

## Tech Takes Challenge; Joins Blood Campaign

By Jerry Lavinsky

In the next two weeks, the students of Georgia Tech will have their chance to give their "Maximum Effort." On Monday, March 3, Tuesday, March 4, Friday, March 7, and Saturday, March 8, the Red Cross Bloodmobile will be on the Tech campus. The mobile unit will be in operation from 8 a.m. until 2 p.m., and will be set up on the first floor of the I.E. Building. This will afford the fraternity men, as well as all the other students at Tech, a chance to really do something worthwhile.

Last year, the University of Idaho began a new type of inter-collegiate competition, and most likely the oddest type of competition. The students of the University staged a campus drive to collect blood and help out in the acute blood shortage. They collected 1,014 pints from 3,000 students. This feat made Idaho the blood donor champion of all the American campuses. Every other school in the country was challenged to beat Idaho's mark. The University of Texas accepted the challenge and turned up with the largest number of pints, but percentage-wise the University of Idaho is still ahead.

To take the lead by percentage, Tech students will have to give 1,300 pints of blood. All organizations are urged to arrange to give blood as a group. This action will be easier on them and also on the Red Cross. For convenience, Dean Narmore said that a student may be excused from one class to give blood if he has no scheduled quiz at that time. If any group decides to give blood at a certain time they can contact Mace Phil-

lips, Chairman of the IFC Blood Drive Committee, and that time will be set aside. Mace can be called at El. 7607 or At. 3615.

Any students between the ages of 18 and 21 must have a release signed by a parent or guardian. A copy of this release can be found elsewhere in the issue. Another extremely important factor in giving blood is that anyone who plans to contribute must NOT eat any fatty foods within a four hour period previous to the donation. Foods that may be eaten are fruit juice, dry toast, crackers, soft drinks, coffee and tea without cream.

A floating trophy will be presented to the fraternity having the largest percentage of blood donors. Anyone not being able to give blood at the specified times may register at the Information Desk on Wednesday, March 5, and Thursday, March 6, and the Red Cross will arrange to have you picked up and returned to the campus after donating blood at your convenience.

"The need is urgent; the need is right now. The man who falls before an enemy has the right to expect from you the blood essential to his healing, and every able-bodied man on this campus has a moral obligation to give it to him." DO YOUR SHARE!!!

## Tech Alpha Pi Mu Chapter Plays Host For Convention

By George Ragovis

The second National Convention of Alpha Pi Mu, national honorary industrial engineering society, will be held in Atlanta, on Friday and Saturday, February 29 and March 1, 1952, with the Georgia Tech Chapter as the host.

The convention headquarters will be at the French Industrial Engineering Building on the campus of the Georgia Institute of Technology where the business meetings of the convention will be held. A registration and information desk was set up in the lobby on Thursday afternoon, February 28 and was maintained throughout the convention.

Special committees on arrangements have been set up by the Georgia Tech Chapter and they are now at work making the final convention plans. From these plans it is evident that this convention is to be a very profitable and enjoyable one. It will offer varied opportunities for general contacts and fellowship, for the exchange of ideas and experiences, for the discussion of mutual problems and interests, for sharing in the determination of the rules and policies of the Society and in the discussion of projects of a national scope, and to develop a stronger fraternal relationship between the members of the various chapters of Alpha Pi Mu and a closer bond

between the schools which they represent.

During the convention the assembled representatives will attend two banquets. On February 29, the informal banquet will be held, at which Professor Rainey of the English Department at Georgia Tech will be the primary speaker. Mr. Rainey is a well known lecturer and appears at a number of similar affairs in the same capacity. On the closing banquet on Saturday, March 1, the speaker will be Mr. Phil Carroll, a prominent industrial engineer. He has written a number of texts for McGraw-Hill, in addition to some 60 papers published in this country and Canada, he is well known for his work in establishing and progressing the fundamentals of Industrial Engineering.

Alpha Pi Mu was founded as an honorary society for Industrial Engineers on January 25, 1949. Within a year new chapters were added, (at present there are ten chapters) and the organization

(Continued on page 8)

## World Student Fund Holds Novel Auction

### Class Rings

On Tuesday, March '4 a salesman will be at the Georgia Tech College Inn to take orders for 1952 class rings.

### Fellowships Offered To June Graduates By Public Agencies

Students interested in public affairs and public service career who receive their bachelors degree next June are offered an opportunity to apply for fellowships carrying stipends of \$1,200 per year. This fellowship provides the unusual opportunity of studying at three different universities.

Beginning in June, 1952, fellows will serve an internship with a public agency such as the Tennessee Valley Authority, a city manager's office, or a department of state government. The 1952-1953 school session will be organized to provide fellows a unique opportunity to take graduate courses at three universities: the University of Alabama, the University of Tennessee and the University of Kentucky.

Completion of the twelve months training period entitles fellows to a certificate in public administration. Fellows may be awarded a master's degree at either of the three participating universities upon satisfactory completion of the master's thesis and after passing examinations for the master's degree.

For eligibility requirements and other information students are invited to see the head of the political science department or write to: Educational Director, Southern Regional Training Program in Public Administration, University of Alabama, University, Alabama. The deadline for submitting applications is March 1.

### FILM

"God of Creation," a sound film in color, will be presented on Sunday evening in the Young People's Training Union at First Baptist Church. Of particular interest to Tech students, the film is one of a series which shows the relationship between science and religion. This series has been cited as the best film representation ever presented on this subject, and was recently featured in a story in Redbook magazine.

