

Bradley Building Plans Revised for Construction

By Bob Tait

Plans for the proposed Bradley Building have been changed due to the international situation and the lack of funds. The modified plans, as stated by Mr. Jamie Anthony, are to complete the building but to leave out certain equipment. The main floor will be used for a reading room and the basement to help relieve, temporarily, the congested situation in the Tech library.

The building will be completed as far as the international and financial situations permit; however, the dining and kitchen facilities will not be included in the new building immediately. Originally the Bradley building was to house a new soda fountain, dining tables and chairs, and new kitchen facilities. The existing lunch room was to be converted into a senior study lounge and the soda fountain space was to be made into a lounge for general student body.

The availability of materials will be a major factor in deciding how and when to complete the building. At present, it appears that the dining and kitchen facilities will be omitted due to the shortage of these particular materials.

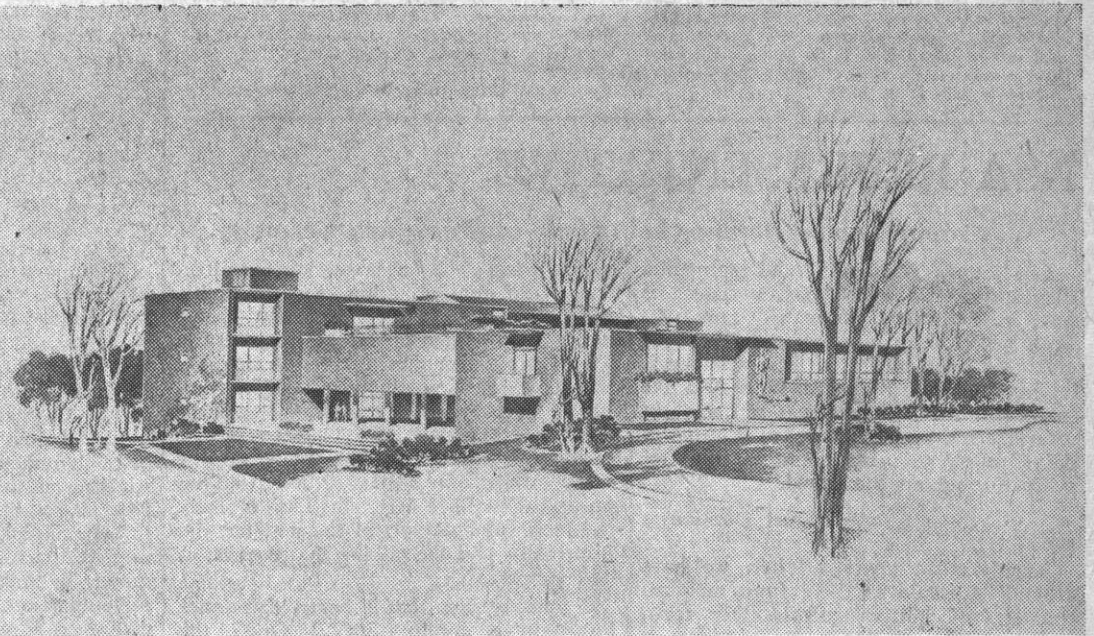

The main floor will furnish study space until the new facilities can be installed. The basement of the new building will provide welcome, if only temporary, relief to the overcrowded library. The new kitchen will have

priority on the basement of the building and it will be installed when materials are available.

Mr. Anthony said that the contract for the revised Bradley building should be signed within the next week. It has been estimated that the construction will take about 200 working days. In normal Atlanta weather, 200 working days might well mean more than one full calendar year. Originally the building was planned to be ready for use by the time school opens for the fall quarter, 1950.

Since the construction is expected to take about 200 working days, the present plans for the completion and use of the building are tentative, and they may be changed to meet the situation—whatever it may be at that time.

The Bradley Foundation has consented to the changes in the plans of the Bradley building. Work on the building should start soon after the contract is signed.

Building Authority Opens Bids For New Architecture Building To Be Finished By Spring, '52

New Structure Will Feature Laboratory, Student Exhibition Room, Drafting Rooms

By Hugh Bivens

The realization of a new architectural building moved into the final stages this week as the Building Authority of the Board of Regents opened the bids submitted for the construction of the new building. The J. A. Jones Construction Company of Atlanta was the lowest bidder with a bid of \$1,014,865, which was 12 per cent higher than Authority officials had anticipated. No contract will be let until all bids are received in the statewide building program of the Authority. The Authority has sixty days in which to accept or reject bids.

