## Student Government And Honor Systems Chief Topic Of Discussion At Mid-Western Conference

### Survey Indicates Lack Of Support On Part Of Students

The Mid-Western Students' Conference which met in New Orleans, February 17-20 brought together representatives from student bodies of more than thirty universities, and representing more than 123,000 students. All sections of the country were well represented, with delegates as far East as Penn State, as far West as Wyoming, Minnesota and Colorado, and as far South as Tulane.

Student problems of interest to all universities were discussed. The chief topic of discussion was the student government and honor systems. This matter consumed most of the time, and discussion and interest in this matter was very keen from all sections. In carefully surveying the situation of honor systems, as brought out by discussion, it was found that honor systems as a whole throughout the colleges represented were failures. Many reasons for the failure and non-use of honor systems in schools were attributed to the lack of support of the student body. It seems from reports given that students do not care for honor systems, but prefer leaving this matter to the faculties of their institutions.

However, it was found that in some departments of the larger universities represented the honor system works successfully; for instance—at Tulane in the Medical Department no cases of the violation of the honor system have ever been reported. A few other colleges reported likewise.

In other discussions brought out it was found that in most colleges represented, student councils, or rather student governing bodies, control the activities of the school. Control of the election of the editors-in-chief of the publications is in the hands of the student council. Likewise managers of ball teams, Glee clubs, and other student organizations were elected by student councils. Of course, councils in such cases as mentioned above are

(Continued on Page 5, Column 2)

### Fraternity Delegates Travel

HELD IN ALL PARTS OF THE COUNTRY

### Thousands of Miles to Conventions

Tech fraternities send representatives many thousands of miles each year to attend the national conventions and district conventions of the fraternities. The majority of the fraternities represented at Tech hold national conventions in alternate years, the chapters meeting in district conferences in the intervening years.

The A. T. O. fraternity held its district convention during the holidays as a guest of the University of Florida chapter at Tampa, Florida. The next national convention, to be held next January, will also take place in Florida, Jacksonville having been designated as the meeting place. Boland Glover represented the Tech chapter of A. T. O. at the district conference.

Beta Theta Pi went outside of the United States to hold its 1925 conference. The Tech delegate, Francis Cook, went all the way to Bigwin Inn, Lake of Bays, Canada, to represent the Tech chapter during September 1, 2, 3, and 4. The next convention of the fraternity will take place at White Sulphur Springs, West Virginia, beginning June 29, 1926.

The Chi Phis met at the Waldorf-Astoria hotel in New York City on

December 29, 30 and 31, last. William Stubbs and Wylie Arnold were present to represent the Tech chapter.

The Eighty-fifth Convention of the Chi Psi Fraternity will take place in New Brunswick, N. J., in June of this year. The convention is an annual occurrence, Hal Chaille having represented the Tech chapter at the last year's conference, which met in Williamstown, Massachusetts.

Blake Barron represented the Tech chapter of Delta Sigma Phi at the convention in Chicago during December 28, 29 and 30, 1925. The Delta Sigma Phi convention is biennial; the next meeting place has not been fixed.

The Delta Tau Delta fraternity sent Carl Rustin as its representative to the Karnea of 1925, as the convention is called, which met in Meadville, Pennsylvania, on August 27, 28 and 29. Savannah, Georgia, has been selected as the meeting place of the Karnea of 1927, the next convention.

The last biennial convention of the Kappa Alpha fraternity met in Richmond, Virginia, during December 28, 29 and 30, 1925. Hugh Harris represented the Tech chapter. The meeting

(Continued on Page 8, Column 1)

### Seniors To Take Definite Action On Class Memorial At Meeting Tuesday

#### Many Candidates Report To First Class For Cheer Leaders

Last week the cheerleaders issued the annual call for candidates for cheerleader and a large number of candidates reported at the Tech "Y."

As a word of explanation—these classes are held every spring and continue through the baseball season. Cuts are made in the squad from time to time until the baseball season is well under way. Then the boys who are left get a chance to get some practical experience leading yells at the baseball games on Grant Field. From this time the Anak society keeps their eyes on the candidates and at the end of the baseball season the Anak Society makes the final selection of cheerleaders for next year. Usually one cheerleader and one alternate are picked. This year, however, it is quite probable two cheerleaders and one alternate will be selected.

Georgia Tech is noted throughout the whole country for its school spirit—the reputation of the Golden Tornado has traveled throughout the whole country—and close behind it the school spirit of Georgia Tech. Some time ago an article appeared in "Liberty" magazine expounding on the value of concerted cheering at collegiate athletic contests and Georgia Tech was close to the top of that list of the biggest schools in the country.

Judging from the showing this year and last year—this reputation is undeserved. And it is for that reason that the Anak society and the cheerleaders are especially anxious to get out a large number this year from which to make the selections.

It's never too late to try. Any who are interested report at the Tech Y Monday, Tuesday or Thursday night. There is still plenty of room.

#### Committee Appointed To Make Complete Report On Plans

#### Important That All Members Be Present

Final and definite action on the senior memorial will be taken by the class at the next meeting on Tuesday, March 9, in the Academic Chapel, when the committee composed of Carter Barron, Warren Wheary and Marthame Sanders will make its report and recommendation on the Memorial.

The question of a senior memorial was discussed at the last meeting of the class on March 2 and it was decided that an arch would be the most appropriate if the required amount of money could be raised to put it over. The committee is to have all the necessary information and every member of the class should be present to give his support to this Memorial.

Other important subjects discussed included the class banquet. A committee composed of Ike Williams, Skinny Edge and William Ware was appointed to make the necessary arrangements for the Senior banquet. This committee is also to report at the meeting Tuesday.

The election of a class historian and class poet was held; William Wear being elected historian and Joseph Eichberg poet.

### Tau Epsilon Phi Leads Fraternities In Scholarship

#### Fraternity Average Below That Of School

The Student Activities Committee, of which Dean Field is secretary, has just compiled a chart of the standings of all fraternities with regard to scholarship for the first term. Tau Epsilon Phi heads the list with an average deficiency of only one-half per man. Phi Kappa Sigma and Phi Epsilon Pi were second and third respectively. Ten fraternities had an average better than that of the whole school, while twelve were below the school's average.

In the following chart of standings, under the column headed "Rank," the school average is taken as zero and the distance from zero to the highest possible rating is divided into ten equal parts numbered from one to ten. The same size spaces below are marked negative rank.

	No. Men	Aver. Def. Per Man
TAU EPSILON PHI	12	.50
PHI KAPPA SIGMA	28	.82
PHI EPSILON PI	21	.90
SIGMA ALPHA EPSILON	52	.98
ALPHA TAU OMEGA	44	1.00
DELTA TAU DELTA	31	1.06
SIGMA PHI EPSILON	41	1.07
CHI PSI	20	1.10
DELTA SIGMA PHI	41	1.20
BETA THETA PI	36	1.22
SCHOOL	1764	1.24
SIGMA CHI	35	1.26
ALL FRATERNITIES	696	1.29
PI KAPPA ALPHA	39	1.29
KAPPA ALPHA	37	1.30
PI KAPPA PHI	30	1.30
PI LAMBDA DELTA (L)	26	1.31
CHI PHI	31	1.39
THETA CHI	31	1.39
PHI SIGMA KAPPA	30	1.40
PHI DELTA THETA	35	1.57
SIGMA NU	32	1.62
KAPPA SIGMA	31	1.81
GAMMA TAU DELTA (L)	20	2.50

#### Glee Club Gives Performance In LaGrange

On Thursday, February 25, the Tech Glee Club went to LaGrange where they played to a crowd that was most appreciative of their talent. The crowd was not as large as expected and as a result the cash receipts were not so heavy.

