THE WHISTLE

GEORGIA INSTITUTE OF TECHNOLOGY — HOME OF THE 1996 OLYMPIC VILLAGE — July 10, 1995

Deadline Looms for Renovation Funds

All facility managers are invited to submit their proposals for classroom renovations. These proposals are due on August 8, 1995. Shortly thereafter, the Classroom Renovation Subcommittee will evaluate all proposals and forward a prioritized ranking to the Faculty Executive Board for approval and then to the Facilities Office for implementation. At present, $500,000 is available for classroom implementation projects.

The renovation proposals should address various issues including, but not limited to, audio-visual technologies, lighting, acoustics, seating and layout/physical design. Preference will be given to proposals in which microcomputers and networking facilities are not a major component of the total cost. Proposals addressing either major HVAC (air-conditioning) or roof repair will not be considered since these items are included in MRR funds.

Each proposal should consist of the following items:

(1.) **Project Justification:** Each proposal must describe the impact that the requested renovations will have on the education of Georgia Tech students.

(2.) **Project Description:** Each proposal must include a detailed description of the renovation and provide floor plans for reference.

(3.) **Cost/Budget**: Proposals should not exceed $150,000. Each proposal must provide preliminary cost estimates. Units are encouraged to seek design and estimation assistance from the Facilities Office. Contact Mr. Tom Kirby (894-5510) for assistance with audio-visual equipment and Mr. David Bowman (894-5517) for assistance with architectural design.

(4.) **Project Contact:** Each proposal must identify an individual who will serve as the primary contact during the renovation. In particular the contact person will interface with the Facilities Office during the detailed design and bidding process. Additionally, the contact person will monitor the project's progress.

(5.) **Maintenance/Security:** Each proposal must provide a plan describing how the renovated facility will be maintained. This should include a plan for protecting equipment from theft and vandalism.

Proposals which were not funded last Spring may be resubmitted, in original or updated form, for reconsideration.

The proposals are due on or before August 8, 1995. Please mail your proposal(s) to Jerry O'Brien at the School of Chemistry and Biochemistry, Campus mail, 0400. Proposals received after the deadline will be returned.

Georgia Tech TelePhoto recently received an Emmy Award for "Best Music Composition." The winning music was produced for the International Conference on Population and Development Media Campaign. Phil Walker, producer of the 14 spots, accepted the award from New World Entertainment, at the recent Southern Regional Emmy Awards Presentation Dinner. Walker (left) attended the dinner with his wife Resa Harney (center) and Julie Rhame, director of TelePhoto (right).

New Wave of Users Now Surfing On-Line

	All	Europe	USA	Prodigy	Male	Female
Mean	35.01	31.25	35.68	38.98	35.05	35.15

The latest World Wide Web survey revealed changes in the age and gender of frequent network browsers. The average age of Web users increased by four years since the October '94 survey. The average age of U.S. users was 36 years old, while the average European user was just 31. The average Prodigy Web browser was 39 years old. Overall, 15.5 percent of the users were female, up six percent since the October '94 study. Nearly 20 percent of those who browsed the Web from Prodigy were female. Source: GVU's Third WWW User Survey; URL:httpL//www.cc.gatech.edu/gvu/user_surveys. Contact:www-survey@cc.gatech.edu

By John Toon
Research Communications Office
Georgia Tech Research Institute

Data collected this spring from more than 13,000 users of the World Wide Web suggests commercial on-line services are significantly broadening the population of people using this rapidly-growing part of the Information Superhighway. The work is believed to be the first to examine the impact of Web access provided through major national services such as Prodigy.

Web access offered by the large national services and expansion of local Internet service providers is helping change the age, gender, income, occupation and other demographics of Web users.

Though African Americans remain poorly represented, the research suggests more women are now entering the traditionally male-dominated computer network.

"The respondents we are seeing now are less technically- oriented and more likely to be female than those we have seen in the past," said James E. Pitkow, a Georgia Institute of Technology researcher who has been studying demographic trends on the Web for more than a year. "Overall, there are more people coming from outside the educational domain. This shows that the people browsing the Web are becoming more like the general population."

One key finding: Since similar research was conducted in October 1994, Windows has replaced Unix as the predominant computer operating system for those browsing the Web.

