

Primaries For Council Representatives, Class Officers Will Be Held Tuesday

Sunday's Band Program Features Vibraharp Solo

The Georgia Tech Band will be presented in concert Sunday afternoon, May 7, at 3 o'clock in the Tech gym under the auspices of the Student Lecture and Concert Committee. Admission is free, and all students, faculty members, and their wives or dates are cordially invited to attend.

Included in the program will be a varied selection of popular, classical, and band music. Opening the program will be Rossini's "Semirade Overture," followed by "Carnival Day in New Orleans," by Morrissey. "March of the Steel Men," by Belsterling will be performed next, after which Holst's "First Suite in E Flat for Band" will be played.

Next on the program is "Slavonic Rhapsody No. 2," by Friedemann, followed by "Rhythms of Rio," by Bennett; the march "Them Bosses," by Huffine; "Deep South," by Isaac-Lillya; and the march "Bandwagon," by Moore.

Special Selection

A special arrangement of the popular "Fiddle Faddle" will then be played on the vibraharp by Bill Brown, who arranged the music for the instrument himself. A junior in Ceramic Engineering, Bill, who plays all percussion instruments, is well known for his musical ability in professional circles in the Atlanta area.

The concluding numbers on the program will be the "Liberty Bell March," by John Phillip Sousa, and the "Ramblin' Wreck," by Frank Roman.

One of the highlights of the concert will be the presentation of the A. J. Garing Award, which is given each year by Kappa Kappa Psi, honorary band fraternity, to the outstanding graduating senior in the band. The award will be made immediately following the overture, by Bob Hutton, Kappa Kappa Psi president. Last year's award was given to Bob Bracewell; the winner for this year will not be revealed prior to the presentation ceremonies. A banquet for members of Kappa Kappa Psi will be held following the concert at 5:30 in the O.D.K. Banquet Hall.

Successful Season

This performance, which marks the last of the season for the Tech Band, save for a first appearance at commencement exercises on June 12, marks the end of a successful and very busy season for the group. In addition to playing for both home and out-of-town games during the football season, the band was featured during the Honors Day exercises during Engineers' Week, and also at the T-Day football game. In February they journeyed to Tampa, Florida, to participate in the giant Gasparilla Festival, winning very favorable mention for their performance in Tampa newspapers.

The present band captain is Jerry La Baw. Wallace Crook is first lieutenant, Bob Pickett and Bob Hutton are serving as second lieutenants, Bruce Jewett is the band's librarian, and Bob Vaughn is assistant librarian.

Directing the concert will be Mr. Ben Logan Sisk, who succeeded A. J. Garing as band director in 1946. In addition to his duties at Tech, Mr. Sisk is also active as band director for one of the Atlanta high schools.

DramaTech Offering For Spring Quarter To Be Held May 12, 13

By Alan Nacht

At 8:30 p. m. on the evenings of May 12th and 13th, the curtain will rise on DramaTech's spring production of "The Bishop Misbehaves" in the Spring Street Auditorium. Under the direction of Mary Nell Ivey the mystery-comedy features Dave Cumming and Millie Barber as the sleuthing bishop and his sister, Lady Emily. Tickets for the Friday and Saturday performances are available at the Administration building desk and from DramaTech members for \$1.70 each.

The English countryside is the locale of the bishop's amateur Philo Vance. Oddly enough, the criminals in "The Bishop Misbehaves" provide both the romantic and comic interests, while the bishop plays detective. An English pub is the setting for the first act, and the remainder of the play takes place in the bishop's home. This is the first time a DramaTech production has included a change of scene.

The cast includes Dave Cumming as the bishop, Frank McMillen, L. G. Bryant, Gordon Albury, and Frank Taylor as the thief and his henchmen; Tony Pellegrino as Mr. Waller, the victim; and Charlie Cooper as the bishop's servant. In her first stage appearance, Millie Barber will be seen as Lady Emily. Two girls from the Atlanta Division of the University of Georgia fill the other feminine roles in "The Bishop Misbehaves." Maria Priles in her first romantic role plays Hester, the thief's sweetheart, and Joyce Kalt, a native of Elizabeth, New Jersey, is seen as Mrs. Waller.

Registration Is Held For Evening School

All students who contemplate taking one or more subjects in Evening School this summer should pre-register now with the Evening School office in the Swann building.

Tentative schedules and pre-registration forms are now available at the information desk and at the Evening School Office.

Subjects offered will depend on the demand of the students as expressed in the pre-registration. Therefore, to assure the subjects being offered and at the hour preferred, students should turn in pre-registration slips immediately.

Pre-registration will close on May 13, 1950.

Ramblin' Reck Bids Due

Students who desire to apply for membership in the Ramblin' Reck Club may obtain application blanks at the desk in the Tech YMCA lobby.

New Vet's Regulation Is Released by Ajax

April 21, 1950

10035. Regulation concerning the pursuit on or after July 25, 1951, of courses of education or training under the Servicemen's Readjustment Act, is amended (Part VIII, Veterans Regulation No. 1 (a), as amended).—July 25, 1951, is a critical date in the education and training program under the Servicemen's Readjustment Act. Veterans who are eligible for education or training and who have not undertaken such training under the Servicemen's Readjustment Act, as well as those who have commenced but have not completed their course, may be vitally affected by the July 25, 1951, date. In order that all such veterans may be made fully aware of the importance of the date and of its effect on the education and training program, this regulation is promulgated at this time for the purpose of providing all such veterans with ample advance notice so that their plans may be made accordingly.

(A) This regulation applies to all courses of education or training pursued by veterans on or after July 25, 1951, under the Servicemen's Readjustment Act, as amended.

(B) The law provides that a course of education or training shall be initiated before the termination of 4 years after the date

Lucky Voters to Receive Awards Following Election

On Tuesday, May 9, primary elections for class officers and Student Council representatives will be held, with voting taking place from 8:30 a.m. until 5:30 p.m. Members of Alpha Phi Omega will supervise the polls. Balloting will take place in the lobby of the Administration building for all sophomore and junior elections, and for the senior class officer elections. Senior Student Council voting will take place in the various schools.

Each student is to cast as many votes for his class candidates as there are positions to be filled; results of the balloting will be used to narrow the field to twice the number of candidates as there are positions to be filled. Final elections will be held one week from the primaries, on Tuesday, May 16. Those elected will serve for one year, beginning September, 1950.