The building site will cross Cherry street and will be bounded by Campus drive on the south, the new drill field on the west, the parking lot on the north, and the Delta Tau Delta house on the east.

The building will be of concrete frame construction with a brick veneer. It is of a U-shaped design consisting of a north wing and a south wing with a connecting wing, a concourse between the two main wings. The north wing will have two stories. The building will contain approximately 67,000 square feet, and will be partially air-conditioned.

Included in the building will be one

lecture hall, one laboratory, four drafting rooms, an exhibition room, a seminar room, nine offices for instructors, two classrooms, offices for the department head, and a library. The library will be located in the connecting wing between the two main wings. The exhibition room will be used to display the designs made by the Architectural students.

Construction will start immediately after the contract is let, which will be sometime before October 1. The building probably will be ready for use in the spring of 1952, since the lowest bidder promised to complete the building in 450 working days.

The houses now occupied by the Architectural school are on the building site of the new library and will be torn down after the completion of the Architectural building to make room for the Library.

Collegiate All-Stars With Dodd Coaching Play Eagles Tonight

By Karl Frankel

The 1950 football campaign will get underway tonight when the College All-Stars meet the Philadelphia Eagles before 90,000 fans at Chicago's Soldier Field. One of the heaviest All-Star squads in the seventeen year history of the classic will take the field to meet the champion Eagles of the National Football League.

The collegians will step on the gridiron tonight after three weeks of extensive drills at Delafield, Wisconsin under the direction of coaches Eddie Anderson of Holy Cross and Tech's Bobby Dodd. The Eagles will go into the fray as a fourteen point favorite but the stars have the brawn and the skill to pull an upset. The collegian line will average very close to 250 pounds per man and could very easily give the Eagles a great deal of trouble.

The All-Stars feature such great Southern players as Charlie Justice and Art Weiner from North Carolina, Doak Walker of SMU, Chuck Hunsinger of Florida, Travis Tidwell from Auburn, Harry Uliniski of Kentucky, and Georgia's Porter Payne.

The Stars haven't fared too well in their previous outings against the teams from the professional ranks having lost eleven times.

Last year the Collegians were soundly trounced by the same Philadelphia Eagles to the tune of 38 to 0. In 1948 the Chicago Cards humbled the Stars 28 to 0. This game was sparked by the Cards' Charlie Trippi who scored one of the touchdowns for the professionals. Georgia's Dan Edwards and Tech's George Mathews played outstanding ball for the Collegians.

The Stars last victory came in 1947 when Charlie Trippi led the team to a 16-0 victory over the Chicago Bears.

"Miss Perfect Lips" Selection To Be Made Saturday Night

Miss Perfect Lips will be selected tomorrow night, August 12, from one of the four finalists in the Miss Perfect Lips Contest. The dance and crowning of the new Miss Perfect Lips will bring to an end the feverish work of the Co-op freshmen. For the past several weeks, the freshmen have been gathering lip impressions from the local lasses, supposedly only on their kiss cards, and the four finalists have been selected.

The four finalists are: Miss Barbara Ann Barber, Miss Ruth Lusk, Miss Betty Ann Allen, and Miss Gloria Jean Head.

Miss Barbara Ann Barber is 18 years of age, and resides at 339 Glenn-

more Ave., Decatur. She is a student at Georgetown College of Kentucky.

Miss Ruth Lusk is 18 years of age, and resides at 522 Ponce de Leon Ave., Atlanta. She works as a clerk in the ladies sportswear department at Davison-Paxon Co.

Miss Betty Ann Allen resides at 892

(Continued on page 4)

Klaus Putter, member of the Co-op Club, ponders of this quartet of finalists for the title of "Miss Perfect Lips." The candidates are, left to right, Barbara Ann Barber, Ruth Lusk, Betty Ann Allen, and Gloria Jean Head.

Tech Latin American Club To Play Hosts for Cubans

The Georgia Tech Latin American Club will greet a Havana, Cuba, group on Monday and will serve as hosts for this group throughout their stay in Atlanta. The group composes the Havana swimming team which will meet an Atlanta team on August 16 and 17 in the annual Havalanta swimming meet.

Howell Hall will house the Havana men and the Alpha Tau Omega fraternity house will furnish the sleeping accommodations for the women. The Latin American Club will serve as guides and interpreters for the group throughout their stay in Atlanta which will be from August 14 through 20. Howell Hall has recently been painted throughout and new lounge furniture has been ordered for the lounge of that hall. This furniture will be a preview of the new

furniture which will be installed in all residence hall lounges.