The program was rendered in two acts, and from the time the opening chorus and first solo was sung by Stewart Boyle to time of the last solo sung by Charles Walker and the closing chorus, the program was delightful and pleasing in every way. The first act was given in six numbers, they were—Opening Chorus—Sense and Nonsense—Yellow Jacket Four—String Syncopation—Such is An Artist's Life and A Sailor's Romance. In the second act the Glee Club presented—"Ye Modern Minstrel," in which the following men took parts, Mr. Arthur Edge, Mr. Willie Bryson, Mr. Butch Bearden, Mr. John Pritchard, Mr. Shorty Wiggins, Mr. Charles Walker and Mr. J. W. Bearden. This is a very clever act and brought many encores.

The Glee Club had planned to make a long trip next week, but due to the fact that dates could not be arranged to play in some of the towns at this time, it was necessary to postpone the trip a week, so it is very probable

### Former Tech Student Outstanding Gymnast At West Point

#### Will Compete In Indoor Meet On March 13

West Point, N. Y., March 3, 1926—The 32nd Annual Indoor Meet of the Cadets of the Military Academy will be held in the Cadet Gymnasium on Saturday afternoon and evening, March 13. This meet provides most varied athletic competition. Three hundred Cadet Athletes take part in forty-five different events. There is a regular swimming meet, a complete boxing and wrestling show, fencing with foils, saber, and epee, indoor track and field events, straight gymnastic events and handball contests.

Striking features of the meet will be the great struggle for the Foster Memorial Cups which are awarded to the two best all-round gymnasts; the presentation of the Edgerton Saber to Cadet H. R. Baxter, of Chester, Pennsylvania, the outgoing football captain; the presentation to first-classmen, who have won their major sports "A," Army Athletic Association Gold Miniature Athletic Trophies; the awarding of the De Aguerro Memorial Cup to the class winning the meet; and the all-important award of the Army Athletic Association Saber which will go to the Cadet who has excelled in general athletics during his four years at the Academy.

The struggle for the Foster Memorial Cups will lie among M. D. Jones, of Quitman, Ga., Class of 1926, and a former student of Georgia Tech, F. H. Falkner, of East Orange, N. J.,

## Senior Class Meeting

Tuesday morning there will be a very important meeting of the senior class to decide about the memorial and other important affairs. To this meeting all seniors are urged to come. At the meeting last Tuesday morning only fifty of the class of three hundred were present. This indicates that only about one-sixth of the class have interest enough in the plans of the class to come to the meetings. The class of 1926 is reputed to be a very good class, in fact some contend that it is one of the best that has ever been to Georgia Tech. This boast has been made several times but to judge from the representation at the meetings one would judge that it is one of the worst in class spirit. A senior class is supposed to be a leader in the school, to set examples for the underclassmen to follow. How can that be said of this class when the members are not sufficiently interested to attend the meeting. This meeting Tuesday will probably be the last one this year except for the banquet and every senior should make a special effort to be present and help put over this senior memorial and a good senior banquet. Take an hour from your valuable time and come to the meeting.

## Dr. Van Doren's Opinion

Dr. Carl Van Doren, famous literary critic and author, in an interview in Atlanta recently, said: "The youth of the State are keen-minded, eager and enlightened, warmly following the lead of liberal teachers, and the University of Georgia is one of the most enlightened schools in the country, with great possibilities of reaching the top of the world of learning if not hampered by politics and lack of funds." Dr. Van Doren's remarks concerning the personnel and characteristics of students in Georgia results from the observations of an expertly trained mind in the field of education. What he says may justly be considered as coming from an authority. In native ability, intelligence, alertness and enlightenment the students of Georgia, indeed, are not exceeded in any respect by students of any section of this or any other country. Georgia may rightly feel proud of its student personnel as ranking with the best any section can boast of.

But what about the last remark of Dr. Van Doren's with reference to being hampered by politics and lack of funds? Two twin evils are these which often go hand and hand and at their door lies the answer to most of the ills to the State owned institutions. Does not the lack of funds result in a vicious circle? After all, is there any real economy in cutting down on educational advantages that the State can give its youth and at the same time reducing their potential intellectual development and earning capacity? Will it never be seen that on account of our State institutions being continually cramped for funds and consequent modest salaries paid college professors, the best and brightest minds of the teaching profession are either being forced out of it altogether or else are being attracted to more remunerative positions with institutions of learning in other sections of the country.

## The 1925 Memorial

It is not generally known by the students on the campus to just what extent Col. Sam Tate and the Georgia Marble Company are responsible for the beautiful senior memorial of last year. Nor, to our knowledge, has the student body in any way ever expressed its appreciation to them. Recently it was discovered that the company let the senior class of last year have this memorial at a very much reduced price, so low in fact, that it did not represent a third of the market value. Had it not been for this reduction it is doubtful whether or not the senior class could have given this type of memorial, and thus one of the most beautiful adornments of the campus would have been lost. Either the Student Council or some other organization on the campus should write a letter to Col. Sam Tate expressing the appreciation of the student body of Georgia Tech for the share that the Company donated in the memorial.

# CAMPUS CHATTER

Phantoms! Phantoms! Have you indulged in the popular outdoor sport of "Cherchez le Phantom?" From all accounts it appears a very promising and exaggerated type of sport. We suggest that Tech have the idea patented and install the same as a substitute for "Hair and Hound."

—G. S. T.—

If you want any first hand information as to the art of blackmail and how it failed to succeed, why just go to four prominent members of a certain fraternity and true information can be vouched. Certainly if the athletic officials knew all we know of this little affair, surely letters might be given with the words "Anything for Once" written across the entire front. Abou Ben Adhem! May thy tribe increase!

—G. S. T.—

Soon Spring holidays will be observed in the other colleges of the South, and we take pleasure in announcing the regular row of holidays for us will begin on Saturday noon and terminate the following Monday morning. Quite a few students are not expected to go home for the holidays and there are rumors of a bus ride out to Morningside. Look out Buttermilks!

—G. S. T.—

Speaking of bus rides, one recalls

the pleasant times had atop one of these creatures last fall when all the pretty girls in Atlanta seemed to have a pocket full of dimes and spent them only on Sunday afternoons. Well, Boys, it's a great and wonderful life if the dimes last out.

—G. S. T.—

Next comes baseball. From the new crop of Freshmen and the abundance of fresh meat, those inspectors who play ball should find plenty of batting practice on schedule. Brooms to take the place of baseball bats and the arm that knocked the homer will surely play "over the fence is out" when the poor freshman's anatomy is under fire.

—G. S. T.—

We don't mind puns being pulled on us at Tech, but when a sad one is used that is a question concerning a horse of the color brown. This popular comedian, in securing a kiss from his partner, (about the nth million) pleaded and finally in one big, bold seizure announced his intention of taking it like the Ga. Tech fellows did—Caveman like. Someone in the balcony giggled and our Sara snickered outright. Maybe she knew. Anyhow she was willing and that means a lot with some of these Atlanta girls.

## News From Other Colleges

THREE students of the University of Rochester have signed to play in the orchestra of the Cunard Line ship California for next summer.

TEN students at the University of Illinois were recently fined \$10 for hooking their sleds onto the backs of automobiles.

SUSPENDERS or "galluses" to hold up the skirts is the latest thing in women's fashions say the girls of Converse College. The suspenders have succeeded the belt and are very conspicuous by their bright colors.