All Tech students are invited to participate in the youth fellowship beginning at 5:00 p.m. Following a free supper, the film will be shown at 6:15 p.m.

## Tech President And Car To Chauffeur Templeton

By Norman S. Tarlin

On Friday and Saturday night, February 22, 23, the ever familiar sound of "Going Once, Going Twice, GONE" echoed at two well known gathering places on the Tech campus. Although the voices of the auctioneers sounded like the real professionals, in reality they were two warm hearted individuals who were donating their own time to raise funds for the World Student Fund at Georgia Tech.

On Friday evening, Mary Nell Ivey, director of DramaTech directed the auction which took place during the intermission period of the production "Whistling In the Dark." One of the first prize packages to be auctioned off was to have Prof. E. H. Folk of the English Department clean up a dormitory room and have Dean Mason's secretary type a report. This sounded like a terrific deal until Prof. Folk started bidding against all challengers in order to avoid the menial task. After all competitors were routed, the professor emerged victorious.

The services of Dean Ajax, to be used as a baby sitter, was quickly earned by Paul Liberman, a senior in Arch. Since Paul is not married we are all waiting to see just what type a baby our popular Dean will be sitting.

Dan Santacroce outbid all on-comers to win the services of Prof. William B. Johns of the Mech. Department. Dan stepped out from his role in the play to win and will soon have a super-doooper shoe shine as his prize.

A combination of a Tea Party in the Robbery and Supper for two at Agnes Scott College was won by Frank Taylor. Word has it that this boy has had some interest at Scott for some time.

On February 27, the meal at the Phi Delta House was served by two of Tech's popular deans. They are Dean J. J. Pershing and Dean T. Ben Massey. The Phi Deltis jumped at the opportunity of having these professional waiters joining them for dinner.

On Saturday the well trained voice of Mr. John O. Childs, a member of the Tech Athletic Board and a good friend of Tech, shouted loud and clear in the basketball arena so that all would hear of his various packages.

When Dean Narmore's services as a shoe shine boy was auctioned off, a prominent member of the Tech Alumni Association outbid all others to win. He was Price Gilbert, National Alumni President. The name of this gentlemen will not be forgotten for the great work he has done for Tech and as a tribute to him the new Tech Library will bear his name.

The highlight of the evening (Continued on page 8)

## President Van Leer Reports On Memorial Fund Drive

By Boots Handle

On Sunday, November 5, 1950, friends and alumni of Georgia Tech were approached in a public campaign to pledge donations to the William A. Alexander Memorial Building Fund. The money collected in that drive was to finance the Alexander Memorial Building. Tech students were asked to consider gifts of ten dollars or more per student per year for a period of three years.

The \$2,500,000 building was to be paid for by the contributions of the students, faculty and friends of Georgia Tech as well as the Georgia Tech Athletic Association.

The proposed building was described as a building that would have many uses. Among these were a large auditorium of thirteen thousand and seating capacity and many other rooms to be used for physical training for the students.

Approximately one year ago the campaign ended and since that time little or no word has been heard about the progress that is being made. Recently, Col. Blake R. Van Leer, President of Georgia Tech has been authorized by the Board of Trustees to give a report on where the committee and the campaign funds stand today.

It was stated that the building was estimated to cost \$2,500,000, that the campaign was to secure pledges for \$1,500,000 from popular subscription, and that the Georgia Tech Athletic Association would finance the remainder. There have been some disappointments. First, because of the Korean conflict the Federal Government would not permit the school to enlarge the stadium from which we would receive additional revenues for financing the Memorial building.

Because those conditions were temporary there have been three important steps taken. First, the architects and engineers were given orders to proceed with the completion of the final plans and specifications. These are due for completion on April 1, 1952.

Second, a contact has been let for the construction of the steam (Continued on page 8)

## Annual Military Ball In Auditorium Saturday

## Air National Guard Offers Commissions

Approximately 300 direct Air National Guard commissions in the grade of second lieutenant are now open to eligible young men who wish to enter pilot training, Major General Earl T. Ricks, Chief of the National Guard Bureau's Air Force Division, announced today.

Under the program those commissioned will take the regular one-year pilot training course in the United States Air Force in their commissioned grade. As presently planned, these officers will return to the Air National Guard after completing flight training.

Appointment as second lieutenant in the ANG to take pilot training is open to qualified men, single or married, between 21 and 26½ years old, in the following categories:

(1) Men who previously held commissions as first or second

lieutenants in any of the armed services.

(2) Warrant officers and top three enlisted grades with one year active military service in any branch of the armed forces of the United States after December 7, 1941, high school graduates, with two years college or able to pass an equivalent examination.

(3) Warrant officers and top three enlisted graders with six months service in the Air National Guard or Air Force Reserve in the past two years. Same educational requirements as in (2) above.

(4) College graduates with one year active military service after December 7, 1941 or six months in the Air National Guard or Air Force Reserve in past two years.

The Air National Guard is still accepting applications of eligible young men who wish to become pilots under the USAF aviation cadet training program.

Requirements for appointment as aviation cadets through the Air National Guard are: single, between 20 and 26½, two years college credit, and able to meet physical and other USAF requirements for aviation cadet training.

## Tech Graduate Wins Prize

Edgar G. Baugh, a civil engineering graduate of the Georgia Institute of Technology, is the 1952 recipient of the American Society of Civil Engineers' Daniel W. Mead Prize for the best paper by a junior member on engineering ethics. The subject of this year's contest, which was open to 15,000 junior members of the ASCE, was "Why Is A Code of Professional Ethics Desirable?"