Others Housed Here

While the Cubans are staying here, Tech will also provide housing facilities for the Georgia High School All-Star football teams. These teams will be housed in Brown Hall. The U. S. Public Health Service field training delegates will also stay in the Tech residence halls, being lodged in vacant

NSA REPRESENTATIVE

... reports on conference being held in Frankfurt, Germany.

Bill Kennedy, Georgia Tech's representative to the National Student Association, is now in Frankfurt, Germany. This past week we received a letter from Kennedy giving us some idea as to just what he is learning on his trip abroad. We would like to reprint this letter so you can see just what Tech's representative in Europe is doing to try to bring about a future of peace throughout the world.

Frankfurt, Germany

Dear Bert,

As I said in my last letter, we have around fifty students here from most all countries of western culture. Our main topic is student self-help government; attempting to bring together all viewpoints, problems, procedures, programs, etc. I will send you a copy of our program. This program was merely something to start with. We realized that as we talked more ideas would turn up, just like a rolling snowball, particularly in an international group.

We start work at 9:30 every morning in our committees. Everybody is on one of the four committees, which have been mainly gathering facts all last week and so far this week; it is necessary to first find out what conditions exist before we can begin to talk about them. Chairmen of the committees were appointed first to get started, but after a few days when everybody knew their committee, we elected (democratically) a chairman and secretary. Then in the general assembly of everybody we elected five members at large to the steering committee making a total of nine (the committee chair-

men, the five elected at large) and the director of the seminar. I am explaining this because we felt it very important to organize the seminar in the most democratic way possible — thus being a lesson in itself. We have lunch at 12:30 and begin committee meetings again at 2:00 and work all afternoon. Supper is at 6:30. After supper at night is usually when we really do our work, talking over a glass of beer, walking around the village here, etc. That is really the most valuable part of the seminar, the informality and the talking that goes on at odd moments.

I must confess that I began this letter last night but couldn't finish it. One of the American participants came up here to the room to see me. Just after he came in, my roommate came in. My roommate is from Dresden, Germany, which is in the Eastern zone, and we began to talk about his family, how he escaped from the Russians and came to western Germany to study at the University of Bonn. He plans to leave here and cross into the Russian zone, get the girl he is engaged to and her mother and bring them back with him into the Western zone. The stories that these people tell about going back and forth into the Eastern zone are incredible.

I visited one very interesting place while I was in Munich. It is called Massmannplatz. It is a place where students and workers of student age live together. It is a most interesting experiment and I believe it is going to be a tremendous success. There are several reasons why it began, rather several things which existed and the

house thus organized in an attempt to help the situation. A man by the name of Herman Mau had the idea, so he got a little starting capital from the state of Bavaria and advertised in the newspaper that anyone who wanted to help build a home for boys in exchange for food and lodging could apply. An architect turned up and drew some plans better than those originally planned, several others turned up and work began. Today there are 95 boys, average age 22, living together. Each case is investigated separately. All the boys I met were either D.P.'s, had no father or mother, or maybe only a mother who was trying to keep a home for three or four children, etc. The plans for the future are tremendous; theatre, apartment houses for married people, two all-girl dormitories, etc. The present building is very attractive, modern with big plate glass windows, etc. The idea of both students and workers is to attempt to break the line between classes, which has always been a tremendous problem in all of Europe, I think, over the past years. I stayed there with these boys most of one day and spent the night there to get the best possible picture, and I think that I did. I don't think I have ever seen a finer bunch of boys; so happy that they have a place that they can call home, working or studying as the case may be. It is mighty good to see these boys doing all they can to help themselves. When you see that sort of a place you don't mind giving them money, or anything you can, to help. And in comparison, we really have a lot we can give them, in materialistic lines anyway.

So many conferences of this sort usually do nothing but exchange a lot of hot air and at the end, it is all over. We mustn't let this happen. This is our main goal of the whole seminar: to find a mutual understanding, to further ideas of exchange of students for study, for the building of a free peaceful world. A marvelous atmosphere exists here. We Americans are not here with the attitude of transplanting American ideals and way of life to Europe, or to further the economic control of Europe which it does have now to some extent. We are here to show these people that we have problems just as they do, that we realize that there is a lot wrong with our system of government, but that in spite of it all, we are trying to develop this crazy world into one of peace and freedom to do as one wants as long as he stays within the limits of decency and gives his fellow man a chance to better himself and not use his

freedom and the principles of freedom to further those ends of any one person or particular groups. I know I sound like a soap-box preacher but I think it is high time people began to realize there is something in these words and that they are going to have to do something, and do it quickly if they want to keep their place in the world today. I am in all sincerity and hope we at Tech can do more in the future than we have been doing. This is the very atmosphere I am talking about; everybody here realizes this, including the French, Swiss, English, Americans, Germans, and the rest . . . especially those who have fled from the Russians.

