

Industrial Management

DEPARTMENT

The objective of the School of Industrial Management is to train students for such positions in industry as are not regarded as highly technical such as is the case with engineering schools. Those aspects of management in industry are stressed which have to do with management of capital, management of finances and accounting, employment, training and management of personnel, making the best utilization of already known markets, and discovering new markets.

Particular emphasis is placed upon the personal development of the individual personalities of the students with the view of realizing the kind of leadership that is exemplified in the life and work of successful persons. While a knowledge of the subject-matter of the courses offered is not minimized, it is not stressed so as to overshadow the importance of the individual student and the broadening of his individual version of the part he is to play in the future as an industrial leader.

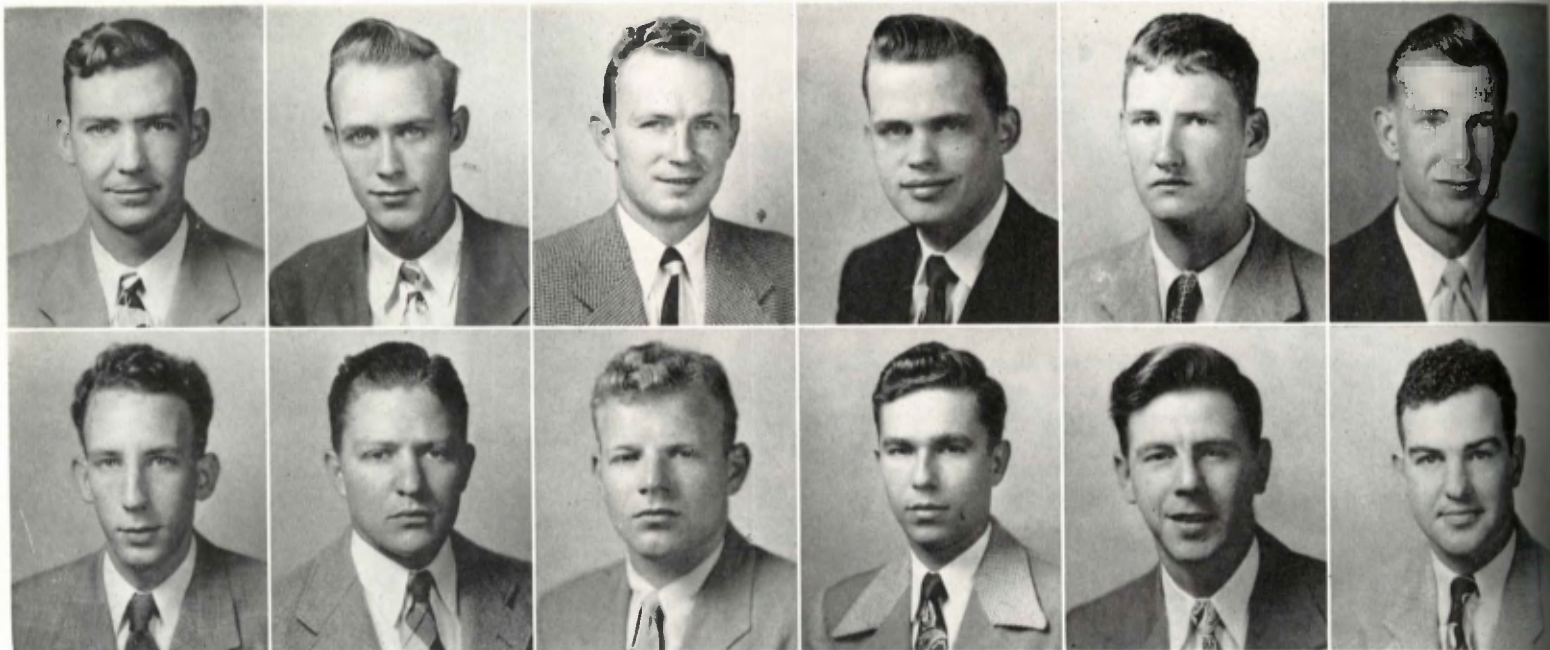

H. E. DENNISON

FIRST ROW, LEFT TO RIGHT: Brewster, Hibbs, Marshall, Lentchner, Arant, Thompson, James. . . . SECOND ROW: Henderson, Chisholm, Buckingham, Hardwick, Speer, Aldredge. . . . THIRD ROW: Dennison, Rerifree. . . . FOURTH ROW: Brown, Warren, Sifford, Proctor. . . . FIFTH ROW: Carberry, Breese, Wenn.