AUSTIN College has begun the practice of having the professors make social calls on the students. They claim that if the members of the faculty see their students only in the class-room they never really know or understand them.

THE faculty at North Carolina State are proud to report a 400 per cent increase in co-eds this quarter. Before Christmas there was only one girl; there are now five.

RANDOLPH-Macon is the only college in the South that allows the coach to appoint captains.

EACH fraternity taking part in an interfraternity track meet at the University of Southern California competed for a sorority, each team wearing the colors of the sorority which it represented.

HARVARD University will from now on allow but 1,000 men to enter the university each year. This will raise the standard of the school by barring those who do not have a high enough grade average.

SENIORS at the University of Washington recently turned boot-blacks and collected over \$500 by shining shoes. The money went toward the establishment of a permanent fund for the aid of students in ill health.

FOLLOWING the example set by Harvard University a few weeks ago the faculty of Yale University has announced that after a certain rank in scholarship has been attained by members of the senior class, they may attend lectures and classes at their own discretion.

NINETEEN new courses are to be offered by the University of North Dakota for the second semester according to recent reports from the university council there.

THE southern delegates of the National Student Federation are vigorously protesting the election of a negro student to the national committee.

FIFTY-FIVE new members were recently added to the staff of the Dakota Daily Student publication of the University of North Dakota. These additions included students for both the editorial and business departments.

THE extension division of the University of Kansas has an enrollment of nearly 1800 students.

MEMBERS of the senior class at the University of Mississippi are circulating a petition requesting that Governor Whitfield veto the bill recently passed by the Mississippi legislature prohibiting the teaching of the evolution theory in schools receiving state funds.

# CAMPUS CALENDAR

## Saturday, March 6:

Track Meet—Yellow Jackets vs. Tornado (Grant Field)	2:30 P.M.
Merriemakers Dance (Garber Hall)	9:00 P.M.

## Sunday, March 7:

Bible Classes:	
Gene Turner (Ponce de Leon Baptist)	9:45 A.M.
North Avenue Presbyterian Church	9:45 A.M.
St. Marks Methodist Church	9:45 A.M.
All Saints Episcopal Church	9:45 A.M.

## Monday, March 8:

Technique Makeup Staff	7:00 P.M.
Radio Program Broadcast by WGST	9:00 P.M.

## Tuesday, March 9:

Glee Club Practice (Tech "Y")	4:00 P.M.
Technique Editorial Staff ("Y" Basement)	4:00 P.M.

## Wednesday, March 10:

Blue Print Editorial Staff ("Y" Basement)	4:00 P.M.

# THE ENGINEER

Who comes with pencil sharpened keen,  
With profile long and sober mien,  
With Transit, Level, Book and Tape  
And glittering axe to swat the stake?  
THE ENGINEER

Who sets the level, bends his spine,  
Squints through the glass along the line,  
Swings both his arms at rapid gait,  
Yells, "Hold that Goldamed rod up straight?"  
THE ENGINEER

Who raves and snorts like one insane  
Jumps in the air and claws his mane  
Whene'er he sees a scraper take  
A whack at his most cherished stake?  
THE ENGINEER

Who says he'll charge an even ten  
For stakes destroyed by mules and men,  
While on all fours he tries in vain  
To find the vanished stake again?  
THE ENGINEER

Who saws the air with maddened rage  
And turns with hate the figured page  
And then with patience out of joint  
Ties in another reference point?  
THE ENGINEER

Who calls it your unrivalled gall  
Whene'er you kick for overhaul,  
And gives your spine a frigid chill  
Whene'er you spring an extra bill?  
THE ENGINEER

Who deals with figures most profuse,  
And tells you solid rock is loose,  
That hardpan is nothing more than loam,  
While gumbo is lighter than sea-foam?  
THE ENGINEER

Who, after all, commands our praise  
In spite of all his peculiar ways,  
While others harvest all the gains  
That spring from his prolific brain?  
THE ENGINEER  
—Clemson Tiger.

## IKE GARBER ELECTED DELEGATE TO PI D. E. CONVENTION

Ike Garber, business manager of the Yellow Jacket was elected by the Tech Chapter of Pi Delta Epsilon to represent it at the National Convention of the Fraternity to be held in Berkeley, Cal. in September. Ed White of the Technique was elected as alternate delegate.

This fraternity which is the largest journalistic fraternity in the country has chapters at nearly all the larger schools and holds its conventions once a year. The last one was held in Syracuse, N. Y. in May 1925. Since the foundation of the Chapter in 1922 it has never failed to be represented at the National Convention.

The Tech chapter is planning to do the publicity work of the seniors again this year which includes writeups about the prominent seniors which will be sent to the home papers.

## SEVERAL VACANCIES IN DORMITORIES

Since the beginning of the second term there are several vacancies in the dormitories. The main cause of these vacancies is the departure on permanent leave of a good many students at the end of the first term. Comparatively few outsiders appreciate the many advantages of rooming in the dormitories. Living in Swann or Knowles Dormitories necessitates the taking of meals in the mess hall. The cost of staying in the dormitories is less expensive on the whole than rooming outside since the single cost includes room, meals, laundry, light, heat, and other accommodations. It is not necessary for one rooming in Brown Hall to take meals in the Mess Hall. For the Freshmen rooming in the dormitories Friday and Saturday nights are the privileged evenings. Everyone who has passed in all his work the first term is allowed and a reasonable number of signouts per week.

## Kappa Alpha, One Century Old, Plans Celebration

**Oldest Greek Letter Fraternity To Have Continuous Existence In American Colleges**

Kappa Alpha, the oldest Greek letter fraternity to have a continuous existence in American colleges, is planning to celebrate attainment of its first century at Union College. The first formal meeting of what was then known as a social and literary society was held November 26, 1825. Three members of the class of 1826 organized Kappa Alpha, and it flourished from its inception, although there were years when it encountered serious opposition from forces that objected to secret societies of any kind. The second chapter was installed at Williams in 1833, and the third at Hobart in 1844. Another fraternity having the same name was established at Washington and Lee in 1865 and is confined to southern colleges and universities.

Although Kappa Alpha is known as the oldest continuous fraternity, Phi Beta Kappa, the honor fraternity, was founded at William and Mary, December 5, 1776. The existence of this society was interrupted by the Revolutionary war and by other causes, but it continued to reassert itself at intervals, and a new constitution was written in 1883. It now has chapters in many American educational institutions. Scholarship is the basis for election to membership.

The end of the first century for one fraternity sees Greek letter organizations on every hand. The latest edition of Baird's manual of American fraternities lists 48 general fraternities for men and 24 general sororities for women. Fifty-one professional fraternities, such as musical, dental, medical, legal, engineering, and the like, have been formed, and Phi Beta Kappa has been followed as an honor fraternity by the organization of 24 others. Many fraternities and sororities have been organized and many organizations are petitioning for chapters in the older Greek letter organizations. The passion for Greek letters has not been confined to colleges and universities. Other social and literary clubs have been formed under Greek titles that have nothing to do with any educational institutions. The prohibition of these fraternities in a Georgia high school recently caused part of the student body to walk out. The contention was that the fraternities were contrary to the ideals of democracy, but the ban was finally lifted.

## FORMER TECH STUDENT OUTSTANDING GYMNAST AT WEST POINT

(Continued from Page 1, Column 5) Class of 1928, and P. H. Brown, of New Orleans, La., and W. L. Bell, of Richmond, Va., both of the Class of 1929. These cups are awarded annually to the best two all-round gymnasts, performing on horizontal bars, parallel bars, flying rings, and on both the long and side horse. Each contestant must do a prescribed exercise on each apparatus. Jones seems almost certain of winning one of the cups. As for the others, Brown looms up as the most likely, although Bell and Falkner are both thoroughly trained gymnasts.

