

New Sigma Nu House To Be Finished by Fall

By Jimmie Baldwin

The massive structure, located between the Phi Delta Theta House and the Beta Theta Pi House is the future home of the Sigma Nu Fraternity House. If the construction goes by the set schedule, the Sigma Nu's will be moving in just before the beginning of the Fall quarter.

The modern building, of contemporary design, is the final result of several year's hard work by the Georgia Tech Chapter of Sigma Nu. Just before World War II the idea of a new, modern fraternity house was only a wild dream, but through close cooperation between the active chapter and the alumni groups, the wild dream has become a realization.

Designed By Alumnus

The new, beautiful fraternity house was designed by Bill Finch, prominent Atlanta architect, design critic at Georgia Tech and alumnus of Sigma Nu. Included in the plans of the modern building are living quarters for twenty-five men, a chapter room, library, dining room, living room, service areas and rooms for a house mother and guests of the fraternity. A picturesque patio will be enclosed on three sides and will open onto Fowler Street. The U-shaped structure will have the sleeping and studying areas in the north wing and the living quarter in the south wing. Located in the connecting section will be the service areas.

As it has been previously stated, the house itself is of contemporary design, or, as it is sometimes called, "modern" design. When it is completed, the new Sigma Nu house will take its place with the other modern structures now located on the campus. The change from traditionally conservative-type fraternity homes began on the Georgia Tech Campus with the Phi Epsilon Pi fraternity house and will soon have the Kappa Alpha Dining-recreation hall and the

Sigma Nu House. This new trend in housing is a direct result of the national prominence with which Georgia Tech has been blessed since the war.

Inspection Ceremony

An inspection ceremony of the new house will be held on Friday afternoon, April 13, at 4 o'clock by alumni and student members, according to an announcement by Eugene Bowers and Daniel Farley, student members of the building committee.

Participating in the ceremony will be President Blake R. Van Leer and Dean of Students, George C. Griffin of Georgia Tech. Alumni members of the building committee expected to be present are Jason Woodall, president; Gordon F. Price, secretary; George "Pup" Phillips; Robert F. Bryant, Jr.; James W. Bradley, divisional fraternity inspector; John C. Pye; and James F. Finch, chapter advisor and architect of the house.

Also invited to the ceremony are the following Sigma Nu members: Judge Bond Almand; Judge Luke Arnold; Edgar J. Kobak, former head of the Mutual Broadcasting System; L. W. "Chip" Robert; Roscoe T. Anthony; Robert E. Hightower; Julian T. Hightower; Dr. James Paulin; and Dr. John W. Turner.

Ball to Be Held

In the evening, alumni and student members together with dates and wives will attend the fraternity's "White Star Formal" ball at the Sky Room of the Municipal Auditorium. Miss Rena Aronson, Torrington, Conn., will be crowned as the "Sweet-heart of Sigma Nu" during the dance.

General Expansion

With the expansion of the Institute, the expansion of the physical plant has followed as a matter of course. It is generally known that the master plan of Georgia Tech calls for many new structures and most of these buildings will be of modern design.

As new structures take their places on the Tech campus they will add to the beauty and to the prestige of Georgia Tech. In the very near future, Georgia Institute of Technology will boast one of the finest and most modern campuses in the nation.

Carmichael Announces Pre-Registration Dates

Summer and Fall Students To Pre-Register Next Week

A punched card, with the student's name and instructions printed on it, will be placed in each student's campus post-office box. If any student fails to receive a punched card by noon April 16 he should report to the Office of the Registrar. No conferences will be held after April 20.

- Students who will not be enrolled at Tech after the current quarter: DESTROY THE CARD. Coops who will go out on a work period for the summer quarter see paragraph 3 below.
 - Students who will be enrolled during the summer quarter.
 - On the punched card check the space marked "Summer Quarter."
 - Present freshmen who will not schedule any sophomore subjects in chemistry, mathematics, or physics should deposit the card in the Office of Dean Hefner, Room 206, Administration Building. No schedule conference will be necessary.
 - All other students who will remain enrolled for the summer quarter should present the punched card to an adviser in their school of specialization. The purpose of the conference with the adviser is to receive a course list for next registration. This form must be presented to a schedule adviser at the time of registration, June 25.
 - Students who will not be enrolled during the summer quarter but who wish to return in the fall.
 - On the punched card check the space marked "Fall Quarter."
 - Present freshmen who will not schedule any sophomore subjects in chemistry, mathematics, or physics should deposit the card in the Office of Dean Hefner, Room 206, Administration Building. No schedule conference will be necessary.
 - All other students who will not remain for the summer but who wish to return in the fall should present the punched card to an adviser in their school of specialization. The purpose of the conference with the adviser is to receive a course list for fall registration. This form must be presented to a schedule adviser at the time of registration, September 24.
- Time tickets will be distributed only to those students who have registered.

