

—Atlanta Journal Photo.

This enthusiastic crowd of Tech students and supporters, which met the returning football squad as they pulled into Union Station, held a demonstration for the Jackets which surpassed any similar display of school spirit seen here in a number of years.

## Victorious Jacket Team Given Stirring Reception

By Bill Abbott

Two thousand cheering Tech students met a victorious Jacket squad Saturday night as the team pulled into Union Station after a 30-13 homecoming upset over the highly-touted Tennessee Volunteers in Knoxville. In one of the finest displays of school spirit seen here in many years, the students managed to completely jam the station, forcing special police details to block the ramps leading to the platforms.

### Greeted by Singing

Coach Bobby Dodd and his players were greeted by the "Ramblin' Reck," sung by students waving Confederate flags as the train braked to a stop. Wearing an ear-to-ear grin, Dodd stepped off the train and was met by thunderous cheers. A crowd quickly surrounded him, completely separating the beaming coach from his wife and son, Bobby, Jr. Similar ovations met the players as they left the train—a fitting end to a perfect "Dodd Day" that had started that afternoon in Knoxville.

### Rated as Underdogs

Rated as two-touchdown underdogs, the Jackets completely fooled the dopsters in beating a high-geared Tennessee team. In licking the Vols, Dodd beat his old coach, General Bob Neyland, and spoiled his Alma Mater's homecoming. Dodd was an all-American halfback during his football days at Tennessee.

A motorcade headed by three policemen took the crowd out West Peachtree to the flats. In the parade were several left-over wrecks, remnants of a spoiled Tech homecoming a week ago.

### Started by Students

The demonstration was instigated by group of students, who went through the dormitories enlisting freshmen and anyone else willing to join in the merrymaking. Phone calls were made to determine when and where the players would arrive. The police sent a special detail to control the crowd, a job made easy by the crowd's good humor. The newspapers were consulted and a radio station asked to broadcast plans of the intended rally. The results were more than gratifying to all concerned, Coach Dodd terming it the greatest demonstration he has seen since he came to Tech.

## Ramblers Will Play At Pershing Rifle Ball To Be Held on Friday

The Pershing Rifles will present the Annual Pershing Rifle Ball this Friday night in Crenshaw Field House from eight until twelve. Music for the gala formal will be by the Ramblers, a Tech organization which has attained quite a reputation that is rapidly spreading throughout Atlanta. For those who like the latest jive, the Ramblers are hard to beat; their smooth selections rank high in that field, also.

Tech's chapter of the national military honorary society, Company F of the Fourth Regiment of the Pershing Rifles, is acting as host to the local cadets, midshipmen, and other students. The ball is open to all. Uniform of the day for cadets and midshipmen will be Army, Navy, and Air Force ROTC uniforms. Attire for other students will be tuxedos. Tickets for the formal are \$1.50 and are now on sale at the Information desk in the Administration building, at the Naval Armory, and from any Pershing Rifleman. Tickets will also be on sale at the door.

All men who plan to attend the dance are requested not to purchase corsages for their dates. This will be the first social event of the year sponsored by the Georgia Tech chapter. The president of the group is Cadet Captain Daniel R. Apostolu. Sponsors for the formal will be Miss Ann Griggs, Miss Frances Howerton, and Miss Betty Jo James.

## Airline Agents

Representatives from Delta and Eastern Air Lines, will be at the information desk on Tuesday, November 15, from 10 a. m. to 3 p. m. to make reservations for Thanksgiving holiday travel.

## New Sixty-Four Page Engineer Will Be Available to Students Beginning Tuesday, November 15

### Wider Interest Is Stressed; Future Plans Are Revealed

Dave Crane, editor of the Georgia Tech Engineer, announced that the first issue of the magazine for the fall quarter would appear Tuesday, November 15, and may be picked up at the Information desk in the Administration building by showing student identification cards. In size this issue is equal to the one of last March, which contained sixty-four pages and was the largest Engineer ever put out up to that time.

Its sixty-four pages makes the Engineer the largest technical magazine put out by any college in the United States, and it is hoped that sufficient high quality material can be secured to keep the Engineer at its present size. It has been the endeavor of the editorial staff to make the publication of more general interest to readers than it has been in the past. Crane asserts that henceforth the editorial policy of the magazine will be to have all articles written so that they may be readily understood by those having a general interest in the field of engineering rather than aiming articles at one small segment such as electrical engineers or industrial engineers.

### Outstanding Features

Of particular interest in the forthcoming issue are "Deadlock—Steel's Human Stress," by G. B. Schnabel, C.E. '51; "A Hard Look at Uncle Sam's Budget," by H. H. Griswold, I.E. '51; and "Public Improvements—For Whom?," which forms the center spread. Crane particularly called attention to the latter feature, the center spread. "Implications of this article are that Atlanta's administration has allowed political influences to overwhelm the more wholesome ones of engineering and sociological know-how," he said. The spread depicts various improvements in the city, and indicates the need for many more.

Starting in January the Engineer will come out on a regular monthly schedule, and one half of the staff will work on the current monthly issue while the other half is preparing material for the next, Crane announced. Beginning next year the Engineer will be published eight times a year; one issue is planned for each month of the regular school year with the exception of September. No summer issue is planned.

### More Advertising

To support this new publication schedule, the Business staff is conducting a drive for more advertising, and their drive has met with unqualified success. More advertising, both local and national, has been sold than ever before. A subscription campaign is also being conducted, and five thousand letters have been sent to alumni in an effort to stimulate interest and subscription sales throughout the nation. Thirteen hundred extra copies of the magazine are being sent to alumni, industries, engineers, and research groups.

This year the Engineer is backed by both the largest editorial staff and the largest business staff in its history, but there is still a need for more men in all departments. Since the magazine is to come out monthly starting in January, an expanded staff is necessary to provide adequate

coverage and to assure that the high quality of the Engineer will be maintained in spite of the increase in the number of issues.

Feature articles of over two thousand words will be paid for at a rate of between ten dollars and twelve and a half dollars each. Shorter articles will receive from seven and a half to ten dollars. Three and a half dollars will be paid for shorter features, such as alumni news, campus engineering news briefs, and the center spread. Members of the business staff receive a ten percent commission on all sales, and a bonus is given to members who do the most outstanding job of selling.

The appointment of several new staff officials for the Engineer was approved by the Publications Board (Continued on page 8)

## Blue Print Notice

All organizations are reminded that the deadline for submitting lists of additional members or corrections for the 1950 Blue Print is Wednesday, November 16. No changes can be made after that time. All lists should be addressed to Box K, Organizations Section.

## Tutoring Program Details Disclosed by Tau Beta Pi

Ernest Camp, chairman of the Tau Beta Pi committee studying the use of a student tutoring system, has announced that after much planning a workable scheme for such a service has been developed.

The idea, originally conceived by a Tau Beta Pi member, was tried last year for the first time in the freshman chemistry courses, as it was felt at the time that it would be best to get the program running smoothly on a small scale. The results of the trial program were very successful, and the recommendations made by the committee of last year are expected to be of great benefit in getting the program under way this year. Also, a temporary committee in operation during the summer discussed the plan with the heads of the various departments and made a general exploratory investigation.