## Nat LUXENBERG & Bro. CLOTHES

The Fly-Front Coat is characteristic of the smart style and free drape which has made Luxenberg clothes a standard.

Next Showing  
HOTEL ANSLEY  
Mon.-Tues.-Wed.  
March 15, 16 and 17th

Nat LUXENBERG & Bro.  
37 Union Square, New York  
Between 16th & 17th Sts.

## March Issue of Yellow Jacket Out Wednesday

**Will be Girls' Number**

Girls' Number of the Yellow Jacket, which is to be off the press about Wednesday of next week will be one of the outstanding issues of the year's volume, according to those in direct touch with the publication. They can make rather complimentary remarks, with all modesty, for this issue is in large part the work of feminine friends of the Yellow Jacket, who have contributed many of the most attractive humorous bits. When it was asked who the young ladies are, the answer was rather evasive, so Technique readers will have to join with the staff in waiting for the new Yellow Jacket to find out all the details.

The April issue is to be the Travel number of the Yellow Jacket, and will contain a variety of choice yarns on this most elastic subject. Copy for this number is due March 10th.

## INTER-COLLEGIAN CARRIES ARTICLE ON TECH "Y"

There appeared in the March issue of the Inter-Collegian, a national monthly on conditions in the American College, an article on the work and purpose of the Tech Y. M. C. A. which was written by Bill Gore, one of Tech's most active "Y" workers. The article outlined in an excellent manner the place in student life of the Y. M. C. A. at Ga. Tech. A good description of the "Y" building and equipment was made, and also the account of the constructive work of

## Dr. Herty White's Letter of Appreciation To President Brittain

Dr. Chas H. Herty, who was among the many prominent scientists and delegates attending the Ceramic Convention which was held in Atlanta on February 8-11 has written a most appreciative letter of his entertainment while in Atlanta to Dr. Brittain. The letter is as follows: President M. L. Brittain, Georgia School of Technology, Atlanta, Georgia, My dear President Brittain:

Now that I am back again at my desk after a very happy week spent in Georgia, I want to write and tell you how much I appreciated your many kindnesses to me during the day I was in Atlanta, in the opportunity to meet the members of your faculty and to address the seniors of your Institution and to take part in the very beautiful luncheon you gave in the Capital City Club.

It was a great regret to me that the necessity of my leaving Atlanta the next morning made it impossible for me to see the new building which houses your Ceramic School. Some day I hope still to have the pleasure of seeing it and meeting Dr. Henry.

With best wishes, I am,

Very sincerely yours,  
CHAS. H. HERTY.

## New Equipment For Com. Dept.

A new Dictaphone set has been bought for the Commerce Department and will be in use within a few days. This equipment is primarily for the use of the freshman class and will be sufficient to accommodate five men at a time.

Every member of the freshman class will be required to familiarize himself with every part of the machines and to be able to take a required amount of dictation from the machine.

One of the power amplifier stages of the world's first super-power transmitter

Antenna of super-power transmitter

## The World's Loudest Voice

On the rolling plains of South Schenectady, in several scattered buildings, is a vast laboratory for studying radio broadcasting problems. Gathered here are many kinds and sizes of transmitters, from the short-wave and low-power sets to the giant super-power unit with a 50- to 250-kilowatt voice.

Super-power and simultaneous broadcasting on several wave lengths from the same station are among the startling later-day developments in radio. And even with hundreds of broadcasting stations daily on the air throughout the land, these latest developments stand for still better service to millions of listeners.

Only five years old, yet radio broadcasting has developed from a laboratory experiment into a mighty industry. And alert, keen young men have reaped the rewards.

But history repeats itself. Other electrical developments will continue to appear. And it will be the college man, with broad vision and trained mind, who will be ready to serve and succeed.

From the studio of WGY in Schenectady, six miles from the developmental station, there may be controlled a great number of transmitters, one of which is the first super-power transmitter in the world. WGY, together with its associates, KOA of Denver and KGO of Oakland, is the General Electric Company's assurance to the American public that radio broadcasting shall be maintained upon the highest standards.

A new series of G-E advertisements showing what electricity is doing in many fields will be sent on request. Ask for booklet GEK-1.

# GENERAL ELECTRIC

# North Carolina Wins Southern Conference Tournament

## Inter-Fraternity Cage Tournament Begins March 8

Handsome Cup to be Awarded the Winner

The annual inter-fraternity basketball tournament will open shortly. This tournament has always proved one of the most colorful events of the spring and arouses keen interest among the contenders. A handsome cup is awarded to the winner by the Inter-Fraternity Council which with the honor and distinction that naturally comes with victory acts as a very strong incentive for hard work among the various teams.

It will be remembered that last year the Kappa Sigmas and the Sigma Nus went to the finals, and after a very strenuous contest the Sigma Nus emerged victorious. Both of these fraternities are putting strong teams into the field this year and it is expected that they will start the tournament off with a bang.

## GOLF TEAM PLAYS FIRST GAME FRIDAY

Tech's Golf team will play its first match of the season next Friday, March 5, at the Druid Hills Golf Course, against the directors of the Club. The team is in excellent shape for the approaching match and with such a large group of players to pick from should make a very creditable showing.

The most outstanding contenders are Watts Gunn, Archie Reaves, Enos Hartman, Joe High Williams, Johnny (Continued on Page 6, Column 3)

North Carolina, the South's Best Basketball Players

## Third Consecutive Championship For Tarheels

Miss. Aggies Runnerup

Another Southern Conference Basketball Tournament came to a close Tuesday night with the quintet from Chapel Hill again carrying away the honors. This marks the third consecutive time that the University of North Carolina has won this coveted championship and the fourth time in their basketball history. With five players, all of practically equal ability at any position, the Tarheels presented a team that worked smoother than any other five and easily won out in the elimination struggle.

The finals of the tournament were played off between North Carolina and Mississippi A. & M. The Aggies doped to lose out in the first round to the strong Maryland five, were without a doubt possessed with more spirit and determination than any team in the conference. Playing all the way through with immense grit the Aggies fought their way into the finals. They then proceeded to outplay the Tarheels for the first half of the game but the smoothness and accuracy of the Chapel Hill outfit finally decided the issue.

The other two teams to survive the semi-finals were Mississippi University and Kentucky. Kentucky lost to the fighting Aggies and in so doing lost their first conference game of the year and upset the dope of numerous experts. The Kentucky quintet were favored to play off the finals and by many to cinch the championship. Their record and stars were enough evidence to demand their favoritism. Jenkins, star guard of the Kentucky team, was chosen for All-Southern honors and it is a question whether he or Stone was the best of the tournament. Stone, was the center of the Aggies play and had little trouble in winning the other guard position. Mississippi also placed a man on the All-Southern five. E. Johnson, accurate tosser, won his place at forward along side of Cobb of North Carolina. Cobb led the field in scoring.

The reorganized Tech quintet, which barely won the right to qualify for the tournament and was expected to lose the first game, played with plenty of spirit and vigor. The Jackets took the measure of the Alabama five in the first round of the tournament by displaying more fight. They were eliminated in the second round by Mississippi. In this game Tech continued the same drive and for the first half held "Ole" Miss to an almost even score. However in second period they lost the services of both guards, George and Jamieson on fouls, and Mississippi took the game 36 to 24. (Continued on Page 6, Column 2)

## Cross-Country Race Draws Large Entry List As Date Nears

WHAT great army of thinly clad youngsters with bare shivering limbs will parade forth on Grant Field next Saturday afternoon for the annual cross-country run, the biggest event in the life of every Tech freshman. The annual race to the water works and back is a tradition of long standing on the campus and the annual affair with the line of tempting cakes draws the underclassmen in heated competition.

