THE TECHNIQUE, ATLANTA, GEORGIA, FRIDAY, OCTOBER 10, 1930

NO. 4

## National Student Council Federation to Meet

### Convention in Atlanta

The National Student Federation, the most prominent student organization in the country, has paid honor to Tech in selecting Atlanta as its host for its annual congress this year. The delegates to this convention are outstanding students selected by leading colleges, and their meeting will be of vast educational interest throughout the country.

Definite plans are tentative to the coming of Ed Murrow, national president of the organization, who will be in Atlanta on November 1st to make final arrangements for the meeting of the Federation, which will be the latter part of December. All meetings are to be held at the Biltmore Hotel, and the dormitories of Agnes Scott and Georgia Tech have been decided upon to house the women and men delegates.

A national broadcast for the opening night of the Congress is planned, and it is expected that many prominent men will speak. The delegates will leave on January 2nd.

## Gene Turner Bible Class In \$1,000,000 Home

### New Baptist Church Chosen

The Gene Turner Tech Bible Class, which is one of Tech's traditions, has new headquarters. The Sunday morning classes which were formerly held at the Ponce de Leon Baptist church, are now being held at the new million dollar First Baptist church, situated on Peachtree between Fourth and Fifth streets. Regular meetings started last Sunday and will henceforward be held every Sunday morning at the above location. Classes at ten o'clock.

The Gene Turner class which has been one of the oldest and best Tech classes for years, expects to make great progress during the ensuing year. Last year there were about one hundred and twenty-five young men in the class and now that more room is available, the enrollment is expected to exceed that of last year.

Those who were in last year's class will remember the fine times the class had together and will never forget the wonderful talks given by Mr. Lee Ashcraft, teacher of the class. Mr. Ash-

(Continued on page 6, column 1)

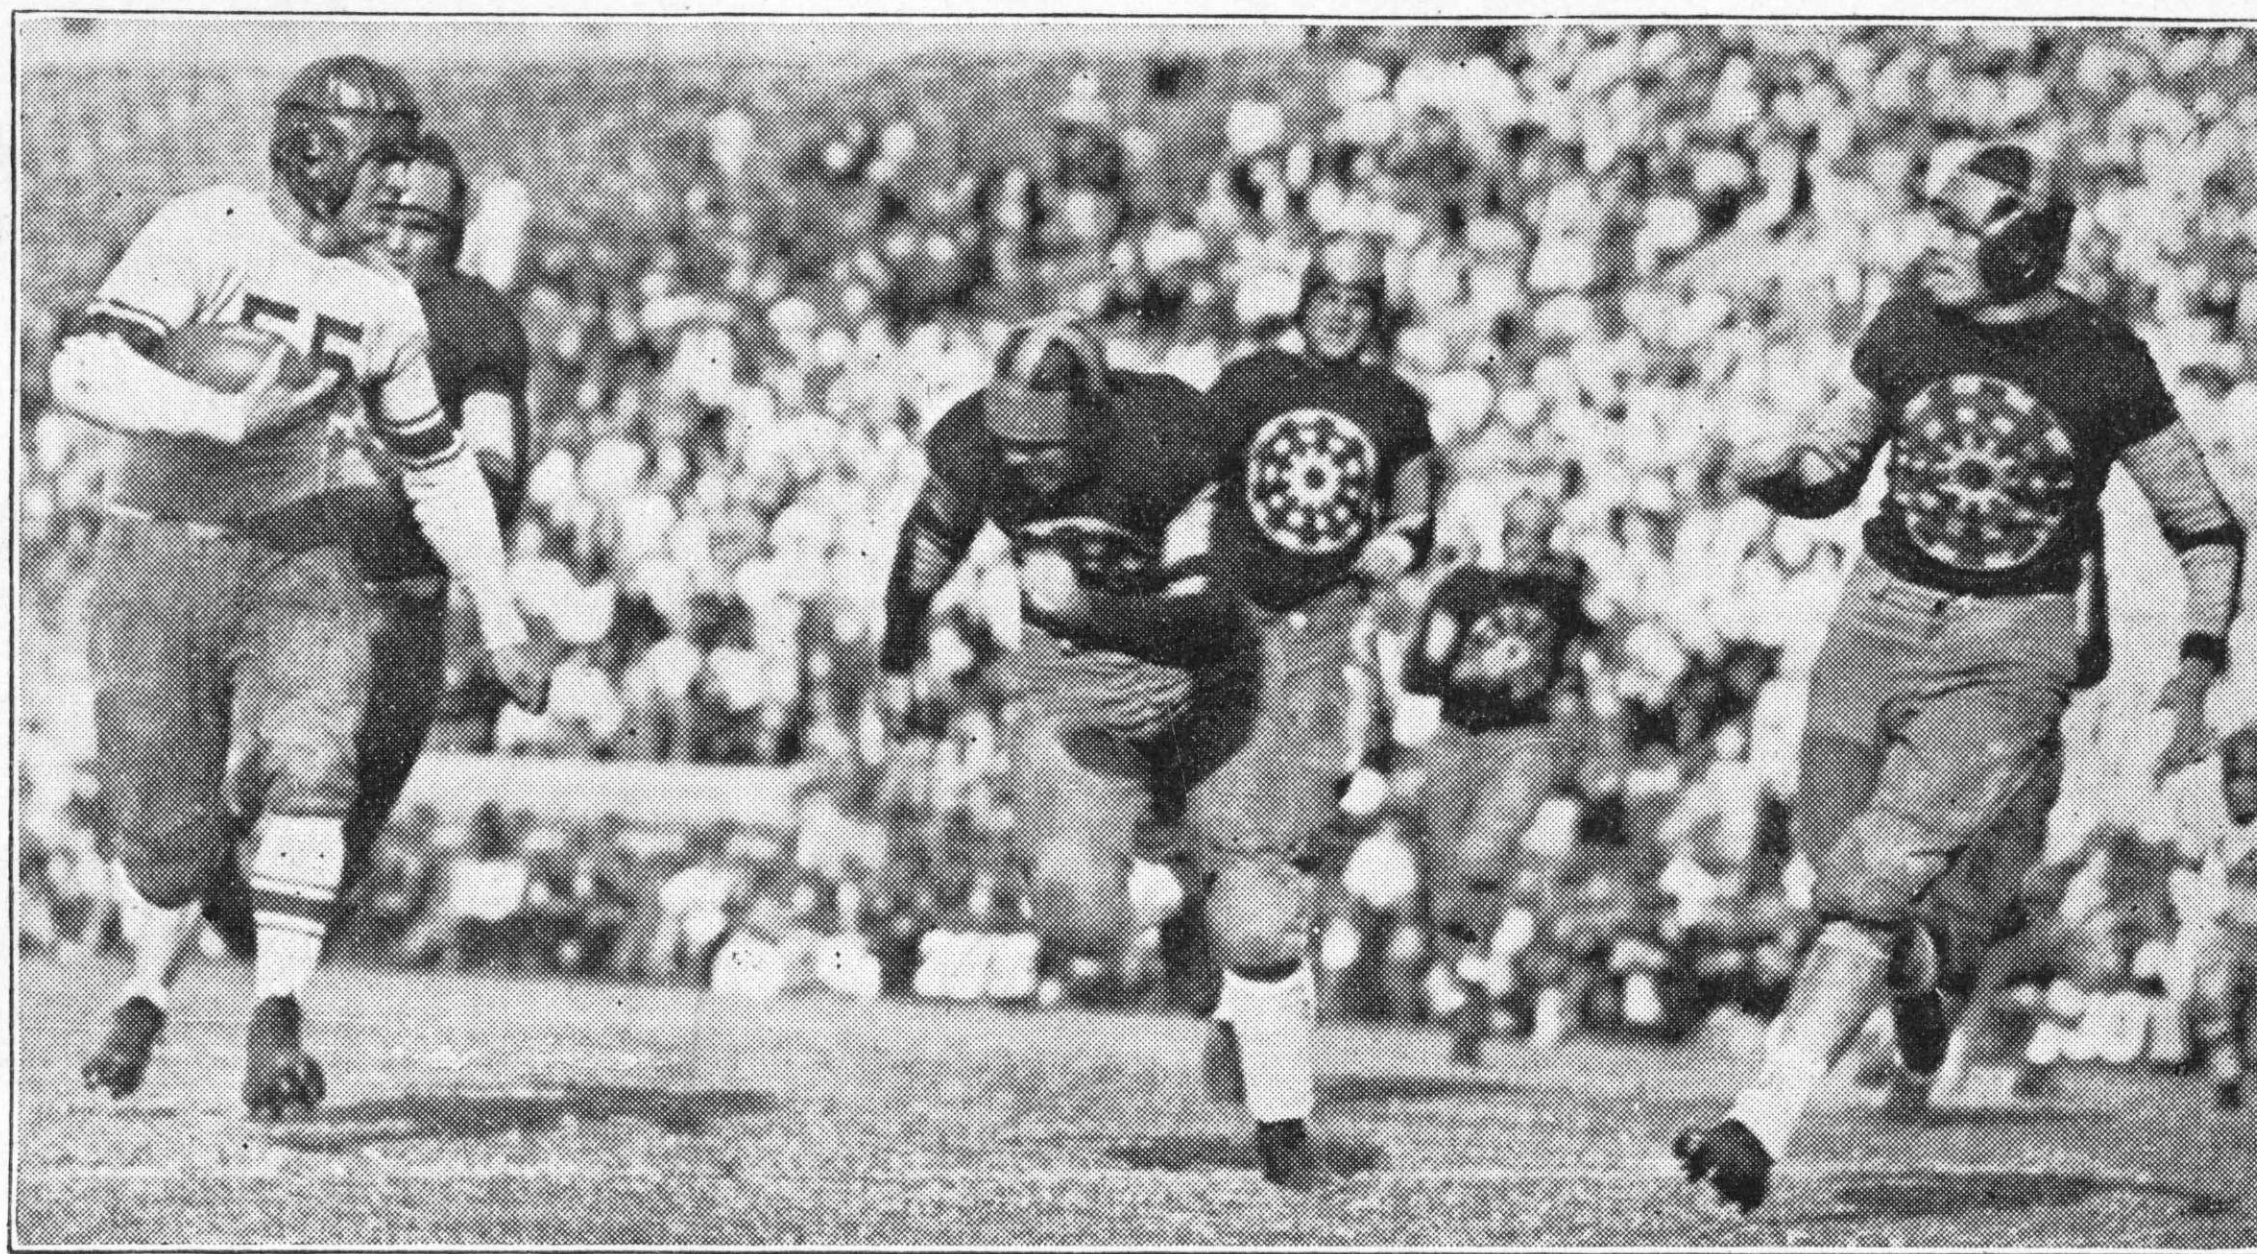

## Yellow Jacket to Appear Soon on Campus

The first issue of the Yellow Jacket, Georgia Tech's monthly publication of campus humor is scheduled to come off the press on October 24th, the day before the Tech-Tulane game.