The general plan is for Tau Beta Pi to assume responsibility for the general administration, with the honorary and professional organizations in each department sponsoring the tutoring done in subjects directly pertaining to them. Tau Beta Pi, however, will sponsor tutoring done in Mathematics. All heads of departments have been contacted and recommendations requested. These heads will have a chance to approve the tutors selected if they so desire.

Although there are no positive requirements for tutors, Tau Beta Pi

## Tau Beta Pi Votes Ninety Candidates Eligible for Election

By Clyde Brown

The Georgia Tech chapter of Tau Beta Pi, national honorary engineering fraternity, recently voted approximately ninety members of the junior and senior classes eligible for membership in the chapter, it was announced by Ralph Gilmore, corresponding secretary of the group. Senior candidates were voted upon November 1, and juniors at a meeting last Tuesday evening.

Some of the qualifications necessary for consideration of membership in Tau Beta Pi are, according to Gilmore, a pleasing personality, outstanding leadership abilities, a high reputation both on and off the campus, and above all a qualifying scholastic average. The qualifying averages this fall were 2.75 for seniors and 2.91 for juniors.

All the voting on the various candidates was secret, with each member voting according to his own personal estimation of the merits of each man considered, stated Gilmore. Men who were voted eligible for membership will be notified of the fact in the near future. Their acceptance should be made known by November 17. The formal initiation of new members will be held December 6 and will be followed by a banquet.

Gilmore explained that in the past, through permission of the national (Continued on page 8)

## Scabbard and Blade Convention Is Attended by Green, Johnson

By Marshall Graham

The annual convention of the honorary military society of Scabbard and Blade was held in Pittsburgh, Pennsylvania, on November 3 through November 5. Hosts for the affair were the University of Pittsburgh, Duquesne, and Carnegie Tech. Representing Georgia Tech at the convention were Sam Green and Rolston Johnson who flew up to Pittsburgh on Wednesday night.

Convention headquarters were set up in the William Penn Hotel, with the Allegheny Room and Pittsburgher Room devoted to the meetings, social affairs, and lunches. A Military Ball was held Friday night.

There are nearly one hundred chapters, or companies, of the Scab-

bard and Blade in the United States. Almost all of the companies were represented at the convention, there being ninety-four delegates attending the meeting. Presiding was Major Thompson S. Crockett, national executive officer. The activities of the va-

## Dames Club Dance

The Dames Club, composed of the wives of Tech's graduate students, will hold a square dance Saturday evening from 7 until 12, to be held at the Girl Scout Lodge at North Fulton. Dr. Lane Mitchell, of the Ceramics Department, will give the calls. All graduate students and their wives are cordially invited. Each couple is asked to bring a box supper for two.

rious companies were discussed and plans were made to extend the functions of the chapters. Four new companies were voted into the unit.

Scabbard and Blade was founded in 1905 by five men. Membership in the society is not restricted to any particular branch of the service; thus the organization was one of the first proponents of unification of the services. Lieut. Col. Leo M. Cook, the only remaining living founder, was at the convention.

## Student Council Minutes

The meeting was called to order at 6:35 by President Estes Mann. Those absent were Judy Attaway, Dunbar Jewell, and Bill Horsey. The Campus Government and School Spirit Committee reported that plans are being made to inform the Freshmen Student Council Candidates of the work of the council.

George Naleznik reported that the authorization to proceed with work on the Radio Club improvements has been given to Building and Grounds by Dean Emerson.

George Naleznik gave the financial report for the month of October.

The Welfare Committee members reported as follows:

Lamar Jordan read a letter to Mr. Griffin of the Athletic Association, stating that complaints had been received about the uncleanness of the Ladies' Rest Rooms in Grant Field. Action will be taken to remedy this before the next home game.

Bruce Sams read a letter from Dean Emerson explaining the proposed car washing point. Jim Pruitt volunteered to be responsible for unlocking and locking hose box. Details on the car washing point will be published as soon as they are fully worked out.

Bruce Sams reported that Dean Emerson had requested the MacDougal Construction Co., on behalf of the students, to arrange some way for them to cross the highway project at Third Street.

No definite solution has yet been reached in the Burge Apt. parking situation.

Elam Anderson read the minutes of the Publication Board Meeting and explained the important actions taken in detail.

Brian Brown suggested that the Rules Committee investigate the advisability of assigning point loads to publication staff positions.

Ed Gothard reported that 37 petitions have been turned in by Freshmen Class Officers and Student Council Candidates.

Manville Mayfield read a letter written in reply to a request from City College of New York as to the distribution of the Activities Fees. The figures for this year are as follows:

|  |         |
|--|---------|
| Athletic Association                   | \$ 9.00 |
| Gn. Tech Y.M.C.A.                      | 3.00    |
| Post Office Box                        | 1.25    |
| Alumni Association                     | 1.00    |
| Student Lecture and Entertainment      | .75     |
| Technique (Semi-weekly newspaper)      | 1.00    |
| Blue Print (Annual)                    | 4.75    |
| Engineer (Technical Magazine, monthly) | .75     |
| Yellow Jacket (Humor magazine)         | .65     |
| Student Council                        | .35     |

TOTAL, per year \$22.50

Lamar Jordan reported on the Publications' Sinking Fund as follows:

The profit made from all publications is placed in a sinking fund which is to be used to help build a Student Union Building and to meet the losses sometimes sustained by the different publications.

At the present time, the money in the Sinking Fund is being used to meet some of the expenses for the present publications. This is necessary because the school has yet to receive the activity fee from the government for the Winter, Spring, and Summer of '48 and the term of '49.

Dean Pershing said that as soon as the government gets up to date on the activity fees and as soon as the money in the Sinking Fund is needed for the Student Union Building, it will be turned over to ODK for that purpose with the exception of \$500 held in reserve for each publication for fixtures and possible losses.

The fund at the present time has \$13,734.26 in it. Each publication has debited to its account the amount that it has contributed. The accounts for each publication is as follows:

|               |            |
|---------------|------------|
| Blue Print    | \$ 6497.89 |
| Technique     | 2433.69    |
| Yellow Jacket | 1237.68    |
| Engineer      | 3865.00    |
| TOTAL         | 13734.26   |

The motion by Brian Brown that \$8.00 be appropriated to cover the cost of the Presidents Club Banquet for the Council President and three Class Officers was taken from the table and passed.

The motion by Buddy Shields that \$6.50 be appropriated for Junior Class Meeting posters was taken from the table and passed.

Estes Mann reported on the Administrative Council Meeting.

Estes Mann read the Minutes of the Student Executive Committee Meeting.

John Tolan moved that \$50.00 be appropriated to set up an emergency fund to cover the cost of sending flowers to the deceased members of the Student Body. This fund will be disbursed at the discretion of the President of the Student Council. Tabled.

Lamar Jordan announced that Jeff Powell had requested that an A.P.O. representative be placed on the Elections Committee.

Cameron Lacy asked for help in securing a truck in which to take the winning SAE 'Reck to the Alabama game.

The meeting adjourned at 7:40 p.m.

Respectively submitted,  
Bruce Sams, Secretary.