There is no getting around it, every freshman must run and those who shirk and hide out in pitch darkness on March 13 can count one of the grandest days in their freshman year lost to them forever. The experi-

ences gained on that run amid the wild cheers from the grandstand as the big gun sounds off will long linger in the memory never to be forgotten and cherished in later life.

The lowly freshmen will not be the only chief contenders for the coveted honors, for there will be sophomores, juniors and seniors who will engage in the long grind for class and club honors. The interfraternity council cup, won by the Beta Theta Pi chapter last year will be awarded to the chapter finishing first. Every runner who finishes has a chance to help out every organization of which he is a member.

The best prize of the races goes to the winner who breasts the tape (Continued on Page 7, Column 2)

## Jackets Defeat Oregon Aggies and Delaware U. in Rifle Match

### Fourth Victory

LIEUTENANT SAMUEL L. METCALFE and his Tech sharpshooters won their fourth rifle match by defeating both the University of Delaware and Oregon Agricultural College last week in dual matches. The Jacket shooters in defeating Oregon Aggies can well be classed as the leading rifle team in college circles for out Oregon way the Aggies have reached a great height and have a long list of victories to their credit being considered as one of the strongest college teams in the country.

The Aggies were given the short end of a 3663 to 3503 score while the Jackets defeated the University of Delaware 3663 to 3503 out of a possible 4000.

Each team used ten shooters firing from the four positions ten shots in the kneeling, standing, sitting and prone. Meeks and Smith tied up for high honors with a 381x400 possible score. Story and Morgan followed in third and fourth place with Banton fifth.

This week the Tech shooters will fire against all R. O. T. C. teams in the Fourth Corps Area and the winning team will represent the Corps in the national match.

The five men making the highest

## GREATER IMPORTANCE ATTACHED TO SPRING FOOTBALL IN SOUTH

IF general interest in spring football continues to grow and take on new life as it has done this season a regular schedule is likely to be made in the future. Already there is some talk on the gridiron that a possible game with both the University of Tennessee and Oglethorpe may be arranged before the Jackets turn in their moleskins. This rumor may take on new life and become a reality since the game with Oglethorpe and Georgia was so successful. That game gave both the Petrel and Bulldog mentors a good line on the players and cemented a great friendship between the two schools.

Spring football not only puts the players in excellent physical condition but it also furnishes more time for individual attention and for the advanced theory to be studied and learned. Then too it affords a chance for the freshmen to know their older teammates and to familiarize themselves with varsity plans.

If the present plans and shifts now taking place on Grant Field are carried out, the student body and the public may see a very different team when the Jackets take the field next fall. The first scrimmage of the spring training program was held last week. The affair was just to get the new men familiar with the Tech jump shift and the plays. Numerous changes were noted among which Thrash, who played center on the freshman team in 1924 and who was the second string center on the varsity last year was playing guard opposite "Firpo" Martin. Bumgardner, the giant Indian, who played center on the freshman team last season, was shifted to tackle on account of his size and speed. Lilliard, who played fullback on the freshman team in 1924, but who was shifted to guard last year, was again seen at the fullback position where he showed up well.

## SANFORD'S PASTE

**Dries Quick  
Sticks Tight  
Never Stains**

## Bob Moreland Making Strong Bid For Third Base

Bob Moreland after attending Meriwether High, where he was captain of both the baseball and basketball teams and also a leading member of the track team and the football squad arrived at Tech in the fall of 1923. Since that time he has proven himself to be a valuable man on both the baseball and basketball teams. He made numerals in track, baseball and basketball his freshman year and last year held down third base on the Jacket nine. It is probable that Bob will play third this season as he appears thus far to be the most likely man for the place. Last summer Moreland held down the hot corner for Marietta who won the championship of Georgia, Alabama and Florida. Being a quick thinking as well as a quick acting player, with a batting average of over .250 per cent, it is expected that Bob will be a big help in making Tech's team a championship one.

### STUDENT GOVERNMENT AND HONOR SYSTEMS CHIEF TOPIC OF DISCUSSION AT MID-WESTERN CONFERENCE

(Continued from Page 1, Column 1) very representative of student bodies. The student body president is rightfully elected to his position by ability displayed as a leader. In most schools it was brought out that cheer leaders were also trained and elected by student councils.

It was found by close observation that in most institutions student councils have more control of activities than has the student council of Tech. They are most active and take great interest in upholding the standards and traditions of their universities. It is hoped that some good may come out of this conference, and that Tech's Student Council may accomplish more in the future.

score in the corps match will be selected to represent Tech in the Hearst Trophy match in which more than 500 teams have been entered.

The following men have been selected to fire this week in the Fourth Corps Area match: Meeks, Morgan, Walton, Watkins, Smith, Banton, Coates, Lanier, Story, Lee, Hitchcock, Whittlesley, Snavely, Barlow and Myers.

The following are the scores made against both the Delaware and Oregon matches:

Meeks	381
Smith	381
Story	371
Morgan	368
Banton	367
Lee	362
Walton	361
Coates	359
Hitchcock	359
Watkins	354
Total	3663
Tech	3663
Oregon Aggies	3636
U. of Delaware	3503

**When it's a rainy night—and with three crafty bridge players your luck is running wild—have a Camel!**

WHEN the dark skies are pouring rain outside. And fickle fate deals you hands at bridge that you play with consummate skill—have a Camel!

For Camel is the silent partner that helps every deserving player win his game. Camels never hurt or tire the taste, never leave a trace of cigarette after-taste. Regardless of the gold you spend, you'll never get choicer tobaccos than those rolled into Camels.

So this evening as you ply your unerring skill, evoke then the mellowest fragrance that ever came from a cigarette.

Have a Camel!

Our highest wish, if you do not yet know Camel quality, is that you try them. We invite you to compare Camels with any cigarette made at any price.

R. J. Reynolds Tobacco Company

Phi Pi Dance

The members of the Phi Pi sorority of Washington Seminary entertained at their annual formal dance last Thursday night at the Druid Hills Golf Club. The ball room was attractively decorated for the occasion with smilax and the sorority colors, and at one end of the room the Greek letters, Phi Pi, electrically lighted were placed. The dance proved to be quite a success, and was thoroughly enjoyed by quite a number of Tech, Emory, and Oglethorpe students.

Among the young ladies present were Misses Boyce Lokey, Pat Rogers, Helena Calloway, Josephine Clark, Virginia Turman, Helen Barbee, Lena Knox, Gladys McClelland, Laura Candler, Eugenia Bridges, Kate Thompson, Julia Ruth Turnbow, Corday Rice, Cornelia Orme, Callie Orme, Jeannette Bailey, Alice Gayle, Katherine Smith, Florence Eckford, Jane Tway, Hazel Stamps, Esther Garrett, Augusta Porter, Sara Southerland, Adeline Winston, Edna Belle Raine, Inez Willingham, Catherine Norcross, and others.

Kappa Sigma Tea Dance

The Kappa Sigma Tea-Dance given Saturday evening at the Capital City Club by the members of the Tech and Emory chapters in honor of the visiting members and officers was one of the most delightful affairs of the week-end, assembling quite a few of the college set and a select number

from Tech and Emory.