Since his graduation from Georgia Tech in 1949, Mr. Baugh has been employed by the Humble Oil and Refining Company and is now associate engineer in the Production Department of the company's Gulf Coast Division, with headquarters in Houston, Texas. He will receive the award at the society's Spring Convention in New Orleans in March.

While at Georgia Tech, he was quite active in student affairs, serving as vice president of the Student Chapter of ASCE and Editor of the Georgia Tech Engineer, student technical publication.

Men trained under the cadet programs also will be earmarked for eventual return to Air National Guard flying units. Tactical Air Guard units returning from active duty will need an estimated 80 per cent replacement of young pilots because of losses from over-age in grade and pilots choosing to remain in active service.

Men wishing to take advantage of the pilot training programs offered by the Air National Guard should apply in person or by letter to the Office of the State Adjutant General in their respective States.

## Selective Service Director Urges Student Applications

Major General Lewis B. Hershey, Director of Selective Service, today reminded college students that applications for the April 24 Selective Service Qualification Test must be postmarked not later than midnight March 10.

The deadline is necessary to allow the administrators of the test, the Educational Testing Service at Princeton, N. J., time to process the applications and assign each applicant to the testing center requested by the student—or to the closest possible alternative center—also to make administration arrangements consistent with the number who will take the test. There are more than 1,000 testing centers throughout the United States and its Territories.

National Headquarters estimates that upward to 100,000 will make application to take the April 24 test. This will be the last test given during the current academic year.

Application blanks may be obtained by students from the nearest local board. They do not have to return home to the local board which has jurisdiction over them.

To be eligible to take the Selective Service Qualification Test, an applicant, on the testing date (1) must be a selective service registrant who intends to request deferment as a student; (2) must be satisfactorily pursuing a full-

time college course—undergraduate or graduate—leading to a degree; (3) must not previously have taken the test.

National Headquarters said that recently completed statistics reveal that 61.3 per cent of the 19,571 students who took the December 13, 1951 test made a score of 70 or better. Of the approximately 340,000 who took the first four tests, 63 per cent made a score of 70 or better.

The criteria for consideration for deferment as a student at the present time is either a score of 70 or better on the Selective Service College Qualification Test or class standing among the male members in the upper half of the freshman class, upper two-thirds of the sophomore class or upper three-fourths of the junior class. Seniors accepted for admission to a graduate school satisfy the criteria if they are among the upper half of the male members of their senior class, or they make a score of 75 or better.

These criteria are guides for the local boards. The local boards are under no compulsion to follow them, but any local board classification is subject to appeal. The appeal must be filed in writing with the local board within 10 days of the date the local board mails the notice of classification.

General Hershey has urged all eligible students to take the test so they will have scores in their files when the local boards reconsider their cases to determine whether or not they meet the criteria for deferment as students. He has emphasized many times that the present criteria are variables which may be raised or lowered either to increase or decrease the number of students as the national interest shall require.

General Hershey also has repeatedly stressed that no deferment is an exemption. "A deferment is a delay or postponement," he said, "and in no way cancels the duty of the registrant to meet his obligations."

Many students have been confused in differentiating between the I-S and II-S deferments. The II-S deferment is considered on the basis of class standing or qualification test and is discretionary on the part of the local board. It may be granted by the local board each successive year, thus enabling students who continue to meet the criteria to complete their education.

The I-S deferment, on the other hand, is provided for by the law. A college student ordered to report for induction while he is satisfactorily pursuing a full-time course is entitled to this I-S deferment until he finishes his academic year provided he has not had his induction postponed or been deferred as a student prior to June 19, 1951. He may be given but one such deferment and it is incumbent upon him to notify his local board of his status when he receives the order to report for induction.

## Scabbard and Blade To Have Breakfast After Military Ball

Immediately following the Military Ball, held on March 1st, Scabbard and Blade Society will sponsor a breakfast which will take place at Mammy's Shanty. This breakfast is scheduled to begin at 1 a. m.

Cadets of the society have been notified of this affair by the committee in charge but in case of error, this will serve as an invitation to all members of Scabbard and Blade and their dates. Members are urged to make their reservations as early as possible so as to avoid conflict.

All prospective members of Scabbard and Blade who participate in the tapping ceremony are also cordially invited to attend along with their dates.

The committee in charge wishes to have as many members of the society as possible attend this affair.

## Technique WORLD EVENTS

By John Langford

In the March issue of AIR FORCE magazine there is a page listing some facts that are noteworthy of quotation. It behooves all who value our country's security to take careful notice of that which is quoted in the following.

"WHY JOE STALIN IS LAUGHING—He is laughing at our expense and at our military expenses . . . at the defense budget now before Congress . . . at the airpower scandal (recently exposed) . . . at our leaders of government (For the following reasons).

"We force unrealistic military decisions by making a fetish of politics as usual.

"We jam our military production machine with business-as-usual bottlenecks.

"We ignore our best estimate of Russia's approaching air-atomic superiority.

"We are not buying security with our projected \$52 billion defense budget.

"We could buy survival insurance with this money if we spent it wisely.

"We live in a fool's paradise of atomic surplus and out-moded military strength.

"We fail to establish strategic priorities for military tasks and military goods.

"We stretch out production and compromise the quality of our air weapons.

"We underestimate the threat of all-out attack and of atomic blackmail.

"We blind the taxpayer to his true alternatives with guns-and-butter thinking.

"We invite Russia to bleed our economy and grab world balance by our failure to practice 'selective mobilization' geared to a first-things-first strategy."