## J. Paul Sheedy\* Switched to Wildroot Cream-Oil Because He Flunked The Finger-Nail Test

FOR A WHILE, Sheedy's life story was a pretty sad tale. People rode him about his wild, unruly hair. And it wasn't until his favorite filly gave him the gait that he decided to do something about it. He trotted down to the corner drug store and bought a bottle of Wildroot Cream-Oil hair tonic. You should see him now! Non-alcoholic Wildroot containing Lanolin keeps his hair neat and well-groomed all day long. No more annoying dryness, no more loose, ugly dandruff.

Take a tip from Sheedy. If your sugar balks when you ask for a date, you need Wildroot Cream-Oil right away. Get it in bottles or tubes at your local drug or toilet goods counter. And ask your barber for professional applications. You'll be a winner every time!

\* of 327 Burroughs Dr., Snyder, N. Y.

Wildroot Company, Inc., Buffalo 11, N. Y.

## Newly Formed FMA Gives Fraternities Co-op Buying

On the first day of this year the newly formed Fraternity Managers Association started operating. This group acts as a clearing house for all orders for food and supplies for those fraternities who desire this service. Under the direction of Carl Maiocco the association has been able to get discounts ranging from ten to fifty per cent on all purchases.

The idea for the F.M.A. was conceived in the minds of a group of fraternity table managers last winter. Carl Maiocco and Bob Gibson, president of the Table Managers Association, visited Ohio State to investigate their cooperative. It was learned that they had been successfully operating the co-op for the past twenty years. The volume at that time was \$500,000 a year, and they estimate their savings to average out at ten per cent after all expenses are paid. Gibson and Maiocco found that the school, merchants and fraternities gave their wholehearted support to the organization.

### Georgia Group Fails

A few other schools have successfully operated co-op buying plans, but many have also gone by the wayside. A good example is the venture at the University of Georgia. An inter-fraternity council on that campus disclosed that the members had been unsuccessful in getting the cooperation of all the fraternities' purchasing agents. Another defect in their plan is the fact that they do not have a central office and manager to coordinate its activities.

After a careful study of three of these and many more college co-ops, the Tech F.M.A. was organized on a basis that used the best features of each plan.

### Frats Must Cooperate

Maiocco has stressed, however, that no matter how good the plan or organization is, it cannot succeed without complete cooperation from the fraternities.

The plan that finally evolved is a very simple one. Fraternities and other recognized campus organizations sign contracts with the F.M.A. to purchase their food and supplies through it for a year. The individual organizations are then allowed to purchase through the thirty-three wholesale outlets that have been established by the F.M.A.

### Surplus Returned

F.M.A. charges three per cent on the net invoice to cover operating expenses which include the operation of its office in front of Crenshaw Field House. At the end of the year the surplus funds are returned to the groups on a basis of total purchases made during the year.

Under this plan the fraternities receive only one bill per month for all the services. The entire order may be called in at one time; this saves each fraternity from having to contact a large number of wholesale houses. Another advantage of the plan is that salesmen call at the F.M.A. instead of wasting the time of the house mothers or table managers.

Wholesalers are also able to cut down greatly on the number of salesmen's calls and pass this saving on to the F.M.A. The wholesalers can also consolidate deliveries and thereby effect a further saving.

Last fall all wholesale grocers and

### Tech-Bama Salute

"TOOLS AND SUPPLIES FOR THE MODEL CRAFTSMAN"

meat packers who had a listing in the phone book were sent a bid request. Quite a few sent in bids which varied a great deal even on standard-brand and quality goods. From the bids that were received thirty-five were contracted.

To date, the F.M.A. has done a creditable volume of business and is gradually increasing each month. In October their volume was approximately \$13,000.

### Variety of Purchases

Of special interest to the student is the fact that he can buy anything from a diamond ring to an auto battery through the F.M.A. Some of the other items that can be purchased at a wholesale rate included television sets, refrigerators, heaters, washers, toasters and many other related appliances.

Carl Maiocco stated that there are of course a few "bugs" in a venture this large and so new, but he is confident that with the whole-hearted cooperation of the student body, the Fraternity Managers Association will be a big success.

## IE 407 Classes Are Given Facilities In A. French Building

In the past, the students taking IE 407, Factory Planning, have been hampered somewhat by poor working conditions in the department. Since the IE School moved into the A. French Building, however, there has been a special room reserved for this course. New tables, large enough for the layout plans, have been installed along with a blue print cabinet and several drafting tables. This new equipment, coupled with better lighting conditions, has greatly improved the standard of work produced. As aids to the student, excellent files have been developed on Manufacturing Machinery and Service Equipment.

Factory Planning is a student work course with guidance from the professor. It concerns the location, design, selection, and layout of factory buildings and equipment. Professor H. L. Boyd, Jr., who supervises the classes, often uses the IE School's up to date visual aid projectors to supplement his lectures.

Factory Planning is mainly for IE seniors, but is not restricted in that sense. Seniors from other departments, on approval of their department, may elect the course. Non-IE students act as technical advisors to the group with which they work.

## IE Professors Attend Annual SAM Meeting

On November 3 the Society for the Advancement of Management held its annual meeting at the Statler Hotel in New York City. Professor Donald B. Wilcox and John M. Arant of the Industrial Engineering School attended from Georgia Tech. Other delegates included 900 leading industrialists and representatives from 18 colleges.

Professor Wilcox is faculty advisor for the Georgia Tech student chapter of S.A.M., and Professor Arant attended in his capacity as president of the Atlanta chapter of the senior society.

### Technical Conferences

The meeting was mainly of a technical nature with conferences on various aspects of management. The highlight was a banquet with ex-President Herbert Hoover and Federal Mediator Cyrus Ching as honor guests. Mr. Hoover and Mr. Ching received awards for their work in the field of management. Mr. Cloud Wampler, president of Carrier Corporation, was the guest speaker at the banquet.

A booth showing the work of the Georgia Tech student group received much favorable comment from the delegates. This display was taken to New York by Professor Wilcox, and consisted of pictures of the student chapter of S.A.M. and personal histories of the seniors in the Industrial Engineering School. These histories were shown to the industrialists in the hope that then seniors would have an easier time in obtaining a job. The Georgia Tech display was one of the best shown according to Professor Wilcox.

## Otto Morris Elected Graduate Club Prexie

At the recent elections of the Graduate Club, Otto Morris was chosen to succeed Robert Borman as president. Borman's resignation was accepted "with regret", and a vote of thanks was passed for his services to the club. Other officers elected were: vice president, John A. Brown, and secretary, Lewis C. Latimer. Ernest Pollitzer continues as treasurer.

On Friday, the members of the club had a rousing square dance after a dinner at the Fort McPherson Officer's Club. Mr. Carl Paul, of the Atlanta Promenade Club officiated, demonstrating various folk dance steps, and called the "hoe down" in the native tongue. A short rest session was required after each square dance and Virginia Reel before normal dancing could be resumed. The faculty members present led the students through their paces. This dinner dance is said to have been one of the most outstanding events organized by the club since its formation.

## School Selects New Site For Memorial to Sideways

By John Bell

The monument to Sideways, who before her death was the Georgia Tech mascot, is to be moved from its present location outside the Post Office to the small island between the Administration building and the Old Shop building.