Among those present were: Misses Pearl Fort, Gladys McClelland, Alice Carmichael, Gates Eckford, Alice Gayle, Edna Belle Raine, Helen Barbee, Venita Viley, Boots Walker, Harriet Wynn, Mary Moritz, Inez Willingham, Helena Calloway, Mary Rhorer, Corday Rice, Mary Ensley, Pat Rogers, Eugenia Bridges, Adeline Wynston, Frances Barnett, Callie Orme, Jinx White, Margaret Keiley, Josephine Hollis, Nell Clayton, Elizabeth Whitman, Jane Williams, Virginia Myrick, Margaret Bostwick, and others.

Merriemakers Dance

The Merriemakers Club gave their usual dance last Saturday night at Merriemakers Hall, a large crowd attending. Adding to the interest of the occasion were the many visitors, among whom was Miss Dora Dubb, sister of the famous John J., world's champion Mexican athlete.

Among those present were: Misses Gladys McClelland, Gates Eckford, Edna Belle Raine, Helena Calloway, Pat Rogers, Eugenia Bridges, Adeline Winston, Frances Barnett, Esther Garrett, Sara Southerland, Jinx White, Josephine Hollis, Nell Clayton, Margaret Bostwick, Jane Tway, Helen Bradbury, Virginia Deering, Inez Willingham, Charles Harmon, Josephine Clarke, Louise Bradbury, Florence Eckford, Elizabeth Spalding, Kate Thompson, Lena Knox, Bunch Dunbar, Sara Ivins, Boyce Lokey, Anne Spalding, Sophie Street, Edna Belle Raine, and others.

NORTH CAROLINA WINS SOUTHERN CONFERENCE TOURNAMENT

(Continued from Page 4, Column 5) Nick George, Jacket guard, was chosen on the second All-Southern team.

The most outstanding characteristics of the tournament were the surprising elimination of Maryland in the first round, the dark horse playing of the Mississippi Aggies, the dribbling and speed of Jenkins, Kentucky guard, the accurate tossing of Cobb, Tarheel forward, the center playing of Newcombe, Tarheel center, and the playing of Virginia in holding North Carolina to such a close score in the early part of the tournament.

The official All-Star team is as follows:

E. Johnson—Ole Miss.....Forward  
Cobb—North Carolina.....Forward  
Newcombe—North Carolina.....Center  
Stone—Miss. A. & M.....Guard  
Jenkins—Kentucky.....Guard

So. Intercollegiate Arch. Contest Opens

Tech Has Won Ten First Places in Twelve Years

Seniors in the Department of Architecture will soon have an opportunity to submit plates for competition in the thirteenth annual Southern Intercollegiate Architectural Contest.

Although full details concerning the contest for this year have not been received, it is supposed that the following colleges will be among those entered: Clemson, Texas A. & M., Auburn, Florida and Rice Institute. The problem will most likely be given out by Washington University, of St. Louis, Missouri, and judgment of the plates entered will be held there. Any senior may submit a plate to be judged in his own school. The four plates selected as the best from each college are then sent to represent that college in the southern intercollegiate competition.

In the twelve years that this contest has been held Tech has won first place ten times. This is a splendid record, and those who are familiar with the work of this year's seniors are confident that the first prize will come to Tech again. The freshman class in Architecture this year is the largest in the history of the school, and the first year men bid fair to carry on the good work.

SMALL PERCENT OF STUDENTS ENGAGE IN ACTIVITIES

Approximately 24 per cent of the entire student body of Tech are engaged in some form of activity. There are 255 men engaged in athletic activities while 206 are enlisted in other fields of endeavor.

Exact figures are not procurable but upon investigation a fair estimate shows the following:

Men engaged in athletics are—football, 51; baseball, 50; basketball, 48; track, 70; swimming, 24; tennis, 6; golf, 6; total, 255.

Men in other activities are—Glee Club, 52; Technique, 51; Marionettes, 50; Yellow Jacket, 23; Blue Print, 20; total, 206.

The second term registration was the largest in the history of the school—1,915 men being enrolled; out of this number 461 are engaged in some activity. Often, however, one man is engaged in more than one activity.

INTER-FRATERNITY CAGE TOURNAMENT BEGINS MARCH 8

(Continued from Page 4, Column 1)

Bachman and Captain Bill Spaulding. There are also several other men out who are making creditable showings.

A schedule for the season has not been completed at present but will be announced at an early date. An Eastern trip is being planned which includes matches with the University of Pennsylvania, Princeton and other Eastern colleges. This trip is not a certainty but every effort is being made to carry it through. There will be several matches in Atlanta during the season and it seems as though the Jacket team is in for a good year.

The Scotchman was so tight that he paid for the drinks.

Eustace Learns All About Appendicitis

No. 4 of a Series by Mama's Pampered Pet

"Eustace," said the Doctor, "let us talk today about appendicitis. You may not like to be called Mama's Pampered Pet, but you may well stop, look, and listen to a few things about this disease. Appendicitis, Eustace, may be considered one of the most frequent college diseases. One authority states that 50 per cent of the cases occur before twenty years of age and certainly the percentage becomes higher between the ages of ten and thirty years. It decreases markedly in frequency after the age of forty. It is, then, emphatically a disease of young persons. This explains why one hears of so many college students being operated on each year.

"Appendicitis is an inflammation of the appendix, a worm-like structure located near the junction of the large and small intestines in the right lower part of the abdomen. Its end is closed and it should be able to discharge its contents into the intestine. Failure to do this for any reason seems to favor trouble, namely, appendicitis. This disease is, of course, an infection. Various bacteria may be liable for the disorder, but most often either the colon bacillus or the streptococcus is the trouble-maker.

"How is one to know when he has an attack of appendicitis? By this I mean acute appendicitis, the kind most likely to require an early operation. This is a question difficult to answer directly. One should be very cautious, however, before attempting to treat himself for any abdominal pain; it is better to see a doctor. Good judgment is as valuable as good medicine. It may be dangerous to take a purgative for any such pain. An examination, coupled with the doctor's judgment, should precede treatment in such cases. If the doctor should wish to keep one under observation for a time, this should not be considered unreasonable and consultation may be desirable.

"Once the diagnosis of appendicitis has been made, the quicker the appendix is in the alcohol bottle the better. Delay is often dangerous as complications such as rupture, abscess and peritonitis may occur. Iron-clad rules are out of place in medical practice and the good judgment of doctors cannot be displaced in cases presenting symptoms suspicious of appendicitis. An early operation should carry little dread of consequences, as good surgeons today are most successful in the removal of the cause of this trouble. Most persons operated on for appendicitis without complications are able to leave the hospital in less than three weeks and are rapidly convalescing a week after operation. If thy appendix offend thee, let a surgeon take it out, if that be his judgment after experience with similar cases. Since the year 1886 and the memorable published article of Dr. Fitz, medical men everywhere are more and more convinced of the wisdom of this procedure. Sometimes chronic appendicitis may be handled with deliberation, but acute appendicitis is the most frequent reason for emergency operations in surgery.

"It is of course impossible to cover

Dartmouth Claims Collegiate Hockey Title

Arouses Stir in Northwest League

The claim of Dartmouth to the National Collegiate Hockey title has aroused an unusual stir among the members of the Northwest Collegiate Hockey League. True enough the Big Green has won the eastern title but that in turn does not mean a thing to the sextettes of the Middle West. The work of such teams as Wisconsin, Minnesota, and Michigan, to say nothing of half a dozen other members of the league, is of such caliber that they would give the Dartmouth team a great run in a meeting.