The AIR FORCE magazine has presented the appalling but enlightening facts that confront the United States as a world power. To be oblivious to them would be an ultimate tragic misdemeanor. Only by our nation's leaders—both military and political—realizing the ominous situation that now prevails, can we be assured of a Democracy that can stifle the plague of Communism that has already enveloped over half of the earth.

### Other Colleges Say —

## Girls Plan Leap Year; Student Rates Profs

By Bill Ross

One brave man at Pennsylvania State College undertook the job of studying and classifying his profs. He reports as follows:

"In order of seniority, we begin with the Old Prof. This species enters the classroom at a brisk trot, drops an interminable series of

ancient and illegible notes on the desk before him, scrawls a shaky and unpronounceable name on the board, and snarls through a clacking set of teeth, 'Mumble mumble mumble BAH!' He gives you his name, which you know, the text's name, which you know, the meeting date, which you know, the absolutely-no-cuts-under-any-circumstances policy, which you guessed, and, casually picking his teeth with a Phi Bet key, dismisses the class.

"Then we have the Regular Feller type prof. He's one of the boys. He outlines an extremely liberal cut policy, remarks that you don't really need to buy the text, announces his open mind and generous curve-grading system, and then dismisses the class, whistling 'Shrimp Boats' as you leave. The wise student will drop this course like a hot potato. There'll be no A's, one B, a scattered group of C's, and great quantities of zips forthcoming.

"The female prof (there are

## Student Council Minutes

February 26, 1952.

President Dunwoody called the meeting to order at 6:45 p. m. with Bishop, Cady, Callaway, Chastain, Crake, Dyer, Hull, Kennedy, Smith, Templeton, and Ballentine absent.

Dan Blitch reported for the Welfare Committee stating that the hot water shortage in the dormitories is being taken care of. The Committee will look into the possibilities of having the entrances to Smith Dorm free of mud after a rain storm, and of having steps put in at the entrance to the drill field in order to avoid the mud. It was also asked that the committee see if a sign could be posted by Smith Dorm stating that the parking lot by the dorm is for Tech students only.

It was brought out to the council that the reason for a three week interval between the spring and summer quarters was so that members of the faculty might have their first vacation in several years. The Welfare Committee will look into the benefits of having such a vacation.

Randy Seckman reported for the Trial Board stating that the Board had tried two cases involving five boys for misconduct in the dormitories.

The following members of the council volunteered to attend the Annual Meeting of Active Voters to hear a discussion on the subject of "Democracy on the Campus": Dunwoody, E., Holt, Hartman, and Liberman.

The following Resolution was then adopted by the Student Council of the Georgia Institute of Technology.

Whereas: The Georgia Institute of Technology is one of the few remaining leading engineering institutions in this country which does not permit the matriculation of female students, and

Whereas: It is felt that the women of Georgia desiring an engineering education are being discriminated against, since at present said women are required to matriculate in the fields of engineering and/or architecture out of the State of Georgia resulting in additional expenses for said females, and

Whereas: The physical plant of the Georgia Institute of Technology is now fully capable of accommodating female students in the same manner as male students.

Be it resolved that: We the representatives of the student body of the Georgia Institute of Technology respectfully urge the Board of Regents of the University of Georgia System to permit the enrollment of female students at said Institute on the same basis as male students.

Paul Liberman amended the above resolution to read that the Georgia Institute of Technology admit women to engineering and architecture courses only. Defeated.

The above Resolution was voted on by a roll call vote, with the following results:

Betts	.....	against
Blitch	.....	for
Brown	.....	abstain
Burrus	.....	against
Childress	.....	for
Clark	.....	for

Results: 13 for — 9 oppose — 1 abstain  
Randy Seckman moved that the Council appropriate \$4.50 to Miss McQueen for services rendered to the Student Trial Board. Seckman also moved that the Council appropriate \$4.50 to Miss Betty White for the above mentioned reason. Tabled.

John McGlosson then introduced Miss Mary O. Dea from the national N.S.A. headquarters, who talked to the Council on the subject of American students travelling abroad. Miss O. Dea then introduced Mr. Hahnemann who talked to the Council on the subject of an organization in Denmark similar to N.S.A. here in the United States.

There being no further business, the meeting adjourned at 8:45 p. m.

Respectfully submitted,  
Don Ramsbottom, Secretary  
Student Council.

## THE TECHNIQUE

... favors coeds only on same basis as male students.

The discussion, on the student level, as to whether or not Georgia Tech should be made co-educational is still in full swing. Both sides of the question are being discussed quite frankly and in some cases, quite heatedly.

During the past three days, The Technique has made an effort to uncover the opinion of the majority of the student body on this subject. To do this, we felt that it was first necessary to look into the statements made in the Resolution presented by the Women's Chamber of Commerce of Atlanta. These statements were concerned with the fact that there were now sufficient housing, lavatory and toilet, and classroom facilities on the Georgia Tech campus to allow the matriculation of female students at Georgia Tech on the same basis as male students. An investigation of conditions revealed these statements to be true in every detail.

Needless to say, the main advantage of admitting female students to Georgia Tech would be to the women themselves. At the present time, a colored student not accepted in a state school,

may receive financial aid from the University of Georgia System, which would enable him to attend a college or university out of the state. A female student desiring an engineering or architectural education must go out of the state for such an must pay out-of-the-state tuition without financial aid from the University System. This is discrimination in its finest form.

From the student's point of view, the few disadvantages do not appear to bear too much importance. Such things as having to make a better personal appearance, having to control the vulgarity in our speech, etc., while needing to be considered, carry very little weight.