Attention Veterans

All veteran students under Public Law 16 who plan to be graduated, transfer to another school, withdraw from school, or go to work under the co-op system as of the end of this term, 9 June 1951, are urged to secure the official withdrawal papers now from Room 102 Knowles Building, and get them executed as of 9 June 1951.

- Co-operative students will execute interruption papers.
- Students to be graduated will fill out discontinuance forms.
- Students transferring to another school or to on-the-job training will also fill out discontinuance forms.
- Students planning to drop out for one term under the G. I. Bill and return to Georgia Tech will fill out interruption forms.

These papers, having been executed by the students now, will be reported to the Veterans Administration from day to day, so that there will be no delay in the Veterans Administration Office receiving due notification.

Rotary Offers Tours To Ga. Tech Students

Through the Georgia Tech World Student Fund Committee, Mr. Kendall Weisiger of Rotary International has offered two summer trips to France. The only expense will be round trip transportation to and from France. While in France, participants will be the guests of French Rotary International members. This means staying in private homes for both room and board.

Rather than spend the summer in a classroom in France, trips will be arranged, parties planned and much free time given for personal and individual travel. Schools, factories, and business establishments can be visited as well as the French countryside.

If you care to take advantage of this opportunity for travel and friendship in France fill out the application at the desk of the Tech YMCA.

Marcel Breuer Gives Lecture On Problems of Architecture

By Jerry Lavinsky

Mr. Marcel Breuer gave a very successful lecture on the problems of modern architecture. The lecture was held in the auditorium of the Hightower textile building on Tuesday night, Mr. Breuer was introduced by Colonel Blake R. Van Leer, president of Tech. President Van Leer, in his introductory speech, stated that one-half million dollars will be spent in the near future for the improvement of the architectural school at Georgia Tech. He also remarked that Tech is slated to be one of the finest Architectural schools in the United States.

Marcel Breuer is one of America's most outstanding architects. His scope of interests include tubular steel furniture, development of the clover leaf traffic circle and prefabricated houses. His talk concerned itself for the most part with specific details about building and planning small residential homes.

Mr. Breuer described the two types of houses which he prefers. The first type is called the long house. It is exactly what the name implies. All the rooms are on one level and they are generally placed end to end. In this type of house, the kitchen is about in the middle of the house. This modification separates the house into two main divisions, the day section and the night section. The day section includes such rooms as the (Continued on page 4)

Concert Tickets

Faculty tickets for the Alec Templeton Concert can be obtained from Mrs. Chastain in Colonel Zuffa's office. These tickets will go on sale Monday for 75 cents, including tax. Tickets will be available to the public at Colonel Zuffa's office and Muses, at \$1.25 each, including tax. The concert will be held in the Georgia Tech gymnasium on Sunday, April 22.

Latest Information on Draft Deferment Exams Presented

HOW TO TAKE THE DEFERMENT TESTS

- Check your draft number on your identification notice (SSS Form 391) or classification notice (Form 110). If you don't have a number, ask your local board for one.
- On April 12, get an application blank (it's a post card, Forms 106 and 107) from any local draft board. Get your copy of the Bulletin of Information about the test.
- Fill out and mail your application immediately. First 300,000 applicants will be tested Saturday, May 26; the next 300,000 on Saturday, June 16; the remainder on Saturday, June 30.
- Wait for your ticket of admission. You will get it back within three weeks if within the first test group. But it may be six weeks before you get it back, if you delay.

- Report at the test place specified on your ticket by 8:30 a.m. Bring your identification or classification card, a No. 2 pencil or a fountain pen. Do not bring books or notes.

- Proctors will admit you to the test room. You'll be fingerprinted, after you swear that you never took the test before. Proctors will watch for cheating, dismiss cheaters from the room and report them to their draft boards.

- Your score on the test will be mailed to your draft board, not to you. Your board probably will tell you what you have made, however. Scoring will be done by machines at the headquarters of the Educational Testing Service in Princeton, N. J.

Information Tentative Few Changes Expected

This report is reprinted from "U. S. News & World Report," an independent weekly magazine on national and international affairs, published at Washington, Copyright 1951 by United States News Publishing Corporation. It gives information on the proposed aptitude tests. This information is tentative at the present time and is not official, but few changes of any consequence are expected. The Technique reprints it herewith as a service to the student body.