Voting Machines

As in past elections, voting machines will be used for all balloting. At various times during the polling as well as during the campaign speeches to precede the final contest, complimentary cigarettes will be distributed to voters. Chances will be distributed during both elections, those holding the lucky numbers to receive a handsome briefcase donated by the College Inn and a Phillip Morris "Treasure Chest"—an embossed leather case holding two cartons of cigarettes. These prizes are now on display in the Administration building.

Underclassmen who are successful in the primaries will be given the opportunity to address their classmates on Monday, May 15, in front of the Post Office building, with band

music provided between class sessions from five minutes before the hour until five after. Senior candidates will address their respective departmental societies.

Poster Regulations

Posters may be placed on any bulletin boards on the campus, but not on trees or buildings, states Election Chairman Ed Gothard. Utility poles in the immediate vicinity of the campus may be used, except for those on North Avenue. Only one poster of a given candidate may be placed on any one board or pole. Candidates are cautioned that anyone caught removing another candidate's poster will be disqualified. Posters of those candidates defeated in the primaries must be down by Friday, May 12, and posters of all candidates must be removed by Friday, May 19.

Deadline for submitting petitions is this afternoon, Friday, May 6, at five o'clock. An incomplete listing of those who have submitted petitions to run in the various races is as follows: in the senior Student Council elections, no entries have been received from the A.E. School; candidates from the School of Architecture are Julian Flexer, Dick Veenstra, and Ned Wilson; Ch.E., Ken Brown; C.E., John I. Bell, Jr., Chuck Ferrell, Bill Jett; E.E., Homer Killebrew; I.E., Bob Lee; L.M., Herbert Bradshaw, Bill Jones, Walker G. Miller, Brace Sams, and Mickey Sermersheim.

Schools Combined

M.E. candidates are Bob Kimzey and Ted Lachmann; Physics, Robert S. Congleton and Pete Moore; T.E., Bill Muse, Jack Sadow, and Gardner Wright. The schools of Ceramic Engineering, Chemistry, and General Engineering will be combined as a group in the elections, having one representative for the three schools. Petitions received at last report were those of Joe L. Pentecost and John O. Tinius, of the School of Ceramic Engineering.

Number of representatives for the different schools is chosen on the basis of the number of rising seniors; those schools having less than fifteen are combined, while those having from fifteen to seventy-five rising seniors are entitled to one representative, and those schools having over seventy-five, two representatives. Those schools which are entitled to two representatives are Ch.E., C.E., E.E., I.E., L.M., and M.E.; and those entitled to one are the schools of Architecture,

AEC Fellowship Is Awarded To Tolan for Physics Study

By Dick McClosky

John Harris Tolan, a graduating senior in the School of Physics, has been awarded an Atomic Energy Commission graduate fellowship in radiological physics for study at Vanderbilt University and the Oak Ridge National laboratory. Under the terms of the fellowship, John will receive all tuition, fees, and a stipend paid monthly at the rate of 2,500 dollars per year, to begin at the opening of the fall term at Vanderbilt University, Nashville, Tennessee.

At the close of the fall quarter and following the Christmas holidays, Tolan will report to the Oak Ridge, National Laboratories, Oak Ridge, Tennessee, for another six months of training. At some time prior to the completion of the fellowship, Tolan will also be eligible for an extension of the fellowship grant to enable him to complete the requirements for the master's degree in radiological physics at Vanderbilt.

Two Centers

This fellowship work is being conducted at two training centers, one at the University of Rochester, Rochester, New York, in cooperation with the Brookhaven National Laboratory at Upton, Long Island; and the other at Vanderbilt, in conjunction with the radiological laboratory at Oak Ridge.

The training programs at both centers will cover such topics as modern physics, consisting of a survey of the field of atomic physics, nuclear processes, fission, and transformations; radiation biology; radiation measurements, consist of radiation instru-

mentation, fundamental electronics, and practical problems in radiation; industrial hygiene and toxicology; and selected problems in radiation and radiological research.

John Tolan, who is from Milwaukee, Wisconsin, came to Tech after serving in the Army Air Forces, and while here has participated in many extracurricular activities, including Phi Eta Sigma, chapter president of Sigma Pi Sigma, Tau Beta Pi, Phi Kappa Phi, Omicron Delta Kappa, Callaway ISO, and Student Council. He has been named on the Dean's List for four years, and has worked as a research technician at the Tech Experiment Station. At present Tolan is a student assistant in the school of physics.

Prerequisite for selection of the fellowship candidates is an undergraduate degree in physics, or engineering, usually chemical or electrical, from an outstanding school in the country, although outstanding applicants with other equal qualifications will be considered. All fellows must be under 35 years of age, be able to present evidence of U. S. citizenship, and have full security clearance from the AEC, based on investigation by the FBI.

Presidents' Club Meeting Scheduled for Thursday

The next meeting of the OAK President's Club will be at the home of Colonel Blake R. Van Leer on Thursday, May 11, at 6:30 p.m. Dinner will be served outdoors. Presidents of all organizations should sign up and pay Mrs. Leveille in Dean Griffin's office before Wednesday, May 10, at 4:30 p. m.

Notice to Graduating Seniors

Seniors graduating in June or September, 1950, desiring to withdraw their drawings or Graphic Statics sheets should complete the form below and deliver to the Secretary of the Engineering Drawing and Mechanics Division not later than May 16, and pick up their drawings on May 18 from 1-4 p. m. No drawings may be withdrawn after May 18.

Tulane Scholarship Awarded at Tech

The administration of Tulane University recently announced the re-establishment of an annual tuition scholarship in the College of Law to be awarded to graduates of the Georgia Institute of Technology.

This tuition scholarship will be awarded each year to a student to be nominated by the President of Georgia Tech from among the current year's honor graduates. It is valued at \$350 per year and will be renewed annually through the period of graduate residence at the request of the holder maintaining scholarship rank under the standing regulations of the College.

Faculty Bulletin

Issued by Department of Public Relations

RECENT RULING BY BOARD OF REGENTS—The Board of Regents at its meeting held on April 12, 1950, recommended that:

"The employment of persons related to each other shall be discouraged. Immediate members of a family (those related within the first degree of affinity or consanguinity under the common law) shall not be employed in the same unit of the University System in a teaching, an administrative or a supervisory capacity."

This ruling is effective as of July 1, 1949, and does not affect personnel in the employ of the University System prior to that date. All persons employed after July 1, 1949, who are related as set forth in the amended by-law must be given immediate notice of termination of employment.

Please note that this ruling applies only to persons who teach or hold administrative or supervisory positions and does not apply to secretaries, clerical personnel, laborers, janitors, etc.