The information was gathered from questionnaires posted on the Web from April 10 to May 10, 1995. At the time the questionnaires were posted, only Prodigy had made its Web browser software widely available, and approximately 20 percent of those answering the questions entered the Web through that service. The researchers advertised the questionnaire on Prodigy, and in other Internet locations and popular sites on the Web.

"We found that Prodigy brings both a younger population and an older population, compared to the typical Internet user," Pitkow explained. "The service brings a larger population in the K-12 age, as well as more older and professional people."

The responses demonstrate that the World Wide Web has grown beyond the college and university groups that have been the predominant users, noted Laurie Hodges, a collaborator in the work and a research scientist in the Georgia Tech Research Institute. Though the Web demographics appear to be changing, she believes marketers will still use it to reach "niche" audiences.

"These numbers shouldn't be over applied to direct the development of Internet and World Wide Web applications," said Hodges. "I think successful business and government applications will be directed at the hundreds and thousands of micromarkets that exist on-line."

More than half the respondents answering questions about it said they had learned HTML -- the code used for creating Web pages -- in less than three hours. This shows the Web's potential as a new form of communication, noted researcher Colleen Kehoe.

"Unlike other forms of media which are basically one-way communications channels into the home, the Web is two-way," she said. "The average Web user in the future will be a producer of information as well as a consumer."

The new data also shows significant differences between North American users of the Web and their European cousins.

Continual Calendar

Faculty/Staff Toastmasters Club - Techmasters, Thursday mornings, room 102, Pettit Building, 7:30 - 9:00 a.m. For more information call Richard P. Kenan, 894-4702 or e-mail: dick.kenan@ee.gatech.edu

Women's Therapy Group. Female students meet Wednesday to discuss concerns, build support and expand choices, noon - 1:00 p.m., room 238, Student Services Building. Confidentiality stressed. To join or for more information call 894-2575.

JULY 11

SuperTrain Sessions, course, "Introduction to CQI," 8:30 a.m. - 1:00 p.m., Weber Building. For more information call Denise Daniels at 894-1146.

Career Services Seminar, "Creating a Professional & Winning Resume," will be held from 11:00 a.m. - 12:00 p.m., Success Center, Presidential Suite A. For more information call 894-2550.

JULY 12

GTOC Food Bank, 6:00-8:30 p.m. faculty/staff volunteers are needed. Contact Candy Carson at 894-0284.

JULY 13

SuperTrain Sessions, course, "CQI - Team Dynamics," 8:30 a.m. - 1:00 p.m., Weber Building. For more information call Denise Daniels at 894-1146.

OutTech, HRD training room, 5:15 p.m. Group discusses issues of concern to gay, lesbian, bisexual and transgendered employees and develops strategies to improve the campus climate in relation to those issues. Meetings open to all members of GT community. For more information call Danny Ingram at 894-5518.

Career Services Seminar, "Successful Interviewing Strategies", will be held from 11:00 a.m. - 12:00 p.m., Success Center, Presidential Suite A. For more information call 894-2550.

JULY 17

SuperTrain Sessions, course, "CQI-Problem Solving," 8:30 a.m. - 3:30 p.m., Weber Building. For more information call Denise Daniels at 894-1146.

Career Services Seminar, "Creating a Professional and Winning Resume," will be held from 3:00 - 4:00 p.m., Success Center, Presidential Suite A. For more information call 894-2550.

JULY 18

Career Services Seminar, "Job Search Strategies for the '90s," will be held from 11:00 a.m. - 12:00 p.m., Success Center, Presidential Suite A. For more information call 894-2550.

JULY 19

Career Services Seminar, "Successful Interviewing Strategies," will be held from 3:00 - 4:00 p.m., Success Center, Presidential Suite A. For more information call 894-2550.

JULY 20

GVU Demo Day, 1:30 to- 4:00 p.m., room 259, College of Computing. For more information call Elaine Swobe at 894-9392.

Career Services Seminar, "Business Etiquette," will be held from 11:00 a.m. - noon, Success Center, Presidential Suite A. For more information call 894-2550.

JULY 25

Career Services Career Seminar, "Networking/Information Interviewing", will be held from 11:00 a.m. - 12 noon, Success Center, Presidential Suite A. For more information, call 894-2550.

Did You Know?

GT Logo Contest

Georgia Tech's Broadband Telecommunications Program announces a contest to choose a logo design, to be used to promote their colloquium series on broadband services to the home.