An interesting thing happened the other day. A boy from Leipzig, Germany, who has been president of the Student Council there, sorta turned-up here. Leipzig is in the Russian zone and this boy has been there since 1948 when Wolfgang Natonick (at that time President of the Student Council) was arrested for his undemocratic attitude and for resisting Soviet orders by the Russians, and for this he was sent to Siberia for 25 years of hard labor. I hope you know of the Free University of Berlin. That story is a most incredible one that I am sure will go down in history. (I am flying to Berlin this weekend on HICOG orders to visit the Free University and will bring back all I can about it.) Anyway, the vice president of the Student Council at the Free University, a girl, is here . . . and she has no faith in this boy from Leipzig whatsoever. She knows all about the Russians and says that anyone who can stay in the Russian zone for two years, compromise back and forth with them, and anyone that compromises with these people is supporting a murdering, terrorizing country. If this guy was or is not a communist, and fought very hard for what freedom was possible, and compromised as a last resort, then we should be kicking those people who followed him that are still in the Eastern zone, (he was the leader of the student Liberal party in all eastern Germany). We can't prove anything and are therefore hamstrung. It's a peculiar situation. He has been allowed to stay here until tomorrow night as a compromise. There is a lot more in it than that, but will bring the whole story with me in September. I hope this hasn't been too boring, if I can write anything in particular for you, let me know. Thanks again for sending those things.

Sincerely,
Bill Kennedy.

Students Recognize New 'Hole' As Faculty "A" Bomb Shelter

By Al Conway

Tech has always striven to keep abreast of the times in all fields of endeavor. The new textile building is the finest in the country. Plans for the new library and architecture building are on file for all to see. The Research Station is expanding its facilities and the scope of its work.

When Tech needed a larger stadium to accommodate the ever increasing number of fans for our popular Jackets, it was ready by the following season. Future expansion has been the subject of many articles and speeches. A model of the Tech of the future is on display in the Athletic office.

There was very little notice taken when construction work was started next to the Robbery. Most students watched them remove a king size magnolia from behind the Library thinking that tree and grass were giving way to cement paving for more expedient movement of traffic between the buildings.

Then bull dozers and dump trucks went to work. In their wake a tremendous hole appeared. This caused much interest and speculation. While it may just be coincidence, the first signs of war accompanied a cessation of work. No longer was the boredom of library research broken by construction noises.

Rumors are running rampant. One story has it that Tech is constructing a secret government project — so secret in fact that they have to work in the dead of night where they will be free from prying freshmen eyes. Another idea is that it is the faculty bomb shelter for the atomic war.

One cynical veteran suggested that it was a bomb-proof vault to store

the excess profits of The College Inn. The most frequent guess is that uranium has been discovered under the Administration building. With all of the conflicting reports, students don't know what to believe.

Tech Graduate Wins Fulbright Fellowship In Research Studies

A Fulbright Fellowship for study and research work at the Eidgenossische Technische Hochschule, Zurich, Switzerland; has been awarded to Pierre V. Andreae, 351 Derby Circle, Chattanooga, Tenn., who graduated with highest honor in general engineering from the Georgia Institute of Technology last June. The award was announced by Donald V. Shank, vice-president of the Institute of International Education, New York, N. Y.

In addition to free tuition and laboratory fees, Mr. Andreae will also receive a stipend of 2000 Swiss francs for the academic year of 1950-1951. He plans to start his work in Zurich at the beginning of October and complete it by July, 1951.

This fellowship is one of several set up by the U. S. Department of State for the exchange of students between American and foreign universities under the Fulbright Act passed by the 79th Congress. Final selection of American scholars for study in foreign countries is made by the Board of Foreign Scholarships appointed by President Truman.

Co-op Softball League Prepares for Tourney

By Frank Hinds

The past week saw the Co-op softball league continue their fast pace, in preparation for the tournament which will start on August 12.