FACULTY CLUB—The annual meeting of the Georgia Tech Faculty Club will be held at 1:00 p. m., Thursday, May 11, in the ODK Banquet Hall. All members are urged to attend.

NEW BENEFITS IN INSURANCE POLICY—The Equitable Life Assurance Society of the United States recently announced that the group policy providing for hospital confinement and surgical benefits has been amended, resulting in the following liberalizations, effective as of April 1, 1950: (1) The minimum hospital confinement clause has been removed in regard to surgery or accidental bodily injury. (2) Payment of surgical fees for cutting operations will be made whether or not performed in a hospital. (3) The restriction has been removed on payment of charges incurred in a mental hospital by an insured member of a person's family.

FACULTY NOTES—Dr. A. J. WALKER, head of Department of English, was one of the judges of the Atlanta Journal 1950 Spelling Bee on April 29. . . . Dr. J. H. HOWEY, director of the School of Physics, attended the meeting of the Executive Council of the honorary physics society, Sigma Pi Sigma, with the Director of the American Institute of Physics in Washington, D. C., on April 26-27. He also attended the meeting of the American Physical Society in Washington on April 26. . . . Mr. HERMAN A. DICKERT, director of the A. French Textile School, will attend the Textile Machinery Exhibition in Atlantic City, New Jersey, on May 8-9. He will also attend the annual meeting of the Cotton Manufacturers Association to be held at Daytona Beach, Fla., on May 15. . . . Dr. R. L. SWEIGERT, Dean of the Graduate Division, and Dr. R. A. HEFNER, Dean of General Studies, have been re-appointed by President Van Leer to represent Georgia Tech on the Advisory Faculty Council of the University Center.

Tech Glee Club Plans Trip To North Carolina Saturday

The Georgia Tech Glee Club, under the direction of Mr. Walter C. Herbert, is once again taking to the road but only for a short journey this time. The choral group will leave here Saturday morning by bus for a trip to Canton, North Carolina.

About thirty-five boys are making the trip and they will come back to Tech on Sunday. The group will perform a concert which is sponsored by the Lion's Club of Canton. The performance will be open to the public.

Included in their program will be many of the songs which have been favorites of past audiences. Bob Hutton will give his song-and-dialogue

routine, "Pianologue," and a quartet will render a wide selection of songs before intermission.

One of the feature attractions of the concert will be a group of songs which will be sung by Janice McPherson, new soprano of the glee club. She has selected "Romance," "My Hero," and "The Little Damsel" as her three pieces.

The glee club appeared in concert here at Tech during Engineers' Week and sang at Russell High School on Thursday of this week. They have made several tentative plans for this summer, but as yet there have been no concrete preparations. Last summer the choral group made a tour of the Middle-Atlantic states and during the Christmas holidays they made a trip to Europe to sing at various service camps overseas.

ODK Applications Are Due

All juniors and seniors who believe that they are eligible for consideration for membership in ODK are asked to come by Professor Fred B. Wenn's office, third floor of Swann Hall before Friday, May 12 and fill out an application. Those who have already submitted an application this quarter need not submit another.

McDaniel Resigns from Position To Assume Government Duties

By Charles Dulaney

Professor James Erskine McDaniel, who has been the director of the Co-operative Division at Tech since 1927, has resigned in order to take a permanent position with the military government in Germany. He has been on leave intermittently since 1942 in the service of the government. Since 1948 he has been connected with the Educational and Cultural Relations Division, under the State Department.

Educated Abroad

Mr. McDaniel, who was born in South Carolina, received his higher education at Oxford University, the Sorbonne in Paris, and at the University of Berlin, where he held a fellowship. He became director of the Co-operative Division in 1927.

In 1945 Mr. McDaniel was appointed by the War Manpower Commission as the Director of Education and Training in the Southeast; he was maintained in that post until 1945. He returned to his duties at Tech, where he remained until March, 1948, when he was sent to Germany as an educational specialist. Last year he was promoted to the position of a deputy in the Division of Educational and Cultural Relations. Recently he was appointed as head of the educational system of one of five sectors of American-occupied Germany. He returned to Atlanta for a brief vacation in order to terminate his position at Tech.

Main Job

The principal task of American educators in Germany at the present time is to instill into the educational system methods more closely correlated to American ideas, to make a college education available to a wider range of young people who in the past have been unable to obtain such an advan-

tage for financial or special reasons. The agency with which Mr. McDaniel is connected is also in charge of the promotion of libraries, art, and music in Germany, where artistic developments have long been under the direct control of the German government; therefore for the past two decades there has been little cultural progress which has not been devoted to nationalistic ideals. Professor McDaniel will be responsible for the rehabilitation and Americanization of a large part of the German educational and cultural systems.

NROTC Midshipmen To See the World On Summer Cruises

With the summer approaching, Georgia Tech NROTC midshipmen will look forward to many and varied cruises to all parts of the world, according to Captain Joseph Adams, Jr., commanding officer of the unit.

The present freshmen regular midshipmen, along with five juniors, will find themselves basking in the sun along Waikiki Beach at Honolulu, at the same time witnessing the scenic beauty of the Hawaiian Islands. Their cruise begins June 19 and ends July 30, and they will visit such west coast ports as San Francisco and San Diego, California.

The present sophomore regular midshipmen travel to Little Creek, Virginia, July 8 for amphibious training and then journey to Pensacola, Florida, for training in Aviation. Their training will end August 19.

The present junior Marine Corps (Continued on page 8)

Candidates—

(Continued from page 1)

Physics, and Textile Engineering.

Applicants for senior class officer posts are John R. Hammond and Buddy Shields. Aspiring to junior class officer positions are Ken Farmer, Roland Holt, and Moon McKenzie.

Candidates for junior council representatives, from whom seven will be elected, are Gordon Albury, Elliot Dunwoody, Duane Franklet, Marshall Graham, Donald M. Hartman, G. Paul Jones, Ray Kennedy, Paul Liberman, Jim Perkins, Randy Seckman, and Harold A. Valery.

Sophomore class officer candidates are Ben Bishop, Richard Clement, Pete Dunlay, and George Morris. Council candidates for the sophomores, of whom five will be chosen, are Eric Crake, J. Dean Davidson, Tommy Kirkland, Ken Lundburg, Harold McKenzie, James R. Patrick Jr., Conolly Phillips, Pete Silas, and Jim Smith.

In the event no more petitions are turned in than twice the number of positions to be filled in any given race, the primary election will not be held, and those candidates will compete in the finals only.