## Ceramics Club Holds Organizing Meeting To Secure Charter

An organizational meeting of the Georgia Tech Keramos Club was held November 4. At the meeting were elected officers for the year: LeRoy Williams, president; Ed Nance, vice-president; J. D. Walton, secretary; James Breedlove, treasurer.

The purpose of the local group is to prepare a petition to be presented to the national Keramos fraternity for a chapter charter. The club has been approved by the Student Activities Committee, and it is hoped that the Student Council will take similar action soon.

### National President Speaks

The club was fortunate in securing for its first official meeting the National President of Keramos fraternity, Dr. A. I. Andrews, as its guest speaker. Dr. Andrews is the Dean of the School of Ceramic Engineering at the University of Illinois and a past president of the American Ceramic Society. Dr. Andrews gave an outline of the fraternity as a national organization, and stressed its relationship to the school and industry.

### Professional Society

Keramos fraternity is established to provide a professional fraternity open to outstanding students in the schools of Ceramics and Ceramic engineering in the universities and colleges of the United States and Canada. Its principal object is to promote and emphasize scholarship and character in the thoughts of Ceramic students, to stimulate mental achievement, and to promote interest in ceramic art, technology and engineering.

The founding members of the local group are: James Breedlove, Bill Brusse, Dan Gates, Cecil Jones, Don Judd, Dale Lupton, Kent Morris, Ed Nance, Hayne Palmour, Joe Pentecost, James Riley, J. D. Walton, and LeRoy Williams.

This move was made necessary by the planned widening of the sidewalk outside the Post Office. The increase in the width of the sidewalk would have placed the monument on the edge of the walk. It was feared that the stone would become chipped and otherwise damaged if left in its present location. Another factor was the new fire-escape under construction on the side of the A. French building. If it became necessary to lower the escape, Sideways' monument would be in the way.

### Officials Agree

Vice-President Cherry Emerson; Mr. Tom Jenkins, head of Buildings and Grounds; and the Welfare Committee of the Student Council met to decide on a new location for the headstone. The site agreed upon was the small island between the Administration building and the Old Shop building. The flash card bulletin board is presently located on this property. The island is to be cleared and the monument will be placed there in the near future. To protect the stone from damage, an enclosure will be erected. This will consist of four white iron posts with a guard chain.

School officials want to stress that Sideways' monument is not being moved to accommodate the school but to protect the monument.

## Chem Club to Hold Smoker Monday Night

The Georgia Tech Chemistry Club invites all freshman and sophomore students who are interested in chemistry or chemical engineering as a career to be the guests of the Chemistry Club at a smoker to be held Monday, Nov. 14, at 7:30 p. m., in Room 255, Chemistry Annex. All members of the school of Chemistry and Chemical Engineering are urged to attend.

The Chemistry Club is an honorary organization composed of juniors, seniors, and graduate students who meet certain scholastic requirements, in the fields of chemistry and chemical engineering, and interested faculty members.

## SPONTANEOUS COMBUSTION

... produced the most well-deserved show of school spirit ever.

It was a great demonstration—the foremost exemplification of school spirit we have seen in our days at Tech. We are speaking of course of the some two thousand Tech students, dates, and wives who were on hand at Union Station Saturday night to greet the victorious Yellow Jackets after their slaughter of Coach Bob Neyland's Tennessee Volunteers.

The thing we liked particularly about the action was that it was totally spontaneous, completely voluntary. There was no one standing over the students with whip in hand to force them to go down to meet the conquerors at 11:15 at night. Credit for the idea cannot be claimed by any one student or any single organization. It was simply a matter of spontaneous combustion. When the Jackets had completed their stomping of the Volunteers, a number of students conceived the idea of gathering a crowd to greet the giant-killers. Somebody called the various fraternities and passed the word to them. Somebody else called Dean George C. Griffin to find out what time the train was due, and he in turn contacted the police for the necessary police escort for the parade.

While this was going on, another student called radio station WCON and had the announcer broadcast the intentions of the students in an effort to get a larger crowd. One fraternity sent its members through the dormitories to let the students there know about the plans. Somebody contacted the Atlanta Journal and the Atlanta Constitution and the metropolitan dailies had reporters and photographers on hand.

About eleven o'clock Union Station was bulging with students, dates, and wives, all feeling in the highest of spirits. The turnout has been estimated at an excess of two thousand, all singing, cheering, yelling, and slapping backs until the whole station veritably reverberated with the celebrating.

About ten minutes before time for the train to arrive, the escalator doors were unlocked and the multitude poured downstairs. Police officers were on hand to see that most of the celebrators confined their activities to the platform but a few of the hardier souls who had a little more spirit than the rest managed to crawl atop closeby locomotives in order to lead the multitude in cheers and school songs. Confederate flags were in evidence throughout the crowd.

As the train roared in at the tremendous speed of about three miles an hour to prevent any accidents, the throng impetuously burst into "Ramblin' Reck." The team's cars were in the rear but before Coach Bobby Dodd could get his feet on the ground several of the students had him hoisted on their shoulders, a broad smile beaming across his face from ear to ear. The crowd, shouting words of praise, obligingly made way for the Coach of the Week as he was carried to the escalator. Members of the team were greeted with handshakes, loud cheering, and hearty back slappings.

Three motorcycle policemen led the parade down Forsyth Street to Marietta Street to Five Points to Peachtree Street to North Avenue to the Varsity. In the parade were the cars of all the students who had participated in the greeting, with a great many freshmen running alongside, cheering, singing, and yelling. A couple of the fraternities even had their wrecks in the parade. Two police cars brought up the rear as traffic was stopped to allow unimpeded progress.

The whole idea was fine, was carried out well, and was certainly richly deserved by a fighting Tech team that just doesn't know when it is supposed to lose games. So congratulations to a great bunch of football players and to an incomparable student body that really knows how to back its team wholeheartedly.

—DWU.

## AN AUBURN ELECTION

... brings to light a great multitude of balloting irregularities.

Although the interest and enthusiasm in last week's Miss Homecoming election was very encouraging as a sign of increasing interest in student elections, we were very disappointed with some of the methods by which the election was conducted. Recurrence of some of the irregularities seen in the election last week may tend to decrease interest in future student elections. We sincerely feel that the Political Activities Committee must revise the policy used in the Miss Homecoming election if they are to maintain full discipline over all matters pertaining to student elections. The method used in devising a voting list, insufficient instructions to members on the ballot boxes, and the disregard for the 50 feet rule were weaknesses easily noted in the election last week.

First of all, the voting lists used in the election were not sufficient for the conduction of a student election. The only list of students which the PAC used was the old poll list used in the spring quarter elections. If the student's name did not appear on the spring quarter list he was permitted to vote by merely signing his name to a list provided for those whose names

were not included on the old voting list. If the student had changed schools since the spring quarter, he merely had to sign his name to the new list and he was permitted to vote in his new school. By this method there was nothing to keep a student from voting at least twice. Moreover, the PAC provided no method to prevent a student from voting for another student.

We also noticed and heard a great deal of complaint in regard to disregard for the "50-feet from the polls" rule. We saw several candidates and their supporters standing as near as 20 feet of the voting booths and soliciting votes. There is no excuse for this laxness on the part of the PAC. Steps should be taken to provide more people on the voting booths if necessary to curb this irregularity.