FRESHMAN

Take the aptitude test this spring. A score of 70 or better will qualify you for deferment even if you rank low in your class. A score of 69 or lower will not disqualify you for deferment, if you remain in the upper half of your class. Taking this test will be good practice for later ones.

SOPHOMORE

You, too, are advised to take the test. A high score will make you eligible for deferment regardless of your class standing; a low score won't disqualify you if you stay in the upper two thirds of your class. You can take this test, and wait for its results, even though you already have a notice of induction.

JUNIOR

You will not be drafted, regardless of your course, if you rank in the upper three quarters of your class. If doubtful, take the aptitude test—a score of 70 qualifies for deferment. Advanced ROTC students need not bother. They will be allowed to finish college, then serve as officers.

SENIOR

If you plan to go into graduate study, you must rank in the upper half of your class, or make 75 on the aptitude test. If you are graduated and look for a job, you can be drafted right away, unless you land a job that your draft board thinks is essential.

RUMORS ABOUT THE AA

... that have appeared on the campus recently are cleared up.

This past week has seemed to furnish more rumors on the campus than any other single week in our memory, and most of them concern the Athletic Association. We feel that this is a good time to speak out in defense of the AA, not because we bear any love for it, but because we feel that it has gotten a lot of poor publicity so far as the student body is concerned.

Before we go into our defense, we should like to clear up the rumors to which we have referred by stating the facts as we got them from various members of the administration. First of all, Tech is not going to be without any intercollegiate sports next year (which is one report we received). Nor are we going to be limited to the "big four": football, basketball, track, and baseball. The truth of the matter is that at the present writing all we stand to lose from the intercollegiate sports picture is gymnastics, and possibly wrestling.

The reason for the elimination of gymnastics from the picture is that every branch of Tech must economize, and the AA feels that, since Tech is the only school in the SEC with a gym team, it is the logical sport to drop. Coaches Welser and Neiger have not been dismissed—their contracts with the AA have been dropped. These two coaches are here primarily to serve as Physical Training instructors, and that portion of their salary paid by the Athletic Association is extremely small; the great part of their stipend is paid by Georgia Tech. At the same time the AA dropped Neiger and Welser from its payroll, the school announced that the contracts of coaches Griffith and Woodruff would not be renewed next year. These two men are also primarily PT instructors, although each does some coaching for the AA.

These two men were let go because they have the shortest tenure on the faculty, and somebody had to go. Obviously, with enrollment down to its present low ebb, the PT program did not have to be maintained at its early post-war peak, and the school felt that a cut of two men in the PT faculty would prove an effective economy. In the same manner that Welser and Neiger are paid by the AA, Woodruff and Griffith are also paid a small salary. This sum is not sufficient to furnish the coaches with a living, and as a result, they are both planning to leave the Flats. The fact remains that these two men were dismissed by the school, not by the AA.

We had an opportunity to talk to Coach Dodd the other day about all the rumors

that are flying, and we found that he hopes to be able to reinstate gymnastics in the very near future, and he hopes that the AA will find some way to retain wrestling on the slate. Actually, nothing has been done to abolish either of these sports, since the Athletic Board must vote on the subject before any action can be taken. Coach Bob Miller, who is a member of the Tech faculty, coached wrestling before Coach Griffith, and he may take the mat squad back under his wing next year. Briefly, the truth of the matter is that the only two sports that have been considered for elimination from the intercollegiate picture are wrestling and gymnastics, and it is hoped that neither will be missing for long.

But to get back to our defense of the Athletic Association. We aren't just sure how the idea got around, but everyone on the campus seems to look upon the AA as an ogre stealing the students' money without giving anything in return. This is just not true. We are confident that anyone who has had dealings with the AA will agree with us when we say they do all they can to further the students' interests. We must remember that the Athletic Association is organized separately from Georgia Tech, and it is not supported by the Board of Regents. For this reason, the people who run it must make a profit to carry the overhead expenses and so forth. We can say quite freely that we do not believe any profit is made from student fees. The student not only gets free tickets to all athletic contests on the campus, but he gets the use of the gymnasium, lockers and showers, equipment and playing fields. In addition to all this, every Tech student is offered the opportunity to participate in one of the best-rounded intramural sports programs in the country. We feel that every dollar of student money is returned many times.

Perhaps we are all wrong in thinking that the students want to know how the AA operates, and perhaps the wool has been pulled over our eyes, but we hope that we have accomplished something in these columns. We wish to remind our readers that the students do have somewhat of a voice in the activities of the AA, since three members of the board are students, and if there are any grievances to be brought up, the students will be well represented. We hope that this article will help to further understanding between the AA and students, and that it will bring a little well-deserved appreciation to the men behind the AA.