Mechanical Engineering

DEPARTMENT

The School of Mechanical Engineering was the only degree-granting department of Georgia Tech from the opening of the Institute in 1888 until 1896. The course of study has changed through the years from the original one, largely of vocational nature, to the present curriculum in which broad application of engineering theory is emphasized.

There are no optional courses in mechanical engineering but electives are provided whereby a student may have some choice of subjects most suited to his individual desires. Courses of cultural and humanitarian aspects are included as a necessary part of a curriculum designed to provide the basis for future advancement of mechanical engineering graduates as professional engineers and as citizens.

FIRST ROW, LEFT TO RIGHT: Mason, Morris, Hinton, Henika, Weber, Allen. . . . SECOND ROW: Wilcox, Vidosic, Doyal, Foster, Bonner, Deek. . . . THIRD ROW: Zimmerman, Weeden, Davis, Goglia, MacCullen, Sangoter, Haroldson. . . . FOURTH ROW: Holland, Cheatham, Morris, Darby, Bowman, Davis, Trotter.

Physics

DEPARTMENT

The School of Physics at Georgia Tech offers training in physics leading to either a bachelor's degree or a master's degree. The last few decades have been a spectacular development of physics in the field of nuclear energy, and an ever increasing complexity in industrial and military equipment. The changes call for the education of more physicists and for the education of engineers with more fundamental training in physics.

A thorough foundation of physics is particularly necessary for engineers who wish to specialize in development and research work. To meet these needs, the course of study in physics has been designed to give a thorough fundamental training with considerable emphasis placed on the industrial applications of physics. Flexibility in the undergraduate schedule makes it possible to obtain a bachelor's degree both in physics and in some specialized branch of engineering in five years.

Textile Engineering

DEPARTMENT

In order to provide the textile and related industries with prospects for supervisory, administrative and executive positions the School of Textile Engineering offers three options leading to the degree of Bachelor of Science in Textile Engineering. The student may choose Textile Engineering, Textile Chemistry and Dyeing, or Textile Manufacturing as his field of specialization. Courses are also offered leading to the degree of Master of Science in Textiles.

It is the purpose of the A. French Textile School to continue giving each student the advantage of the best training possible to fit him for a place of leadership in community and industry.

Engineering Drawing and Mechanics DEPARTMENT

Regardless of his field, no engineer has received proper training without adequate knowledge of certain basic subjects—service courses, as they are called. This division offers such courses in two fields—Engineering Drawing and Mechanics—with the purpose of providing students of the Georgia Institute of Technology with sufficient knowledge of these subjects to perform the services required of an engineer.

Engineering Drawing, fortified by descriptive geometry, is designed to give students a basic skill in making and understanding drawings. Mechanics includes kinematics, dynamics, statics, kinetics, and mechanics of materials. In all of these it is hoped a foundation will be laid for a comprehension of a force and its effects externally and internally on a body.

English

DEPARTMENT

The English Department is one of the largest and oldest departments on the campus. Its twenty-nine members have taught at Georgia Tech a total of more than two hundred years, and in college for a total of more than four hundred years. The department teaches required courses to all freshmen, all sophomores, and eighty per cent of the juniors, in addition to offering elective courses for a large number of upper classmen.

It is especially interested in campus organizations and supplies faculty advisers to such organizations as the Debate Club, The Technique, the Y.M.C.A., the Blue Print, and ODK. But its chief aim is to see that every Tech student speaks well, writes correctly, thinks clearly, and reads widely.

Mathematics

DEPARTMENT

The Department of Mathematics provides instruction in the subject that is the basic foundation of an engineering education. Two years of mathematics is required by every school of engineering and each quarter between three and four thousand students schedule courses in this department. In addition to the basic courses there are offered many excellent advanced courses that are offered at few other schools in the South.

The problem of finding teaching personnel has been solved to a great degree by selecting specially able underclassmen and graduate students. These men have proved quite conclusively that the training they received was of a high caliber by their excellent performance.

DAVID M. SMITH, Ph.D.	Professor

THIRD ROW: Prince, Gnann, Daniel, Suttles, Neisius, Chasen. . . . FOURTH ROW: Brown, Manning, Griffin, Fulton, Beale, York, Porter. . . . FIFTH ROW: Cook, Bushy.

Modern Languages DEPARTMENT

The Department of Modern Languages seeks first to give the student sufficient mastery of a foreign language to enable him to read and understand with reasonable facility the scientific and technical literature of that language. Further, it seeks to inform the student, through the medium of the foreign language, of the civilization and literature of the countries where that language is spoken.