We do not intend to underestimate the work of the PAC, yet we can see no reason for the occurrence of such mistakes. In order to maintain student interest in elections and to keep these elections on a high level, the PAC must take all necessary steps to see that these irregularities do not occur again.

—The Auburn Plainsman.

### TECHNIQUE PLATFORM:

1. Student voice in matters of student interest.
2. Encouragement of school spirit.
3. Better orientation and vocational guidance.
4. More participation in the intramural sports program.

5. Promotion of active campus organizations.
6. Erection of an adequate library.
7. Erection of a Student Union Building.

The Technique will at all times attempt to represent the best interest of the students in current discussions and controversies.

Editor ..... Don Usher  
Business Manager ..... Dick Fox  
Managing Editor ..... Mack Gregorio

## Don't Be Left Behind

Freshmen are urged to become a part of their campus life.

Many of the students of the freshman class have already, during their short stay at Tech, become members of the various clubs and organizations on the campus. To these men, we offer a commendation and best wishes for success in these endeavors. A large majority of the freshman class, however, has abstained from joining any group or activity. There are perhaps many of this latter group who will present a galaxy of reasons and excuses why they haven't offered to participate in the campus activities of their school. Whatever the reasons may be, we cannot force ourselves to accept them. College life is a period of training before assuming the duties of a community citizen. Every man wants to feel he is an integral part of his community life. Why then shouldn't every freshman wish to become a part of his campus life?

In just a few brief years, most of the freshmen will be preparing to graduate. They will be filling out the same forms, attending the same interviews, and preparing to take the same step out into the world that the present day seniors are taking. When they prepare their job qualification records, how many will want a big blank spot in that space reserved for college activities? Although a senior might say that he made his straight A average by studying continuously and never devoting time or effort to campus activities, he will have something else to say when he finds himself left out of those lucrative and ideal jobs. In the final reckoning, those company officials will be much more interested in honors won and positions held than they will in that 4.8 average. Industry realizes that the bookworm will not make an ideal executive or engineer. Every effort should be made now by every freshman to join one

or more of the many campus organizations. There's an activity open for every student, regardless of his individual likes and dislikes.

For the writers, there are the five publications which offer opportunities for every phase of writing ability. Most of these publications are staffed by juniors and seniors who are soon to graduate, and the men who join now will be the leaders a few years hence. For those interested in advertising and business work, the business staffs of these newspapers and magazines offer many opportunities, both for earnings and experience. There's room too for the artists and photographers as every publication needs both cartoons and pictures as well.

The field is by no means limited to publications work. Those students gifted with musical and vocal talent may join the band or glee club. The debating society is eager to receive new members and DramaTech offers untold dramatic possibilities. For the sports minded, there is always an open place on the varsity squads for qualified men, and if students are not of varsity caliber, there's a chance for everyone through the vast intramural program. Still another top-notch activity is Alpha Phi Omega, the campus service fraternity. Help make the campus a better campus by becoming a member of this group. These are but a few of the many opportunities available to students who just enter school. They pave the way for a distinguished list of achievements by diligent students who do not mind burning a little midnight oil for their school as well as for themselves. Don't be left behind, you freshmen. Join at least one of the many activities available and become a part of YOUR campus life.

—LSF.

## Here's A Big Salute

... to a military college which won't compromise its morals.

Movements to bridle American education have broken out like a rash over the entire country since the beginning of the present school year.

First came the matter of loyalty oaths, intended to ferret out Communists in faculties, which was in itself a rather dubious purpose. The pressure of public opinion was such, however, that in at least one large school the loyalty oath was somewhat modified.

Then last week one Mr. George W. Armstrong, a Texas oil man, came into the news. Mr. Armstrong's ideas about education are as preposterous as the tall tales some of his fellow Texans spin.

Mr. Armstrong is a very generous man. He offered a struggling little military college in Mississippi \$50,000,000 worth of mineral rights and property. The trustees of the college eagerly accepted the offer, perhaps before they realized the ramifications of their act.

But Mr. Armstrong's generosity was somewhat tempered and indeed, outweighed, by the demands which accompanied his endowment. The enrollment of the school was not to include African, Asiatics or

Jews; it would teach the superiority of Anglo-Saxon races and the faculty, too, would be restricted.

It was easy at first to see that the donor may merely have been taking advantage of a small school which would accept almost any conditions in order to push itself out of its financial doldrums. But, then, Southern Methodist University in Dallas revealed that the same man last year offered it \$5,000,000 under the same stipulations.

Then, over the week-end and doubtless again as a result of the pressure of public opinion, little Jefferson Military College abruptly announced it was withdrawing from the agreement with Mr. Armstrong, whereupon the Texan countered with the announcement that that was all right, by George, he'd just establish his own college and make his own entrance requirements.

His methods of control sound suspiciously like those employed by another but, we hope, more successful person, Adolph Hitler.

His stipulations would not only promote religious and racial hatred, but would be the first step in undermining democratic ideals. It is necessary to say here that the fact is not to be ignored that prejudicial schools already exist; in the South this is particularly evident. But the trend should be toward diminishing the number of such schools, and spread them, as Mr. Armstrong intends.

Another effect of Mr. Armstrong's methods would be to defeat the rehabilitation of education in occupied countries. Reports from Germany last week indicated that a more liberal concept is being identified with education there. Admissions, formerly based exclusively on such superficialities as wealth or social position, are now looking more and more toward scholarship and maturity as bases. Imagine the effect there of news that from now on, American schools won't admit Africans, Jews or Asiatics, regardless of their intellect, talent or potentialities.

Jefferson Military College deserves a salute for reconsidering and rejecting Mr. Armstrong's endowment. SMU, though, should get an even heartier "bravo" for refusing even to consider it.

The case of Mr. Armstrong is a frightening one. But money, thank goodness, can't buy everything.

—The Daily Reveille.

## It's About Time

... says one of the G. I. wives.

Editor, The Technique

Dear Sir:

I read an article in The Technique last Friday afternoon; the title was "Those Wonderful Women." Well I think it's about times someone gave us, the G. I. Wives, a little credit for what we have done.

My husband is an ex G.I. in the freshman class at Tech. And no kidding I know his German almost as well as he since I help him so much with it. When he makes a D or F I suffer more than he does. Worrying, why I almost knock myself out trying to make him study besides doing my household duties and taking care of our year old son. Believe it or not, we wives have a problem.

Thanks for remembering us in your article. I too think we should get the P.H.T. Degree.

Sincerely,  
Mrs. Alice C. Sparks  
429 Peeples St., S.W.

# Freshman Candidates Give Platforms

## Class Officer Candidates

Orville Bevel

I am running for a Freshman class officer with the idea that I want to represent the class feeling in all of our activities. If you give me the honor of being one of your officers, please believe that I will be always willing and ready to receive any of your ideas and constructive criticisms that will benefit our class in any way.

We've been here at Tech for a relatively short time; and, for that reason, I honestly don't believe that it would serve any purpose to make promises concerning school policy, student-faculty relations, and other things about which we have so much to learn. Therefore, I only promise that I will do what we think is best for us and that I will represent our majority opinion whenever and wherever it is possible.

Ben Bishop

If elected president of the Freshman class, I will do the following things to the best of my ability.

