Unemployment Insurance Debate Won By Tech

Driving home the dire need of the United States for a constructive plan to combat its present grave unemployment crisis with attendant crime and distress, and citing the prominent example of nineteen foreign countries that have adopted unemployment insurance as a means of meeting this economic evil, the Tech debaters, Furman Smith and Russell Brooke, won a three-point decision over the invading team of the University of North Carolina. The North Carolina debaters, E. E. Ericson and J. M. Bailey, in upholding the negative of the question: "Resolved that the several states should enact legislation providing for compulsory unemployment insurance, based their argument around the technical point that it is serious and criminal to place one's self in close proximity to the rear end of a mule with such kicking abilities as the figuratively as the unemployment problem but that it is deliberately to court disaster by pulling this mule's tail—that is by applying artificial legislation as a corrective measure.

Dr. M. L. Brittain presided, and reiterated his favorable opinion of this forensic sport. The judges were Dr. Philip Davidson, Dept. of History of Agnes Scott College, Dr. C. B. Gosnell, Professor of Government and Politics at Emory University, and Dr. D. Witherspoon Dodge, pastor of the Congregational church.

Lectures on Constitution Will Begin April First

All Seniors Must Pass Examination to Be Held April 13

The examination on the Constitution of the United States and of Georgia will be held in the Y. M. C. A. chapel on April 13, at 3 o'clock. All regular Seniors and Co-Op Seniors must pass the examination before graduation. Section 1 Co-Op Seniors will receive instruction from Prof. McDaniel at a later date in regards to their examination. Section 2 Co-Op Seniors will take their examination with the other Senior students. The examination is not required of Special Textile students, Special Architectural students, and Commerce students who have passed Com. 38.

Lectures will be given in the Y. M. C. A. chapel as follows.

Wednesday, April 1, 11 o'clock.
Thursday, April 2, 8 o'clock.
Thursday, April 9, 9 o'clock.
Students may have from 1 to 3 o'clock April 13, to study for this examination.

Absences and grades are covered by the following rules:

1. With no absences the minimum grade of 60 shall be required to pass the examination.
2. With one absence a grade of 65 shall be required to pass the examination.
3. With two or more absences a student shall be required to take as many coaching lessons as he has missed lectures and make a grade of 65.
- Absences considered as those incurred by students who fail to attend the lectures listed above.

New Military Club Takes Form Only Seniors Eligible

Major Longino has successfully planned a new club at Tech to be organized in September. All Senior military students are eligible for membership. It will be elective for the student and will have no effect at all upon the rating of the Scabbard and Blade fraternity. The student who is eligible to belong to both organizations may do so if he desires.

The clubroom will be in the Y. M. C. A. building and will serve as an assembly hall for all military meetings called by Major Longino or any of the cadet officers. There will be pool tables, magazines, periodicals, easy chairs, lockers, and perhaps a radio. A regular hangout for the members, so to speak.

No dues will be paid. However, a small initiation fee will be required of each member which will be deducted from the member's pay check. This money will be used to fix up the room. At the end of the school year the amount of money left in the treasury will be distributed equally among the members. Approximately one-hundred and fifty students will be eligible for membership. Of this number at least one hundred are expected to join.

This club will also serve the purpose of furthering the spirit of camaraderie that is begun at the summer camp attended at the end of the Junior year. Six weeks of summer camp soon develop friendships that will be further cemented by membership in this senior club.

Georgia Tech Alumni Association Active in New York City

That the New York City Georgia Tech Alumni are active is attested by the fact that at their mid-winter dinner at the Downtown Athletic Club, forty-five men were in attendance. A very interesting talk was delivered by Percy C. Brooks, '91, President of Fairbanks, Morse & Company. Mr. Brooks told about his days at Tech and ended his talk with a strong appeal for interest of the part of the Alumni and pointed out the good work that can be done by the Alumni for Georgia Tech.

The officers of the Georgia Tech Club of New York are J. J. Spalding, 11, President; J. E. Davenport, '08, Vice-President; Dean Hill, '13, Secretary-Treasurer.

At a recent meeting of the club Coach J. W. Heisman at his own request was enrolled among the Alumni. Coach Heisman gave a very interesting talk on General Leonard Wood and his football days at Tech, at the last meeting of the club.

Sparks Heads Mercer Alumni Association

Professor George R. Sparks, head of the Evening School of Commerce and professor in the Commerce Department of Georgia Tech, was elected president of the Mercer alumni of Atlanta at a recent meeting of the organization. Due to the fact that Professor Sparks' interests are so tied up in Tech affairs, it is interesting to note that he is still true to his alma mater.

Tech Students to Model for Atlanta Merchants Will Display New Spring Wear

Tech's Annual Spring Fashion Display will be held in the Y. M. C. A. lobby Thursday and Friday, March 26, 27, at which time students will have the opportunity of viewing the latest styles in men's wear, as exhibited by Atlanta clothiers. The high-light of the two days' display will be Friday night when a group of prominent Tech students will act as models for the merchants in the "Best Outfit Contest" to be staged in the "Y" auditorium at 7 P. M. Street clothes, formal wear, and sport wear will be shown as the boys compete for the \$45 in gold prizes, being judged by style experts from the society staffs of local newspapers.

Refreshments will be served to all visitors of the show, which will be open all day Thursday and Friday. Merchants represented in the display and Best Outfit Contest include: Zachary, Muse, Rich's Men's Department, Parks-Chambers, Copley, Hirsh's, and Florsheim Shoe Company.

The students who act as models have been selected by Pi Delta Epsilon as representing Tech's best dressed men, and will be completely outfitted for the occasion by the merchants. A first prize of \$10 in gold, and a second prize of \$5 in gold, will be awarded the men having the best outfits in the formal, street, and sport dress classes, making a total of \$45 to be distributed among the sixteen models.

