## Tech Hosts Trials for '96 Paralympics

Over 150 athletes from 19 countries competed in the International Paralympic Swim Trials (IPST), held August 17-20 at the Georgia Tech Aquatic Center. The event was part of the one-year out Paralympic Countdown Celebration, hosted by the Atlanta Paralympic Organizing Committee (APOC) and the Shepherd Center of Atlanta.

In all, there were 154 medal events, designed to provide an opportunity for athletes to obtain international classification and a chance to establish a qualification time for the 1996 Atlanta Paralympic Games, scheduled for August 16-25, 1996.

The U.S. had the largest showing with over 90 swimmers competing. Australia had the next largest contingency with a total of 25 athletes. China and Japan each sent 20 swimmers. Other countries represented include Argentina, Canada, Cuba, Guinea, Iraq, Korea, Kuwait, Malaysia, Nepal, New Zealand, Nigeria, Peru, Swycheles and Thailand, according to APOC officials.

Paralympic events range from wheelchair basketball to swimming and tennis. Participants are comprised of amputees, quadriplegics, paraplegics, visually impaired, dwarfs, cerebral palsy, and les autres (those with disabilities difficult to categorize). Each competitor must be selected by his or her national team before gaining eligibility for the international event.

The first Paralympic Games were held in Rome in 1960 and have been held every Olympic year since, usually in the city or country hosting the Olympic Games. The Paralympics and the Olympics share most of the same venue and many of the same sporting competitions.

## Police Handle Package with Special Care

The Georgia Tech Post Office experienced a false alarm Saturday, August 12, upon receipt of a suspicious package with no return address. The package, addressed to the School of Earth and Atmospheric Sciences, was wrapped in tape, with wires protruding through the wrapping.

It was essentially two packages taped together, with a metal ring sticking out, said Jack Vickery, Georgia Tech police chief. "We notified city officials just to be safe," he said.

The package met the city's profile for "suspicious packages" and was opened remotely. At this point, it was determined the suspicious parcel was a weather balloon package produced by the College of Earth and Atmospheric Sciences.

School officials identified the contents as an ozone sunde, a device used to measure ozone in the stratosphere.

The device is one cubic foot, styrofoam object with an antenna that attaches to a balloon. Researchers attached the device to a balloon and sent it up about 125,000 feet, according to Michael Rodgers, associate

## Teachers Integrate Problem Solving Techniques

A recent School of Electrical and Computer Engineering (ECE) workshop reminded high school teachers "people are the real problem solvers, not machines."

The "Integrated Problem Solving Workshop" emphasized the blending of science and mathematics courses, and encouraged the use of integrated calculation methods.

"We think it is important for educators to take an integrated approach to problem solving by combining the use of pencil and paper, modern calculators, and computers," said Thomas Gaylord, Regents' Professor, School of Electrical and Computer Engineering. "The strengths and weaknesses of each, and how they fit with each other, is crucial to solving real world problems," he said.

One of the themes of the workshop was, "the problem solver, not the calculating device, is the key to problem solving," according to Gaylord.

Twenty high school science and mathematics teachers assembled at Tech for the three-day intensive hands-on workshop. Participating teachers represented private and public high schools from several metro Atlanta counties. The workshop, taught by a

combination of ECE and North Springs High School instructors, was based on senior-level problems in chemistry, physics, and business. Instructors used the applications to introduce problem solving methods and tools. Participants analyzed and solved the problems using pen and paper, graphics calculators and computer software.

**"the problem solver, not the calculating device, is the key to problem solving."**

"A lot of teachers don't have the time or resources to keep up to date with the available instructional tools," Gaylord said. "We hope that the computer and technical training we provided will help them to broaden their teaching methods," he said.

Several ECE professors served as workshop instructors. Participating professors included Gaylord, Dave Hertling, and Jim McClellan. José Cruz-Rivera, Ph.D. candidate, also

served as a workshop instructor. High school instructors were Jan Gaylord and Patricia Walker, both from North Springs High School.