In the first game Martin downed the Co-op club by a score of 8 to 1. The Co-op club's defeat came in the first inning as a result of three out-field errors which allowed six runs to score that inning. After a shift of positions the Co-op club settled down and allowed only two more runs to score while pushing one across for themselves. The winning pitcher was Green, giving up only five hits while Wright was the loser, giving up only three hits. Davis caught for Martin and Pratt was the catcher for the Co-op club.

In the second game Troxler edged out Puckett 10 to 9. The winning pitcher was Chapman who gave up six hits while striking out 19 men. The losing pitcher was Crawford, who

gave up 10 hits, three of which went for round trips. Chapman, Burgess and Weatherman each got a homer. The tying run was on third when Chapman fanned the last hitter, to end the game. Lanier caught for Troxler while Bowers caught for Puckett.

In the third game M. Sarris defeated Hester 9 to 3. The winning pair was Chung and Sarris while Horan and Bradford were the losers. Chung held them scoreless and allowed only one hit for the first four innings. Hester's scores came in the fifth and seventh innings. There were two men on base at the end of the game.

The first game of the Co-op softball tournament is to be played at 1 o'clock, Saturday, August 12, on the O'Keefe high school athletic field. This game is between Martin and Hester.

The schedule for August 19, is: M. Sarirs vs. Troxler

Nettles vs. Puckett

Phillips—bye.

The schedule for August 26 will be determined by the results of these preliminary eliminations and will be announced later.

1950 Coaching Clinic Features Lectures on Football, Track

By Mert Wolenburgh

On August 14-19, Georgia Tech will be host to the Thirteenth Annual Coaching Clinic sponsored by the Georgia Athletic Association. Many coaches from all over Georgia will gather to hear lectures on football, basketball, track and athletic training.

The first session of the program will start with lectures on basketball and track. The lectures on basketball will be conducted by Henry Iba, "Coach of the Year" for the 48-49 season, who is coach of Oklahoma A and M. Climaxing the basketball portion of the program will be the All-Star basketball game at the Georgia Tech Gymnasium Wednesday night, August 16. The 24 outstanding Georgia cage stars representing North and South Georgia will be pounding the hardwoods for the last time before donning a college uniform.

The lectures on track will be given by Speck Towns of Georgia and Norris Dean of Georgia Tech. Between halves of the All-Star football game there will be a relay race matching the fastest foursome in South Georgia against the fastest in North Georgia.

Neely on Football

The second session will be entirely on football. The "T" formation offense will be covered by Jess Neely, coach of Rice Institute, and Bobby Dodd of Georgia Tech. Jess Neely last year led his team to the Southwest Conference championship, and the Cotton Bowl championship. Nothing need be said about Tech's own Bobby Dodd. Herman Hickman, coach of Yale, will lecture on defense. Hickman was an All-American lineman at the University of Tennessee. Last year as coach of the Eastern College All-Stars, he handed the New York Giants a 28-13 trouncing. Ray Graves of Georgia Tech will round out the program with lectures on line play, using Georgia Tech players to demonstrate. In 1947, when Graves became head

line coach, Tech ranked first on defense in the nation.

Highlight of the football program is the All-Star game between the South Georgia prep All-Stars and the North Georgia All-Stars. Each squad will carry 33 players who were selected as the outstanding senior performers during the 1949 season. The series now stands at a tie with three victories each and one tie. The game will be played at Grant Field, Friday night, August 18.

Tech Gets Fourteen

Fourteen of the players have accepted grants-in-aid to Georgia Tech. Names of the players who Tech students will probably see wearing the White and Gold uniform next season are: guards—Norman Campbell, Charles Hoper; tackles—Ed Carithers, Bob Doan, Harry Perkerson, Bob Sherman; ends—Henry Hair; backs—Gordon Malloy, Charles Brannon, Arthur Edge, Bobby Gilliland, Johnny Hunsinger, Courts Redford, and Pepper Rodgers. Many more have not signed grants-in-aid, but prefer to attend Georgia Tech.

Registrar Announces Policy for Handling Official Transcripts

Office of the Registrar

Within the past few weeks there has been an increasing number of requests by students for a transcript of record the same day it is requested.

We are anxious to cooperate but technical requirements of the photo lab make it impossible to do this. Records which can be photostated, if requested before noon one day, will generally be ready for delivery the following afternoon. If the record is on an old type card and the transcript must be typed it will take longer.

Requests will be handled in the order received and every effort will be made to expedite the work.

W. L. Carmichael
Registrar.