The fashion show is being sponsored by Pi Delta Epsilon, journalistic fraternity, to promote interest in being well dressed. In past years hundreds of students have viewed the displays with interest, and a large crowd is assured for witnessing the competition Friday night. An orchestra has been engaged and a number of young ladies invited to make the event one well worth attending.

Commerce Night School Offers New Courses

The Georgia Tech Evening School of Commerce announced Saturday that with the beginning of the new term on Monday, twelve new courses will be offered in this department.

The new courses as outlined at the present time will concern interesting and varied subjects. Two of the most interesting, perhaps, will be radio advertising and writing for profit. The course in radio advertising is offered by only one other school in the United States, New York University.

The other unique course, writing for profit, is not taught at any other school in the South. This is taught by Professor George W. Sparks.

Admiral Coontz Inspects Tech Naval Unit

Admiral R. E. Coontz, retired United States naval war veteran, inspected and reviewed the Georgia Tech Navy R. O. T. C. unit last Tuesday. Admiral Coontz came to Atlanta as junior vice commander in chief of the Veterans of Foreign Wars of the United States, and while here he was entertained by Atlanta Post, No. 390.

A parade and review of the naval unit was held at 11 o'clock on the football field inside the Tech stadium. Admiral Coontz was accompanied by Dr. Brittain during his brief stay at Tech. He expressed himself as being well pleased with the fine showing made by the naval unit.

Mallet Club Installs Rome Chapter Brown Elected President

The Tech Mallet, co-operative industrial club, the membership of which is restricted to co-op students, has organized a new chapter to have its headquarters at Rome, Ga., where a number of co-ops are employed by Georgia Power Co., and various other business firms. The first section members of the Rome Mallet gathered Monday in the Chapel and elected officers for the year 1931:

President, Carl Brown.

Vice President, J. G. Lee.

Sec. and Treas., Raymond Burkett.

The Tech Mallet has been an active school organization for five years, increasing its membership and constantly expanding its activities with the growth and popularity of the co-operative plan of education. The purpose of the Tech Mallet in its relation to the industries, utilities and other employers of student labor is to win and hold the friendship of co-workers, to awaken the interest of trade leaders who provide its members the laboratory and financial means for an engineering education, and, by creating favorable publicity in the localities where co-ops are stationed, to gain the attention and aid of the engineering profession. The social activities of the organization are similar to those of school fraternities having chapter houses on the campus.

Dean Fields Inaugurates New Plan for Orientation

Tech Masons to Meet With Local Lodge

An invitation is extended to all Masons of Georgia Tech, among the faculty and student body, to meet with the Atlanta Lodge No. 59, F. & A. M., as special guests, at their regular communication to be held Thursday evening, March 26th, at 7:30 P. M.

Several other lodges have been invited to meet with the lodge on this occasion and the Grand Master of Masons in Georgia, Most Worshipful Master Wm. G. Meador, of Gainesville, has been invited to be present on that occasion and address the Tech guests especially and the craft in general.

The Square & Compass Fraternity has also been extended an invitation to attend with the Masons of Tech who may not be members of the Square & Compass Fraternity.

Yellow Jacket Club Offers Prize for New Yell

Five dollars reward is offered by the YELLOW JACKET CLUB for best NEW YELL submitted before April 1st, 1931. Everyone attending Tech is eligible.

Rules:

1. Contest closes midnight, March 31st.
2. All new yells must be turned in at the desk of the Y. M. C. A.
3. Judges will be members of the Yellow Jacket Club.

Remember everyone has as good a chance as the other. The idea is to promote more spirit and get things started off right for the baseball season. Also to get some new yells to replace "Ke Mo Ki" (probably an old Indian word meaning "To hell with Georgia.") Get busy now and win the five dollars.

Georgia College Placement Office Ceases Activities

A feeling among members of the Executive Committee that the Georgia College Placement Office has fulfilled the purpose intended for it in establishing contacts between college and business has resulted in a unanimous decision on the part of the Advisory Board to discontinue the Placement Office.

That the Atlanta Office is to be closed does not mean that the activities conducted by the Placement Office will be discontinued, but that the individual colleges formerly represented by it will take over the work of placing their own students and graduates.

At a meeting of the Executive Committee in January the question of closing the Placement Office was discussed, and a specific recommendation to this effect was made to the Advisory Board in order to draw forth a true expression of opinion. A letter setting forth in detail the situation of the Office and its relation to colleges and industry and calling for a vote on the proposed action of the Executive Committee was sent to members of the Advisory Board.

Technique to Feature Weekly Articles By Department Heads

To All Engineering Freshmen:

Instead of the usual spring meetings of the Orientation there will be substituted a series of articles printed in the *Technique* from the Engineering Departments. The first article follows.

Please read these carefully and we trust that you will be assisted in making a satisfactory choice of a course at Tech.

If questions arise which you care to discuss, I will be glad to make appointment for conference. My office hours are 8:30 to 9:00 A. M. and 11 to 12 A. M. If you have classes during these hours see me between classes at 9:00, 11:00 or 12:00, for other appointment.

Cordially yours.

FLOYD FIELD,
Dean of Men.

MECHANICAL ENGINEERING By R. S. King, Head of Mechanical Engineering Department.

When the graduating class of the French Military School corresponding to our West Point is dismissed at its last assembly the commandant uses this final salutation "Remember that today as always—what do you wish, what can you do." So to the present freshman class who are about to become sophomores and who must choose their future engineering course might well be said—"Remember that today as in years past—what do you wish, what can you do."

Mechanical engineering is not a profession to be entered upon lightly, but is one that entails hard work and study to finally attain success in later years. The mechanical engineer is proud.

Helping

One of the hardest things in the world to do is to help somebody. Most of us reflect with a tinge of bitterness over the attempts we have made to give this person and that a lift, and at the outcome of it. And, indeed, the commonest way in which we try to help anybody is by giving advice; needless to say it is about the most futile. And there is a universal impulse when anyone speaks of an ailment to recommend a remedy. Everybody has a favorite medicine or knows a remarkable physician, or perhaps has some infallible religious cult, all of which are sure cures and few of which we can get anybody to believe.