"Putting the workshop material together and refining our training techniques was the hard part," said Gaylord. "Assuming our sponsorship needs are fulfilled, we will be able to offer the workshop on a regular basis."

Participants responded positively to the workshop, said Diana Fouts, workshop coordinator. Written evaluations revealed that 100 percent of the high school teachers who attended "would recommend this course to others."

Seventy high school teachers applied for the workshop. To ensure each teacher would receive individual instruction, only 20 were selected.

Participants were chosen, said Gaylord, with favor given to those schools that were able to send both a science teacher and mathematics teacher.

The Eisenhower Higher Education Program, the Eisenhower Secondary Education Program, Texas Instruments, Prentice Hall, and Mathworks provided sponsorship for the event.

President Wayne Clough joins Charitable Campaign committee members in pledging their efforts to make this year's campaign the most successful ever. The Campaign runs September 27 through November 1. By giving to Tech's Charitable Campaign, the donor has more control of where donations are spent. The Charitable Campaign involves more than 100 independent agencies, along with the United Way and affiliated agencies. Committee members (L-R) are Kathy Earwood, Pete Dawkins, Kathy Arnold, President Clough, Carolyn Meyers, and Carole Moore.

## Continual Calendar

**Faculty/Staff Toastmasters Club - Techmasters**, Thursday mornings, room 102, Pettit Building, 7:30 - 9:00 a.m. For more information, contact Margaret Graff, 876-0132 or e-mail mmgids@aol.com

**Women's Therapy Group**. Female students meet Wednesday to discuss concerns, build support and expand choices, 12:00 - 1:00 p.m., room 238, Student Services Building. Confidentiality stressed. To join or for more information, call 894-2575.

## AUGUST 21

Academic Senate

3:00 p.m. - 5:00 p.m., in SST, Room 3. For more information, please contact Lee Durbetaki at 894-3282.

## AUGUST 23

Continuing Education, certificate course, "Intermediate C Language" [COMP-101], August 23-

25, fee: \$995, GT Computer Training Center. For more information, contact Billie Ann Rice at 894-3146.

**Continuing Education**, Logistics Institute course, "Advanced Order Picking" [TLI-101], August 23-24.

For more information, contact Continuing Education Marketing at 894-2547.

## AUGUST 24

**Continuing Education**, certificate course, "Programming with the X Window Systems" [COMP-154],

August 24, 25, fee: \$695, GT Computer Training Center. For more information, contact Nancy Pinion at 894-9215.

**Continuing Education**, Environmental Science course, "Hazard Technician Annual Refresher Course" [EST-112], August 24. For more information, contact Continuing Education Marketing at 894-2547.

## AUGUST 27

**Continuing Education**, conference, "Humic Substance in the Environment: New Challenges and Approaches" [GIT-120], August 27 - Sept. 1. For more information, contact Continuing Education Marketing at 894-2547.

## AUGUST 28

**Continuing Education**, certificate course, "Object-Oriented Programming Using C++" [COMP-104], August 28 -30, fee: \$995, GT Computer Training

Center. For more information, contact Billie Ann Rice at 894-3146.

**Continuing Education**, certificate course, "Computer Aided Software Engineering (CASE)" [COMP-117], August 28-29, fee: \$695, GT Computer Training Center. For more information, contact Nancy Pinion at 894-9215.

**Continuing Education**, Environmental Science course, "Applied Ergonomics" [EST-142], August 28 - Sept. 1. For more information, contact Continuing Education Marketing at 894-2547.

## SEPTEMBER 1

**Summer Commencement**, 9:00 a.m., Georgia World Congress Center, exhibit hall "D." Speaker: Dr. M. Raymond Flannery, Regents' Professor of theoretical physics and recipient of Tech's 1995 Distinguished Professor Award.