With these and other facts in mind, The Technique goes on record as favoring the admission of female students to Georgia Tech, IF, they are admitted on the same basis as male students, and IF, no "special" courses are ever instituted for the female students that might lower the standards, or mar the fine reputation that Georgia Tech now enjoys as an all-male institution.

—WmED

## Scandal

... in colleges is discussed by 'Stanford Daily.'

"SCANDAL" has been a national byword since the U. S. senate undertook a nation-wide investigation of crime. The newspapers have been full of news about scandal.

We have lingered on the details of crime scandal, scandal in the national government, scandal in college athletics. Prominent men have deplored what seemed to be a general decline in public and private morals.

We, students here, have talked about this problem. Perhaps it seemed remote before, but now it has come home to roost. Recently four students in the college of pharmacy were suspended for cheating and stealing.

The problem is a local one now. It would be optimistic to suppose that what has just been uncovered is an isolated instance.

We don't know whether morals have declined on this campus, or in the nation. But we do know that the nation is scrutinizing its morals more closely

now than it has done for many years.

If what has been found to be true of national morality is true—even partly true—of this campus, then the problem is due for more serious thought than students here have given it thus far.

We suggest that it's time for students to begin thinking about an honor system for the entire University. We don't suggest that the system would be a cure-all, but it might be an improvement. It has worked on Ag campus for years.

The West Point incident may have brought some disrepute to the honor system. But at West Point, or anywhere else, a plan on paper is not a plan in practice.

An honor system is not so much a procedure as a state of mind. If students aren't concerned about cheating, we might just as well forget the idea.

But if students are ready to go to bat for the good name of their University, and therefore their own good name, then let's open this area for discussion.

—The Stanford Daily

### TECHNIQUE PLATFORM:

1. Student voice in matters of student interest.
2. Encouragement of school spirit.
3. Better orientation and vocational guidance.
4. More participation in the intramural sports program.
5. Promotion of active campus organizations.

6. Promotion of more interest in Student Government.
  7. Erection of a Student Union building.
  8. Promotion of a successful Trial Board.
- The Technique will at all times attempt to represent the best interest of the students in current discussions and controversies.

## Our Freedom

... is being dissipated says 'The Daily Californian.'

"It's a free country, isn't it?"

In a sentence that seems to be the favorite national summation of the Constitution, our legal tradition, our great men's great words. It is declared and shouted and mumbled all over the country, on street corners and in rural lanes—"It's a free country, isn't it?"

If ever there were a bond between people and a word, it is the one between Americans and "freedom." If we, as Americans, build a hospital or cheer a ball game, propose or oppose a law, seek justification for a security measure or foreign alliance, it is always done in the name of freedom.

We, as Americans, are sometimes laughed at, with reason, for kidding ourselves, and chided, with reason, for hypocrisy; but the basis for all this—the hold that freedom has on American minds—cannot be laughed away. It has been the moving force of our democracy.

But today that force is being dissipated. It seems to have been immobilized by our new position in the world. Americans admire freedom in a looking glass, call this country's image freedom, while the real thing slips away, ignored.

It seems that nowadays we Americans have let ourselves believe that we are so wedded to freedom that it cannot be lost, no matter what strains are put on it. Individuals anoint themselves keepers of freedom, judges of who should and who should not enjoy it—and we listen to them.

Oaths of loyalty are prescribed, college forums are censored, pointing fingers bring the casual ruin of livelihoods and reputations—and we let it pass.

Rules are set down for what we can say, and what we can hear and whom we can hear—all in freedom's name—and we accept them. As a result there is a stifling of our critical powers, our genius for progress.

Now it seems that we are willing to accept the idea that security must come first and liberty second in the struggle against communism. But security measures need not prey on freedom. Americans surely have not grown so dull in 170 years that they cannot tell a good idea from a bad one.

Common talk has it that individuals are ineffective in this huge country caught in the drift of world conflict—and yet—unless we exercise our rights, each of us, constantly, immediately, we may find that we are grasping a nettle and calling it freedom. In fact, freedom may die by our own hands and not by Communist aggression.

What freedom needs most today is exercise—not admiration, not tributes, not exposition, not protectors and administrators, but a vigorous use of independent thought and speech by 150 million Americans. We as American students must encourage people to speak their minds, to help overcome the fear instilled by repressive trends and to point up the true meaning of events which affect our freedom. Make an issue about what freedom really means; make freedom the topic of conversation in your living group and in your classes or over your evening cup of coffee.

Speak up! Freedom needs exercise!

—The Daily Californian

## Let's Give Blood Next Week

FORM SE—2105  
JULY 1948

### RELEASE

My (son) (daughter) \_\_\_\_\_  
has my permission to voluntarily make a donation of blood to the American Red Cross and for that purpose may, at his or her own risk, submit to the tests, examinations and procedures customary in connection with donations of blood. We agree that neither the American National Red Cross nor any surgeons, physicians, technicians, nurses, agents or officers connected with any of them, or who may be participating otherwise in this work, shall be in any way responsible for any consequences to him or her resulting from the giving of such blood or from any of the tests, examinations or procedures incident thereto, and we hereby release and discharge each and all of them from all claims and demands whatsoever which we, our heirs, executors, administrators or assigns have or may have against them or any of them by reason of any matter relative or incident of such donation of blood, and we agree that the above-mentioned organizations may use in any way that they may deem advisable any balance or residue of the blood.