It is a wise man who learns early in life that pills are things for him to take himself and not to offer to other people. And then so much of the helping in this world is done so clumsily that it does more harm than good. Yet the curious thing about it is that everybody thinks he could help a lot if he had the wherewithal, and that helping people is very easy.

A business man applies a lifetime of training and energy to the business of making a million dollars, and thinks he can give away a million dollars without any training or thought at all. The result is that his benevolence is, more often than not, distinctly harmful.

The fact is that the only perfect giver is God, and our giving is really helpful only as it is Godlike. You can make a million dollars by working like the devil, but you cannot give it away except by working like God. One of the things that spoils giving is intolerance.

"So very few," says a recent writer, "help the less fortunate on their way without cramming their own religion, or their own politics, or their own munificence down their throats at the same time. They cannot be kind for the sake of being kind; they cannot help others up without seeking to brand them at the same time with their own pet views and beliefs. And then they wonder why the poor will not be helped; why they are suspicious and ungrateful."

There is indeed no place where we more need tolerance and self-control than in helping our fellow-men. And there is no place where our selfishness, egotism, narrowness and prejudice are

HERE WE ARE

Dear Ma:

Well, Ma, plenty things have been happening on the old campus lately, some of them good and some of them not so good; but nevertheless plenty things have been happening.

Ladies and gentlemen, step right this way. The champeens of the annual fist slinging and leather pushing bouts have been selected, and how they were selected! Not by the playing of tag or the dancing ability of the contestants but by the thud of the leather against the bodies of the wielders of 'he gloves. The boxing tourney this year was plenty good and there were lots of good scraps, plenty close ones, too; yep, lots of blood and everything. Two of the former champions were able to retain their crowns, McNichols and Jim Thompson. Some of the other crowns were not competed for by champions while others were defeated for their belt, or at Tech, sweater. The manly art of self defense is growing in popularity and from the onslaughts of the "Vagabond Lover" to the final match there was plenty of interest in the fights.

From the art of pushing leather to the art of acting as mannequins is quite some jump but we are taking the big chance of making it. The fashion show of the Pi D. E's looms over the horizon and it won't be long now before the engineer washes his face and dons the correct clothing and parades before the feminine judge to be adjudged who is the best in wearing of someone else's clothes. Plenty men at Tech have had plenty experience at the art, too; ask any fraternity man.

Did you notice that a few weeks ago the Technique did what we had always thought was the impossible. They took the 'l out of school and the school they used was none other than The Georgia School of Technology. Yep, we thought it was a dream and the next class revealed to us that we were correct, that they were just fooling us.

This week the tall story club takes us to the plains of Texas. Cactus Pete was idle for a long while and one of the inhabitants asked, "What's the idea you don't work?" "Do!" said Pete, "My work is out of season. The winter is when I work." "What's your business?" was asked. "Oh, I may cayenne pepper synthetically." "Synthetically?" "Yep." "Well, what has the weather to do with it?" "Plenty! In the winter months we go to the coldest parts of Alaska and build camp fires. When the flames freeze we break 'em off and grind 'em up."

The Theta Chi's gave another formal dance last week, another crowded dance at East Lake with the banjo player and his orchestra furnishing his music.

The fraternity brothers of Rudy Vallee (Pardon, Chas. Chatter) gave a founders' dance at the Piedmont Driving Club in honor of the men that started the fraternity, or something or other. Yep, due to the fact that we are not one of them, we were not present and due to that fact cannot comment much on the dance other than, they did get their share of the publicity, and Bobby Jones was not on hand for the festivities.

We see by the papers that there was a Delta Tau Delta dance. Yep, the belles and the beaux and all of their glory were pictured at the dance. Funny, too, because the Delta Tau Delta's don't know anything about the dance that they gave. Seems funny that they did not attend their own dance. Maybe this is another of these new fads.

The prey schools again came into the limelight and any number of fraternity dances were given recently. Looks like they would realize that the SYT's have hard enough time as it is without having to decide between two dances in the same night. Yep, but there are plenty more years left in the acceptance of the prep school bid, so they were plenty crowded. You know there is no love stronger than a motherly in-

more out of place than when we set about being benevolent.

Hurting people is simple. We come by it naturally and anybody can do it. But to help people you have to be great, which is a lot harder than being good. For goodness is largely a matter of impulse. Greatness includes, not only impulse, but intelligence, and, most of all, humility, which is perhaps just about the scarcest thing about the house.

stinct. Maybe we have judged wrongly some of the belles attending and this was the motive. Who knows? Who cares?

The rotogravure still gets so they have to go to the ends of the earth to get material. Yep, the Palais Peachtree got a lot of free publicity. The painting of a house and the fact that buttermilks can pose with rifles got a lot of space. Yep, even the Junior League of a foreign clime with a new bit of polo racket and the May Queen and her attendant at the finishing school for girls on Peachtree Street came in for their share of honors (?). Too bad they published the picture of the May Queen at Wesleyan in the same issue—a real beauty and my, what a contrast.

Speaking of the Palais Peachtree, looks like the banjo player got an awful swat when the moguls changed the routine of their dances and left Lloyd Huntley free for Friday night engagements, but possibly there is some technicality that can be used to keep the real band in Atlanta from playing at the college dances. Remember the Skull and Key dance at commencement? Well, time will tell and here's hoping.

And the Delta Sigma Phi's announce another of those delightful open houses. For the benefit of the out of town readers, this is not a custom at Tech, just one that is imported at times for which we see no real good reason. You know one of those affairs where you shake a lot of hands and take a lot of people that you are so glad to see them, when you didn't care whether you ever saw them again or not. Then you nibble a sandwich, wishing that you could get away and get some real food.

The Blue Print is rounding into shape and from the looks thus far the book this year is going to be plenty good. If it isn't, the reason will not be that the staff has not worked on it plenty hard. Congrats, Fred, Randy and cohorts.