In addition to conventional methods, the instruction of the department is supplemented by regular work in its sound room. This laboratory, with a collection of recordings and containing instruction tables equipped with headphones, enables the department to make available to its students the most recent oral-aural methods of foreign language instruction.

R. M. ERVIN

JAMES D. WRIGHT, A.B., M.A., Ph.D.	Associate Professor
ERNEST B. ELLIS, A.B., M.A.	Assistant Professor
HERMAN W. SCHULTZ, A.B., M.A.	Assistant Professor
GEORGE M. EVERHART, B.S.	Instructor

Physical Training

DEPARTMENT

Strength of body and mind are closely correlated. To condition the body of the student during the years of study the Department of Physical Training presents two years of courses leading to well-rounded muscular development.

The first year is spent in developing a sound physical condition. Included in the freshman work are swimming, gymnastics and track. During the second year the course is designed to maintain the condition developed in the first year and to teach skills in games and other events. Included in the sophomore training are indoor and outdoor games and combat.

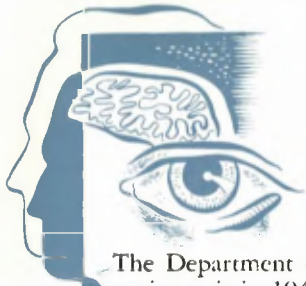

WILLIAM A. ALEXANDER, B.S.	Professor
Head of Department

W. A. ALEXANDER

Psychology DEPARTMENT

The Department of Psychology was established at Tech as service unit in 1945. The philosophy of the department has been to stress the importance of the human factor in all phases of engineering. An attempt has been made to make students sensitive to the whole man, his attitudes, his feelings, his fears, and his desire for recognition and security. The position has been taken that graduates of Georgia Tech are going to supervise employees and work with others.

The advancement and success of graduates will be due, in no small part, to how well they understand, direct, motivate, and manage other human beings. It is towards these major goals that the staff directs its efforts.

FIRST ROW, LEFT TO RIGHT: Moore, Janus. . . . SECOND ROW:
Glickman, Ward.

J. E. MOORE

JOSEPH ERNEST MOORE, Ph.D. Professor
Head of Department
ALBERT S. GLICKMAN, B.A., M.A. . . . Assistant Professor
SIDNEY Q. JANUS, B.S.S., M.A., Ph D. . . Assistant Professor
L. CHARLES WARD, A.B. Instructor

Public Health and Biology

DEPARTMENT

The Department of Public Health and Biology is a service department on the undergraduate level and a degree-granting department on the graduate level. Students who elect certain selected courses offered by this department may qualify as sanitarians with the health services.

In the courses offered by this department the biological rather than the physical aspects of organic chemistry are emphasized. The sanitary engineering option of the School of Civil Engineering requires many courses offered by this department. Students may upon completion of this course seek the degree of Master of Science in Public Health Engineering.

H. A. WYCKOFF

LEFT TO RIGHT: Brillhart, Miller, Wyckoff, Cannon.

HUGH A. WYCKOFF, M.S. Professor
Head of Department
HAROLD E. MILLER, M.S. Associate Professor
ALBERT E. CANNON, M.S. Assistant Professor
WILLIAM E. BRILLHART, M.A. Instructor

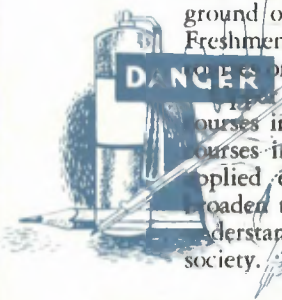

Social Science DEPARTMENT

Safety Engineering DEPARTMENT

The Department of Social Science serves the college as an integral part of its program of general education. To be a fully educated citizen, the engineer must have a broad background of general training in fields not specifically technical. Freshmen are required to take either a year of social science or a modern language.

Students may elect many valuable and interesting courses in the broad field of social science. Among these are courses in government, history, sociology, current affairs, and applied economics. The election of these courses tends to broaden the vision of the prospective engineer and to help him understand the far-reaching problems of our complex modern society.

The development of new industrial processes and materials is rapidly increasing the requirements of industry, business and government for engineers with an understanding of accident-prevention fundamental as well as highly-trained specialists in safety engineering.

To accomplish an awareness of the accident problems in the chosen field of each engineering student a course in industrial accident control, is offered to supplement the information gained through the inclusion of appropriate safety materials in the content of other courses. The engineer is thus equipped to weigh safety considerations with those of strength, efficiency and economy in problems of design, construction and operation.