IN WITNESS WHEREOF I have hereunto set my hand and seal this \_\_\_\_\_

day of \_\_\_\_\_, 195\_\_\_\_\_.

## WSF Chairman

... thanks faculty and students for auction cooperation.

Editor: The Technique  
Dear Editor:

The World Student Fund Committee wishes to thank the administration, faculty and students for their excellent cooperation and participation in the novelty auction of this past weekend.

This has been an excellent example of student-faculty cooperation on a great undertaking.

Randy Seckman  
Chairman, World

Student Fund Committee

## "Voice of Georgia Tech" Broadcast

This quarter, on the weekend of January 12 and 13, "The Voice of Georgia Tech" was heard all over the United States. From Maine to Florida, from California to Carolina was heard W4AQL, the station of the Georgia Tech Radio Club. "The Voice" said that the club was operating portable from atop Mount Mell Wilkinson, about 15 miles north of Atlanta, Georgia. The cause of all of this was a small group of the members of an active and growing campus organization that is rapidly gaining a good reputation all over the state of Georgia, as well as the entire country.

Late last fall, the members decided that it would be a good idea to prepare the radio club for any emergencies that might come about. In order to do this it was decided that actual emergency conditions should exist. The date was decided upon, and on the morning of January 12, the club loaded up a truck and proceeded to the top of a small mountain just north of Atlanta. The truck arrived on top of the mountain just after noon, and by about four o'clock, the first call was put out by W4AQL/4, operating under emergency conditions from a gasoline power generator. By five o'clock the second transmitter was on the air, and later on in the afternoon two more transmitters joined in on the airways, making a total of four transmitters on the air from the top of the mountain. Contacts were made with stations all over the States. Some of these were in California, North Carolina, Maine, Florida, and Texas.

One of the transmitters de-

veloped trouble during the night. Two of the boys went to work on it, and before long the transmitter was again on the air, calling other stations and answering calls directed towards it.

This field day was just one of the many activities that the club participates in. One of the other things that it takes part in is the annual Engineer's Day. Last year, the members of the club set up a relay station in the Crenshaw Field House to take messages from anyone who wanted to send them. Most of the messages were distributed to all of the places where they were directed, although some of them were in some out-of-the-way places, even in foreign countries.

The club does not limit the service of message handling to the Engineer's Day either. As some of the students on the campus have already discovered, messages are accepted by the operators any time, and no charge is made for its delivery. Though they may vary from urgent messages to home or to kin-folks to little notes that have no great meaning, all are accepted and delivered.

The latest project of the club is a code and radio theory class, scheduled to begin in the near future. The class is to be taught by members of the club, and is

designed to aid the boys on the campus who are trying to obtain any class of amateur license. The class, like the message handling, is a club service, and no charge will be made to those who sign up for it.

The Georgia Tech Radio Club is not just one campus club all by itself, but is a part of a great national organization, The American Radio Relay League. The club has long been affiliated with the League, as have many other individuals and clubs over the nation. It holds several Official ARRL tilts, granted to the club by ARRL headquarters. The Military Amateur Radio System is another national organization to which the club belongs.

The clubhouse, in which is located all of the club equipment, is behind the Civil Engineering building. The meetings of the club are held there on the first Monday of each month, and the officers and members cordially invite visitors to come to the clubhouse, and to attend the meetings. The officers of the club are as follows: Jim Elliot, President; Don Martin, Vice-President; Larry Scheff, Secretary, and Don West, Treasurer. Dr. G. A. Rosselot and Roy A. Martin are the faculty advisors.

The Georgia Tech Radio Club's station, W4AQL, was heard all over the United States early this quarter when it made a portable broadcast under emergency conditions.

## Tennis Team Opens Practice Next Week

By Ken Read

As the present basketball season is fading out and only the tournament remains, Flats fans and the Georgia Tech tennis team are readying themselves for the coming tennis season.

In the pre-season estimation of Coach Earl Bortell, "This year's team is not too strong, but should win about half of their games." For the interest of spectators and prospective students, the team will start their practice sessions next week and all players are welcome to try out.

### Mainstays

This year's team is composed of six dependable mainstays. They are returning players Ed Van Winkle, Lowry Bell, and Phil Rotholz, sophomores Bill Wade, and

Mac McCallister, and freshman Rod Lee.

### Schedule

The schedule for the coming season is as follows:

April 2—Georgia in Athens.  
April 5—Alabama in Tuscaloosa.  
April 8—University of Indiana in Atlanta.  
April 9—Florida in Atlanta.  
April 11—Mississippi State in Atlanta.  
April 12—Vanderbilt in Nashville.  
April 15—Emory in Atlanta.  
April 18—LSU in Atlanta.  
April 19—Auburn in Auburn.  
April 23—Georgia in Atlanta.  
April 26—Tulane in Atlanta.  
May 3—Tennessee in Atlanta.  
May 8, 9, 10—Conference Tournament—in New Orleans.  
May 17—Tennessee in Knoxville.

### KILLER KENTUCKY

In the 1951 SEC basketball tournament, Tech drew a first round bye. They met Tulane and won 63-61 in overtime, after the regulation game ended in a 59-59 tie. Kentucky ousted the Jackets with an 82-56 victory.

Auburn scored the fewest points of any winner in SEC play. They beat Florida 16-11 in 1933.

## Missing Anything? See Mr. Sinclair In Locker Room

By Gene Lorenz

Have you lost anything lately? Not including your mind! Mr. Sinclair, head caretaker of the Tech gym, reports quite a booty in his cage at the entrance to the locker room.