The thud of the horsehide is now booming with the rat, tat regularity of the machine gun. The pitchers are loosening up and the would be Babe Ruths, etc., are striving to survive the cut of the Little Napoleon. The championship A's have been scheduled—watch out, champs!

A new innovation at Tech has gotten under way. Coach Mundorff seems not to be pleased a little bit with the way that the basketball team showed up in the tourney this year and the spring school of fundamentals should round into shape a team that will make basketball history at Tech. Well, maybe we will have the pleasure of seeing a team from Tech win the conference tourney before we lose the old eyesight or before the thrill of the glamour of contest fades.

The language squad is rounding into final shape and from this year's schedule we see that we will have the pleasure of seeing the wielders of the net in our own backyard. This should do a lot to popularize this form of sport at the flats.

The championship swimming team of last year's Southern Conference is getting away to a great start and it seems that with the addition of several frosh stars to the veterans that we are headed to another aquatic title. Ish the Fish has broken a flock of records already and big things are expected of him, probably a lot of laurels in the Olympics. Go to it, Ish; we are pulling for you.

The track team is plenty hard at work and several interesting meets have been scheduled. The team is looking good this year under the tutelage of our Ed.

We note that Tech is sponsoring two Shakespearean plays at the auditorium by Sir Phillip Ben Greet, the famous actor. Here's hoping that they are a success in every way. We are sure they are well worth while.

Your son,
PETER.

Alumni Note

An announcement of interest to Georgia Tech students and alumni is that James E. Davenport, graduate of Tech and former Atlantan, now living in New York, has been appointed assistant to Vice President R. D. Starbuck of the New York Central Railroad. Mr. Davenport was a member

CAMPUS

CHATTER

WITH THE PI D. E. FASHION SHOW SET FOR NEXT WEEK-END all Tech students will become suddenly enthused over the idea of purchasing clothes and will probably buy the town out. At least that's the hope of the organization as well as the merchants participating. The idea really is good, however, since it will give many a Tech man a chance to compare the clothes of the various stores without walking all over the town. Then there are the refreshments which are always popular.

* * *

BOXING IS FINISHED FOR ANOTHER YEAR as one might judge from the condition of most of these of amateur pugilists Saturday night. Mike Chambers should have the satisfaction of knowing that he has put across another successful show and that, regardless of any howling to the contrary, most of the decisions were well accepted by the crowds. Some, we admit, were very close and but none were really shady.

MIKE'S CUTE LITTLE DESK was some trick. If his idea was to have something to pile his schedule on, but still have an absolutely unobstructed view of the fights, he certainly accomplished his purpose. We had no idea that the Athletic Association was in such poor financial condition.

* * *

SWIMMING IS ANOTHER SPORT that is being rightfully talked up around Tech now. It's not an uncommon thing for a swimming team to have an outstanding star who can always win in his particular event, but

such a congregation of aquatic artists as has been assembled at Tech is unusual as well as indeed fortunate.

FIVE SOUTHERN CHAMPIONSHIP RECORDS broken in one night by one team is quite a mark and one that probably will stand up under fire for a long time unless these speedy mermen decide they want to hang up a better one this year to be shot at.

* * *

THIS WEEK-END BRINGS DEAD OLD BEN GREET and his Shakespearean players to Atlanta sponsored by Georgia Tech, although we haven't been able to figure out why until yet. Not that we disapprove, because we think that everyone who likes this type of amusement or educational recreation, as you choose to call it, should attend with bells on. We venture to say that the Sophomore class will have a larger attendance than anyone else just because English 31 and 32 is included on their schedules.

* * *

THAT RACE FOR THE SUNDAY SCHOOL CUP seems to be another of those tortoise affairs. The action has been rather slow and nothing much has been said, but those boys who have been going out by 9:30 every Sunday are one of these days going to have a nice cup staring them in the face. Maybe they deserve it.

* * *

WE NOTICE THAT THE TECH BALL TEAM played a pro team from Reading just the other day. If it was some other college team, we would be tempted to wonder which was the professional team.

Georgia Tech's Bible Class

Here is something that should get you out of bed a little earlier Sunday mornings, Tech students. Georgia Tech's own Bible class, the Gene Turner Class, is meeting in the First Baptist Church on Peachtree, just a few blocks from school.

The teacher of the class is our own well-known Prof. Sparks, who holds forth in the Commerce building every day except Sunday. If you have been so unfortunate as to have missed hearing Prof. Sparks give his views on life, grab this chance to hear him. He won't bore you with long sermons on the Bible, but he will give you a lesson taken from every day life that is related to a similar teaching in the Bible. If you have never heard Prof. Sparks rave about Villa Rica, Willacoochee, and Lullawisse, take this opportunity to do so.

The designer of this great church is a Tech graduate, and he has used our colors as part of the decoration scheme. Some other very prominent Tech graduates are interested in the class, and attend practically every Sunday. You can see that the class is wholly for Tech students, and is where every one of us should attend Sunday school.

Prof. Sparks, Prof. Siebert, and several ardent student supporters are

making a campaign just now to get over five hundred members in the class. Last Sunday there were 142 Tech students there; so a great many more are needed. Prof. Siebert says that if you want to sit by pretty girls, why he will personally see that you get to sit by pretty girls. How about that? Every Sunday brings something new for the members of this class. One Sunday it is Sophomore day, another Sunday it is Sophomore day, another into the year.

Another stunt that is quite popular with this class now, is the one seeing who can bring in the most new members. It sounds like an old stunt, but it has sprouted new feathers. If you bring the most one Sunday, on the next Sunday you are allowed to bring a date. You and your date are then driven over to the Dining Hall and set up to a fine dinner. After that a driver and a car are placed at your disposal so that you may drive your date around the city during the afternoon. What could be sweeter?