Under new management this year, the Yellow Jacket announces a change of policy, as far as practicable. The staff will strive to make it reflect the true viewpoint and attitude of collegiate life, well seasoned with wit and humor, but not totally a humorous magazine.

Under the able guidance of Paul Dorn, editor, and Jimmie Minter, business manager, the paper will be bigger and better than ever before, we predict. Many new innovations and changes in make-up will be made, including the substitution of two-column pages instead of three-column as heretofore, adding much to the attractiveness and tending to increase the number of cuts and cartoons.

Don't miss the new Yellow Jacket. A sure cure for that tired feeling, a laugh per line, as well as articles of more serious nature, and as Floyd Gibbons would say, "Chock full of vim, vigor and vitality, more potent than any prescription that Doc McGehee can give for driving the blues away."

Captain Earl Dunlap off for a Touchdown in the South Carolina Game

## Interfraternity Council Holds First Meeting

The Inter-Fraternity Council held their first meeting this year last Monday, October 5. After the regular routine of opening the meeting new business was taken up. The treasurer's report brought a resolution urging all fraternities in arrears to pay their debts promptly. To defray the expenses incurred in the first term an advancement will be required from each fraternity. This advancement is to be deducted from the cost of the dance tickets at the Mid-Year Dance. The Junior members of the council were announced, the Senior members having been in last year.

The Delta Tau Delta fraternity announced the pledging of James McClendon of Atlanta. The Delta Sigma Phi fraternity announced the pledging of R. Sutton Ison.

Dean Floyd Fields, Dean of Men, and Moon Corker, president of the council, are going to attend the meeting of the National Inter-Fraternity Council in New York as representatives of Georgia Tech.

## Army Announces Change in Cadet Appointments

By the special orders of Oct. 7, issued by Major Longino, the additional appointments and promotions in the military department are announced as follows:

(1)

Cadet 2nd Lieut. J. W. Austin, promoted to the grade of Cadet 1st Lieutenant.

Vice 1st Lieut. Copenhagen, out of school, and assigned to Company "C". Cadet A. P. Persons, appointed Cadet (Continued on page 7, column 5)

## Notice of Freshmen Football Game

The Georgia Tech Baby Jacks meet the Monroe Aggies in their first game, this Saturday at Grant Field. There will also be a play-by-play description of the Tech-Carnegie game at Pittsburgh, through the loud-speakers. Let's all turn out and support the frosh in their opening game.

## Phi Psi Announces New Officers for Year

### Aaron Taylor President

The Georgia Tech chapter of Phi Psi, national honorary scholastic Textile fraternity, takes pleasure in announcing the election of the following officers, who were selected at the last meeting of the fraternity, held last spring:

President—Aaron Taylor.  
Vice-Pres.—Billy Nightingale.  
Secretary—Bob McKame.  
Treasurer—Jack Smith.  
Professor Jones, Councillor.

These men were elected on a basis of personality and scholarship. The fraternity, of which the Tech chapter was installed on the campus six years ago, was founded to promote a spirit of brotherhood within the Textile department. The enrollment of the fraternity last spring was thirty men. Meetings are held bi-weekly on Tuesday at 7:00 P. M. Throughout the year, lectures are given to the fraternity by different men who are leaders in their lines of industry.

Social plans for the fraternity are rapidly taking shape, with two dances, including Annual Lint Head Ball slated for next spring. The chapter, boasting an enlarged enrollment this year, is laying plans for a dance to be held in the near future.

Two delegates were sent to the National Convention of the fraternity which was held in Bellport, L. I., last May. The two men who attended this Convention were Billy Nightingale and Aaron Taylor.

## Tech Woman's Club Will Hold Reception

A reception honoring new members of Georgia Tech's faculty and their wives will be given Tuesday evening, October 21, at the home of Dr. and Mrs. M. L. Brittain, by members of Georgia Tech Woman's Club, of which Mrs. H. W. Mason is president.

Mrs. R. S. King entertained the club Tuesday afternoon at her home, 1293 Oxford road, in Druid Hills. She was assisted by Mesdames R. W. Holland, R. G. Sawyer, N. C. Ebaugh, J. W. Fountain, Jr., and O. M. Harrelson.

## Tech Radio Club Meets Officers Announced

In a few days, the Georgia Tech Radio club will be organized for the coming year, and it is urged that everyone interested in radio join. As freshmen are eligible, it is hoped that there will be a large turnout. The interest in the short wave phase of electrical study and experimentation is very high at Tech, and a large number of students have enrolled in the past. The Club, which was affiliated with the U. S. Signal Corps last year, was founded at Tech before the war, and has had a very successful career. The experience gained by past members of the Club has been responsible for their obtaining responsible positions in the electrical and business world. The officer at present are:

President—D. B. Buchanan.  
Vice President—C. H. Marsh.  
Secretary—J. M. Eubanks.  
Chief Operator—Ben Akerman.

## Fencing Teams Hold Daily Try-Outs at Y

Sounds of "Advance, retreat; advance, retreat; feint, lunge, parry, or guard" come daily from the side of the "Y" building as the members of Prof. Morenus' Fencing Club have their daily workout. Prof. Morenus is skilled in the use of epees, foils, and sabres and he is rapidly bringing the old members back into shape for the coming year.

The Club is in its third year and each year it has grown and expanded until it now promises to be one of the most prominent of the school's outside activities.

Last year the team fenced with (Continued on page 7, column 5)

## Notice

The Ga. Tech Alumni Association have just completed a list of every Tech alumni and it is now available in book form. The president of each fraternity chapter on the campus can secure one of these by seeing Mr. Thieson. Mr. Thieson can be seen in the office located in the south stands of the stadium.

## Yellow Jacket Club Elects New Men

### Plans for Season Given

The newly formed Yellow Jacket Club, which is to endeavor to promote the Tech spirit in every way possible but particularly to encourage cheering at the games, held its first meeting at the Y. M. C. A. on Tuesday, October 7. At this time the plans for the fall season were discussed. It is hoped to be able to work out some sort of specialty for one of the football games, possibly the Vanderbilt game.

The members of the club will have special uniforms—which have, however, yet to be selected. They will learn special drills, yells, and songs. It will be the particular business of the members to see that the freshman class of this year attends all pep meetings, does all the cheering possible at the football games, and in every way conducts itself properly. Each member of the club is responsible for the actions of five freshmen.

The organization is similar to the Cheerio Club of the University of (Continued on page 6, column 5)

## Mississippi Club Formed

### Plan to Meet October 14

With the beginning of the new year another new club makes its appearance upon the Tech Campus, The Mississippi Club. It is composed of every member of the student body that lives in the state of Mississippi. The purpose of the club is to give the Mississippi boys an opportunity to know and meet each other and to bring about a friendship among these boys that has heretofore been lacking. In the years past it was impossible for the boys to know each other as only a few of them were classed alike and more than sixty per cent of them mailed to boys that lived within a close proximity of them. It is believed that this is the best way that this end may be achieved, hence the organization.

The club is to meet once a month, as will be decided upon at its meeting Tuesday October 14th, in the "Y" auditorium. Every Mississippi boy is urged to attend this meeting, as it is to be one of the most important meetings of the year, and there are quite a few things to be thrashed out at that time.

The club plans to give several interesting programs during the coming year, and one of the most interesting is to be a half hour broadcast over Radio Station WSB.

The following officers are to serve in their respective capacity until the February election:

Hugh W. Stancill, President.  
Walter H. Moffatt, 1st Vice President.  
Earle Gilmore, 2nd Vice President.  
William W. Pointer, Treasurer.  
Bert A. Campbell, Reporter.  
The Secretary is to be elected at the next meeting.

## Dr. Brittain Entertains Notables at Game

At the Jacket-Gamecock game on Grant field last Saturday afternoon, Dr. Brittain had as his guests some quite distinguished personages. Those present in the president's box were the Right Honorable Rennie Smith, M. P., of London, England; Governor L. G. Hardeman; Fuller Calloway, Jr., of LaGrange; a number of Atlanta jurists, and all pastors of churches in the neighborhood of Georgia Tech.

Another visitor of some renown present was W. L. "Young" Stribling. His appearance caused no little excitement in the south stand which was filled to capacity with school children.

## On Cheering

It is deplorable that the freshman cheering section was so feeble in their support of the Tech team last Saturday. It was not fitting that the senior section should be filled with underclassmen an hour before the game started. And it was a disgrace for all the students to be publicly revealed in their ignorance of the Alma Mater that should thrill and inspire every real Tech man present.

The only way for the cheering section to render the yells in a convincing manner is for every single man to do his best regardless of whether the lagard at his side opens his mouth or not. One hundred percent individual yelling is the keynote of successful group cheering. Let's all start off together at the next game and watch the enthusiasm spread around the stands like wildfire.

It is probable that those Juniors, Sophomores, and even Freshmen in the senior section experienced a sort of cringing feeling when a senior deserving a seat looked over the crowd and wondered how a Tech student could show so pitiful a lack of respect for tradition as to jam their way into a little better seat he did not deserve. It is to be hoped that these cheap ones will stay where they belong hereafter.

It is a most primary duty for every student to be perfectly familiar with the Alma Mater and love it. Those who have been negligent enough to continue thus far without learning the words should never have the nerve to appear at a football game in such a shameful state. The poor specimen who heartlessly mumbles nothings while the Alma Mater is being sung should certainly lower his head. Don't let your friends mark you as one of these delinquent spirits.

## Athletic Training

The University of Oregon and many of the other leading colleges and universities of the country maintain a school of physical education, which prepares all of the students for participation in some form of athletic activity, thus giving the entire student body the advantage of sports in place of a few who are already developed. Freshmen are examined with a view to ascertaining their degree of fitness for activities, and if they are found to be below normal or underdeveloped, they are put through a period of training to qualify them for the various sports. Those who pass this examination are permitted to elect the sport they desire to engage in just as in the elective system of studies. Instruction is given in swimming, life-saving, wrestling, boxing, fencing, tumbling, tennis, handball, baseball, golf, football, volleyball, soccer, apparatus work and track

## CAMPUS CHATTER

### Tech is Here

Three hearty cheers for the big freshman night shirt parade which wound five hundred strong through the "Tech section" of Atlanta the night before the South Carolina game. Even with no freshly won victory to spur them on the "rats" participating in this "celebration of anticipation" were not alack in vigor or enthusiasm. A call was sounded for a nightshirt parade that night and the freshmen proceeded to have a nightshirt parade with neither humming nor hawing. It was one of the best processions we have ever seen and the class of '34 is certainly to be congratulated on this display of real spirit. After the next big game Tech wins we are looking for a parade through the downtown section and theaters that will completely overshadow every other demonstration to

Atlanta that TECH IS HERE! Come on Frosh, we're for you!