1. I will preside over all class meetings.

2. I will plan, organize, and conduct all class functions such as dances, parties, etc.

3. I will attend all meetings of the Student Council, and I will represent the Freshman class in all issues concerning it.

4. I will serve on the various committees of the Council, such as the committee on Campus Government and School Spirit, and the Student Executive Committee.

5. I will support any resolution that will help in bringing the Student Union Building closer to reality.

6. I shall have plenty of time to give to any student, who wishes to suggest any plan or scheme pertaining to the betterment of Georgia Tech.

W. S. Burt, Jr.

In this modern day and age our theory of construction is changing from one of nails and wood, to one which consists of tenacious moulded units. In keeping with the times, I have chosen to use the latter method in the construction of my campaign platform.

It is not my intention to make rash statements. I make one promise: to represent the Freshman Class to best of my ability.

This is the first Freshman class in three or four years which has not been composed predominantly of veterans. This is also the smallest entering class at Tech in several years. Due to this return to normalcy it should be easier for us, as a class, to achieve a great deal. In 1953 why not have a list of really important distinctions? A means toward attaining this end is to act now; elect the fellows who will represent the class honestly and diligently.

James Fiveash

My platform for the candidacy for President of the Freshman Class is one of willingness to learn, service, and representation.

Although I have had some experience in Student Government, the Georgia Tech Student Government is just as new to me as to you. I will, however, be willing to learn what a good class officer should know. Student government is a representation of students. If elected I will not try to change the whole school, but I will bring up anything of freshman

interest if approached by any of you on the subject.

In considering where to place your vote remember that I will do my best to make a good officer.

Ray Gould

As a member of the Freshman class and one who is in the same position that you who are voters are. My greatest promise to you is a loyal representation and my sincerest effort in every way possible. As far as making promises, it is my belief that as a freshman, I am not qualified to make any campaign promises whatsoever. By this I mean that I cannot promise any of you more privileges, less hours, an increase in pay, and the usual promises. One thing that I do promise is myself, my time, and my unfailing effort for each and every one of you. With this in mind I ask you to go and vote in the election. Vote for the man you want. Most of all go and vote.

Stanley P. Lathrop

I believe that the primary job of the president of a class is to take action upon the requests and desires of the class.

I will, if I am elected, do my best to work in full cooperation with the Student Council to fulfill these requests and desires.

Fostering school spirit and organizing social functions are part of the job of class officers. I believe social activities are necessary for good school spirit. Therefore, I intend to promote more and better social functions for Freshmen.

Perhaps the worthiest student project on the campus at the present time is raising funds for the Student Activities Building.

Since the need for such a building here at Tech is so important I will serve in any way possible to help make this building a reality for the students of this college.

Curtis Pittman

I, Curtis Pittman, respectfully submit my platform as a candidate for President of the Freshman Class.

There is only one promise that I

believe I am in a position to make and that is, if elected; I will, to the best of my ability, work diligently and consistently, cooperating with the class, Student Council, and faculty at all times in order to accomplish anything that will contribute to the betterment of the Freshman Class.

Bob Snelling

My platform for Freshman Class president consists of the following:

1. Encouragement of Student activities and the furtherance of school spirit through these.

2. To take an active part in the Student Council and Student Executive Committee meetings. To support and work further, on the proposal for the student executive committee to sponsor a program of orientation relative to the department of their choice.

Mert Wolenburgh

I am pleased to have this opportunity to present my platform to the class of '53. In running for this office I fully realize the responsibility which being President of the Freshman Class entails.

The following list is a condensed outline of my platform of what I would like to help this freshman class achieve:

1. The pushing of the construction of a Student Union Building.

2. A better all year around school spirit.

3. Active support of plans for an improved system of registration and payments of fees which would eliminate long lines.

Fight for a reduction of prices in school business.

Even if not for me, I hope you will vote on election day. Let's make the Class of '53 the best ever at Tech.

## Student Council Candidates

Dan Blitch

If elected, I will:

1. Represent the interests of the Freshmen class at all times.

2. Secure the opinions of my classmates before voting on any issue con-

cerning them.

3. Remain in the Student Council office at least two scheduled hours each week to discuss problems which any individual would like brought up before the council.

Bill Burkhardt

I do not believe that I or any other freshman on the campus could possibly make a platform with a great deal of promises and be able to keep them all. So instead, I only want to say that I will do my utmost to find out what the freshman class wants as a whole and back it with my effort.

Jack Carpenter

If elected as your representative to the Student Council, I will support any measures which I honestly feel are for the best interests of the Freshman Class and the student body as a whole.

Some of the specific items which I will work for are:

1. The publication, prior to registration, of the names of the professors who will teach the freshman courses, and the hours they will teach.

2. More information during the freshman orientation about the various campus organizations open to Freshmen.

3. The placing of wastebaskets, pencil sharpeners, and coats in each classroom.

I promise to bring all Freshman grievances before the Student Council for prompt action.

Johnny Hicks

As a Freshman at Georgia Tech,

I would like to submit my platform as a candidate for Student Council.

I do not intend to make in my campaign any superior qualities I possess or that my opponents lack for the position of Freshman Student Council.

Nor do I base my platform on high sounding promises that do not have much meaning. I have as my platform service and cooperation. For both service and cooperation is what you want from a Council Representative.

I realize the many responsibilities of holding this office and I am prepared to meet these responsibilities with hard work. I would appreciate your consideration.

Ed Ifft

The basis of my platform is faithful representation of the Freshman Class in the Student Council. I do not intend to offer any promises for revolutionary changes on the Tech campus, which I could not hope to carry out. I do promise, however, to

## Crimson Tide Plays Host To Inspired Tech Eleven

**'Bama Team in Top Form for Fray;**  
**Southard May See Limited Action**

By Fred Tallant

After breaking into the winning column again last week with a stunning 30-13 triumph over a favored Tennessee Volunteer eleven, the White and Gold gridders of "Coach of the Week" Bobby Dodd are primed for this Saturday's clash with the Crimson Tide of Alabama. The Jackets will be at near top physical condition with only Jimmy Southard out.

Again in the number one quarter-back slot this week will be Sophomore Darrell Crawford, who turned in an excellent performance last week as he led the Engineers to their fifth victory in seven starts. Southard may be used this week for specific pass patterns, but the burden of directing Tech's T-machine against 'Bama will again rest on the capable ability of Crawford.

### Tide Uses Split-T

Coach Red Drew's Alabama powerhouse is set for the coming contest with the Yellow Jackets after an open date last week which enabled the Crimson Tide to insert some special twists just for Tech in their version of the split-T. So far this season the Alabama eleven has racked up wins over Georgia, Mississippi State and Duquesne while losing to Tulane and Vandy and tying Tennessee.

### Salem Shines

The Tide's candidate for All-SEC honors, Ed (Suitcase) Salem, is the ace performer in backfield which is pointing for Tech. Salem, a 187-pound triple threat man, has already established himself as one of the most versatile backs in this part of the country. He had a field day against Georgia this season, almost single-handedly handing the Bulldogs their fourth loss. Last year Salem was the brightest star in Drew's backfield array. He threw 51 strikes out of 110 heaves for 597 yards and six touchdowns. In addition, Suitcase netted 28 yards rushing, kicked 27 of 33 conversions and booted a game-win-

ning field goal.