All in all it is a mighty fine class with a fine bunch of fellows. Why not try it for at least one Sunday? If you will come one Sunday then there will be no further need of me taking up space like this. What about it?

Scholarship and Salaries

By William Trufant Foster and Waddill Catchings

(NSFA)—Is high scholarship worth the struggle? Opinions differ on this subject, but statistics do not. Almost invariably promise becomes performance. A hundred scientific studies prove it. This is notably true, as we have already shown, of doctors, lawyers, and ministers.

But is it true of business men? It certainly is true of the men employed by the American Telephone and Telegraph Company. President Gifford has shown that men who graduate in the first tenth of their class, have four times as many chances of getting into the highest salaried group, as those who graduate in the lowest third of their class.

About half the men who ranked in the highest third in scholarship are in the highest salaried group. On the other hand, this group includes only a quarter of those who were in the low-

est third of their class in scholarship. The Telephone Company does not hand out large salaries for sentimental reasons. It demands and gets performance. It did not even know, until recently, that it was paying much larger salaries to high scholarship men than it was paying to other men.

Another study shows that the graduates of Bowdoin who receive the highest marks in college receive, as a rule, the highest incomes after graduation.

Dean Potter, of Purdue University, has shown that superior scholarship among engineering students leads, as a rule, to success in engineering, as indicated by salaries. Similar results appear in a study of the graduates of the Yale School of Forestry, and of West Point.

Some of our most successful corporations evidently have these facts in mind. They have made standing offers to various colleges to give positions to the highest scholars in every class. Similar standing offers have been made to the Harvard Business School.

Yes, business wants scholars. It wants them more than ever before. And more than ever before, it knows what to do with them.

BEAU BRUMMELS

By Peter

UNIVERSITY OF WASHINGTON "Huskies"

And again we go westward ho! for another column of fashion and what not. This time a "fur" piece Westward—yep to be exact—as far Northwestward as these United States go.

The University of Washington is located in Seattle Washington, the State that is as far Northwestward as the United States runs. To merely say that the campus of the University of Washington is beautiful would do it a severe injustice — romantic — well, but more than that. A haven of splendor natural beauty and architectural loveliness. Located between the turbulent waters of Puget sound and the placid waters of Lake Washington the spires of the Gothic Architecture of the campus rise to greet the visitor as did the castles of old. The campus is a beautiful natural setting; is a symphony in things romantic enhanced by the stone of the massive and impressive buildings. The present campus is one of splendor and is still being added to every year. The old campus was located in the heart of the city and the old location is now so valuable that the income is building a wonderful campus for the University. Mere words are inadequate when mere man tries to describe the beauties of the University within a few hours from the balmy climate of the University the snow capped peaks of the stately mountains greet the eye. A wonderful school in a wonderful location.

The young aspirant of things journalistic has for the outlet of his thoughts, the "University Daily" an excellent college daily. "The Columns" is the monthly magazine, and stacks up with the best of its kind in things collegiate. "Tyee" the yearbook records the activities of things of interest of the year and is a host of pleasure when in the dim light of tomorrow recalls the happenings of yesterday to the old grad.

This week we go Northwestward ho! to thank Harry G. Green, Delta Tau Delta (president) University Daily, etc., for an excellent questionnaire.

Football leads the list for popularity in a list of well rounded and diversified sports program. This year the "Huskies" turned in a list of wins that would do any team proud; true that it was not a championship, but a well fought and impressive schedule that would do any school credit. When the shouts of the students rang through the stadium and the charges of Jimmy Pelham bedecked in Jerseys of Purple and Gold regardless of the foe of the battle was plenty hot. Yep there is in these United States another Tornado; the Purple Tornado of Washington. Too bad that the distance of the two schools keeps Tornado from meeting Tornado. The biggest rival of the Huskies is the Cougar of Washington State, the foe of the Tide this year in the Rose Bowl. But when any California team meets the Huskie there is plenty of rivalry and regardless of the dope the fur flies plenty.

Next in popularity is the Basketeers who are just completing a highly successful season among the West coast teams. Basketball on the coast, like many other sections of the country, is gaining rapidly in popularity.

The placid waters of a still lake and the barking of the coxswain with huskies responding in machine like rhythm is a picture beyond words. The Crew is a very popular sport and the team of the "Huskies" always rate high at the National regatta when the best of the country meets to decide the National Champion and many times the Olympic representative. A sport that the South knows little of, but one that requires as much coordination and

team work as the best of them.

The Track team of the "Huskies" has always been among the leading in the country and every year there are several national champions that wear the purple and gold of the University and unless we miss our guess it won't be long before several of them discard the Purple and Gold for the Shield of the United States in the Olympics. Track means a lot to most of the schools on the Coast and Washington is no exception.

The Ice Hockey team is also an innovation as far as we are concerned. At the still hour of 4:00 A. M., the games get under way; true the time is a bit different than the time that we snatch the old sandwich and rush to the eight o'clock, by, but four bells is four bells in any mans' town. Ice hockey is a game that requires a lot of skill and team work, and is rough—well imagine playing Lacrosse on ice and you have a vivid idea. Ice Hockey comes in for its share of popularity among the minor sports. Imagine returning from the prom and going to an Athletic contest.

With the setting of splendor and the general outlook of the campus, it would be naturally assumed that when Huskie met Huskie, whether it is at Meany Hall, Frosh Pond, on the Denny Steps or at the Columns, that they would be attired in satorial splendor, but such is not the case. The prevailing style of the campus is campus cords and leather jackets. The older the clothes for campus attire, the better they are liked by the Huskie. A sprinkling of Blazers are seen on the porches and in the living rooms of the Frat houses. But when the sun sets behind one of the mountains and the moon lends its mellow glow to the beauty of the lake and seems to imbibe a carefree atmosphere on things in general the clothing changes, that is for the Huskie that is not boning away for the exams or the classes of the morrow. Again the makers of the covering for the Knob known as hats gets a sock on the jaw because very few hats are ever worn on the campus. The Huskie in things social presents a picture that would make the style pace setters of the collegiate world green with envy.