### Sleuth Sails

On the "S. S. Maslipstic," most palatial liner afloat, last night sailed one Dogeye Daniel, crestfallen, broken, wounded. From Glasgow come rumors that dauntless Daniel, the slickest dick of the Yard will retire to private life following his humiliating failure in the Tech Inter-Fraternity Rushing Rules case. This is the first case out of two thousand in which Dogeye failed to accumulate sufficient evidence to convict somebody of a capitol offense. When asked for a statement as he embarked, Dogeye screamed, "Get that air-dale off the stage."

### Chinchy

The Fox Theater is a good theater. Tech students like it. But somewhere (Continued on page 6, column 3)

## TECH IT OR LEAVE IT

You should be proud  
Of Dunlap, our hero.  
He beats the Gamecocks  
Forty-five to zero.

:: :: ::

Along with the passing of the good old grading system at Tech goes another feature of school life, the memory of which will bring a twinge to the heart of more than one mother's son. We speak of the fair, young waitresses of the Tech Dining Hall of last year. How many little romances, endearing glances, and all of that, went on between these lassies and the brawny engineers, no one knows. However a little note, hastily scribbled on a slip of paper, has just appeared which bears much light on the subject. The note was written by the "dining hall girls," themselves, and addressed to the Technique of 1920-30. We herewith respectfully submit it for observation.

To the Technique:—We, the girls think of Tech boys in this manner. Each of us has a secret crush on one individual and we are living in hope that he will wake up to the fact before school is out. Tech boys have such enormous appetites we have despaired of ever "filling them up." We have decided their legs must be hollow. Taking all the boys together we think they have nice manners although being in

and field.

As to the "star athlete" problem, the director of the university's school of physical education writes in the NATION'S HEALTH: "Men going out for teams are given full credit for their work. Upon completion of a season the student is required immediately to engage in another activity. In this manner a varsity athlete learns to play recreative games, which will be of vast importance to him as a means of obtaining much needed exercise when he can no longer participate in the more strenuous athletic activities." This further fact of importance is pointed out by Mr. Scott: "Once habits of exercise are firmly established in the student, it is like that the transition from college to business or professional life will be made without sacrificing the practice of regular physical exercise, which is so essential to the continuance of well-being of the individual."

This program is notable as an acknowledgement of the ills of magnifying intercollegiate contests at the expense of intercollegiate athletics, and also as looking to the rounded development of the rank and file rather than to the fostering or pampering of a few. In any realm the individual of rare worth is certain to stand out, and it is only just that merit should have its laurels.

Such a system is one of the greatest needs of the Georgia Tech student body for it is true here as well as in many of the other colleges of the country, that only the already-developed athletes get any physical training. It is only those who are already specialists in their field of athletic activity who get the training here, and the majority of the students do not receive any at all. We have a large coaching staff, but the student other than the athlete receives no benefit from it whatever. Such a system would be comparatively inexpensive to put in and Tech would be turning out men developed physically as well as mentally.

college seems to mean having a "Big Time." Now what do you think?

:: :: ::

Old sayings modernized:

A friend who's broke, is a friend to choke.

:: :: ::

Here's to little Buck,  
The ladies' delight;  
When a girl speaks to him,  
He shivers with fright.

:: :: ::

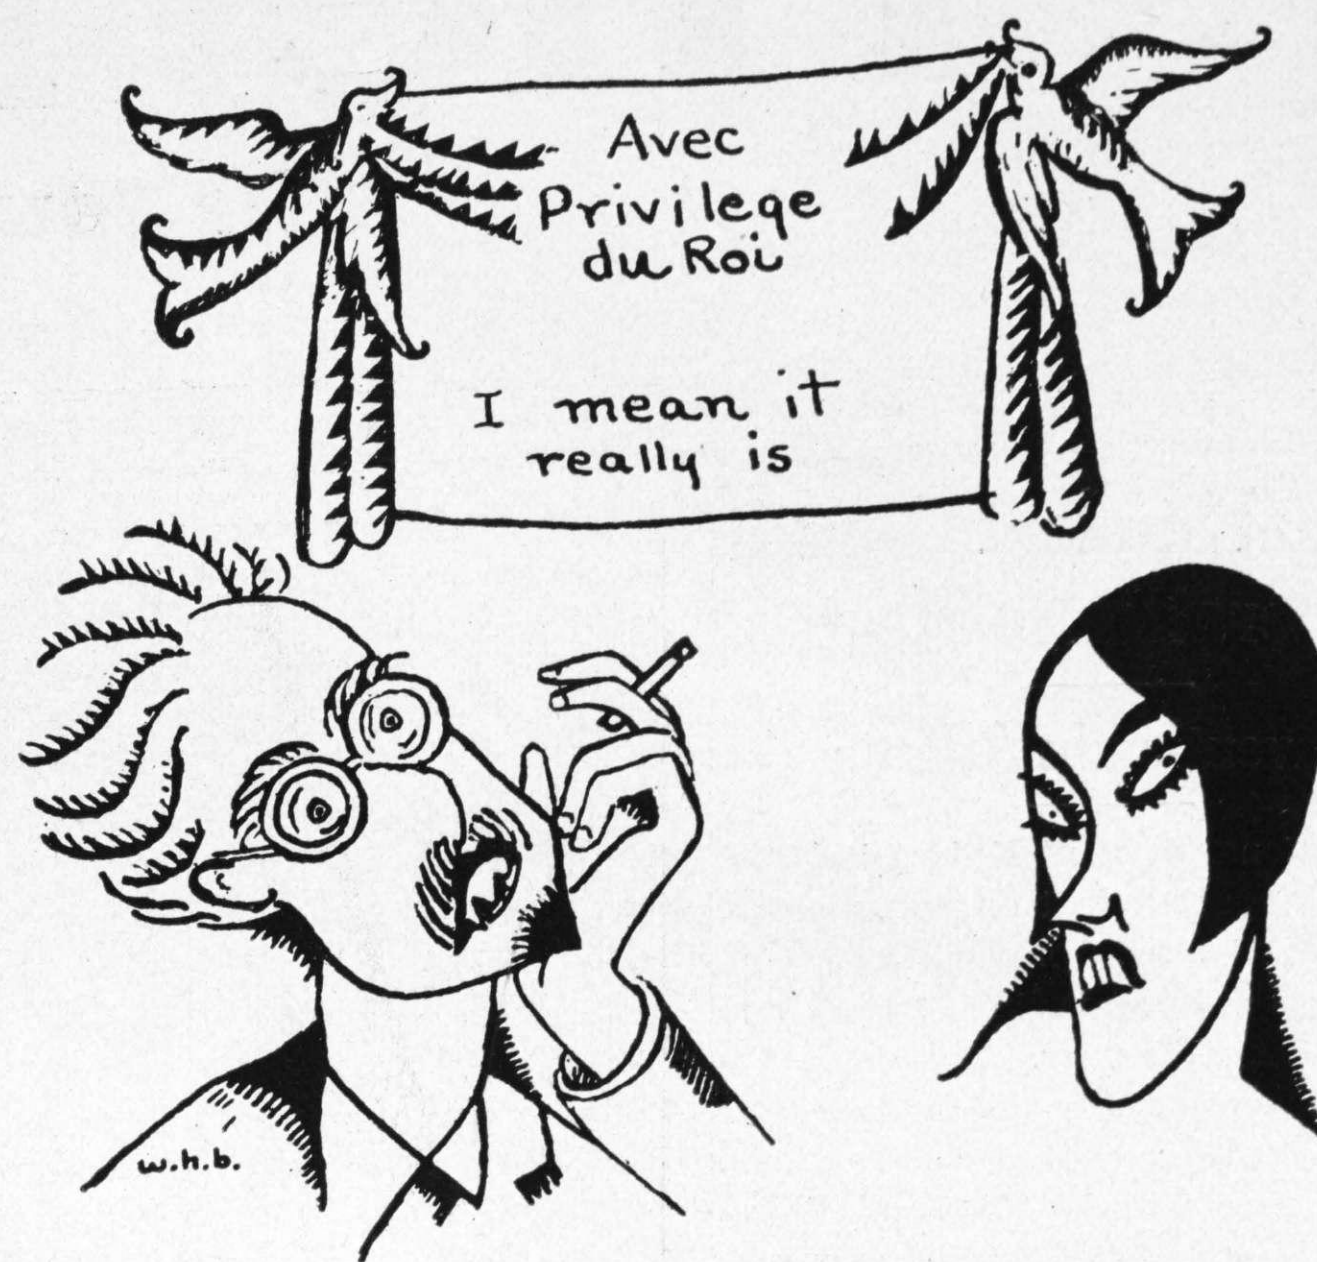

Definitions overlooked by Webster:

Class: A meeting of a small group of people, usually held in colleges and kindergartens, for the purpose of killing time. The meeting is generally conducted by some old fogey who is narrow-minded and mean. The success of a professor is judged by his ability to keep the class in a bored attitude. There are many successful professors at Georgia Tech. Syn. for class: bull session, circus, comedy.

:: :: ::

Don't ever speak  
To B. O. Wright;  
At the football games,  
He's always tight.

## What Price, Gloria?

What would you like to have, Bob, a Charlotte russe or a peach Melba?  
So far as I'm concerned, Gloria, I'll take an Irish Kathleen every time.

## HERE WE ARE

Dear Ma:

Well, Ma, football has begun and how it started with a 45 to 0 victory over the South Carolina Gamecocks is most encouraging. The Gamecocks humbled Duke last Saturday and Duke beat Virginia while we were trouncing the Gamecocks. That looks good. There seems to be a foe for Tech that did themselves proud in their first inter-sectional game when they humbled Minnesota to the tune of 33 to 7. Congratulations, Commodores; here's hoping that you meet with every success until November 8th, and then may the best team win.

Did you notice the new football program where the names of the players are in alphabetical order rather than numerical. It looks good that way in print but it takes quite a magician to

find the man according to number until after the time to look for the participants in the next play.