## SEPTEMBER 4

**Campus Holiday**. The Georgia Tech campus will be closed in Observance of Labor Day.

## SEPTEMBER 5

**IX Diving World Cup** will be held at the Georgia Tech Aquatic Center September 5-9. For more information, call 546-4095.

## SEPTEMBER 6

**SUPERTRAIN** Sessions, course, "Introduction to CQI," 8:30 a.m. - 1:00 p.m., Weber Building. For more information call Denise Daniels at 894-1146.

E-mail your calendar items to [whistle@www.gatech.edu](mailto:whistle@www.gatech.edu). Items must be submitted at least 11 days before publication.

## DID YOU KNOW?

## HUMAN RESOURCES

The Office of Human Resources (OHR) has received many positive responses regarding their ability to conduct Pay Equity Analysis. However, it is unfortunate the announcement of July 31, 1995, pertaining to new hires' pay rates caused some concerns.

According to OHR, the statement that the policy no longer permitted midpoint hires was misleading and should be disregarded.

Departments are able to hire employees up to the midpoint and even above the midpoint under appropriate circumstances.

OHR's primary mission and purpose is to facilitate the hiring process which enables all departments to hire the most qualified candidate available to meet their respective needs. To this end, OHR will be distributing materials that further clarify the official Institute policy and procedures on Pay Equity Analysis.

The newly formed Human Resources Representative group will help develop policies which improve the Institute's management of its human resources.

They will continue to solicit campus involvement in significant policy decisions. Please contact OHR at 894-9411 if you have further questions or concerns.

**Institute of Electrical and Electronics Engineers, Inc. (IEEE)** IEEE needs information-system coordinators and network coordinators to assist in venue setups for ACOG during the August and September test events. For more information, contact Gretchen or Bonny at ACOG 546-3175.

## FOOTBALL

The NCAA has wised up to something Tech fans have known all along: the annual gridiron grudge match with Georgia is more than just a football game.

Acting on a request from the two schools and the Scottish Rite Children's Medical Center, the NCAA deemed the game a "special event." The move clears the way for Scottish Rite to link fund-raising activities to the game.

For 62 years, Scottish Rite linked some fund raising to the Tech-Georgia junior varsity game, but that tradition ended last year. This year's game will be played on Thanksgiving at Grant Field.

## PARALYMPICS

With a minimum time commitment of only five days, volunteers are quickly signing up for the 12,000 available volunteer positions during the Atlanta Paralympic Games, August 16-25, 1996.

Positions are still available in all areas including accreditation, athlete's village, opening/closing ceremonies, press operations, VIP services, language services, spectator services, medical services, hospitality, athlete services, results/scoring, security, technology, transportation, and venue setup.

Volunteer assignments will begin in January of 1996 and volunteer training will begin in February.

Volunteers will attend an official Paralympic volunteer rally between February and June 1996 and pick up their volunteer manual.

Closer to the games in August, volunteers will have specific job

training sessions and a tour of their assigned venue. Uniforms and limited edition volunteer pins and posters will be provided for all volunteers.

Coordinators are seeking volunteers who "know their way around Atlanta and the Tech campus. Prior experience is not a prerequisite.

Interested parties should call Linda Henson at 724-2632. Henson graduated from Tech in 1994 in industrial engineering. She encourages the Tech community to get involved in the volunteer effort.

## DRAMATECH

If you've ever been whipped through the chain saw of love, or hope to be, then you'll identify with "Personals," DramaTech's summer offering, a hilarious and bittersweet musical about looking for romantic fulfillment through the personal ads. Written in part by David Crane and Marta Kauffman, the dynamic duo behind the hit sitcom "Friends," it's an evening that will take you at a gallop through the highs and lows of the mating game.

Remaining performances are August 24, 25 and 26 at 8:00 p.m. Tickets are \$4 for students, \$6 for Georgia Tech faculty and staff, and \$8 for general public. DramaTech is located in the Dean Dull Theater in the Georgia Tech Center for the Arts.