The Badgers have come to the fore with rapid strides under the tutelage of Kay Iverson and while they may not win the title in this part of the country, they will be one of the strongest contenders. The wish of the Badger coach and team could find no greater solace than a meeting with the so-called National Collegiate Champs, Dartmouth.

Minnesota has repeatedly won the Big Ten crown, while Michigan has come to the fore the past two years and would prove a worthy foe for the eastern six. The Badgers on performances to date this winter would be able to hand the "champs" a busy sixty minutes on the ice and it would be no surprise to see the Cardinals romp off with a win over the Green. While such a meeting of eastern and western sixes seems very remote, it would indeed be a mighty feat and a credit to anyone who might be able to arrange the match.

The scene opens on the Druid Hills Golf Club where some go to play golf but where others go to dance. The Phi Pis were holding forth in goodly style while the student bodies of Tech, Emory, Oglethorpe, Tech High and Boys High danced in attendance. The girls were in their glory and arrayed in their best while among them, radiant and triumphant, was a newcomer to Tech and Atlanta. Excited whisperings and inquiries of "Who is She," brought about a shaking of heads—no one seemed to know. At last someone remembered her escort—surely it couldn't be and yet it was—none other than Wayward Boye. Approaching him he cast upon us a cold and fishy eye but presented us to his fair companion and we got the name right, and again we gasped for this was none other than Dora Dubb, sister to the famous John J. Dubb, world's champion oboe player. "Do you go to Tech," she asked and when I admitted it she said, "Oh, I just adore Tech men." Hot stuff. Seeing Wayward approaching with Butch Bearden in tow, I asked for a "no break," which was granted me with a display of graciousness for which the Dubb family is noted. Immediately upon joining the stag line I was besieged with requests for an introduction and inside of a very few minutes half of Tech was clamoring for an

(Continued on Page 8, Column 2)

a subject of this kind completely in so short an interview but, let us hope, here are outlined some of the salient points of interest."

Georgia School of Technology

"A TECHNICAL SCHOOL WITH A NATIONAL REPUTATION"

THE GEORGIA SCHOOL OF TECHNOLOGY offers to young men of ability and ambition a training which will fit them for positions of responsibility and power.

The national reputation of this institution is based not on claims, but on results. Its greatest asset is the record which its alumni are making in the productive work of the world. Georgia Tech graduates succeed because they have been trained both to think scientifically and to work efficiently.

Courses in CIVIL, ELECTRICAL, MECHANICAL, TEXTILE, GENERAL, AND CERAMIC ENGINEERING, ENGINEERING CHEMISTRY, ARCHITECTURE, COMMERCE, AND GENERAL SCIENCE.

Coast Artillery, Signal Corps, Air Service, Infantry, and Ordnance Units of the R. O. T. C.

For Further Information Address

THE REGISTRAR

Georgia School of Technology

ATLANTA, GEORGIA

### Monday Evening Broadcast Under Direction of Prof. Seidell

Monday evening, March 8, the broadcast will be given under the direction of Prof. T. C. Seidell, head of the Electrical Engineering Department. This program of Prof. Seidell, who is a baritone of prominence, should prove very entertaining. He will be assisted by Mr. Dora Duck Seidell, who was formerly organist at St. Luke's Cathedral of this city.

In the 7 o'clock broadcast next Thursday, March 11, the Boys High Orchestra will be heard. Mr. Preston Epps, baritone soloist of the First Baptist Church of Atlanta, will sponsor this program.

Unusual flavor is to be added to this weekly Artist entertainment by a short talk from our celebrated coach, Don Miller, one of the "Four Horsemen of Football." Don, no doubt will be able to give some very interesting points on the outcome of Tech's spring football practice.

Three very good programs have been "sprayed out" in the ether by WGST this week, one of which was a special midnight test broadcast given last Monday night. Prof. Carroll D. Edgar, of the Drawing Department, arranged this test, which consisted of selections on the new Brunswick Panatropie Machine.

This week's Monday program which was given by the Sigma Phi Epsilon Fraternity, went off in great style.

Wilde and Wycoff Close Basketball Career at Tech

### CROSS-COUNTRY RACE DRAWS LARGE ENTRY LIST AS DATE NEARS

(Continued from Page 4, Column 4)

ahead of that great throng who began the long journey. He will receive a handsome gold medal and the choice of the 125 or more cakes. A silver and second choice of cakes will be awarded to second place while the third runner to cross the finishing line will get third choice of cakes in addition to a bronze medal.

For the past three years the old record "has took" a tumble with the running of each race. Back in 1923 Horace Moore breasted the tape first. 1924 saw John Barrett the

winner while last year Herbert Gattis was accorded the honor as the first freshman to win the annual race.

There is a large field this year brimming full of stiff competition. Stuart Haynesworth, Hayden Ross-Clunis, Errol Dawson are listed among the leading upperclassmen. Wright, Womelsdorf, Solomon and Hughes are heading the freshman list. Every afternoon there is an endless stream of track aspirants tramping over the course. Only one more week left—now is the time to get in some last minute training for the race which will be cherished in later years.

### GLEE CLUB GIVES PERFORMANCE IN LAGRANGE

(Continued from Page 1, Column 4)

that the long trip will be made the week of March 14. A few weekend trips have already been made this season and a few more will be made after the long trip has been completed.

"Are you a college man?"

"No; but I know where you can get it."—Clemson Tiger.

The talk of the Thursday night radiocast, last evening, was given by Prof. J. B. Edwards, of the Physics Department, on the subject "Optical Phenomena of the Air."

Georgia School of Technology, Atlanta, Ga.

Program coming in good at Dallas.

SMITZ SNYDER.

## FROM FANCY TO FACT

IN the "Manchester Guardian," one of England's most famous newspapers, there has been a series of American sketches written by a travelling correspondent. His awe at New York's "giant skyscrapers" seems even to have surpassed the wonder which most Europeans feel when they first gaze upon that skyline. "But," he continues, "the electric lift made the skyscraper a fact."

In these words he has expressed very tersely a truth which many of us have come to take for granted.

Nothing could be more fantastic than the sight of those mighty towers climbing up through the many-colored mists of the great city; nothing could be more dream-like. And yet, nothing could be more useless were it not for the thousands of Otis Elevators which are busily plying within those high walls.

The skill of architects and engineers has created a vision, a mirage wilder than any of the "cloud-capt towers" of fancy. But the Otis Elevator has made the skyscraper a fact.

There are over 17,000 Otis Elevators operating in New York City, ranging from the lowly hand-power elevator to the 800 ft. speed automatic signal control elevator for intensive office building service. All elevators in New York carry more passengers per day than the combined subway, elevated and surface car lines, amounting to ten million people per day.

## Now enjoy all-day shaving comfort

NO matter how sensitive your skin, it will find all-day comfort in Williams Aqua Velva—the new, scientific after-shaving liquid. A few drops keep the skin all day velvety smooth just as Williams Shaving Cream leaves it. Big 5-oz. bottle 50c. At all dealers'.

FOR BETTER SHAVING—WILLIAMS

twixt Ed and Co-ed result from that alluring institution, the sorority "At Home" Lunch.

The ideal food is something light, yet satisfying, appetizing without being elaborate—in short easy to prepare and easy to serve.

## Shredded Wheat

fills the bill perfectly. Thousands of fair young stewardesses all over the country can testify to its popularizing, energizing qualities; its adaptability to a number of out-of-the-ordinary menus.