The matter of styles with Betty co-ed is a bit different, but not as different as one might expect. The sport clothes of the coed is in keeping to a great extent with the attire of the male, from the standpoint of the older the better, but as for the sacrifice of beauty for comfort. The Co-ed is quite different in the fact that shorn tresses are the exception rather than the rule. There's a method in their madness too, me thinks. The long hair waving in the glowing sunset or in all of its splendor in the moonlight in a canoe on a placid lake. Pardon—back to the styles. When the attire of the male goes to things conventional, from the garb of the campus, so does the attire of Betty co-ed. Long dresses, low backs are the prevalent fashion when not imbibing in the art of getting a college education. And when the strains of the orchestra announce the fact that the dance is to begin, Betty co-ed presents a picture that only an artist could paint.

The guess, with the above in mind, would be that there is plenty of social activity at all times and the guess is quite in order. There is plenty of so-

cial activity for the amusement and recreation of the tired college student. The formals consist of a series of three dances—the Varsity ball in the fall, the Junior Prom in the winter, and the Cadet ball in the spring. Orchestras of a national standing are imported from the North and South to lend to the merriment of the affairs. A sprinkling of Fraternity and club dances throughout the year add to things social at Washington. The decorations at all of the dances are quite different and unique. The Bowery, Kids, Wild West, Train, etc., are inspirations for the themes that are worked out by the different committees in charge.

The most popular of the Interfraternity sports are hockey and baseball; the games are played between the hours of 4 A. M. and 5 A. M., which would lead us to believe that if that were the vogue at Tech there would be a lot of defaults. In fact they might all be defaults.

For diversion there is canoeing, swimming, horseback riding, skiing on the mountains, etc. With the natural setting and the diversification of things restful, there is no wonder that the old grad looks back on many happy hours in yesteryear at Washington.

Lucky Strikes are the most popular of the weeds among the Deltas, while pipes come in for a strong second, when day dreaming, lounging in the frat house and when boning on the work for the morrow, until the wee small hours, there are many Briarfuls of contentment at Washington.

Mrs. Fred B. Wenn was hostess to the Georgia Tech Woman's Club at her home, 179 Fourth Street, Tuesday afternoon, March 17, at 3 o'clock. She was assisted by Mrs. A. H. Armstrong, Mrs. Kenneth Thrash, Mrs. D. L. Stamy and Mrs. G. H. Boggs. Mrs. E. P. Crenshaw talked on "What to do in the Garden Now."

Mechanical Engineering

(Continued from page 1, column 5)

marily the tool designer and builder for the nation, and the industrial manager who is responsible for mass production and the fabrication of practically every manufactured product.

If you like design of machinery, construction of engineering projects, can command the respect of other men and can work with them, can manage men, have the tenacity and grit to work out a problem, or project to a final solution, like to operate all kinds of machinery, and have the following characteristics of a good engineer—physique, energy, thoroughness, observation, concentration, judgment, loyalty, fairness, tact, control, mechanical ingenuity and ability to study hard to acquire the truth of every engineering problem, then you have a right to wish today to study mechanical engineering, tomorrow you may be able to follow your chosen profession.

As a mechanical engineer you may follow any one of the following specialties, such as Chief Designer, Chief Engineer, Production Manager, Chief Executive, Superintendent, Research Engineer, Engineer of Tests, Patent Expert, Consulting Engineer, Sales Engineer, etc., for a large number of industries a few of which follow: Power Production; Manufacture of all types of machine tools; Production of Automobiles, Paper, Sugar, Steel, Office Equipment, Transportation Equipment, Power Plant Equipment, numerous manufactured products, refrigeration and the handling of food and its many manufactured products, etc.

Do not select mechanical engineering because you think there is money in it and you may become a millionaire, because millionaire engineers of any type are scarce. Success will only be attained by those who are doing what they like best to do.

If you are considering mechanical engineering study the school catalogue and *note particularly* the summer shop requirements starting in June this year.

Tech Mermen Win Meet As Records Fall

Ish Williams Sets Two New Marks Against Florida

The Tech swimmers defeated Florida last Saturday afternoon in one of the most exciting meets held in some time. Out of eight events the Jackets won six, and set five new Southern Intercollegiate records. The final score stood with Tech 44, Florida 31. The meet marked the third straight victory for the mermen.

Florida got off to a good start by winning the 200 yard relay and thereby getting four points up on the Jackets. The lead was short lived, however, for Tech won the next five events.

In the 200 yard breast stroke event the home team took first and second place. Ingle came in in two minutes, 53.1 seconds, setting a new S. I. C. record. Brown was second.

Ish Williams came to the spotlight in the 50 yard free style by making it in 24 seconds flat and setting another S. I. C. record. In the 100 yard free style Williams broke the record he made in the State Meet of 55.2 seconds. His new mark was 54.3 seconds. Stover came in third in the 50 yard and Ingle was number three in the 100 yard.

Still another record was broken by Charlie Wagner in the 150 yard back stroke. Wagner was in the lead from the start and gained ground on each turn. His time was 1 minute, 15.4 seconds.

Ed Fain won the 220 yard free style with a time of 2 minutes and 35 seconds.

Freshman Baseball Team Is Progressing Well

Schedule of Twelve Games Will Be Played

The freshman baseball team has been progressing under the capable and directing hands of Coach Mundorff since March the third. The team is looking exceptionally well, with about twenty-five men reporting to practice at the Rose Bowl field at two-thirty o'clock every day.

Coach Mundorff has a very fine pitching staff composed of the following men: Crum, Sanford, McGarrity, Milligan, Jolly, and Lackey.

The infield is well cared for by Pool, Brady, Harden, Hunt, Paris, Maffet and Clark.

In the outfield there is such heavy hitters as: Fergusson, Rudd, Hammond, Powell, Wissler and Romellette.