Those eligible to vote are rising sophomores, juniors, and seniors; that is, those who now have "freshman," "sophomore," or "junior" on their student I.D. cards.

Other Colleges Say—

Do Feminine Wiles Change As Father Time Plods On?

A feature writer of the Oklahoma Daily probes into a social guide of 1888, "The Social Mirror" and comments, "A glance at this social bible makes one conclude that a woman must have been very unladylike to have ever been able to snare a man; and have a good time, as the present generation knows it, was a thing nice girls didn't do."

The book of etiquette explains that a young lady would not attend parties and balls while engaged in educational pursuits. Sending a girl away to school is inviting trouble. "To suffer our young and immature children to pass out from under home care and its influence just as they have reached that most critical period when they are most susceptible to evil teaching, is a fearful experiment," according to "The Social Mirror."

As for manners of conduct, the author states that it is not good taste for a young lady to dance every time. Also, a lady should not run across the street to escape an approaching vehicle. She terms such action as dangerous and inelegant.

* * *

A Spanish instructor at the University of Kansas reports twenty-two students and one dog in his eight a.m. class. Recently the dog's owner was absent but the dog arrived to sit in his usual place at the foot of the empty chair. He wasn't observed to take notes but the Daily Kansan won-

ders if "he will explain to the absentee 'Wha' happened' during the session."

* * *

The Indiana Daily Student reports that members of advanced reporting class visited the City Hall and police department last week as part of their editorial education. They listened to a detailed discussion on the workings of the parking meters. On walking out of the building they found that one of their parked cars had been tagged for parking meter violation.

What price journalism?—\$1.00.

* * *

"The average newspaper reader in Europe knows what goes on in the United States better than many American readers know what is happening in Europe," says the University Daily Kansan reporting Dean Keanth E. Olson, Medical School of Journalism, who addressed the Inland Daily Press Association in Chicago.

Dean Olson, who visited Europe in 1949, said that the press of Europe is a more serious press than the press in the United States.

"In Europe the papers," he said "carry much more foreign news and much more background of the news than our papers. Europeans can't understand why Americans shock their readers with crime, divorce, and the extra-curricular affairs of prominent persons."

Officers Announced By Table Managers

The Table Managers' Association recently held the election of new officer for the remainder of the year. They are as follows: president, Ernest Scheller; vice-president, Klaus Mellenheimer; secretary, Albert Chaiken; and treasurer, Radford Adams.

The next regular meeting of the F.M.A. will be held on Monday, May 8, at 7:30 p. m. at the Phi Kappa Sigma fraternity house.

WHY SPIRIT IS LACKING

The early week absence of bulletin boards is disappointing.

In many oft-printed words both on these pages and on the pages of other campus organs, we have tried to encourage as well as instill some semblance of spirit in Tech's student body. We realize school spirit is at a low level on the campus due to the metropolitan location and the scattered living places of many students. Despite these obvious disadvantages, however, there are a few campus functions and campaigns which do arouse the spirits of many students. Probably one of the most vital and far-reaching of these functions, excepting, of course, action on the gridiron, is the annual election campaign for candidates to student government and class officer positions.

The Student Council, through its Elections committee, does a considerable amount of work each year providing for candidates petitions, supervising the elections, weeding out unqualified candidates and handling the many and sundry little details that customarily arise in a project of this nature. Under the able leadership of chairman Ed Gothard, the committee has performed admirably.

As we all know, much of the spirit in our campus elections arises from posters placed throughout the school area. In past years, candidates have entered into strenuous competition with each other in the printing and design of the posters and in the placing of these posters in the more prominent spots on the campus. Naturally, it is the aim of every candidate to put as many of his posters as possible where the greatest majority of his classmates can see them.

Thus he will be able to attract the attention of these constituents and thereby receive many more votes toward his possible election.

This year, when election plans were formulated, it was agreed by the committee to delay the placing of bulletin boards and posters on the campus until immediately after Engineers' Week so as not to detract from the glamour of the week's activities. Mr. Jenkins, the Superintendent of Buildings and Grounds, was notified last week of the election plans and agreed to have the bulletin boards put up Monday morning in order that the candidates would have at least a week before elections to display their posters. Came Monday morning and no bulletin boards were seen. Tuesday morning and afternoon arrived and passed on yet still no boards were seen. It is thus easy to imagine the apprehension and disappointment of chairman Gothard when still on Wednesday morning, no poster boards were in evidence.

A hurried check Wednesday with the office of Dr. Van Leer and that of Dean George Griffin resulted in a call to Mr. Jenkins which brought about the desired results and the bulletin boards were on the campus later Wednesday morning. Why, we ask, was it necessary for administrative authority to call on Mr. Jenkins before the election requests could be carried out? We realize that Buildings and Grounds tries to cooperate in every way with the student body yet is indeed difficult to try to understand cases such as these.

—LSF.

FOR ONLY A QUARTER

... we can take part in halting excessive government spending.

Editor, The Technique
Dear Sir:

Do you want to know the best way to wreck the Cold War? Or tear down the iron curtain between every country on the face of the earth? Are you one of those students who always jeers "what can I do about it?" If so, you should finish the rest of this article!

This year the U. S. Government plans to spend 25 billion dollars defending this country by means of the defense bill, Marshall Plan Aid and the armament proposal. It is going to come out of your Parents' pay check, your salary or allowance or out of that attractive salary you have been offered when you leave here. Would you like object to its use, without damaging its work?

You CAN and here's how!

Ask any psychologist or economist about the world situation and he will always come back to the fact that the college students of today are the citizens-in-charge of tomorrow. What better way to join the world in one union that to link the students of every country?

Here is where the quarter comes in!

At a quarterly cost of 25c, paid with your tuition, you can STOP government spending in these enormous proportions in the next few years. It is your most powerful vote or veto! For 1/4 of dollar per quarter or a total cost of \$.75 a year you can help support completely, 5 foreign students. Realize the importance of this move. Five student ambassadors thoroughly SOLD on the U. S. each year or, if desired, each quarter. If each school of the U. S. organized such a campaign, one foreign student for each 1,000 on enrollment, we could have over 2,500 students learning about America and Free Enterprise first hand.

Moreover, how many of you would like to go to Stuttgart Tech for a year? It might be arranged by a similar operation.

You who have been hollering, "what can I do?", take heed: This plan can be had by letting your campus representative know your desires. Will you pay 75c a year to decrease your taxes by 60% in the next few years and most important end the threat of WAR!

—William C. MacPherson.