—DMJ

Views on Deferment

Michigan Daily writers air two sides of a vital question.

The President's order deferring college students indicates that the government has finally mastered one of the most vital facts of contemporary life: that we need men not only to fight wars, but, more important, to prevent them.

The order shows a realization that we need more than technicians and fighters—the men who win battles. Evidently there is a growing awareness that we also need political scientists, sociologists, writers, teachers and all those who will contribute to a balanced society and who will conduct our national government and international relations. For it is they who must seek the peaceable solution to the world's problems, the only valid solution.

Perhaps the government has learned its lesson from Great Britain. For a year during the First World War, Britain had no draft, but encouraged voluntary enlistments. Her most brilliant and patriotic young men, encouraged by an incautious government, enlisted and marched off to slaughter in the early battles of the war. When the draft finally began, the finest young men had been annihilated.

And so, in the crucial years before the Second World War, many of Britain's rightful leaders were lying dead beneath the soil of Belgium and France. The vigor, intelligence and courage which dead young men would have furnished, had they lived to take part in the governing of Britain, might well have prevented Munich and the Second World War.

This example indicates that the nation's best young men must be saved in order that they may save the nation.

By focusing attention on the value of college-trained men in all fields, the President's plan discourages foolhardy enlistment and steers young men to the jobs where they will do the most good.

The main objection to deferment of college men has been that it is unfairly discriminatory. This argument is more dogmatic than realistic.

It is no more unfair to defer college students than it is to exempt men over 26 years of age. Of course it is unfair that one man should have to go to war and not another. But obviously some discrimination will have to be employed. And since this must be, it is well to use reason and foresight in the process.

Deferment does not, as some complain, necessarily entail economic discrimination. Any single man without outside responsibilities, if he's intelligent enough to be deferred, can send himself through college without aid from his family. Many scholar-

ships and fellowships are available.

True, these must be limited to the more deserving. But even without such help, any intelligent person can work his way through college by working summers and part-time during the school year, certainly with no more effort than he would be expending if he were training or fighting in the service.

With the war emergency, summer jobs will be plentiful and lucrative. A person should be willing to work, and work hard, for the privilege of staying in college while others fight.

(Editor's Note: The following paragraphs, written by another member of the Michigan Daily staff, conflict somewhat with the above editorial by the associate editor of that paper. They are, nevertheless, a good expression of the feelings concerning the "other side" of a much debated question. The Technique invites its readers to voice their opinions on the subject by writing an open letter addressed to the editor which may be published at a subsequent date.

—WmED)

While the object of the new draft law—to provide a steady flow of both technically trained and widely educated young men—is a wise one, there is one major fault with the plan. It is essentially a law for the privileged, for those who have the financial means to go to college. Those who do not have sufficient money will either have to submit to the draft or will have to work and work hard summer and winter to put themselves through school.

The excuse that scholarships are plenty and ripe for plucking is a little facetious. While existing grants might well take care of some men (women, of course, would have to be excluded from applying) the majority of the right field deferrees would have to sling hamburgers five nights a week if there were enough hash houses on campus to take care of them.

The actual answer to the problem and a logical one at that, is federal scholarships. If the government is going to make college a reason for deferment it should make college equally accessible to all. And the scholarships should not be just for future atomic scientists. The ideal plan would be a civilian version of the GI bill, with financial need rather than service time being the criteria.

If such monetary aid is not made available to those who need it, the family ingetting into the staying in that deferred come will become an important factor in 2-A classification.

—Michigan Daily

TECHNIQUE PLATFORM:

1. Student voice in matters of student interest.
2. Encouragement of school spirit.
3. Better orientation and vocational guidance.
4. More participation in the intramural sports program.

5. Promotion of active campus organizations.
6. Erection of an adequate library.
7. Erection of a Student Union building.

The Technique will at all times attempt to represent the best interest of the students in current discussions and controversies.

Intramural Slate Successful; Phi Delts Take Two Crowns

By Joe Young

The fall and winter quarter intramural program was very successful with keen competition and excellent participation being the key factors.

Bowling contributed many thrilling Friday afternoons to the intramural cause and when the pins had stopped falling the Phi Delts had emerged as school champions. The end of regular scheduled play found ATO leading the White League with a 20-7 record, with the Phi Delts and Lambda Chi's tied for second with a respectable 18-9 record. In the Gold League, AEPi completely dominated regular scheduled play with a 19-2 record as Sigma Nu took second place with a 14-7 record. In a playoff for second place in the White League, the Phi Delts trounced the Lambda Chi's in the first two games, making a third game unnecessary. After gaining a playoff berth, the Phi Delts were unstoppable and rolled to their second school championship in the past four years.