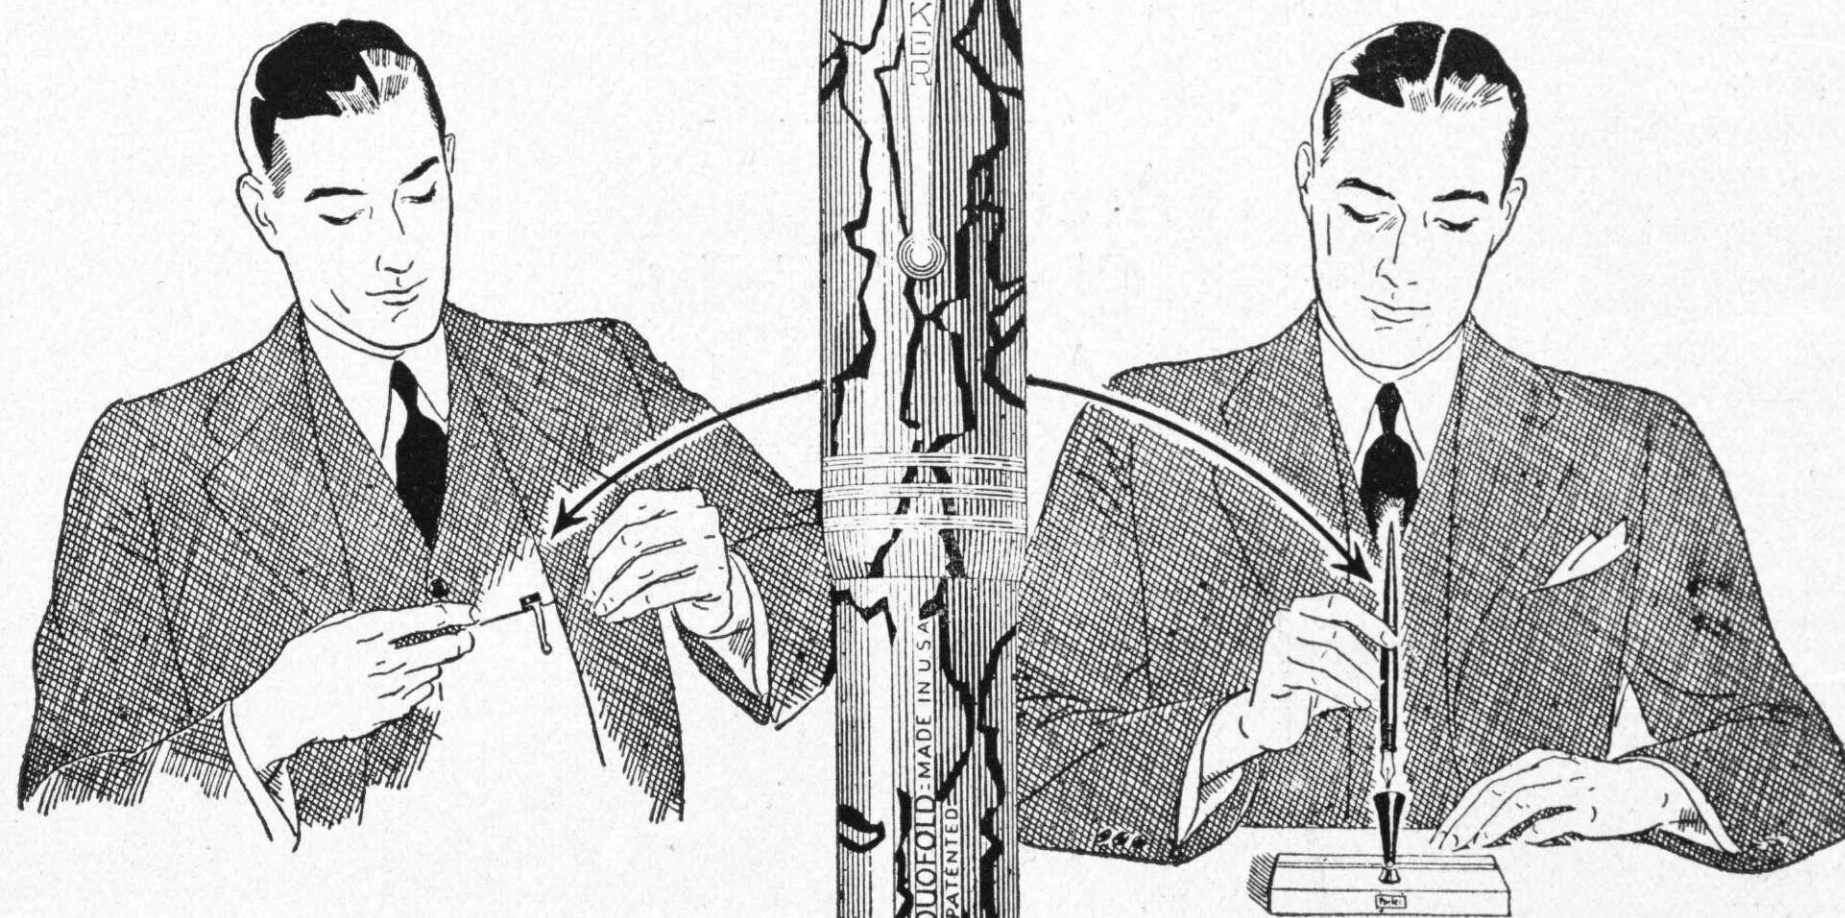

At the football game I happened to be behind an old couple wearing South Carolina colors. They were very enthused and the conversation was to the effect that their boy would be able to play. When buying cushions the man asked "How much?" "Thirty cents," was the prompt reply. He handed the boy a half a dollar and he politely gave them the cushions and put the money in his pocket and busied himself with making another sale, not bothering with the change. Wonder what they thought of this? Quite a reflection on Tech to say the least.

Well, Ma, Garber's looks as though they are in for a bad winter, with the (Continued on page 8, column 1)

## Both Pocket and Desk Pen Now in One

Only Parker Duofold  
SAVES PRICE OF A SECOND PEN

Offers This Combination  
PEN GUARANTEED FOR LIFE

### As a Pocket Pen

Getting the Parker Duofold is now like getting two Pens at the price of one. Attaching a tapered end converts it into a Desk Set Pen. Removing the taper restores it to a pocket Pen.

Either way, you save the price of a second pen. You have only one Pen to fill instead of two. And whether you write at your desk or on the go, you always have your favorite point.

You have a non-breakable Permanite barrel that holds 17.4% more ink than average, size for size—that is jewel-like in lustre, color, and beauty. And most of all—the famous Duofold \*bonus point that writes with Geo. S. Parker's 47th improvement—Pressureless Touch.

### Same Pen Converted

Even at higher prices, other makers have been unable to match this classic. Now that it takes the place of a special pen for the pocket and another for the desk, its sales are soaring beyond all previous heights.

Go and ask the nearest dealer to show how the Duofold is changed back and forth from a Pocket to a Desk Set Pen. If you own a Parker, take it with you. If not, go anyway and see this revolutionary invention.

THE PARKER PEN COMPANY, Janesville, Wis. Offices and subsidiaries: New York, Chicago, Atlanta, Buffalo, San Francisco, Dallas, Toronto, Canada; London, Eng.; Berlin, Germany.

★ Point-smiths Paid a Bonus  
Eleven merciless inspections are given each Parker Duofold point. Then we pay a bonus to our point-smith who made it. Points are rejected if they fail even one inspection, and the point-smith pays us a forfeit. Yet, 7 out of 8 points earn a bonus, because we limit each man to a given number a day.

# Parker Duofold

PEN GUARANTEED FOR LIFE \$5 \$7 \$10

## BEAU BRUMMELS

By Peter

### CARNEGIE INSTITUTE OF TECHNOLOGY (Tartans)

Located in Schenely Park near the civic center of Pittsburgh, about four miles from the heart of the city, tower the spires of the buildings that comprise the campus of the first intersectional foe on the Tech schedule. The Rambling Wrecks that are fortunate enough to follow the Jackets will have the pleasure of seeing, but for the most part we will have to hover around the loudspeaker and anxiously await the returns.

Carnegie Tech was made possible by the generous gifts of the foremost of steel men. Not only did he donate the grounds and the buildings that comprise the institute but the entire civic center was due to his generous gifts. A large tract adjoining the campus, several miles square, affords horse racing and golf. Nearby is a bureau of research (where the renowned Carnegie Bulletin on College Athletics was born), public library and museum combined which furnish inestimable aid to the seekers of knowledge in the institute.

There are nineteen active fraternities on the campus, all of them maintaining houses, and among them being listed some of the strongest nationals. The school of fine arts is co-ed and four national sororities all maintaining houses are included in this branch.

The Floyd Gibbons, Heywood Broun, or what have you, has an outlet for his efforts in the three college publications, The Tartan, the weekly newspaper; The Carnegie Puppet, the humorous magazine, and the Thistle, the year book.

On a hill adjoining the campus is located the University of Pittsburgh, the school's rival in every sporting event of the year. We question the idealness of this location, as we have often believed that some seventy-five miles was close enough.

Football seems to be by far the leading sport of the campus as at practically every other school at this time. The Tartans since their victory over the Fighting Irish of Notre Dame some four years ago have been mounting upward to higher heights. The Big Red Team under the guidance of Coaches Steffner and Waddell are counting on their biggest year. Practically the same team that ran roughshod over some of the best in the country last year is returned. With this strength reinforced by an excellent freshman team of last year the hopes of the Tartans is very bright. The scarlet red stripes of their white jerseys we hope will inspire the Jackets as it did against the national champions some

few years ago. The headgears are quite novel, being red and white. Well, here's hoping that as you read this article we can count the Tartans on the won side of the Tech score sheet.

We wish to thank Harry D. Kolb, Phi Kappa, Junior Editor The Carnegie Tartan, for the help that has been most useful in the compiling of this article. May we at the same time thank him for the most cordial invitation and assurance of their hospitality for the Engineers that are able to take the trip. May we make it a boomerang and invite everyone of the student body to Atlanta should the Tartans emerge to the Southland, be it for contest or conquest.

Being located in the center of a large city where college life is not the main interest in the daily life the student body at Carnegie Tech is obviously limited to prevailing styles in the business life of the city. The attitude seems to be to dress so that the student can mingle with the townsmen without attracting the "college student atmosphere." The colors of the campus are very varied; however, the tendencies lead to the darker browns and blues with the blues ahead by a large majority ranging from a deep shade of blue-grey to a midnight blue. The coats for the most part are single breasted with two and three buttons about equal. The form-fitting peaked lapel is taking the place of the sack coat with notch lapels. The class room is a maze of knickers—principally of tan camel's hair. Light weight crew neck sweaters of solid colors, blues, greens and harmonizing shades of tan, complete the ensemble with the milder colors being the most popular. The well-dressed frosh this year is wearing a trench cap of blue trimmed with plaid. These are in order until the early spring. The frosh here are commonly termed Plebes. The barehead seems to be prevalent—however, the advent of cold weather causes some to don hats, but they are not worn any more than is absolutely necessary. What a tough break for Stetson, Raccoon coats, which are worn a great deal in the Northern and Eastern schools, are very scarce on the campus—however, there is an occasional one accompanying some of the high powered roadsters. Mr. Kolb forgot to mention the co-eds other than they had them. So far as their style of attire is concerned we are at a loss. Possibly they haven't much—we wonder?