BACK ROADS ACTIVITY

Connecticut coeds complain for lack of campus necking spots.

"It would seem the UConn is establishing a 'Social Socialism' for women—there is no 'free enterprise' in social relations."

This is an excerpt from a letter to the editor in which a coed charges that prudish Victorian social practices are returning to the Connecticut campus. She attacks the decision of the guidance council that the dorm women bring their dates into the main lounge for their "good nights." The council's edict states, "This is to be a brief farewell!"

"We are in an educational, not a correctional, institution," the student charges.

"We can expect at any time . . . to start having our farewells timed by an authority with a stop watch who will look, watch, and wonder . . ."

Many of the UConn women have wondered as to the consequences of these directives and have even suspected them of "forcing normal relations of men and women into the underground."

"If this perfectly normal, natural conduct is not in some way provided for at the girls' dorms, it will be seen on the back roads increasingly," the author concludes.

—The Connecticut Campus.

Tuesday Is The Day

... to visit the polls and vote for campus government candidates.

Once again this coming Tuesday, the students of Tech will go to the polls to cast their ballots for candidates to Student Council and class officer positions. To date the number of students turning in petitions from the various campus departments has been very low with some departments having barely enough candidates to fill their number of seats. No petitions have been received from the Aeronautical Engineering department and only one is in prospect from the Chemical Engineering department. In fact, of three senior class offices for the class of 1951, only two petitions have been received.

We express much bewilderment at the complacency of the student body. Of a strength of nearly five thousand students, it is truly hard to believe that only slightly over forty have expressed any desire to participate in campus government. That means that the great majority of candidates for the thirty-seven possible positions will have no opposition at all in their election contests. Certainly this is not a democratic method of running student government.

Perhaps many students are in doubt about the duties of Student Council members and class officers. We will agree that many long hours are spent in meetings and much time is spent in working with committees. Yet no one will deny that it is a campus honor to be a member of the governing body and to have a voice in the affairs of the institute. A council member learns to deal with administrative authorities, to fight against actions he feels detrimental to the student body, and to work with his fellow students. More than that, he knows he is the representative of his

department and that his fellow classmates have placed their trust in him to carry out their aims. If many of the students would survey the situation in a similar manner, it is not hard to imagine a flood of petitions for every available post and office.

Present plans indicate great interest in the coming elections and we trust that every student will feel it his duty to cast his ballot in the primaries this Tuesday. As in past elections, voting machines will be used and sophomore and junior students will vote in the lobby of the Administration building while rising seniors will vote in their respective schools. To further aid in encouraging students to vote, chances will be given with each ballot cast and the prizes will be an attractive briefcase and a Treasure Chest of Phillip Morris cigarettes. Tentative arrangements are being made to add a suit of clothing to the prize list but no final decision has yet been made.

To refrain from voting in these elections is virtually unpardonable. We realize that there may be some extremely extenuating circumstances on the day of balloting to prevent voting early, but as the polls will be open until 5:30 p.m., it does not seem possible for a student to neglect spending a few minutes from his daily routine to participate in these elections. Citizens in many totalitarian nations would part with many worldly goods if they were offered the opportunity of electing their leaders. All we are asked to sacrifice is time. Let's be sure to come to the polls and vote sometime Tuesday. We only cheat ourselves if we do not.

—LSF.

"Water Actually Flowed"

A reader disagrees with the trend for future Engineers' Weeks.

May 3, 1950

Editor, The Technique

Dear Sir:

There was, in Tuesday's issue of The Technique, an editorial by Lenny Frieden reviewing the festivities involved during Engineers' Week. In his description of the exhibits at the Hall of Engineering, Mr. Frieden seemed very impressed by the Civil Engineering exhibit of the model of Allatoona Dam in which, "—water actually flowed . . ."

The C.E. students, in the research, planning, and construction of their exhibit must have put in as much time, effort, and brainwork as the rest of the exhibits combined; and produced a very pretty picture which impressed Mr. Frieden, myself, and everyone else who viewed it. Mr. Frieden then said that in the coming years every school will be encouraged to plan an exhibit especially designed for Engineers' Week, on the idea of this year's C.E. exhibit. Does that mean that future exhibits will be made up of pretty pictures, interesting laboratory curiosities, and finished products, or will it remain an explanation of problems involved in the design of a product and how those problems are overcome. The judges, four real live engineers seemed to think that the latter was the idea.

Oh, by the way Lenny, while " . . . trans-

porting laboratory equipment . . ." over to Crenshaw Field house, the M.E. students tried like hell to move the Cupola over too, but the darn thirty-foot-high furnace wouldn't budge, so how in the heck did you see any " . . . actual casting . . ." being done in the M.E. exhibit. During the next Engineers' Week go over and look at the M.E. exhibit. If you don't understand what's going on, the fellows there will be glad to explain it to you.

—Arthur L. Bernstein.

If reader Bernstein will only take time to confer with Mr. Wayne Coloney, the chairman of Engineers' Week, 1950, he will learn considerably more about the expected trend of exhibits in future years and that the Civil Engineering project was the type of exhibit that is to be encouraged in the future. As for the apparent misnomer of "casting", we merely imagined that at some time during the exhibit, perhaps for the judges, metal was poured in the mold so aptly made by the M.E. students present.

The assumption was only made because of a brief exposure to an electric furnace in the foundry which heats metal to quite an adequate pouring temperature. Even "students who don't understand" cannot be accused of expecting the M.E. students to move their trusty thirty foot cupola.

—LSF.

TECHNIQUE PLATFORM:

1. Student voice in matters of student interest.
 2. Encouragement of school spirit.
 3. Better orientation and vocational guidance.
 4. More participation in the intramural sports program.
 5. Promotion of active campus organizations.
 6. Erection of an adequate library.
 7. Erection of a Student Union Building.
- The Technique will at all times attempt to represent the best interest of the students in current discussions and controversies.

Candidates Issue Campaign Platforms

In continuing its policy of supporting campus elections, The Technique presents in succeeding paragraphs the platform of candidates for election in the May 9 primary. Also, The Technique will publish a special election issue on May 16.

CLASS OFFICERS

Senior

JOHN BELL

Promises made before an election are seldom carried out. With this in mind, I will not make promises other than the following:

I will carry out the duties of Student Council representative to the best of my ability.

I will strive to carry out the wishes of the students in the Civil Engineering School.

HERBERT BRADSHAW, JR.

In announcing my candidacy for Student Council representative of the School of Industrial Management, I do not wish to present a platform of elaborate promises. My only intention, if you chose to elect me, is to serve as best I can and try in every way and on every issue to let my vote be dominated by the opinion of the student body.