Behind the home-plate there are Laws, Quillian, Johnson and Enslow.

The schedule for the frosh nine will consist of twelve games in all. The games will be as follows:

Auburn—four games.

Federal Pen—two games.

Georgia—two games.

Lanier High—one game.

Monroe A. & M.—one game.

The other games will be announced later.

The 300 yard medley brought the meet to a dramatic close. Tech gained with each style stroke and at the finish Williams came in with a good 80 ft. lead. The time was 3 minutes and 22 seconds; 19 seconds better than the previous S. I. C. record. The results in detail follow:

200 yard breast—L. Ingle, Tech first; Brown, Tech, second; Anthony, Florida, third. Time, 2 minutes, 53.1 seconds.

50 yard free—Williams, Tech, first; Carter, Florida, second; Stover, Tech, third. Time, 24 seconds.

150 yard back—Wagner, Tech first; Edsall, Florida, second; Young, Tech, third. Time, 1 minute, 50.4 seconds.

100 yard free—Williams, Tech, first; (Continued on page 6, column 4)

Freyer, Hearne, Thompson, McNichols, Norton Win Lower Weights

Fast Bouts Attract Capacity Crowds to Final Tourney

Georgia Tech ended another successful boxing season last Saturday night, as two champions repeated in their classes, one relinquished his title, and six new champions were crowned in the final round of the annual tournament. The whole show was run off in a quick efficient manner that does credit to the managing of Mike Chambers.

The new champions are J. D. Lackey and J. Q. Adams in the heavy and light-heavy classes. Lackey rushed and slugged his way to a decision over Ben Cherry in a battle that was replete with thrills. Cherry seemed to be the better boxer as far as scientific knowledge of the game is concerned, but he did not get much chance to use his ability, as he was keeping covered up most of the time trying to ward off Lackey's fierce rushes. Lackey was always on the offensive. Cherry seemed to be waiting for him to tire, but it was a vain hope, as the big freshman was still pumping hard rights and lefts to the side of Ben's head when the fight ended.

Quint Adams disposed of Joe Singleton in a business-like manner in one of the best bouts of the evening. Both boys were good fighters and looked more like professionals than college boys. Adams by more endurance and a steadier pace came out on top. If Tech should ever have intercollegiate boxing this boy should bring some laurels to the old institute.

Max Morris, Southeastern A. A. U. middleweight champion, defeated Hungerford in a one-sided match that was featured only by the latter's courage. He was no match for the steady Morris, who is a finished boxer as collegiate boxers go. It is a compliment to Hungerford to say that he stayed in the ring three rounds without getting knocked out.

The only knockout of the evening was a technical one. Elmo Freyer was declared champion of the middleweight class, when his furious battle with Berlin was stopped in the third round. Berlin had gone down several times, but had staggered back to his feet and kept going in the hope of lasting to the end. However, Referee Dunlap stopped hostilities when it became evident that Berlin had no chance and could do nothing but take punishment.

The Thompson boys strode different paths this time. Jim managed to retain his title over Rip Hardeman in probably the closest bout of the evening. The spectators were unable to predict the finish and had to wait for the judges' decision before having the slightest inkling of who would be the winner. Blev Thompson, however, produced the big upset of the evening when he lost a quite evident decision to Hearne. The blond lad showed more ability and aggressiveness than he has ever shown before, and about the middle of the second round the effects began to show on the heavier member of the firm of Thompson and Thompson. He staged a rally in the last round and got in some terrific blows, but the fair-haired lad kept coming and gained a well-earned victory.

The other two bouts were both close. McNichols retained his crown in the

Clay Invents Hip Pad

Alva (Kid) Clay, Georgia Tech baseball and freshman football coach, has been taking lessons from Edison. He has invented a hip pad for football players which will be patented soon. Clay believes that it will have a ready market. Head Coach W. A. Alexander joins in the belief. Some of the pads will be used in the south next year. The details of the pad are secret for the time being.

New Champs Crowned

(Continued from page 4, column 5) 115 pound class by a decision over Owens, due probably to his being in better condition. They started so fast that both were exhausted by the end of the first round and it seemed to be merely a question of which one could keep his arms moving the fastest. They were both too tired for the blows to have any telling effect and the result depended on which one landed the greatest number of times.

In the first bout of the night, Scortas lost to Norton after a hard fight. He had been sick for several days, and his right arm was more or less useless, but he kept gamely on and gave the victor some marks to show that he had been in a fight.

Semi-Final Summary.

The semi-finals, held the afternoon of the day preceding that of the final bouts were featured by scraps fully as colorful and entertaining as those held Saturday night. There were in all thirteen bouts, three of which were knockouts.

McNichols met Shahan in the first fight of the afternoon. Mac won a decision over the latter, who, although outweighed, put up a fine scrap. With a little more experience and weight this boy will make a mean contender for next year's title of the 115-pound class.

In the 125-pound class Rip Hardeman defeated Carson in a fast and furious affair that went to Rip because of the ferocity and speed of his attack. Jim Thompson followed suit to win from Urquhardt in fully as colorful a battle.

Blev Thompson met Chip Robert in the first battle in the 135-pound class. Blev because of his superior knowledge and experience won a decisive decision. In the other fight in this weight, Dick Hardeman lost a decision to Jim Hearne. This was perhaps the closest fight of the day and no few of the spectators believed Dick to be the winner before the judges gave their decision in favor of Hearne.

In the 145-pound class, Berlin defeated Merry, the defending champion. It was a very close affair, but Berlin was awarded the victory by virtue of his furious offensive that gave him a slight edge in the number of blows landed. Freyer fought Prewitt in the other bout in this weight and scored a knockout in the final round. Freyer is perhaps the coolest and headiest fighter to be seen at Tech in our two years of boxing.

Hungerford won out over "Vagabond" Enslinger in the first scrap in the 155-pound division. "Vagabond" put up a game scrap as he always does, but Hungerford showed a decisive edge. Max Morris won a decisive decision also over Ralerson.