The social life of the campus is very full and varied, the most popular of the social events being the spring carnival that is held during May. This period of concentrated merrymaking includes three dances, one costumed,

the election of a campus queen and a coronation ball (maybe the girls have style after all), and numerous functions throughout the daytime, such as fraternity sweepstakes, a country fair, etc. The rest of the year is taken up socially with the usual Junior and Senior prom, one each both for women and men. The interfraternity formal,

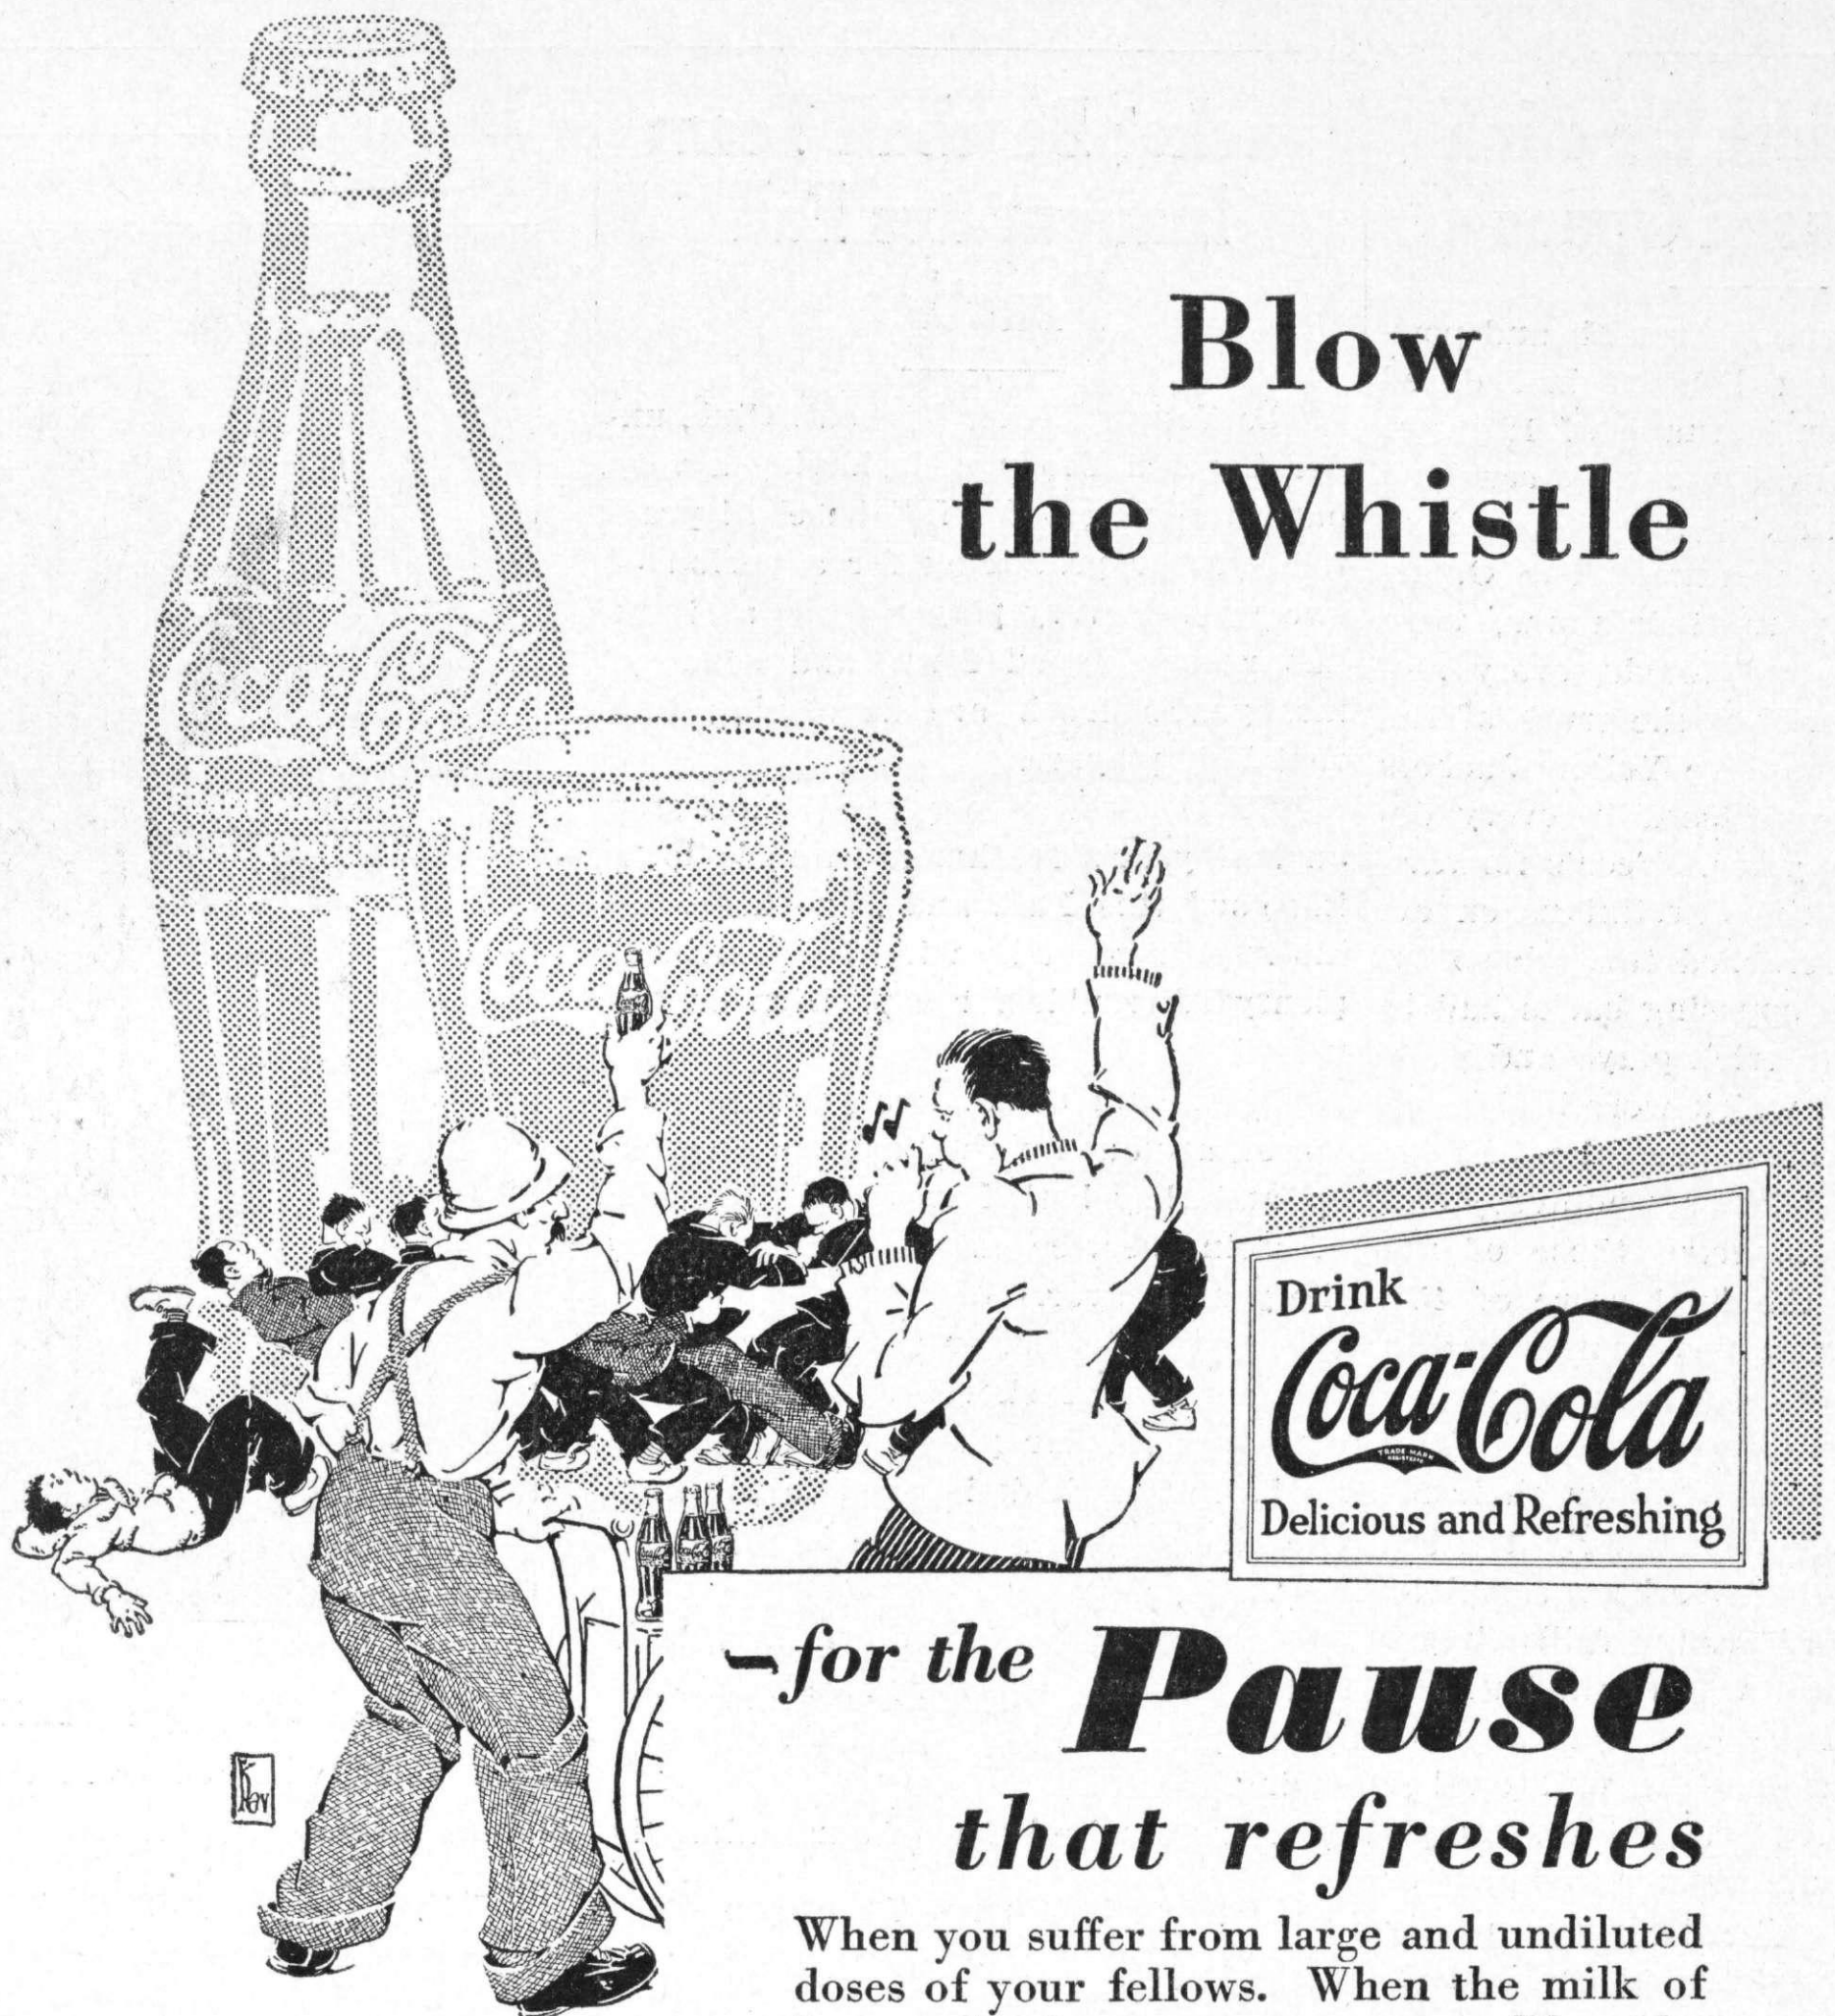

and the informal weekly dances complete a somewhat thorough list of social events.