To make reservations and to purchase tickets, call 894-9600. For other information, including directions, call 894-3481.

## Package, continued from page 1

professor, Earth and Atmospheric Sciences. The balloon pops and the device parachutes back to earth, Rodgers explained.

This particular ozone sunde was launched in Nashville, Tennessee during the month of July.

For recycling purposes, said Rodgers, the department attaches a request with each device that indicates the item should be returned if found. "The person who found this one [the ozone sunde] didn't exactly follow our instructions," Rodgers said. The attached request advises senders to clearly label the outside of the package, he said.

The device was blown up by the Atlanta Bomb Squad before the contents were identified. This is the second incident involving the ozone sunde. Last month the Nashville Bomb Squad destroyed a package that a local post office recovered.

Chief Vickery suggests individuals take the following precautions when mailing on or off campus:

- always put a complete return address on every package;
- use a label to verify content,
- and use packaging with a professional appearance.

"Following these procedures," said Vickery "will help reduce unnecessary suspicions."

## Pedestrians and Bicyclists Should Take Safety Precautions

Traveling on foot or by bike can be invigorating, but with daily construction and other Olympic-related activity on campus, bicyclists and pedestrians need to take special precautions to avoid accidents.

The following safety tips should be followed by all types of Tech travelers:

- Pedestrians should look both ways before crossing the street and entering or exiting a bus. Vehicles sometimes pass the bus while it is loading or unloading.
- Pedestrians should always approach intersections with extreme caution, and never assume the bicyclists or vehicles are going to stop.
- Drivers should yield the right of way to a pedestrian crossing the roadway whether the person is in or outside of a crosswalk.
- Bicyclists should stop before entering the crosswalk, to allow pedestrians to cross before proceeding. Bicyclists riding on the sidewalks should approach pedestrians or other cyclists slowly, or they may become frightened and move into your path. When passing from behind make yourself known by sounding a horn or bell, and by saying "On your left (or right)." This will ensure they do not turn into your path.
- Pedestrians and drivers should always be aware of who or what else occupies the area in which they are traveling.

### TORCH TALK

## Employees Urged to Plan for the Summer 1996 Commute

Most Tech employees have already responded to a survey regarding their needs to access campus during the summer of 1996. Now, employees must decide how they intend to get to the campus.

Employees who need to get to Georgia Tech during the Olympic Secure Period (July 1 - August 10, 1996) will have several commuting options. The one which is most encouraged is MARTA.

Georgia Tech employees who commit to using MARTA rail and bus campus service will receive a free MARTA card, entitling the card holder free train and bus service, as well as free parking in MARTA-operated lots and additional satellite lots, being run by ACOG for specific MARTA stations.

Transportation from the Midtown and/or North Avenue MARTA station to the campus entry control points will be provided. The MARTA pass will be good for all travel within the MARTA system during the period June 15 - August 15, 1996, allowing employees who choose this option to ride MARTA free to any point in the city.

There has recently been a change in the plan for street closures around Georgia Tech. 10th Street will now be a limited access street between Northside Drive and the I-75/85 connector, meaning that the general public will not be able to use the street. Buses carrying spectators, official vehicles, Georgia Tech employee shuttles and vehicles with a specific need to access a point on 10th Street will still be allowed. North Avenue (between the I-75/85 connector and Luckie Street) and Tech Parkway will be closed with no public access allowed.

Satellite parking lots will be available for employees who are unable to use MARTA. The location of these lots has not yet been determined.

Employees who use these lots will drive to the parking lot, board a shuttle bus for the ride to Georgia Tech, and then pass through the entry control point at either the Village Secure Zone or the Research Controlled Area.

A senior design team from industrial and systems engineering is currently conducting a transportation survey that will aid in the planning of Georgia Tech satellite parking lots. The survey results will also be used in the employee shuttle planning process.