Quint Adams opened up in the first few seconds of the first round in his fight with McGowan and landed two hard ones to the latter's jaw before he could get started. McGowan never recovered from these blows and Adams won the first scrap in the light-heavy division. Singleton and Kroner put on the other fight in this class. Both fought at top speed for the full time, but Singleton was awarded the decision. He seemed to be in better condition and showed more kick in his punches in the last round.

In the heavyweight class, Ben Cherry met Jimmie Branch. This fight was one of the best of the tournament, and it was an extremely difficult task for

Frosh Track Team

(Continued from page 4, column 2) events. With such a large squad out, any coach would be bound to feel a bit optimistic over the prospects of his team and Ed certainly does do that very thing. Yes, he is even confident; but he really has some reasons other than the large size of his squad. He has some men whose mettle has been tested and found to be excellent; men whom he has seen perform in competition when they were on High school teams.

Boys' High contributed two good men to our cause; Dean Kelly, a star dash man of the Purple Hurricane, who is certain to hang up points in almost any meet he goes in to; and Gene Gatlin, a pole vaulter and javelin slinger de luxe, who broke quite a few records during his years in high school. Coach Hamm is looking for big things from both of these men, and is doing likewise with regard to Don Murray, a promising trackster from New Jersey. In addition to these men, he has Ray Miller, (winner of last fall's cross country) distance man

the judges to pick a winner. The three rounds were so close that the judges called for an extra round, the only during the whole tournament. Cherry won it because of his ability to land the cleaner and more effective blows. In the other heavyweight bout, the last of the day, "Tarzan," "Hard-guy, rock or something," "Cocky," or what have you, Lackey rather upset the dope by knocking out "Neb" Neblett in the first few seconds of their fight. Neb is a good scrapper but Lackey's sudden attack caught him off his guard for just a second and that along with two pile-driving fists and a very hard floor ended the day's festivities.

Taken all in all, the tournament was a big success, and Mike Chambers is to be highly complimented for the work he has done. It is seldom that a man can step in and make a success out of a sport from the start, but the big blond trainer seems to have done it, and there are a lot of us who would like to see his boys representing Tech in some intercollegiate matches next year.

from Seattle, Washington. They say he thinks nothing of running a hundred miles before breakfast, so such a man is bound to add to the potentiality of any man's track team.

The above men are the outstanding men so far, but in the balance of the squad of fifty-eight, there are bound to be several more good men at least, and that is about all Ed needs to produce a team that will not meet with defeat this season, which, although he might not yell it out in public, he really expects to do.

Frat Basketball

(Continued from page 4, column 1)

Coach Mundorff will meet the committee, composed of Earl Dunlap, Ed Herron, and Bill Herrin, early this week to decide the pairings, and to draw up the chart. It was decided last week to give all last year's semifinalists byes for the first game. Coach

Mundorff believes that this ceding of the first game will divide the play more evenly.

Any fraternity man is eligible to play on a team representing his fraternity if he can conform to the following rules:

1. No man is eligible who has ever made his Freshman Numerals in basketball.
 2. No man is eligible who has ever made his Varsity Letter in basketball.
 3. No man is eligible who was a member of this year's varsity squad.
- Any fraternity found violating these rules will be automatically ejected from the tournament.

Joe Westbrook With Martin-Cadillac Co.

The many friends of Joe Westbrook, star football guard of the National Championship team of 1928, will be interested to know of his recent business connection with the Martin-Cadillac Company. Joe is in the used car department and declares that business is much better than most people would have it.

Joe invites all of his friends to visit him at his place of business for a sociable chat, even if not interested in any auto purchases.

Smoke a FRESH Cigarette!

Chart Showing Moisture Loss of Cigarettes

THIRTY DAY TEST

Each curve represents average of fifty packages

Camel Humidor Pack
Moisture-Proof Cellophane

Prepared for R.J.Reynolds Tobacco Co.

Certified Report No. 150473

Pittsburgh Testing Laboratory

by C.E.Betz Chief Chemist

Cigarettes in prime condition have a moisture content of about 10%. It will be seen by the Pittsburgh Testing Laboratory Chart that cigarettes in the ordinary wrapped package lose more than half of their total moisture in thirty days and that only the Camel Humidor Pack delivers cigarettes to you in prime condition

THE whole country is talking about the throat-easy mildness and the prime freshness of Camel Cigarettes in the new Humidor Pack.

The above chart prepared by the Pittsburgh Testing Laboratory tells you why.

Please examine it carefully. It is an unfailing guide to cigarette selection and enjoyment.

As you can quickly see by the three upper curves on this interesting chart, cigarettes that lack the protection of the Humidor Pack lose their moisture rapidly from the day they are manufactured.

And day by day as this moisture disappears, the smoke from these cigarettes becomes harsher, hotter, more unkind to the smoker's throat.

Not so with Camels!

The Humidor Pack is moisture proof and sealed airtight at every point. It protects the rich, flavorful

aroma of the choice Turkish and Domestic tobaccos of which Camels are blended.

Make these tests yourself

It is so easy to tell the difference between parched dry cigarettes and fresh prime Camels that it is no wonder everybody is reaching for a fresh cigarette today.

Your fingers identify stale, dried-out tobaccos at once. While a Camel is flexible and pliant.

Your ears can tell the difference too. For a dust-dry cigarette crackles under pressure.

But the real test is taste and there is simply no comparison between the rich mildness of a Camel and the hot, brackish smoke from a stale, dry cigarette.

Switch to Camels just for today then leave them tomorrow if you can.

R. J. REYNOLDS TOBACCO COMPANY, Winston-Salem, N. C.

CAMELS

Artificial heat in houses and apartments soon dries the moisture out of cigarettes wrapped the old fashioned way. It is the mark of a considerate hostess, by means of the Humidor Pack, to "Serve a fresh cigarette." Buy Camels by the carton—this cigarette will remain fresh in your home and office.