The contest is open to everyone, including students, staff and faculty. Affiliation with Georgia Tech is not required. Deadline for submission is July 31.

Prizes include: $300 for first place, $200 for second place, and $100 for third place. Winning entries become the property of the Broadband Telecommunications Program.

Submitted logos should be suitable for use on posters and letterhead.

It is strongly suggested that entries be submitted both on paper and electronically.

Paper submissions should be given to Valerie Johnson in room 107C of the Microelectronics Research Center, or mailed to:

Valerie Johnson
Georgia Institute of Technology
College of Computing
801 Atlantic Drive
Atlanta, Georgia 30332-0280

For more information please contact Ms. Johnson at (404)894-1404 or valerie@cc.gatech.edu.

People In The News

Environmental Engineering

S. Casey Jones, a Ph.D. student in Environmental Engineering in the School of Civil and Environmental Engineering has been awarded the 1995 Abel Wolman Doctoral Fellowship by the American Water Works Association.

The fellowship named in memory of the late Dr. Abel Wolman of The Johns Hopkins University provides support up to $30,000 for two years of doctoral study in the water supply and treatment field.

College of Computing

James L. Walsh Jr., senior research engineer, has been named a 1995 recipient of the American Society for Testing and Materials (ASTM) Award of Merit. He was cited for his outstanding leadership and contributions to the development of 12 standards for biomass conversions to energy products.

Microelectronics Research Center

Gerald N. Hill, Sr., formerly facilities manager for the MiRC cleanroom, is now interim associate director for operations.

David Morton, a doctoral candidate in the Department of History, Technology and Society was. awarded the 1995-96 IEEE Fellowship in Electrical History.

Morton is writing a dissertation on the history of magnetic recording which investigates the magnetic recording industry in the American south.

Aerospace

Kevin G. Peterson, a master's degree candidate in the School of Aerospace Engineering, is a 1995 recipient of a $7,500 Mercury Seven Foundation Scholarship. Under the direction of his advisor, Dr. Narayanan Komerath, Peterson is studying the loss of roll control of fighter-type aircraft at high angles of attack.

The Mercury Seven Foundation was established in 1984. The goal of the foundation is to strengthen America's position in science and technology by awarding scholarships to third and fourth year undergraduates and graduates who have demonstrated those special characteristics of mental ability, self-discipline and high creative drive in the science or engineering field of their choice.

TechMasters

The Georgia Tech Faculty/Staff Toastmasters Club, TechMasters, recently elected new officers. The new officers are

Margaret Graff; president
Mary Nelle Connelly; vice-president
Deboris Howard; vice-president for membership
Mary Axford; vice-president for public relations
Pat Johnston; secretary:
Margarita Bolet; treasurer
Bert Watkins; sgt-at-Arms

GTRI

Jim Pitkow, GTRI researcher, climbed Hyuana Potosi (20,080 ft) in Bolivia as the youngest member of the six person American-Bolivian 1995 Expedition Team on June 20. The team had one of the fastest acclimatization schedules yet for a 6,000+ meter peak, requiring only 5 days nights above 12,000 ft before reaching the peak.

WWW, *continued from page 1*

European browsers of the Web, for example, tended to be younger and better educated, but had lower incomes and were less likely to be female.

Because the respondents were not randomly selected from the total population of Web users, the information lacks the vigor of a true scientific survey. However, the data collected by the researchers in Georgia Tech's Graphics, Visualization andUsability (GVU) Center provides one of the best available pictures of who is using the hypermedia system.

An earlier survey in October of 1994 obtained approximately 4,500 responses and established a baseline for comparison.

Results are available on the Web at http://www.cc.gatech.edu/gvu/user_surveys/survey-04-1995

Beyond the demographic data, "The GVU Center's third WWW Survey" also collected information about consumer purchasing practices and attitudes toward transaction security in an effort being analyzed independently by Dr. Sunil Gupta of the University of Michigan's School of Business.

Among the most significant findings in this part of the research was that Web users showed an overall median income of between $50,000 and $60,000. Prodigy users had a higher income range: $60,000 to $75,000, with 15.7 percent reporting an income of more than $100,000.

Gupta's data is available on the Web at http://www.umich.edu/~sgupta/survey3/.