I served this year on the council as a representative of the junior class and I feel that I have a knowledge of the operations of the council that will enable me to properly carry out my duties.

Junior

VERNON ELLIS

If elected to represent the Junior Class on the Student Council, I will try to fulfill the obligations involved to the best of my ability and with utmost sincerity.

DUANE FRANKLET

I propose to fulfill the obligations of Council Representative for the Junior Class. I also will endeavor, to the best of my ability, to meet the problems that will arise during the ensuing year, and further the interests of the Junior Class.

MARSHALL GRAHAM

In announcing my decision to run as a candidate for Junior Student Council representative, I wish to state that I intend to make no wild promises. The Student Government has long been recognized as a constructive adjunct to the school and there is no need to enlarge upon the duties and functions of the Council.

To list a tangible list of goals would be promising something which I may not be able to fulfill, so I pledge myself to always think of the effects

upon the junior class of any decisions which I have to make. In the event of a major issue, I will conduct a poll of the juniors and cast my vote in accordance with the will of the majority.

Quite frequently, representation of a particular class is not very good because the member does not state the opinion if his class about an issue. I will be straightforward in all opinions that I give and I hope to reflect the feeling of the majority of the class. I will appreciate your consideration at the polls on May 9 and May 16.

PAUL JONES

If elected to the Student Council, I will endeavor to serve the student body to the best of my ability and with their best interests in mind.

BILL KENNEDY

In running for re-election to the Student Council, it is very hard to write a platform of plans for a predicted future. Therefore, I would merely like to state that my platform is to attempt to better what I have done over the past two years. I hope to see the completion of a better and more helpful Purchase Card system next year.

To actually represent such a large group of college students is also a difficult task; however, I will do my utmost to do as good a job as is humanly possible if chosen as one of the representatives from the junior class. I will appreciate the vote of all those who see fit in so doing.

RAY KENNEDY

If the rising junior class sees fit to elect me as one of its representatives on the Student Council, I will endeavor to serve to the best interests of the junior class and the student body.

I can make no promises until I find just what the council can and cannot do.

PAUL LIBERMAN

I think the following points to be important to Techmen next year, I favor:

- 1—Stricter attendance rules for Student Council meetings.
- 2—More work for class officers—or abolishing of officers, excepting seniors.
- 3—Immediate establishment of central organizing body for all student activities.
- 4—Departmental recognition for extra-curricular work.
- 5—Return of graded quizzes to students in all departments.

Point 3 was on my platform last year; the plans are completed, but they may not be put into practice this quarter.

I'll be glad to discuss any matter, whether on this limited platform or not. Vote carefully for able representatives — remember the dining plan incident.

Sophomore

DAN BLITCH

If re-elected as your Student Council representative, I will:

- (1) Represent the best interests of the sophomore class.
- (2) I will support better relations between the student council and the administration.
- (3) I will secure the opinions of as many of you as possible before voting on any issue which I think will affect our class as a whole.
- (4) I will remain in the student council office at least two scheduled hours each week to discuss any complaints or kicks about student activities which you would like brought up before the council.

DEAN DAVIDSON

If elected as sophomore Council representative I shall support the following issues:

- (1) Continued co-operation between the administration and the Student Council as the representative of the students.
- (2) I will always try to express the feelings of the class as a whole rather than expressing my own personal feelings.
- (3) I will support the issues that will benefit the class as a whole and will benefit the individual members of the class.

HAROLD McKENZIE

First of all, I would like to say that I do not intend to fill my campaign with futile promises. I believe that the average student wants a representative who is sincere, has the welfare of his fellow students in mind at all times, and realizes that, as a member of the Student Council, he must use persistent initiative and strong determination in every undertaking.

A student who has the honor of be-

ing chosen by his classmates should give of the utmost of his time and efforts to accomplish anything that is for the betterment of the facilities and activities at Georgia Tech.

JAMES PATRICK

If elected:

I will consult members of my class about important motions brought before the Student Council. I will express the opinions of my class at the meetings, and vote as my class wishes me to vote.

I will make my box number known to members of the class so that they may write to me about any complaints or problems. Any complaints received will be presented to the Student Council at the following meeting.

I will be available to discuss with any class member, any problem which he wishes to have submitted to the Student Council.

STUDENT COUNCIL

Senior

JOHN HAMMOND

I promise you service but I also promise some results to go along with it. I will represent the Senior Class faithfully on the Student Council, keeping in mind your needs and desires. I will be available at all times for suggestions and criticisms on things that are being operated here on the campus that affect you.

Junior

KENNETH FARMER

Fellow classmates, if elected president I will faithfully adhere to the following duties of the Junior Class

Presidents:

- (1) Regularly attend weekly Student Council meetings.
- (2) Regularly attend monthly Student Executive Committee meetings.
- (3) Attend the called meetings of the Georgia-Georgia Tech Better Relations Committee.
- (4) Remain in the Student Council lounge, fourth floor of the Administration building, at least one scheduled hour each week in order to talk over with you any gripes or suggestions which you might have.
- (5) Serve on the Ring Committee for the 1952 rings.
- (6) To represent the best interests of my class in any matter in which I have any voice.

Third Street Closed

Third Street will be closed from the C.E. building to the Physics building corner, beginning Monday, May 8, through the remainder of the week. The passageway by the Chemistry building and Power Plant will be open to one-way traffic as an entrance only.

Robby Robinson Wows Crowd With Unusual Backhand Pass

By Eric Crake

Robert "Robby" Robinson, who stands 5 feet 11 inches and weighs 175 pounds, created quite a stir of excitement when he fired his backhanded pass across Grant Field last Friday night in the T-game. The pass carried some twenty-five yards in the air and was eagerly grabbed by the waiting arms of end Dick Harvin.

Robby was born in Beverley, Massachusetts, on March 27, 1929. He attended Beverley High School and participated in five sports. Football, basketball, baseball, track, and golf took care of his high school athletic career. Robby ended his high school career by capturing an all state berth in football his senior year. He also collected a one thousand dollar scholarship his senior year at Beverley for his high school athletic activities. This scholarship is awarded annually to the best all-around athlete at that school.