As in most cities miniature golf holds its place among the students and many indoor and outdoor courses are available to the adherents of the ancient game.

Camels are the most popular of the

cigarettes at the Phi Kappa house with Luckies taking the count for second place. Very few persons risk a briar, partially because of the co-eds and secondly because of the location of the school; however, the Senior oftentimes adds to his dignity somewhat with the old trusty pipe.

Next week—Duke University.

Jackets Victorious In Opener

Tech Sinks Carolina As Season Opens

Showing far more strength and power than the most hopeful had dared hope, the Golden Tornado of 1930 got away to a splendid start by crushing the tricky South Carolina eleven in a most convincing manner. The Gamecocks, living up to their name, were certainly game and fought every second of the scrap, but the truth of the situation was that the Yellow Jackets had them far outclassed in every department of the game. Tech's forward wall outrushed the Carolinians on every play; they crashed through so furiously that the opposing backs had to resort entirely to trick plays and passes, almost all of which were broken up by rushing linemen or alert backs. The jacket backs out-punted, out-passed and out-smarted those of the opposition and the final score of 45-0 certainly indicated no greater margin of power than there was in reality.

South Carolina received the initial kick-off and were stopped on their 22-yard line. They immediately tried a pass which should have been complete, but Hirsch, South Carolina fullback, got it was grounded. An exchange of punts gave Carolina the ball on her own 24-yard line. Three futile attempts were made to gain and another exchange of punts, the last of which was partly blocked, and Carolina had the ball on her own 49-yard line. Here, after a short complete pass, Boineau kicked to somewhere near the middle of the field and a few seconds later placed it gently on the 7-yard marker. Here Carolina got a big break and recovered a fumble made by Dunlap. They kicked out of danger, but not for long. They exchanged kicks, and Tech found herself in possession of the ball in the center of the field. Here Barron, Cain, and Dunlap plowed up the field in a march that culminated with a thirty-seven-yard run by Earl Dunlap that hung up another six points to the credit of Strickland and a swift pass, and the latter, though almost down twice, ran the extra point. The half ended soon after the next kick-off with the score 27-0.

The second half saw the jackets make a drive into Carolina territory, but the Gamecocks tightened and McArthur was forced to punt over the 30-yard line. The first play by the visitors was a perfect long pass. Boineau to Eadon, that looked exactly like six points for them, but Pat Barron, doing a neat bit of headwork, refused to be taken out by turning away from the blocker and running with Eadon until he could tackle him and knock him out of bounds. There followed for the next few minutes a passing and punting duel that finally ended with the Gamecocks in possession of the ball dangerously near their own goal. Here Boineau fumbled and Casey Jones (no, not the one in the song) pounced on it over the goal for the fifth touchdown. Dunlap failed to add the extra point. Soon after the next kick-off, Pat Barron again caused the Atlanta public schools and others present to gasp as he nearly got away. He received a punt and dodged the whole team and had a clear yard stripe. This run was about fifty-five yards. A few minutes later Dunlap scored the sixth touchdown, making it 39-0.

The last tally was the result of a march from the center of the field. Gamecocks got desperate and tried pass after pass every time they got in possession of the ball, but it was all to no avail. Finally Eadon kicked to Barron, who, receiving the ball within a few yards of his own goal, brought the final touchdown. Tech, 45; Carolina, 0. The game ended shortly after the next kick-off.

It is almost impossible to pick any splendid exhibition of broken field running that lasted in the neighborhood of fifty-five yards. Pat looked like the old "Red," who happens to be his brother, Ed Heron, Vance Maree, and Frank Speer was particularly commendable in the line. Barron, Dunlap and Strickland looked best in the backfield. Eadon was perhaps the most outstanding man for South Carolina.

After the next kick-off, the Gamecocks got desperate and tried pass after pass every time they got in possession of the ball, but it was all to no avail. Finally Eadon kicked to Barron, who, receiving the ball within a few yards of his own goal, brought the final touchdown. Tech, 45; Carolina, 0. The game ended shortly after the next kick-off.

After the next kick-off, the Gamecocks got desperate and tried pass after pass every time they got in possession of the ball, but it was all to no avail. Finally Eadon kicked to Barron, who, receiving the ball within a few yards of his own goal, brought the final touchdown. Tech, 45; Carolina, 0. The game ended shortly after the next kick-off.

Jacket Baseball Team Inaugurates Fall Practice

The Yellow Jacket Baseball Club, under Captain Brosman is having a very hard and successful fall baseball practice. After practicing for a period of two weeks, every player looks as if he has reached good form, and some of the year's frosh are developing into real ball players.

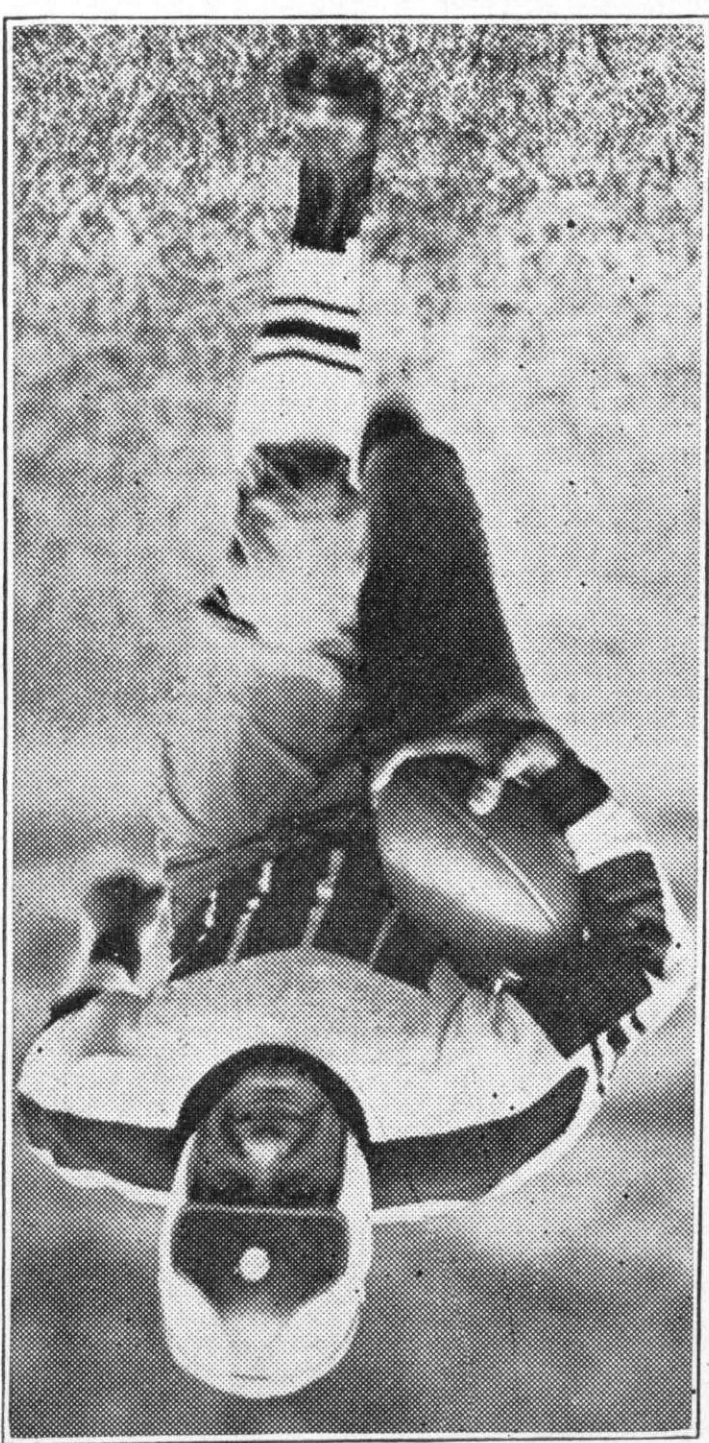

Bill Hogsed, who played short-stop on last year's freshman team, is looking good this fall, and if he keeps up his improvement he will give somebody plenty of trouble for a position on the infield.

Wilson and Gunn, two young sophomores, are out for the position of catcher, and they both have good prospects of seeing service on the varsity before the year is over.

Pullen looks better than ever at his old position of short-stop. He is the same spectacular player who snatched up balls that look impossible for anyone else, so wish him the best of success.

Waldrop is holding down first base at the present and will move than like-ly see plenty of good service there this spring.

Drennon, who is one of our seniors, is Joe Morbito, plunging fullback of Carnegie Tech, who will give the Yellow Jackets plenty of trouble tomorrow.

Red Barron Brings Strong Team to Grant Field

Tomorrow afternoon at three o'clock, the original Red Barron will bring his overwhelming score of 45 to 0, Tech over South Carolina Gamecocks by the Carnegie Tech game to be played in Pittsburgh this Saturday.

The Carnegie Tech team has the advantage in experience, having played two games already, and had to exert very little energy to defeat the Buffalo. In this game the whole third quarter, this was the first time in the history of the school that a scrub team stayed in for that length of time.

Last Saturday the Thiel team was added to the list of Carnegie Tech victories, when she went down to the tune of 52 to 6. Although Thiel managed to score one touchdown, she offered very little opposition and the engineers care of themselves in a football game.

This year's freshman team is by no means anybody's playboy. The "Kid" has a very likely looking bunch of husky gridsters, in fact, this year's

John Dreshar, Guard and Captain of the Carnegie Tech eleven, that faces Georgia Tech in Pittsburgh tomorrow.

### Football Team of Navy Wants Opposition

The Navy had started practicing up for their annual try at the battalion championship, when lo and behold, they found out that they would not have anybody to play! After much research work it was found that the Army had evidently been dismayed at the prospects of winning anything this year, after they had witnessed a few of the practices held on Clay field, in competition with the band.

When the Navy found out their dilemma, they immediately started looking around for someone to play. They are trying to get games with the At-

(Continued on page 7, column 3)

### Lacrosse Fall Practice Gets Under Way

The varsity lacrosse team started their fall practice last Tuesday afternoon. Uniforms were issued to about thirty men and a full afternoon of scrimmaging took place. Nearly half of last year's team returned and Coach Crenshaw expects to put a very good team on the field next spring when the season opens. This year's captain has not been elected but will be announced later.