Try Shredded Wheat at your next party lunch and see. The same biscuits of golden brown whole wheat that you have always preferred for breakfast, you know.

food for thought—and health

## FRATERNITY DELEGATES TRAVEL THOUSANDS OF MILES TO CONVENTIONS

(Continued from Page 1, Column 2)  
place of the 1926 convention has not been selected.

Kappa Sigma has only recently concluded a district Conclave which met in Atlanta on February 27 and 28 and March 1. The last national convention of the Kappa Sigma fraternity met in Colorado Springs during the summer of 1925, and was attended by Herbert Hutton in the capacity of the representative of the Tech chapter. W. A. Lewis represented the Tech chapter at the recent district Conclave.

Phi Delta Theta met in Cleveland, Ohio, during the Christmas holidays of 1925, with Jimmie Knight representing the Tech chapter. The fraternity has selected Montreal, Canada, as its meeting place for Christmas holidays of 1926.

Phi Epsilon Pi met during December 28, 29, 30 and 31, 1925, in Atlanta, with Herbert Nussbaum as Tech representative. The next convention will take place during the same dates next year in Chicago.

The seventy-fifth anniversary of Phi Kappa Sigma was celebrated at a convention in Philadelphia during October 19, 20 and 21, of last year. F. R. Bolton attended in the interests of the Tech chapter. The next convention will take place in Nashville, Tennessee, some time during the coming fall.

Phi Sigma Kappa's last Southern Conclave took place in Atlanta on October 24, 1925. The representatives from the Tech chapter were William Ware, E. L. Gunn, Harold Meeks, Rupert Getzen and Duncan Morton. The national convention will be held in Philadelphia during September of this year.

The Tech chapter of Pi Kappa Alpha, along with the Emory chapter, will play hosts to their national convention which is to meet in Atlanta during December 29, 30 and 31 of this year.

Pi Kappa Phi met in Chicago beginning December 26, 1925 with Bill Gordy representing the Tech chapter. Birmingham has been selected as the meeting place of the 1927 convention.

Bill Spalding and Berry Grant will be Tech representatives at the Province convention of the S. A. E. fraternity which will meet in Montgomery on December 29 and 30 of this year. The next national convention will take place in Boston, Mass., during the Christmas holidays of 1927.

Sigma Chi will hold a district convention during the days of April 8, 9 and 10, of this year. Nashville will be the scene of the convention. The Tech representative has not been selected. The fraternity will assemble in national convention next year, the place yet to be decided on.

The Sigma Nu fraternity held its last national convention in West Baden, Indiana, on December 29, 30 and 31, of 1925. The meeting place of the 1926 convention will probably be Washington, D. C., although this has not been definitely decided upon.

Sigma Phi Epsilon will meet in Richmond, Virginia, on August 25, 26, 27 and 28 of this year. The Tech representative has not yet been selected.

## Seniors Elect Popular Men

Election of the most popular men in the senior class for the "Notable Section" of the Blue Print was held at the class meeting Tuesday March 2. The following men were elected: Wycoff, Barron, Williams, Wilde, Merkle, Poole, Tharpe, Marshall, Sanders, Eager, Reeves, Lyde.

Philadelphia will be the meeting place of the Theta Chi fraternity during September 2, 3, and 4 of this year. The Tech chapter has not yet selected its representative.

Gamma Tau Delta, the Tech local which is petitioning Phi Gamma Delta, will send six or eight representatives to Colorado Springs during the latter part of June of this year to attend the Phi Gam convention. Two or four men are to be selected as official delegates, while the rest will accompany the delegates in an unofficial capacity.

## DARTSMOUTH CLAIMS COLLEGIATE HOCKEY TITLE

(Continued from Page 6, Column 5)

introduction. But being so far blessed I smiled to myself and let well enough alone until my no-break arrived. She remembered me, indeed yes, and while we whirled around the floor to the soothing strains of "Who" she talked to me in honeyed words of things past, present and future until my brain was in a whirl. All eyes were upon us as we drifted about, dodging couples by the sixth sense only, for my eyes were anywhere but where we were going. And then during an interlude, I had my say so and as the dance was coming to an end I asked breathlessly "Would she let me take her to the Merrimakers' dance Saturday"—she hesitated and then dropped her eyes—overcome by such a show of recklessness, she whispered "yes." And then she was gone, carried away in the manful arms of Marthane Sanders. In a mental fog I drifted through the rest of the dance and the evening ended ere it had begun. Came Saturday and my impatience increased until by 8:30 I was in a state of mental debility but at last I summoned up my courage and took myself to the Biltmore and wonder of wonders, she was ready and waiting to go. We climbed into her Rolls-Royce, which she had recently won in a beauty contest in Arizona, and ever so smoothly we rode down to North Avenue where the palace on wheels was parked and we entered the Merriemakers Hall. The orchestra leader stopped in the middle of a piece and in a fraction of a minute they struck up with "Hail to the Queen." Quick stuff—what? What followed was but a repetition of Thursday but I was content I had brought her and I would take her home. That in itself was sufficient. I would learn more in one hour's uninterrupted conversation than in a year's snatches of talk at dances. And what was learned will be told later. As the horse said "That is another Tale."

It's always a date, early and late. Out for a drive, out to a fete. With never a moment for me; But I'll get you yet—wait and see! —Juggler.

## "Y" Seeks To Interest Alumni in "T" Book

### 4,000 Letters Sent

During this past week Mr. Cashion, Secretary of the Y. M. C. A. at Tech, and his assistants have been busy sending out copies of letters to the Alumni of Tech, and by the end of the week expect to have four thousand copies sent.

The purpose of the letters is to try and get the Alumni of the school interested in the work of the Y. M. C. A. in publishing the annual "T" book, or "Freshman Bible" as it is sometimes called. This little book is

published for the incoming freshmen at the beginning of the school term.

The cost of publication of the "T" book is considerable and as it is given to the freshmen gratis, the whole burden falls on the already overburdened exchequer of the "Y." In these letters to the old graduates an earnest appeal is made for them to help continue this work by contributing a few dollars toward such a worthy cause.

The primary purpose of the book is to make the freshmen feel at home upon their arrival at Tech, and also to acquaint them with the various college activities, customs, etc. It is a vital service, for a good start is half the game to the average freshman.

## Pressing Club Makes Change in Movie Schedule

Tech Pressery announces a change in the time of the movies being sponsored by them in the Y chapel. Formerly these were started at 6:20 P. M. and now comes the notice that they will be staged at 6:30—ten minutes later. This change was made to give the dormitory freshman time to massage more securely the food of "Uncle Gus" and give them sufficient time to digest the sinkers before the thrills of "The Blazing Trail" might cause them to choke and perhaps almost succumb to so thrilling a melodrama as the Pressery is presenting. Remember the time 6:30 P. M. and make your dates accordingly. The admission is free so there is no holdback.

## Timken Steel for Timken Bearings

The world's largest producer of electric furnace steel is the Timken Roller Bearing Company. A complete steel mill is part of the marvelously self-contained Timken Bearing plant.

Timken Tapered Roller Bearings are produced on a scale so large, because of their large importance throughout manufacture, construction, mining, agriculture, transportation, and every field in which machinery is used.

Timken Bearings are being designed into every sort of machinery to eliminate excess friction, to save labor, power and lubricant, to increase quantity and quality of output, and to lengthen machine life.

These economies are so important to all the industries that 132,000 Timken Bearings are being added daily to the 150,000,000 Timkens already successfully applied.

Each day—each year—Timken Bearings become of still greater interest to all concerned with machinery. As a potential engineer you have a direct interest in obtaining the valuable little book on Timken Bearings. It will be sent free on request.