Entered Missouri in 1947

After Robby left high school he attended Tilton Prep School in New

Hampshire where he played on the football squad for the 1946 season. In 1947 he moved to the University of Missouri where he participated in freshman football. The next year he was promoted to the varsity and played a lot of ball for the Tigers. Robby pointed out the Navy and S. M. U. games of 1948 as his biggest thrills. He played a lot against Navy as Missouri downed the Middies 35 to 13. Missouri's 20 to 14 victory over S. M. U. was the only loss that the Ponies suffered that year. At the end of the 1948 season Missouri was invited to play Clemson in the Gator Bowl. Robby's kicks, one that rolled out on the six yard line and the other that rolled out on the three inch line, added to the exciting ball game that resulted. Missouri was edged by a count of 24 to 23.

Entered Tech Last Fall

Robby enrolled at Tech last fall and spent his year of ineligibility on the Tech B team. During spring practice he unveiled his famed backhand pass. He credits this ability to his high school basketball career. Robby could pass a basketball behind his back fairly well and this led him to a football backhand pass. He kept enlarg-

ing on his accuracy and distance until he had the pass fairly well perfected. His former coaches didn't seem to realize the potentiality of this amazing ability. Coach Bobby Dodd was quick to give Robby a chance to show his wares. Robby's booming kicks in last week's T-game were shoved into the background by his other talents. Next fall will complete the tale of Robby Robinson and his backhand pass.

Newmanites Take Four Games; Cop Campus Softball Spotlight

By Lew Levenson

With the first part of the week plagued by rain, a number of games were forced to be cancelled and other arrangements made for the games to be played off. Delta Tau Delta and Tau Epsilon Phi passed out rain checks, as did Pi Kappa Alpha and Kappa Sigma. Sigma Chi and Sigma Alpha Epsilon also canceled their game, while Phi Kappa Tau won on a forfeit over Delta Sigma Phi. Phi Kappa Tau made plans for a make-up game with Sigma Phi Epsilon next Sunday.

In the Yellow Jacket League, Phi Sigma Kappa announced their withdrawal from the league, with the result that Tau Kappa Epsilon and Theta Xi racked up one win apiece due to forfeit. The Newman Club took a 21-5 win over Wesley Foundation, plugging Bill Nicolini as their pitcher.

ATO's Score Shutout

Alpha Tau Omega outplayed, out-hit, outpitched, and outfielded Kappa Alpha for a 12-0 shutout. Bob Sharp pitched for the ATO's and chalked up the win. Jinright was the losing hurler for the KA's. High spot of the game occurred in the fourth inning when Reynold Posey clouted a home run for ATO bringing in two men. ATO garnered five hits in that one inning.

Putting in another man from their well-stocked pitching staff, the Newman Club triumphed over the IAS 13-5. The Newman Club fielded a close-working infield that made three double plays. Al Brevetti took pitching honors Monday for the Newmanites.

Base League Playoff

The Co-op Club fell prey to the battery of pitchers put up by the Newman Club, 17-5. Jack McGee played havoc with the Co-op batters with his fast fall specialty. Still showing a tight infield, the Newman Club made two double plays. To tie the Navy ROTC for the league lead, the Newman Club beat the NROTC 10-5. Clem Grella topped the mound for this game. There will have to be a playoff for the Base League championship Sunday.

First Loss For Vanderbleek

Mighty Jack Vanderbleek finally had to rack one up in the losing column for his pitching record for Delta Tau Delta as they lost to Pi Kappa Alpha, 7-1. Sam "Swish" Young gets the pitching honors this time, as he lived up to his name and swished the balls by the Deltas so fast they couldn't hit them. Young pitched a three-hitter in a steady game. There were no outstanding plays during the

Fencers Meet in Crenshaw

The Foil and Mask Society has announced that meetings in the future will be held in Crenshaw Field House on Tuesdays at 7:00 p. m. and on Thursdays at 4:00 p. m. The evening period on Tuesday is expressly for those men who have been prevented from fencing by 3 to 6 lab periods. Visitors are welcome to attend meetings and use the fencing equipment.

game, but a steady stream of short hits that took the PiKA's around the bases seven times. Beta Theta Pi lost to Chi Phi's Charlie Perkins' pitching by the score of 15-5.

Carolina Cindermen To Meet Engineers On Grant Field Oval

By Gene Lorenz

Tomorrow afternoon at Grant Field, Tech engages the University of North Carolina in the second home track meet of the season.

The Yellow Jackets started off their 1950 conference schedule with a narrow win over Florida at the Flats and then dropped two close meets to Tulane and Tennessee on successive Saturdays. Last weekend the Georgia Bulldogs bowed to Tech's cindermen at Athens, thus giving the Jackets a two won — two lost record.

Tarheels Have Much Power

Tarheel track coach Dale Ransom is bringing a powerful squad to Atlanta for this non-conference encounter. Perhaps the most versatile and dangerous man North Carolina has is five-event man Bob Albans. Prevented by an injury from competing last year, Albans now runs both the high and low hurdle events, performs in the high and broad jumps, and is a capable dashman on the side.

Another North Carolina entry, last year's Southern Conference javelin throw champion, Bob Kirk, also set a new Florida Relays record in that event this spring. Bob House, runner-up to Kirk in the conference javelin event, is also back again this year.

Halstead Holden, 1949 Southern Conference half mile champion with a time of 1:56.7, will be here tomorrow.

Three more boys from Chapel Hill who did well in their conference meet last year are running for Coach Ransom again this season. William Crimmins copped second place in the 100 and in the 220 yard dashes. Bob Morrow grabbed a second in the 220 yard low hurdles and a third in the 120 yard high hurdles. Jack Moody took third place in the broad jump with a leap of 22-11 7/8.

Tough Foe For Jackets

With such an impressive array of proven performers to compete against, Tech's thinclads under head coach Norris Dean and his assistant, Coach Tommy Plaxico, have a tough foe on their hands. Yellow Jacket hopes lie mostly in the field events and the distance runs.

In 1947, North Carolina eked out a close 66½-64½ triumph over the Engineers. That beating at the hands of the Tarheels was the last one the Jackets suffered before they ran up a fifteen straight dual meet victory record. Tulane halted the Jacket string three weeks ago down in New Orleans. Last year at Chapel Hill, Tech's Southeastern Conference champions toppled the Tars, 69-62.

Tech Meets Tiger Nine On Rose Bowl Diamond

**Buddy Thompson Likely Starter Today;
Final Battle of Two Teams Tomorrow**

By Bert Edleson

Coach Joe Pittard will send his Yellow Jacket nine against the Auburn Tigers this afternoon in hopes of getting back into the win column of the ledger after three defeats on the road last weekend. The first game is scheduled for four o'clock this afternoon on Rose Bowl Field. These same two teams will meet again tomorrow afternoon in the second game of the current series.