Games have been scheduled with the Navy, Pennsylvania, and the University of Georgia. Arrangements for games with Duke, Virginia, and Fort Mac-

## SPORT GLANCES

Well, the Jackets came through last week and they looked mighty good in their 45-0 route of the South Carolina Gamecocks. The offense was a little ragged. In fact, there wasn't much offense. The Jackets got most of their points due to the bad breaks of the Gamecocks. They had to do some mighty good defensive work, though, to take advantage of these breaks.

It looked mighty good to see Spear and Maree in there again and boy, don't think their presence didn't make a difference. The big boys were in the Gamecock backfield most of the afternoon.

\* \* \*

The big question is what the Tornado will do against the strong Carnegie Tech eleven up at Pittsburgh tomorrow. It will be the first meeting of the two greatest engineering schools in the country and the smoky city fans are looking forward to a great game.

The Northern engineers are supposed to have one of the best elevens in the country and the Jackets will have plenty of trouble on their hands,

Pherson are under way and Coach Crenshaw feels sure that he can get them.

There are twelve men on the team and as there are only thirty men out there is room for several more on the squad. If you think you can play come down to the stadium any afternoon and try out. Uniforms will be issued to everybody who will come out.

5 Suits Pressed -----\$1.00

if they do win.

\* \* \*

Saturday will be another civil war as far as football is concerned. Tech will meet Carnegie at Pittsburgh; Georgia will meet Yale at New Haven; Oglethorpe plays Manhattan College in New York, and Virginia meets Pennsylvania in Philadelphia.

The Dixie teams will be in there trying to get revenge for the defeat which the North handed the South in the war of 1864. It has been rumored that some of the coaches actually have the boys believing that their Northern opponents were with Sherman on his march to the sea.

Of the inter-sectional battles, the Georgia Bulldogs probably have the best chance to win. The southerners have won two out of the last three battles with the northern bulldogs and they stand a good chance to come home on the big end of the score this year.

\* \* \*

The Tech frosh will open tomorrow against Red Barron's Monroe Aggies. Quite a few of the old guard will be out to see the youngsters perform, and it will be an anxious group waiting to see what Tech has to expect from the Sophomores next season.

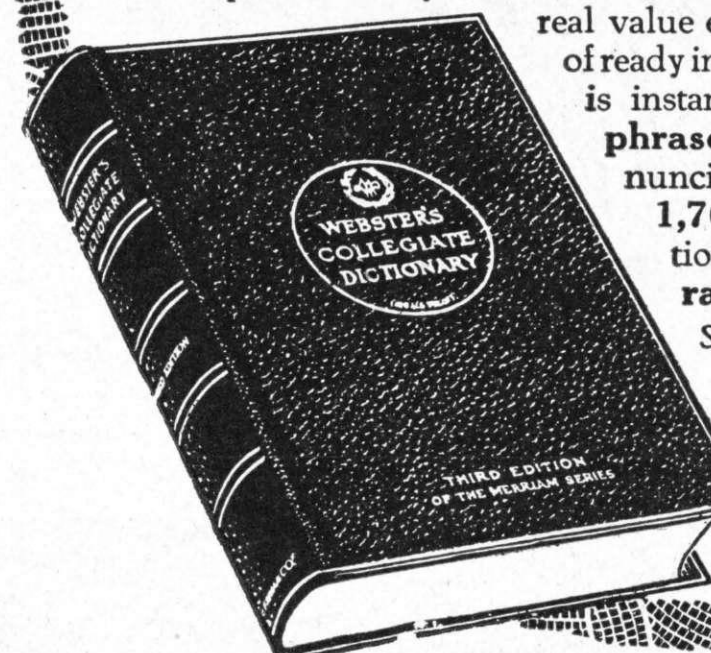

\* \* \*

Pat Barron brought the fans to their feet several times last week returning punts. The fans were waiting to see what the younger brother of the famous Red was going to do, and when he caught his first punt, and returned it fifty-seven yards, well, they were pretty well sold.

## WITH ALL THE PAST TO CHOOSE FROM...

In our youngest industries—radio and aviation—oxwelding is a standard production tool. With two centuries of manufacturing practice to draw from, each has chosen oxwelding as the modern method of high-speed production at low cost.

Oxwelding is ideally suited to routine manufacturing operations. It is readily adaptable to rapid increases in production and frequent or unforeseen changes in design.

It is applicable to the widest range of materials—steel and the ferrous alloys—aluminum, brass, bronze, and practically all other non-ferrous metals and alloys.

### "THE BEST DRESSED MAN"

It takes more than a startling array of haberdashery and the impeccable taste of a Beau Brummel to carry off the proud title of "best dressed man" of the senior class. Don't forget that health is a vitally important factor. Shredded Wheat adds that glow of health that makes splendid raiment becoming. Mineral salts and bran to

promote a good complexion—carbohydrates and proteins for energy and freshness—vitamins for pep and vigor. Try a biscuit or two tomorrow morning—delicious with milk or cream, and a few slices of your favorite fruit.

THE SHREDDED WHEAT COMPANY

# SHREDDED WHEAT

## Gene Turner Bible Class in \$1,000,000 Home

(Continued from page 1, column 1)  
craft has worked with the class, built it and made of it one of the finest classes in Atlanta. He gave to the members of the class, information and

advice that will be helpful in the business world and in life. To him, the members of the class owe many thanks for what he has done for them and for the class.

Mr. Ashcraft will be unable to teach the class this year, however a very capable and interesting person has

kindly consented to take charge. Mr. George M. Sparks, one of Tech's professors and dean of the Tech Evening School of Commerce, is the person. Mr. Sparks is very interested in the class and intends to make it the best and most interesting of Tech Bible classes.

The class, as usual, will have girl sponsors. The system is very successful and each Tech man is invited to bring a young lady with him. The sponsors will be chosen by election.

The officers of the class are: President, Bill Miller; vice-president, Perry Hill; 2nd vice-president, Tom Yarbrough; secretary and treasurer, Harry Weiler.

Tech is looking forward to the Gene Turner Tech Bible class.

## Campus Chatter

(Continued from page 2, column 3)

between the manager and the doorman in its personnel is a chinchy gentleman who does not care to maintain the good will of his patrons. Tech students who use Thrift Tickets don't like him. Every boy who was recently refused admittance because he had his Thrift Ticket and not his Thrift Book, called that man bad names on his way back to school to get the bulky book. So did we.

## Babble, Gabble

Have you ever walked into the school library to sit down and study or read? Its very conveniently located, comfortable, and quiet—sometimes. But oh what a racket a few women can make when they get started. All goes well when the pleasant, efficient looking librarians are at work. But if a feminine friend of theirs happens in, its time to leave. No more studying that hour. Flutter, clatter, buzz, tee hee,

gab, my dear, talk, and-on and on. We're all for the Tech library having a few more bound copies of The Technique and a lot more silence.

## Doggy?

We see by the papers that the M. L. Brittain Debating Society is to meet and that a reorganization of the Glee Club is to be effected, and that Tech will have a fine fencing squad this year. We are anxious for the debaters to score at least one victory during the season, we hope the Glee Club can complete its schedule without deficit, and if the fencers would just burn their doggy berets we could forgive them for losing every tilt.

## Bids for Sale

The allseeing eye of Campus Chatter was caught the other day by a well placed sign, across which one reads in bold letters, "O. B. X. Script Dance." It seems that there has been a gravely erroneous report circulated about, that one has to attend the script dance in order to be among the select seven thousand to receive an invitation to the formal (free) ball. Freshmen, take a tip from an old timer; this is entirely wrong. A better way, by \$1.25, is to instruct your room-mate to say to one (any one) of the little girls, "My name is Jonathan Dothan, but I also have a room-mate named Larry Logan who recently pledged Alfalfa Rho. Their dance will be held early in February." That's all the information the little lady needs and bids are assured for both.

## Tennis is Not Rowdy

New tennis courts on the campus are words that should sound good to the throngs of racket wielders ordinarily thronging the hitherto "Tech Tennis Court." Personally we have not had much to say for the Athletic Board since they killed the sweeping enthu-

## NOTES of SPORTDOM

According to Matt Bullock, veteran athletic trainer at the University of Illinois, there are three classes of athletes to deal with in university sports. They are those who really are injured, those who imagine they are injured, and those who are injured but dislike to admit it. All must be handled with an eye to their mental as well as their physical attitude, explains Bullock, who has been safeguarding Illini athletes since 1917.

North Carolina either isn't as good as the experts had thought or the Tarheel opponents must be strong. Wake Forest almost defeated the Chapel Hill eleven a week ago and Saturday saw V. P. I. score three touchdowns in a game they lost, 39 to 21.

Chris Cagle's Mississippi Aggies lost a close one to Mississippi College, the score being 13 to 12. It was the second defeat of the year for the Aggies. There will probably be much attention given the try for point this week.

Duke, with unusually fine material, has been taking them on the chin with great patience and calm. Saturday they revived the axiom about the worm turning by biting Virginia viciously and winning handily and with much to spare, the score being 32 to 0.

One of the best punters the south ever saw, Ray Dickson, former football star of the University of Florida, has made several trips from Jacksonville this fall to assist in the coaching of the 'Gator kickers.

Ed Sauls, Link Silsby and the young sophomore, Al Rogero, are the three boys Dickson has been especially interested in. "It is nothing now for the boys except timing and cadence," Dickson said yesterday. "We're working hard and the boys are getting off some marvelous kicks, and are consistent with them, too."

Charley Bowser, one of the greatest inspirational players Pittsburgh ever produced, takes charge at Bowdoin after a liberal education in coaching methods as an assistant to Jock Sutherland at Pitt.

Opponents of the Panther teams of six or seven years ago remember Bowser as a raging, rambling fighter who flung away his headgear and shifted from quarterback to center, or vice versa, to get where the going was hottest.

### Barron Brings Team

(Continued from page 4, column 4)

team is the best looking team that the coaches have seen since the famed team of 1927, when Maree, Brooke, Jones and Dunlap were freshmen.

The Freshmen are to be commended on the excellent brand of spirit displayed at the game last Saturday. Tomorrow the men of the freshmen class will be out in the middle of Grant Field battling for the honor of the school and also for the honor of the freshman class; so all the freshmen should go out there and yell for their classmates.

### Navy Wants Opposition

(Continued from page 5, column 1)

lanta high schools, and some of the park teams. The Navy does not want to accuse anyone, but they are wondering what has happened to the Army.

Upon investigation they found out that the Army officers are willing to coach their teams if the students come to them and assure them that they do not want the Navy to claim battalion championship without having to struggle for it.

Meanwhile the Navy has drawn uniforms and is continuing practice under the able directions of Lieut. Comly and Mr. Griffin. If the Army doesn't look out, the Navy will have the edge on them when it comes to practice. Mr. Griffin coached McCaulley High last year and that school did not stand at the bottom of the list by any means. Watch out, Army!