On Friday night, December 2, the AICHE Society will hold an initiation banquet at the Camellia Gardens. All members who wish to attend this affair please contact Cole Meredith.

## Tech Harriers Vanquish Vols At Tennessee

Georgia Tech's Harriers continued in its undefeated way last Monday at Knoxville by edging the cross country Volunteers 31-28.

Tennessee's Harris won first place with a time of 20:31 for the four mile course. Tech's Red Smith was second despite his best time of the year, 21:38.

Tennessee captured first, third, and fourth places while Tech captured second, fifth, sixth, seventh, and eighth.

### Renshaw Runs Fine

Roy Cooper of Tech was fifth and Bob Renshaw, running his best race of the year, was a strong sixth. Glover, Harris, and Kenyon followed the leaders in for Tech.

Tech moves on to Auburn, Alabama on Monday the fourteenth at 3:00 P. M., where they will meet the Auburn runners. Auburn was defeated by Florida this year and Tech downed Florida by a count of 35-33. Auburn is strongly led by Whitey Overton, 1948 American Olympic Team member.

## SPORTS CHATTER

By Bert Edleson  
Assistant Sports Editor

### SEC Features Full Schedule

If you're looking for some exciting football thrillers this Saturday, you won't have to go out of the Southeastern Conference for your material. This weekend finds all twelve conference teams battling it out with a rival conference outfit. The outstanding game of the week, especially as far as we are concerned, is the meeting in Birmingham between our gallant swarm of Yellow Jackets and the Crimson Tide of Alabama. The past two years have seen an underdog 'Bama eleven nip our Jackets, 14-7 in '47 and 14-12 last year. This year the outcome will be different, we hope. This will mark the thirty-first meeting of the two squads, the first game having been played in 1902. To date the men from Tuscaloosa have won 15, Tech has won 12, and three ended in ties. This is lucky 13!!!

A rivalry more ancient than the Tech-'Bama meeting, is the contest between Georgia and Auburn. This game is a yearly feature that is played in Columbus, Georgia. The feud between the Bulldogs and the Tigers dates back to 1892 when the Alabama Polytechnic Institute downed the Bulldogs 10-0. Another ancient rivalry which will be renewed this Saturday in Memphis is Tennessee-Ole Miss. The Rebels and the Volunteers have been going at it as long as Tech and Alabama have, beginning back in 1902.

### Green Wave Meets Vandy

The remainder of the conference schedule finds the S.E.C.'s number one contingent, Tulane, travelling up to Nashville to meet the Commodores of Vanderbilt, while number two team, Kentucky, journeys south to tangle with Florida's Chuck Hunsinger et al down in Tampa. The remaining game pits the improving Bayou Tigers of L.S.U. against the cellar-dwelling Mississippi State Maroon's down in Baton Rouge Saturday night. So as a result of this week's busy conference schedule, the present standings will probably change considerably. To date Tulane stands on top with Kentucky a close second and our Jackets in the third spot. Vandy, L.S.U., Alabama, Tennessee, Mississippi, Florida, Georgia, Auburn, and Mississippi State follow in that order.

We'll start our predictions this week by attempting to choose the victors in the above intra conference struggles. Of course we'll begin by counting on our Yellow Jackets to make a repeat performance and take the Crimson Tide for a ride. We'll also stick with the Auburn Tigers on their victory road while "poor Wally" continues to wail. The Wildcats of Kentucky will have plenty of trouble with one Mr. Chuck Hunsinger, but soph star Vito Parilli should prove to be the difference in Kentucky's favor. Tennessee should bounce back from last week's pasting and top the Ole Miss Rebels while Mississippi State is bowing to L.S.U. The final contest finds Tulane and Vandy meeting head-on in Nashville. Anything may happen here, but we'll ride with the Wave.

### Justice Runs Into The Irish

The outstanding game of the day finds Charlie Justice and his Tar Heels watching the "Goliath of the Gridiron," Notre Dame, storm up and down the yard markers in New York, to remain in undisputed possession of the mythical crown of the gridiron. Army's steamroller will find its first stiff competition in Pennsylvania, but should manage to come out on top. The remaining all victorious squads of California, Oklahoma, and Cornell should continue on while undefeated Virginia is resting up for its game with Tulane next week. California plays Oregon, Oklahoma meets Missouri, and Cornell takes on Dartmouth in what should be a thriller.

In the East it's Fordham over Boston College, Brown over Harvard, Navy over Columbia, Holy Cross over Syracuse, Penn State over Temple, and Princeton over Yale. In the Midwest it's Northwestern over Colgate, Ohio State over Illinois in a thriller, Michigan over Indiana, Wisconsin over Iowa, Iowa State over Nebraska, Purdue over Marquette, Michigan State over Oregon State, and Minnesota over Pittsburgh. In the South and Southwest we pick S.M.U. over Arkansas, Baylor over Wyoming, Rice over Texas A&M, Texas over T.C.U., and Wake Forest over N. C. State. Out west finds Santa Clara over St. Marys, Stanford over Idaho, and U.C.L.A. over Washington.

Recent Southeastern Conference statistics released by Chick Hosch, Secretary of the S.E.C. Publicity Directors Association, reveal that our fighting band of Yellow Jackets are steadily on the incline. This week the chargers of Coach Bobby Dodd ride in fourth place in total offense and fifth in Pass offense and rushing. Bobby North has moved up one notch in the individual rushing column, taking over fourth place from Vandy's Herb Rich. Jimmy Southard, although out of last week's contest, remains in the number four spot for forward passing.

In the individual statistics for the Tech squad, Bobby North has increased his lead in total points by virtue of his two touchdowns, one field goal, and one extra point against Tennessee last week. North now has a total of 47 points in the seven games to date.

## Intramural V'ball Tiffs Highlighted by Fine Play

By Frank Pollio

The second week of intramural volleyball play has arrived and cool, crisp air has greeted the contestants as they vie for victory on the asphalt courts. There have been many close matches and some that have not been too close, but the games have been enjoyed by all participating.

The Sigma Chi's started the ball rolling Thursday, November 3, when they beat the Beta Theta Pi's in two close scrapes. The scores were 15-12 for the first game and 15-10 for the final match. Both games were hotly contested and it took the utmost on the part of the winners to emerge victorious.

On that same day, two more close frays featured the Sigma Nu's and the Kappa Sig's. The latter won the first match and seemed well on the way for a victory when the Sigma Nu's rallied and managed to win the next two events.

#### Phi Sig's Win

The Phi Sigma Kappa's had an easy time as they rolled over the TKE's in two straight games last Friday. The scores were 21-15, and 21-7.

AE Pi gained a game in the win column as their games were won via forfeit on the part of the Pi Kappa Phi's.

The beginning of this week had the SAE's handily defeating the ATO's 21-18 and 21-19. The victors also took the consolation game when they amassed 21 points to the opposition 12.

Tuesday's cast also had the KA's

matched against the Pi KA's. The KA's humbled the latter by two fairly large margins, the scores being 15-10, and 15-7. The winners outplayed the vanquished most of the way in the play of these two games. This past Wednesday had the

Theta Chi's handily rolling over the Phi Kappa Tau's in the first two games of the three game set. The totals at the finale were 21-15, and 21-7.