In the final stages of the playoff, the new champions set an all-time game high for intramural bowling. With Ard setting the pace with a high score of 138, the Phi Delts posted a total score of 608, a mark which will probably stand for a long time.

The high individual average of 110 for the season goes to Charlie Eitel who paced ATO to first place in the White League.

The Phi Delts also emerged as

school champions in basketball as they completely dominated play with one of the most colorful teams to come from the intramural ranks in many years. Using the fast break to great advantage and possessing unusual height, the Phi Delts rolled to their second consecutive unbeaten season with a 15-0 record.

In the round-robin tournament for the interfraternity championship, PiKA, winners of the White League; SPE, winners of the Tornado League; and Theta Xi, representing the Yellow Jacket League; were the victims as the Phi Delts captured their second consecutive interfraternity basketball trophy.

The Newman Club won the right to represent the Independent League in the school championship finals against the Phi Delts and displayed good team work as they bowed to the interfraternity champions 36-30.

In volleyball the interfraternity champion ATO defeated the Latin American Club independent champions 18-5 and 16-14 for the school championship.

Jacket Baseball Squad on Road Trip

By Marvin Gechman

The Yellow Jacket baseball team is now in the middle of a four game series with Tennessee and Kentucky. On Wednesday and Thursday, of this week, the Engineers played the Tennessee Vols at Knoxville. Friday and Saturday they are scheduled to play the Wildcats at Lexington, Kentucky. Next Wednesday the Tech squad will begin a six game home stand against Florida, Vanderbilt, and Auburn.

Tennessee, one of the leaders in the Southeastern Conference, should give the Jacket nine a long-to-be-remembered battle. Tennessee has never won the SEC, but this year the Vols are making a strong bid. After beating Tech in two tilts last Wednesday, the Vols had a 6-1 record. This gave Tennessee the top berth in the SEC. Louisiana State, Alabama, and Florida are the only teams keeping up with the pace set by the Vols.

The Vol's sport one of the conference's leading sluggers in center-fielder Bert Rechichar. Rechichar was once offered \$25,000 to play for the Pittsburgh Pirates. Last week he collected five hits in ten trips to the plate in the two game series with the Jackets. Four of the five blows were for extra bases.

Kentucky's record won't bother the Jackets since they are out to revenge the two setbacks the Vols administered last week. The two games at Rose

Bowl Field last week can easily be classified as slugging contests, for the Vols nipped Tech 15-11 and 12-11. In the first game Tennessee blasted ten hits to Tech's twelve. Tennessee really poured it on in the second tilt and amassed a total of sixteen hits to Tech's nine. There is no reason to doubt that the clash at Knoxville (Continued on page 4)

living room, dining room, play room, and porch. The night section takes in all the sleeping facilities. Another important advantage to this type of house is its great amount of convenience.

The other type of house that Mr. Breuer discussed is basically the same as the long house, except that the day and night sections are separated by some type of hallway or corridor. This type of house is much larger than the long and is more practical for a higher price bracket. This type of house emphasizes many facilities for children. Some of these facilities are extra exits to the outdoors, and much more area. This house presents the problem of privacy because of the great area of wall space taken up by glass. This problem is easily solved by placing small walls at strategic locations around the house.

ville will be another high scoring contest, but the Engineers are hoping for a little different outcome.

The game at Kentucky on Friday and Saturday will be the first battle this year between the Wildcats and the Jackets. Kentucky is not considered one of the top title contenders, but they are a much improved team and could easily upset the Jackets.

Although Tech has been hampered by hurling woes they have shown a lot of improvement. Coach Pittard has had a number of problems, but he is slowly ironing them out. The pitching problem is not as critical now as it was in the past due to the fine performances of Chappell Rhino, Herbert Bradshaw, and Clyde Young. Likewise, there is an ample supply of power at the plate in the persons of Bob Lusk, Bobby North, Powell Scheffer, and Bob McCoy. Coach Pittard is doing a fine job and should make the Jackets a powerful club before the season ends.

A.P.O. Meeting

APO invites anyone interested in joining its organization to come to room 5 in the YMCA at 6:45 Monday night, April 16.

At this meeting, the service fraternity will be explained and a new pledge class will begin. It should be noted that membership in any other fraternity does not disqualify a person from being an APO member.