TORCH TALK

What It Takes To Be an Olympic Volunteer

Following the announcement that Atlanta had been awarded the 1996 Olympic bid, Candy Carson, Georgia Tech registration coordinator, took the reigns as volunteer coordinator of a small service organization called the Georgia Tech Olympic Coalition (GTOC).

Since 1992, GTOC has evolved into a service group with a volunteer base of over 500 people. They have sponsored an average of 50 service events a year, accumulating over 20,000 hours of community service.

"I got involved with GTOC because of the Olympics," Carson said, "but since then I've realized Atlanta's need for community service above and beyond the Olympics."

Volunteer projects include tree plantings, food banks, neighborhood renovation projects and the Goodwill used book sale.

Students make up 80 percent of the organization. The remaining volunteers are faculty, staff and alumni. There are a total of 800 people on the GTOC mailing list. Participation ranges from 10 to 50 volunteers, depending on the need.

GTOC is a member of the Olympic Force, ACOG's volunteer segment, but each volunteer is required to apply individually.

The following are Carson's answers to the most frequently asked questions about Olympic volunteerism.

Q.Is ACOG still taking volunteer applications?

A. Absolutely, and will up until April '96 in order to ensure that everyone receives the training they need to perform the job

Q.Where can I get an application?

A. You can pick up an application for the Olympics and/or test events in the Community Services Office, located on the second floor of the Student Center

Q. What are the requirements to be a volunteer?

A. Each applicant must be available for processing and training.

Applicants must also:
-be willing to submit to a background investigation
-wear the required volunteer uniform
-provide his/her own housing
-be 18 years of age by July '96
-have a verifiable history of community service.

Q. I am not a United States citizen. Can I still volunteer?

A. Yes, if you meet the above requirements and can supply verification of residency.

Q. How much time do I have to commit to in order to volunteer?

A. ACOG requires a two- to six-week minimum commitment, depending on the volunteer's post. Volunteer shifts will be structured much like a full-time job, consisting of five eight hour shifts a week.

ACOG established this requirement for security and monetary purposes. It costs ACOG approximately $650 to process and train each volunteer.

Q. What types of volunteer positions are available?

A. Positions of all types are available including drivers, ticket takers, disc jockeys for the village disco, retailers, greeters, interpreters and envoys.
Volunteers can submit a "wish list" of desired positions, but final placement is determined by ACOG.

Q. Are there also volunteer opportunities for the Paralympics?

A. Absolutely and the minimum commitment time is more flexible.

Q. What are test events and when will they take place?

A. Test events run from August '95 through Spring '96. Scheduled events include swimming, diving, table tennis, track and field, archery, volleyball and equestrian competitions.

ACOG is testing everything from communications to transportation to facilities management to determine how prepared they are for the summer games.

Volunteers are needed to assist during the test events.

Q. What role does GTOC play in the Olympics and Paralympics?

A. GTOC provides the opportunity for people to perform documented hours of community service that can be submitted to ACOG, if participants are interested in serving as Olympic/Paralympic volunteers.

The next opportunity to volunteer through the Georgia Tech Olympic Coalition is during their next Food bank, July 12. There are 100 volunteer positions available. Call Candy Carson at 894-0284 for details.

GTOC Statistics from Summer '94 to Spring '95

	Events	Volunteers	Hours
Summer	4	212	86
Fall	15	451	1,535
Winter	18	485	1,914
Spring	17	419	2,544
Totals	54	1,567	6,779

Penn and Teller Open Theatre's New Season

The Georgia Tech Center for the Arts announces that eccentric magicians Penn & Teller and trumpet great Wynton Marsalis will be two of the incredible performances highlighting its 1995-96 season.

World renowned magicians Penn & Teller will open the Season on September 30 with two much anticipated performances.

"The students of Georgia Tech have been pleading for this performance since we opened in 1992," said Center Director Paul Ackerman. "Their agent was finally booking a tour of the southeast, and we wanted to be the ones to present them."

The season continues with the newly created dance piece by Moses Pendleton and MOMIX titled "Baseball" on October 20 & 21; the national tour of the Mozarteum Orchestra of Salzburg, with violin soloist Hideko Udagawa on November 8; the immensely popular and respected Julliard String Quartet on January 12; and the Center's first theatrical performance, Henry V, performed by the late John Houseman's The Acting Company on February 3.