Mr. Sinclair, a kindly gentleman who has been at the Flats many years, and who as a matter of fact opened up the swimming pool and gym when it was built in 1939, is very anxious to get the various articles back to their rightful owners.

Only recently, he reports, he had a valuable wrist watch which was left in the gymnasium, and it took three weeks of searching ON HIS PART to get it back to whom it belonged.

Mr. Sinclair also tells of one occasion last year when he received a phone call from an excited female voice. She had lost no less than the diamond from her engagement ring. Our genial Hawkshaw went into action immediately and found the stone the first time he doubled back in pacing over the gym floor. The mishap occurred at a Saturday night dance.

There are no unclaimed diamonds lying around now, but there are two ID bracelets (name of James H. Powers and the other just Price) and quite a few items of clothing waiting to be returned. Among the clothing is a light-weight raincoat, a grey corduroy jacket, two zippered windbreakers, AND A FUR-LINED CAP. Yes, C-A-P, Cap.

## Replacement For Wade Commodore's Big Job

Spring football practice for Vanderbilt University's 1952 football team began Monday, Feb. 25 with 79 candidates for the squad, Coach Bill Edwards has announced. Among the 79 candidates were 23 returning 1951 lettermen.

Coach Edwards, in line with the Southeastern Conference limitation placed on Spring football, will drill the squad only 20 days. And he has announced a plan whereby the practice period will be divided into two 10-day sessions, one on either side of the University's regular Winter Term final examinations.

The first session of two five-day working weeks will run from February 25 to March 7. Then after two weeks off for examinations, the second session will run from March 24 to April 4. The jovial and energetic Edwards, beginning his 4th season at the helm of the Commodores, expects this plan to produce the most spirited Spring

practice in years at Vanderbilt, and hopes the drills will be over in plenty of time for the boys who play football to participate in baseball, track or whatever other spring sports they care to.

The big search throughout Spring drills will be for a passer to replace Bill Wade, the Southeastern Conference's most valuable player in 1951 and professional football's number one choice of all college players for the '52 season.

But just back of the need for an outstanding T-quarterback, Coach Edwards lists the importance of discovering some halfbacks who can gain consistently.

Chief candidates for the all-important T-quarterback slot are Sophomore Jim Demain (Wade's relief last season), Freshman Jimmy Holmes and Junior Jim Shelton, a Junior College graduate who was with the team last year but did not participate in any games.

## Tech Hoop Bigger?—

### Holt's 29 Points High Mark Against Jackets

In regular season play, Tulane's Don Holt racked up 29 points for the highest individual total scored against the cagers of Coach John Hyder this year. The towering Greenie center hit the top number in the only match between Tech and the Wave this season, a tilt which Tulane won 73-58 in Atlanta January 5.

Louisiana State's Bobby Pettit dumped in 26 markers, also in the Tech gym, in leading the Old War Skule to a 73-51 win.

Two forwards tied for third highest scorer with a quarter of a hundred points apiece. Kentucky's Frank Ramsey hit 25 in the Atlanta meeting of Tech and the Wildcats, while Georgia's captain Jim Umbrecht poured in an equal amount in ancient Woodruff Hall on the Athens campus.

Vanderbilt forward Dave Kardokus holds down the fifth spot by

himself with 24 points tallied in the game at the Flats.

The Commodores Dan Finch and Adolph Rupp's Bobby Watson each cracked for 23 points, Finch here and Watson in Lexington.

Florida's Red Weatherington and Kentucky's Cliff (The Cat) Hagan gathered in 22 markers, the former at home and the latter here.

Six players are bunched with 21 points to their credit against the Jackets. Robbins (Ole Miss), Heldman (Vandy), Casares (Florida), Bowers and Neff (Tenn.), and Morrison (Parris Island) comprise the group.

The Bulldog's Zippy Morocco plagued Tech twice with counts of 20. Mississippi State's Coyt Vance rounds out the select bunch of point-getters. He got 20 against Tech here in January.

### FEWEST AND MOST

The fewest points scored by a winner in the SEC Tournament was Alabama in 1942. They beat Tennessee 21-18. The biggest margin of victory was 69 points—Kentucky vs Vanderbilt (98-29) in 1947.

### BROYLES HOOP STAR

Frank Broyles, Tech backfield coach, landed on the second All-Tournament team three times while playing for the Jackets. He was chosen in 1944, 1945, and 1947.

## Campus Cagers Slow Up; Bowling Playoff Scheduled

By Mark Myers

Action in the intramural basketball league has come to an almost complete standstill. All teams after they play a game are requested to turn in the scores at the Athletic Office.

In the White League, Lambda Xi Alpha played three games and managed to score wins in all three games. They defeated Delta Sigma Phi 50-30, Chi Phi 35-34, and Theta Chi 33-23.

In a wild and rough game Phi Delta Theta defeated Sigma Nu by a 41-34 score in the Gold League. The Navy A team won two games 51-35 over the Burge team and 49-36 over the Wesley Foundation.

### Newman Club Unbeaten

Also in the ISO league the Newman Club won a 2-0 forfeit from the Towers team, giving the Newmanites 12 straight victories this season without defeat.

### Bowling Playoff

The regular bowling schedule has come to a close and a round robin playoff between the top two teams in each league will begin on Friday, Feb. 29. The round robin schedule is as follows:

Feb. 29—Sigma Chi vs Alpha Epsilon Pi; Sigma Nu vs Phi Kappa Sigma.

March 7—Sigma Chi vs. Phi Kappa Sigma; Sigma Nu vs Alpha Epsilon Pi.

