TUESDAY TALKS

Georgia Tech Faculty Speaker Series

Making Computer Science 101 Fun with Robots

Abstract:
We're trying an experiment here at Georgia Tech: We're teaching freshmen Computer Science 101 (CS 1301 to be exact) with personal robots. Every student has her own robot to take home and work with. All the fundamentals of CS are taught in the context of programming a mobile robot with sensors, motors, a camera and a speaker. During this talk I will report on our success with this approach.

TUCKER BALCH

Associate Professor
Interactive and Intelligent Computing

November 6, 2007

2:00-3:30pm

Neely Lobby

refreshments

Library and Information Center

Tuesday Talks is a series of lectures sponsored by the Georgia Tech Library featuring research by Georgia Tech faculty presented for the rest of us...

Research for all of us