Wynton Marsalis and The Lincoln Center Jazz Orchestra will perform a tribute to Monk, Morton and Marsalis on February 10; Verdi Requiem, performed by The Choral Guild of Atlanta, The Georgia Tech Chorale, & The Atlanta Ballet Orchestra on March 3.

The New York City Opera National Company will be making their third annual appearance at Georgia Tech when they present Verdi's "La Traviata" on March 30.

Zany jugglers, The Flying Karamozov Brothers will be performing their mystery thriller, "Club Sandwich" on April 13.

On April 25-27, The Atlanta Ballet will present a sneak preview of their work from The DanceTechnology Project which will be premiered at the 1996 Olympic Arts Festival.

"We strive to provide Georgia Tech and Atlanta with a cross section of the best talent available from every genre of the performing arts," said Ackerman. "I think we've accomplished that with this line-up. These types of performances will only add to the excitement being generated in anticipation of the Summer Games."

The Center for the Arts' subscription sales will begin on August 1, and single ticket sales will begin on September 1. For additional ticket information, or to receive a 1995-96 Season Brochure, contact the Center for the Arts Box Office at (404) 894-9600.

SPOTLIGHT

Meet Prasanna Kadaba

Full Name: Prasanna Venkata Kadaba

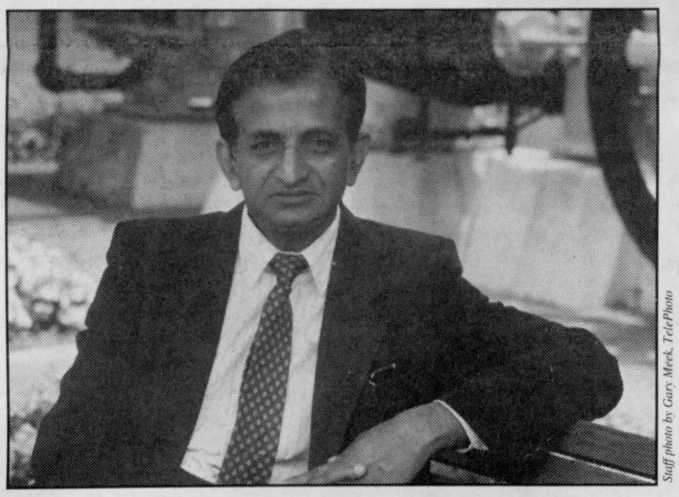
Age: ageless, as expressed by students past and present.

Occupation: Associate Professor, Mechanical Engineering

Years at Tech: 24 (since 1969, except for two years as Visiting Professor at the University of Cincinnati)

Current Professional Project: the design and development of thermal systems with a keen sense for energy efficiency, cost effectiveness and harmony with the environment, without sacrificing material well being and recognizing clever use of heat transfer principles essential in such designs.

Education: B. S., ME and EE, University of Karnataka, India; M. S. ME University of Kentucky; PhD (ME - Heat Transfer), Illinois Institute of Technology, Chicago.



Staff photo by Gary Meek, TelePhoto

Dr. Kadaba, an expert on heat transfer and thermal systems, relaxes in front of the J.S. Coon Mechanical Engineering Building on Cherry Street. In the background is a steam engine-driven, two-stage air compressor with an intercooler, now part of an outdoor museum. Technology used in steam engines helped pave the way for the design of superior thermal systems.

Marital Status: Married to Usha Rani Rajgopal (1966) who teaches in Cobb County Educational System.

Children: Vaibhav P. Kadaba, 25, B. S. ME, Georgia Tech '92; M. S. ME, Case Western University; now studying Patent Law at UNC-Chapel Hill

Favorite Book: *Profiles in Courage*, by John F. Kennedy

Favorite Movie: "The Mouse That Roared"

Few People Know I: am very kind at heart since I create the impression that I am tough and demanding. Those who recognize early have responded favorably to the mission I cherish and uphold.

Best Advice Ever Received: Write always in pencil, erase any mistakes instead of scratching - which proved is helpful in my life.

Personal Hero and Why: Late Professor E. B. Penrod, my mentor. Initially he instilled in me the value of graduate education and showed ways to respect young and old for all the good things they bring to the life.

What Brought You to Georgia Tech? With Tech having a reputation for excellent graduate programs and meaningful industrial experience, I knew that I could surround myself with young, ambitious, quality students, year after year, to share the educational experience, which helps me to stay young at heart.