#### Game Cut Short

Sharing the spotlight on that same day was the SPE's who were victorious in two contests that were cut short when the Theta Xi's were late for play. The Theta Xi's were vanquished by 11-5 and 11-7 scores.

There seems to have been a discrepancy concerning the winning score. The first team to reach fifteen points is the winner of the game, and the initial team that gains two games of a three game set are the victors of the match.

—Photo by Cooper and Clear.

## Potent Featherweight Line A Tribute to Ray Graves

Coach Ray Graves came to Tech in 1946 to take over the job of line coach for the Yellow Jackets. Since he has been here at Tech he has not only fulfilled his job but has gained the respect of every student and player that has been associated with him.

Coach Graves is a graduate of the University of Tennessee. While he was at Tennessee Coach Graves lettered in both basketball and football. In his senior year he was Captain of the football team at that school.

Coach Graves hails from Knoxville, Tennessee, and attended Knoxville Central High School in that city. While he was in high school Mr. Graves lettered in both basketball and football, and as in college he was elected captain of the football squad his senior year.

After graduating from the University of Tennessee, Coach Graves played pro football with the Philadelphia Eagles. In 1944 he was called to Tennessee to take over the position of line coach. 1945 saw Coach Graves re-

called by the Eagles to take the position of line coach and scout for that team. It can well be seen that Mr. Graves has had quite an extensive (Continued on page 8)

## More Freshman Platforms—

(Continued from Page 5)

do everything in my power to accomplish these things which will be beneficial to Georgia Tech and particularly the Class of '53. Your vote and support will be sincerely appreciated.

Bill Jones

In lieu of a platform, I make the following statements:

I am not going to list as a platform a string of wild promises which are only dreamed up for the purpose of soliciting your vote. I am not running for this office in order to deceive you, but rather to serve you in a way which will better help our class and Georgia Tech as a whole. Give me your confidence and vote in the coming election and with your cooperation and suggestions I am sure we can get the ball rolling for a better Freshman class.

Johnny Jones

I do not hold with the "T" hair-cutting system of punishment. I in-

tend to do all that I can to have the situation altered. I do think, however, that this is a good method of obtaining discipline, but I am afraid it will give too many freshmen severe colds. I also feel that the Freshmen should be better represented in the student council and I plan to have this quota of three raised if it is at all possible. Last but not least I am going to recommend that all Freshmen who are not used to walking be given a horse to ride from one class to another. Hitching poles also need to be erected.

J. G. King

My platform is as follows.

1. If elected I will endeavor to fulfill all of the duties of my office in such a manner so that this freshman class will be a model for those who follow.

2. If elected I will cooperate with the Student Council and all other campus organizations in all business which concerns the Freshman class.

If elected I will secure some means of informing all freshmen of the business and activities of his administration.

Jim Mauldin

I, Jim Mauldin, stand upon a platform of fairness and service. I will guarantee adequate representation of the Freshman class. I will promote the interest of the Freshmen in all matters before the council. I will comply to the best of my ability with all the complaints and requests of the majority of the Freshman class. I will maintain an adequate contact with my fellow classmates, so I will be fully acquainted with their complaints and desires. I will attempt to promote better good will and more school spirit among the students. I will try to promote better relationship between the student body and the faculty. I will serve the Freshman class in the best and most honest way possible.

William F. Parsons

My platform is service. By this I mean that if I am elected I will always be available for any task I am called on to perform.

We are all new here and therefore I cannot make any statements or promises of any reforms that I can make as of yet. However, one thing I will advocate and work for is fairness in all respects to all people.

To put it simply, if I am elected, a note in my box (3412) of any complaint or of any work to be done will command my immediate attention and fullest effort.

Let's all vote anyway!

Conoly Phillips

Being a freshman, I am not familiar with the policies that will be before the council. However, any action beneficial to freshmen will get my wholehearted support.

Fred (Red) Reeves

1. I promise to serve the Freshman class and Ga. Tech to the utmost of my ability.

2. I pledge my co-operation to the Student Council and to the entire administration staff of Tech.

I promise that if I am elected, I will work with the zeal of an untiring Yellow Jacket to make all Freshman social events successful.

Bill Strange

Strange one, better known as Bill Strange to his friends, is a firm believer in true representation of the facts. His name, however, has no influence on his policies.

Quoting from Big Bill himself: "Why be one of the crowd—be different—vote the Strange way."

David Thackston

I have attended a council meeting here at Tech and have an idea of how it operates and performs. If elected, I would like to work on the student welfare committee, which handles all student complaints.

Since, if elected, I will have only one vote on the council, I can promise but one thing; that my vote will be cast with the welfare of the student body in mind.

Bill Tippetts

The job of the student council representative is to stand by the people who elect him. This is what I am going to do. My work, if elected, will be to help my supporters in every possible way. I've had several years experience in school governments, I feel that I can handle the job. Remember—no matter whom you vote for, vote wisely.

Clarence Wall

I have summarized my platform by saying that when elected to the Student Council I will do my best to represent each and every freshman equally, fairly and fully. I will always strive for better student-faculty relations, and more and better school spirit.

The above named points will be my primary objectives if I am elected to the Student Council. Be sure to use your privilege and vote.

## Tau Beta Pi—

(Continued from Page 1)

headquarters of the fraternity, a number of third quarter seniors were accepted for membership. This year no such permission was granted, and consequently third quarter seniors were ineligible for election.

It has before been the custom of Tau Beta Pi to hold its election of new members twice a year—during the fall and spring quarters. Beginning this year, however, the second election will be held during the winter quarters, stated Gilmore.

Tau Beta Pi was founded in 1885, at Lehigh University, its purpose being to fulfill a need for an engineering counterpart of Phi Beta Kappa; accordingly, membership in Tau Beta Pi is open only to those men majoring in an engineering field. The only students at Tech who are ineligible for membership are those in the Industrial Management school.

The Tau Beta Pi chapter at Tech is very active in the sponsoring of worthy campus activities. Its most outstanding activity at present is the presentation of Engineer's Day each spring.

## Coach Graves—

(Continued from Page 7)

experience in both college and pro ball as a coach.

When asked in his opinion which line was the toughest he believed that Tech has played against, Coach Graves picked the Navy line of 1947 as his choice. He also said that the Yellow Jacket line of '48 was the strongest that he has coached here at Tech. Not only did that line lead the country in rushing but also rated first in defense. Coach Graves also remarked that this years line was light but showed more fight and determination than any group of boys he has worked with.

In summing up his remarks he said that since he has been at Tech he has worked with the finest bunch of boys any coach could hope to be associated with.

## Engineer—

(Continued from Page 1)

at its meeting of October 31. These men were selected because of the outstanding ability they have displayed on the Engineer and other campus publications, according to editor Dave Crane. These appointments are as follows: Frank Martin, associate editor; Mack Gregorie, feature editor; James Byrd, advertising manager; Don Hartman, circulation manager; and Earl Jackson, circulation manager.

All seniors who desire to make changes in their activity forms must do so by Friday, November 18. They may notify the Blue Print by a note to the Class Section, Box K, or make the corrections in the Blue Print room in the YMCA basement.