### Jackets Have Hard Foe

(Continued from page 4, column 5)

teams and is slated to cause trouble the rest of the season. George Kavel, sophomore half and Harry McCurdy, quarterback, will also bear watching. In the line Captain John Drescher, at guard, Latham, Flanagan and Tel Rosenzweig at ends will give the Tech backs a great deal of trouble.

Eugene Homans, finalist in the U. S. amateur golf championship, is the son of Shep Homans, who played fullback for Princeton through three seasons without being out of the line-up a minute.

### Jackets Baseball Team

(Continued from page 4, column 2)

showing up well at second base this time and is trying hard to make the grade.

The pitchers are not participating in the Fall practice, but they will be on hand at the first of season. Nearly all of the outfield and many other players are unable to come out at this time, because they are engaged in football.

There will be two more weeks of Fall practice, and it is certainly helping to keep the players in good condition for Spring. Baseball this next year will be run on somewhat the same principle as football, as there will be competition between many of the best teams who will make up the Southern conference. This system has been organized in order to create a greater interest in the game and to put college baseball back on its old level.

Coach Clay intends to win the Southern Conference this year, and when he is determined to be victorious, he does not mean to go at it in a half-hearted way. Our baseball material is the best it has been in years, which predicts that Georgia Tech will be the Southern Conference Baseball Champions.

### Fencing Team

(Continued from page 1, column 4) teams from the University of Georgia and the University of North Carolina, and this year the University of South Carolina will also be added to the schedule. Other meets are indefinite at present.

The officers of the Club this year are: Wilber Ruth, president; Paul Wimberly, vice president, and Russel Brooks, secretary and treasurer.

Arrangements have been made for all new men to report to Prof. Morenus at the "Y" on Tuesday, October 14, at 4 o'clock.

## 123,000 tests a year

In the Crane testing laboratories, the weight arm of a specially designed machine measures the steadily increasing load suspended from a small cylinder of metal. Watching it intently is a man who has at his command instruments that measure to .00005 of an inch. The cylinder begins to yield; he notes the weight. It snaps; he notes the weight. Disengaging it, he measures the stretch and diameter at the breaking point. These tests form a part of the 123,000 determinations Crane Co. makes on its own materials every year.

63,000 of the tests are chemical; not one component from pig iron to limestone flux is charged in a Crane melting furnace whose suitability has not been determined by analysis. 60,000 are physical; not one hour's melt is drawn off in a Crane foundry whose physical properties—tensile, transverse, and torsional strengths, yield point, breaking point, elongation, and reduction of area are not known.

By such exhaustive tests and by researches of scientists in Crane laboratories, a vast body of authoritative data on metals and their properties has been collected. It is embodied in a book, "Pioneering in Science," which is an invaluable reference book for students. On request, we will send it to you.

## Rifle Team to Start Practice Oct. 6

Those wishing to try out for the Infantry rifle team are urged to turn in their names to Capt. Wing starting on October 6.

There is keen competition each year between the Infantry, Coast Artillery, and Signal Corps Battalions and sweat-shirts are given the ten best marksmen of the winning team.

Many men are expected out for this year's team and those wishing to try out should sign up as soon as possible.

## Touchdowns Rewarded

### Suits Pressed Free for Every Goal Crosser

Mr. C. F. Gorman, proprietor of the White and Gold Pressing Club, announced shortly before the Tech-Carolina football game that he would press a suit, without cost, for any Tech football player each time he crossed the opponent's line for a touchdown. Although this is a rather inconspicuous form of reward, nevertheless it is having its share in the locker-room conversation while the Yellow Jackets are donning and removing their uniforms, and is humorously referred to during "bull sessions" about the campus.

At the time the offer was made by Mr. Gorman he had no idea that this first game of the season would call for the servicing of seven suits, which was the surprising number of Tornado touchdowns during the encounter with South Carolina. The ones profiting by the offer this time are Earl Dunlap, who will get three suits pressed, and Bob Strickland two, while Ed Herron and Jerry Goldsmith are entitled to one each.

## Georgia Tech Alumnus Has New Issue

A very valuable copy of the "Georgia Tech Alumnus" is just off the press. It has the alumni arranged first, in regard to the classes in which they graduated, secondly, in alphabetical order, with addresses and occupations listed after each name, and thirdly, in geographical order.

This copy will perhaps prove of great value to members who desire to keep in touch with their old chums. As great care was taken in the preparation of this September 1930 issue, very few, if any, mistakes occurred.

The business meeting of the National Alumni Association will be held towards the close of the scholastic year during commencement.

### Here We Are

(Continued from page 2, column 5)

two dances that I told you of last week they had plenty to worry about and now the Biltmore hotel announces Saturday Nite dances for the college set at one dollar a throw. Lowering the ante two bits will get a lot of business unless the moguls of the age-old hall of the well known art of dancing (?) see the writing on the wall and likewise lower the ante.

Well, Ma, the students at Agnes Scott are surely showing the right kind of spirit. They are having a campaign now, headed and managed by students, to raise \$20,000 for the beautification of the old school. We told you they were the best bets around Atlanta. How about the SYT's trying to tie this one.

Just as I thought. After this publication went to press the paper the next morning contained the announcement of the first party in this year's debutante handicap and since that time the paper has been full—a whole page in

### Sign Up for Yellow Jacket

Those who want the YELLOW JACKET sent to an address other than their Tech address, sign up for it this week. Students wishing to secure an additional subscription, can do so by paying \$1.00, the student's special rate for the extra subscriptions, and signing at the Y desk or mailing the address along with the dollar.

rotogravure and thousands of inches of type space. It seems that this year's political campaign is being launched in a big way with plenty of advance publicity. The campaign manager seems to know her, or his, stuff.

The SYT's are still going strong with the freshmen. Every nite we have to listen to some frosh that is falling for the line and is getting prepared to help her rate four more years. The fraternity dances are yet to come and the upper classmen still rate while there is some compensation in the offing. It won't be long now before the lowly frosh is scheduled to replace the dignified senior.

It seems that the thing for the football captain to do is to take a better half—Pund then Rusk. Wonder if Dunlap is holding out on us.

We meet the Tartans of the Carnegie Institute of Technology this week in the first intersectional battle of this year. We hope that the boys are able to bring home the bacon. The result of last Saturday is most gratifying. May the best team be the victor.

come a part of the Tech social life. The first dance was a large affair, hardly breathing space—much less room to dance. The SYT's were there, a new and younger crop, all vying for first honors with the most promising of the frosh. It seems that their motto is the same as that of the Canadian Royal Mounted police, or is it to the victor belongs the spoils.

Speaking of wasted time, here's one that Will Rogers might have told. The

THE BEST PLACE TO EAT AND DRINK

other day I saw a SYT that was in at the Chi Phi's were off to a flying start with the tea dances that have been at practically all of the baseball games last year. Then, too, she went to see the Crackers play a great deal. Inasmuch as she appeared to be somewhat of a baseball fan, naturally she was interested in the world series. She greeted me with "What's the score in the game today?" "It's the end of the second inning and not a man has reached first," was the reply. "That's fine," she answered. "But what's the score?" And they shot men like Lincoln.

Well, Ma, another member of last year's debutante club has gotten a lot of publicity by having her picture on the front of the Red Book. Inasmuch as the picture was painted from a photograph we do not know who to congratulate for the magical powers displayed—the artist or the photographer. The Atlanta theatres seem to have discontinued all of the music and stage shows in an entirety. The Vitaphone is a wonderful invention but there are still a lot of folks that prefer things in a way that might seem foolish to the moderns—"the old-fashioned way." Here's hoping that they can some of

the canned music and put on shows that are really worth while with some of both, canned and real.

Well, Ma, I suppose you noticed in the papers the pledges of the various fraternities at Tech and Emory recently. These are hardly readable in some instances. The SYT's have been studying and analyzing and where the battle was the hardest the names are almost worn off.

We wonder if Ed Herron enjoyed the use of a certain automobile that is parked in front of the stadium a great majority of the time?

# Georgia School of Technology

"A Technical School With a National Reputation"

THE GEORGIA SCHOOL OF TECHNOLOGY offers to young men of ability and ambition a training which will fit them for positions of responsibility and power.

The national reputation of this institution is based not on claims, but on results. Its greatest assets is the record which its alumni are making in the productive work of the world. Georgia Tech graduates succeed because they have been trained both to think scientifically and to work efficiently.

Courses in Civil, Electrical, Mechanical, Textile, General, and Ceramic Engineering, Engineering Chemistry, Architecture, Commerce and General Science  
Coast Artillery, Signal Corps, Air Service, Infantry, and Ordnance Units of the R. O. T. C.

...off the springboard it's **FORM!**

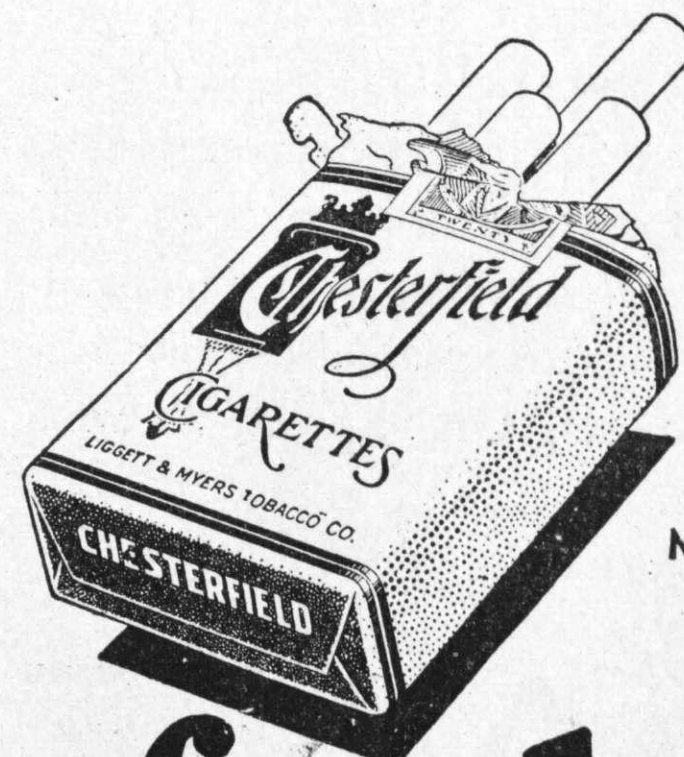

...in a cigarette it's **TASTE!**

GETTING DOWN to brass tacks, a cigarette is a smoke—made and bought for your own enjoyment.

But between just something to smoke, and tobacco character, richness, delicate aroma—in short, something to *taste*—well, that's the difference that accounts for Chesterfield's ever-mounting popularity—

"TASTE above everything"

MILD...and yet  
THEY SATISFY