The surveys were sent to each campus functional area planner. Employees who have not been contacted regarding their transportation plans for the summer of 1996 should seek guidance from their department or unit planners, as there will only be enough parking spaces for those who indicate that they need one.

Georgia Tech will keep employees informed of changes to the transportation plan which may affect traffic patterns in the Georgia Tech area as well as other things which may affect each employee's commute to and from campus.

If you have questions please call Tammy Tuley at 894-88325 or e-mail: [tammy.tuley@vpea.gatech.edu](mailto:tammy.tuley@vpea.gatech.edu)

## Meet Joe Blount

**Full Name:** Joseph D. Blount, Jr. (but I'm suspicious of those who won't call me Joe)

**Age:** 26

**Occupation:** Computer Support Specialist II at OIT's Customer Support Center (formerly Helpdesk)

**Years at Tech:** 3.5 full-time

**Current Professional Project(s):** Getting up-to-speed in my new position, focusing on PC software support; and creating informational kiosks for the campus.

**Education:** B.S. in Architecture from GT; currently working on B.S. in Computer Science from Tech.

**Marital Status:** single

**Favorite Book:** *Deadeye Dick*, by Kurt Vonnegut

**Favorite Movie:** "North by Northwest"

**Few People Know I:** briefly worked for GT parking enforcement, writing tickets.

**Pet Peeve:** Hesitancy, particularly when it interferes with the progress of others

**When I Was Little I Wanted to Be:** anything that involved driving cars or trucks.

**If You Could Do It All Over Again, What Would You Change?** I would learn to enjoy exercise at a younger age.

Photo by Gary Meek, Georgia Tech Telephoto

## Volunteers Put to the Test at Atlanta Sports '95

Hundreds of volunteers were needed to make the Nations-Bank Pan Pacific Championship Swimming competition a success. The event, held at the Georgia Tech Aquatic Center, was part of Atlanta Sports '95 hosted by the Atlanta Committee for the Olympic Games.

teers seem to establish a rhythm and operations ran relatively smoother than the first day.

One of the goals of the preview events is to see what areas need to be improved from the smallest detail, like how many sodas and sandwiches each volunteer will consume. Once these details are ironed out, future planning will be done accordingly. Along those lines, from an operational viewpoint the event was a success.

**Q.) What did you gain personally, by participating in the event?**

A.) I learned about a new area, dealing with the media, and that will help me do a better job during the '96 Games.

Carson, who has been involved with the Olympic Volunteer effort since 1991, also donated her time during the Paralympic Swim Trials, held August 17-20.

To find out more information about GTOC, contact Candy Carson at [carson@registrar.gatech.edu](mailto:carson@registrar.gatech.edu)

Olympic athletes are not the only ones testing their skills at Atlanta Sports '95. Volunteers are also being tested to see if they are able to deliver what the Atlanta Committee for the Olympic Games requires.

No stranger to volunteerism, Candy Carson, director of Georgia Tech Olympic Committee, shares her experience as a volunteer at the NationsBank Pan Pacific Swimming Competition.

**Q.) What type of work did you perform during the event?**

A.) I was a photo marshal, which is part of ACOG's press operations division. My main responsibility was to make sure reporters and photographers stayed within the area, or zones, for which they were credentialed.

**Q.) What was your work schedule?**

A.) I worked August 10-13 from 9 a.m. to 2 p.m.

**Q.) What type of preliminary training did you receive?**

A.) The training was broken down into two segments. First volunteers attended a general meeting, that provided an overview for everyone who would be working at a swimming event.

Second, there was a combined meeting and dress rehearsal where each volunteer was debriefed and walked through their specific posts.

Over 200 volunteers attended the five-hour dress rehearsal, held at the Aquatic Center the Sunday preceding the event.

**Q.) What are your comments concerning the organization of the event?**

A.) Through the course of the week event planners and volun-

## CLASSIFIED ADS