March 14—Sigma Chi vs. Sigma Nu; Alpha Epsilon Pi vs. Phi Kappa Sigma.

Sigma Chi and Sigma Nu will

Sid Johnston of Phi Kappa Sigma goes up for a push shot in an intramural game with Phi Gamma Delta in the Tech gym.

represent the Gold League while Phi Kappa Sigma and Alpha Epsilon Pi will represent the White League.

## Tankers Face Vandy In Last Home Meet

By Rudy Matzner

Georgia Tech students have received a last minute reprieve, not from the electric chair, but from the fate of not getting to see another swimming meet this year. Because of a schedule mixup the Tech men will meet Vanderbilt's tank team in the local pool this Saturday afternoon at 3 o'clock.

The meet was originally slated on the printed schedule to be held in Nashville with Vanderbilt as host. This would have given Tech a string of four straight meets away from home, the last one in the local pool having been held three weeks ago when the Yellow Jackets were narrowly defeated by Duke.

Tech students have not been taking advantage of their opportunity to see SEC swimming meets free when watersplashing have been held here, but will have a final chance this Saturday.

Only a meet with Kentucky in Lexington and the SEC swimming meet, also scheduled for Lexington, remain on tap after the Vandy contest.

Coach Freddie Lanoue, who's had

out the weeping towel for most of Tech's meets this year with some of the toughest college swimming teams in the country, has come out with an "It ought to be good" comment on Saturday's affair. He bases his prediction on the fact that both Vanderbilt and Tech have barely edged Emory.

Emory has been the Yellow Jackets' only victim in seven other meets this season. Co-captains Oscar Crouch and Jim Thrasher along with Strickland have been Tech's most consistent point getters. Crouch and Strickland were the only ones to score firsts against Georgia last Saturday-afternoon. In that meet the locals were downed by the watergoing Bulldogs, 57-27.

## Deadline Nears For Fifth Annual Intramural Gymnastics Tournament

Once again fraternities and independents will gyrate for honors in the fifth annual intramural gymnastics championships, Friday, March 7. Competitors will be guests of the gymnastic team members, who will conduct the meet.

The meet, which takes on the usual serious business of separating the men from the boys, will have added an event in lieu of the all-around. The new event will still be of an all-around nature, but will include some novel stunts such as a frog or squat stand for time (knees resting on bent elbows), a hand walk for distance (can secure permission to use the cross country course if necessary), a cart wheel for distance (a chance for big wheels), and a routine on the balance beam progressing

from the easier to the more difficult.

The stunts are posted for the all-around or novel events outside Coach Welser's office in the gym. The balance routine is as follows:

Walk forward (5 points).  
Walk backward (5 points).  
Walk sideward (5 points).  
Jump turn (5 points).  
Side Stand and jump turn (5 points).

Walk forward touching knees to beam, twice each (5 points).

Walk forward with eyes closed (10 points).

Walk backward with eyes closed (10 points).

Practice is an important part

for entry into the meet and gym team members (who are not eligible to participate) stand ready to serve as coaches and aids as do Coaches Welser and Neiger.

But time is running short. The gym is available for practice Mondays from 10:30 to 3:30; Tuesdays, Wednesdays and Thursdays from 9:30 to 1:30; and Fridays and Saturdays from 9:30 to 12:00.

### Open To All

Competition is open to individuals as well as teams. Teams must have at least 3 and not more than 10 men. Prizes are medals for first and second places with a trophy going to the highest scoring team.

Coach Welser, heading the tourney, expects a bigger entry than ever this year.

Following is a list of the competition since it was first introduced in 1948. Points are in parentheses.

1948—Phi Delta Theta (5); Chi Phi (9).

1949—Latin American Club (7); P.D.T. (19); S.A.E. (15); K.A. (8).

1950—P.D.T. (42.5); Navy (39.5); K.A. (12.5); P.K.A. (7); S. Chi (6).

1951—P.D.T. (66); A.T.O. (20.2); S.A.E. (9.5); B.T.P. (0); P.K.A. (0).

## Jacket All-Opponent Five Duplicates All-SEC Squad

Last Tuesday afternoon, before the basketball squad held their final workout prior to enplaning for the SEC Tournament Wednesday evening, Captain Teeter Umstead asked his hardwood colleagues to vote on an All-Opponent Team.

The results were much the same as the Associated Press and Constitution all-conference honor quintets. Voting was clearly decisive for Tech's All-Opponent lineup with five SEC court aces getting most of the votes.

As a matter of fact, the squad the Jackets picked is identical with the AP all-SEC team. Kentucky placed three men and LSU two.

Cliff Hagan, Bobby Watson and Frank Ramsey, all great players on the Kentucky Wildcats five, each polled 7 votes. Bobby Pettit, sensational LSU sophomore center-forward, also tallied 7 votes. His teammate and playmaker of the Bengal Tiger squad, guard Joe Dean, drew 6 votes and was a clear-cut choice to the outstanding aggregation.

Tulane's big center, Don Holt, and Tennessee's pivotman, Herb Neff, were closest in contention with 4 and 2 votes respectively.

Listed at 1 tally apiece were Morocco (Ga.), Casares (Fla.), Cox (S. C.), Robbins (Ole Miss.), Kardokus (Vandy), and Bartlett (Tenn.).

It's interesting to note that Alabama's fine center, Paul Sullivan, wasn't included on the Jackets' opposition roster. Sullivan drew a second string AP all-SEC berth and a first string spot on the Constitution's poll of SEC coaches.