Buddy Thompson has been nominated by Coach Pittard to face the Tigers this afternoon in the first game, and Jimmy Hale will go against the Plainsmen tomorrow afternoon.

Earlier in the season the Jackets and the Tigers split a two-game series down in Auburn, the Tigers taking the first game 9-5 and the Jackets evened it up with a 9-8 win in the second game.

In the first game down in Auburn, a four run rally by the Tigers in the eighth inning broke up a tie game and gave the Plainsmen their first conference win of the 1950 season. Since that time the Alabamians knocked off the high-flying Georgia Bulldogs for the first loss the men from Athens suffered this year.

In that second game down in Auburn, Buddy Thompson turned in one of his best games this season, and coupled with Bob Bossons' great hitting, managed to get revenge on the Tigers.

This will be the last chance for the Jackets to get warmed up for their coming four-game series with the Bulldogs. The Bulldogs have been hot this year while the White and Gold team has run warm and cool. But as is always the case when these two teams meet, anything can happen.

Meeting Monday

On Monday, May 8, at five o'clock sharp, a meeting will be held in the gymnasium for the purpose of organizing a Red Cross Water Safety Instructors course. Coach F. R. Lanoue has announced that anyone interested in this course must be at the meeting. Only those attending the meeting will be permitted in the class.

Yellow Jacket Netters Triumph Over Emory In 9-0 Clean Sweep

Georgia Tech's tennis team trounced the Emory University netters 9 to 0 last Monday at Peters Park.

The victory marked the third win of the year against six setbacks for the Jackets. Tech's netters completely dominated the playing as they swept to victory in all of the matches. The courtmen lost only one set in six singles and three doubles matches.

Completion Days Set

Louis King, Tech's number one courtman, encountered some very stiff opposition from Emory's Jack Haldi but defeated him by winning two of the three sets played.

Jacket Ed Van Winkle defeated Bill Yon 6-0 and 6-2. Tom Graham captured a very close match from Gene Caverly 6-3 and 10-8 with the last set being quite a see-saw affair.

Six Flights In Golf

Don Ferguson of Tech nosed out Mario Soto 8-6 and 6-1 while Emory's Tom Johnson was being subdued by Traylor-Thieson 6-1 and 6-1.

Tech's Don Lyles dealt a sound 6-0 and 6-1 trouncing to Ellis McClellan in the final singles match of the day.

In the doubles competition Graham and Ferguson of Tech, teamed up to defeat Haldi and Yon. Louis King and Lowery Bell combined their efforts to annex a victory over Soto and Johnson 6-0 and 8-6.

The pair of Thieson and Lyle climaxed the Jacket triumph by winning their match with McClellan and Mansfield.

Intramural Tournaments For Golf and Tennis Are Now Underway

By Lew Levenson

Play has commenced this week in the intramural tennis and golf tournaments. All first round matches must be completed by Monday or else both competitors will be struck from the listings and play continued without them.

King Opens With Victory

Second round matches in the tennis tournament must be finished by the fifteenth of May; third round matches by the following Monday; fourth round matches by Saturday, May 27; fifth round matches by Thursday, June 1. Finals in tennis will be played by Monday, June 5. Contestants have the privilege of playing on any court they can secure for the match, provided it is satisfactory to both contestants.

There are six flights of sixteen men each signed up for the golf tournament. The first round matches must be reported by Monday, May 8. The second round results are due one week later. May 22 is the deadline for the third round and the fourth and final round will be played off by May 29.

To Compliment

Rifle Team Finishes Season

—Photo by Cooper and Cleare.

Tech's 1950 Army ROTC Rifle team which compiled one of the best records in many years of intercollegiate competition has completed its schedule with the firing of the National Intercollegiate Championships. The team is composed of the following men: Front row: Marchetti, Hagler, Raynes, Giometti, Rainwater, and Slider; Second row: Williams, Ladner, Sebastian, Rigney, Jones, and King; Back row: Lind, Davenport, Motz, Peck, Tatum, and M/Sgt. Dixon, team coach.

Midshipmen—

(Continued from page 3)

students, contract and regular, will take training at Quantico, Virginia, in June and July. All other present junior midshipmen will make cruises with ships of the Atlantic Fleet. The contract midshipmen will make a three-week cruise and the regulars will serve as junior officers on many Atlantic Fleet ships, thereby gaining practical experience as well as traveling.

One sophomore regular midshipman will take training in the Civil Engineering Corps of the Navy at a summer surveying camp in southern Ohio.

Veterans Notified—

(Continued from page 1)

of discharge or by July 25, 1951, whichever is the later, and that such education or training cannot be afforded beyond July 25, 1956, except for those veterans who enlisted under the Voluntary Recruitment Act of October 6, 1945. Therefore, a veteran otherwise eligible must have commenced and actually be pursuing his course of education or training on July 25, 1951, or the date 4 years after discharge, whichever is later, except where his attendance is interrupted because of the normal interruptions for

summer vacations, or other reasons beyond the control of the veteran.

(C) A course of education or training shall consist of such curriculum, program of study or training, or combination of subjects as are prescribed by the institution as constituting the course. When the veteran elects his course of education or training, is accepted by the approved educational or training institution as qualified to undertake and pursue the elected course, and commences such course, he shall pursue his course of education or training continuously until completion, except for conditions which normally would cause interruption by any student.

(D) A veteran may change his course of education or training only while in training and then

for reasons satisfactory to the Administrator. A change of one or more subjects in the elected curriculum or program of training, including the dropping of a subject without replacing it with another, or the adding of a subject, or a change in the sequence in which the subjects are undertaken does not constitute a change of course of education or training. Advancement from a basic or preparatory phase to an advanced phase within the course of education or training which the veteran is pursuing does not constitute a change of course.

(E) A change of course of education or training may be considered to be for satisfactory reasons when:

(1) The veteran is not making satisfactory progress in his present course and the failure is not due to his own misconduct, his own neglect, or his own lack of application; or

(2) The course to which the veteran desires to change is more in keeping with his aptitude, previous education, training, or other such pertinent facts; or

(3) A course to which the veteran desires to change, while not

a part of the course currently pursued by him, is a normal progression from said course and will enable him to attain his educational or vocational objective.

No additional changes of courses of education or training will be approved except for the most cogent reasons.

(F) When the veteran completes his course of education or training as defined above or discontinues his elected course of education or training, the law does not permit the initiation of another course of education or training.

—Fred W. Ajax,
Coordinator of
Veterans Administration.
