## INTRODUCTION

This report presents a summary of the results obtained in conjunction with the Continuous Evaluation of Corrugating Medium from April 1, 1958, to March 31, 1959, and is supplementary to a similar report dated October 1, 1958. The present report covers a period of twelve months. Each month has been designated a period number which is related to the progress report numbers as shown in Table I.

This study was three and one-half years' old on April 1, 1959. Data have been obtained for a period of 42 months, but because the results for the months of February, March and April (1957) were summarized in one progress report (corrugator was being repaired), only 40 periods are shown in Table II and Figure 1 in which the current F.K.I. averages are tabulated and plotted. In observance of the completion of three and one-half years, it would seem appropriate to review the results obtained to date. The following observations may be made about these results:

(1) Basis weight was 26.6 lb. for the first period; this was the lowest value noted to date. Highest basis weight observed during the entire 40 periods was 27.4 lb. Basis weight is currently maintaining a level of 27.3 lb. No long-term trends have been evident.

(2) Caliper exhibited its highest averages during the third and fourth periods when it was 10.7 points. Currently, caliper is 10.1 points. No long-range trend appears to be evident.

TABLE I

RELATIONSHIP OF PROGRESS REPORT NUMBERS TO PERIOD NUMBERS

Period	Progress Report Number	Date of Report	Month Reported
29	31	July 1, 1958	April, 1958
30	31	July 1, 1958	May, 1958
31	31	July 1, 1958	June, 1958

TABLE II--Continued

TABULATION OF CURRENT F.K.I. AVERAGES FOR PERIODS 1 THROUGH 40

Period		Basis Weight, lb.	Caliper, points	Concora Flat Crush, p.s.i.	Single-Face Flat Crush, p.s.i.
37	Dec., 1958	27.3	10.3	37.2	32.1
38	Jan., 1959	27.3	10.4	36.5	32.4
39	Feb., 1959	27.2	10.2	35.9	31.9
40	Mar., 1959	27.3	10.1	35.8	31.7

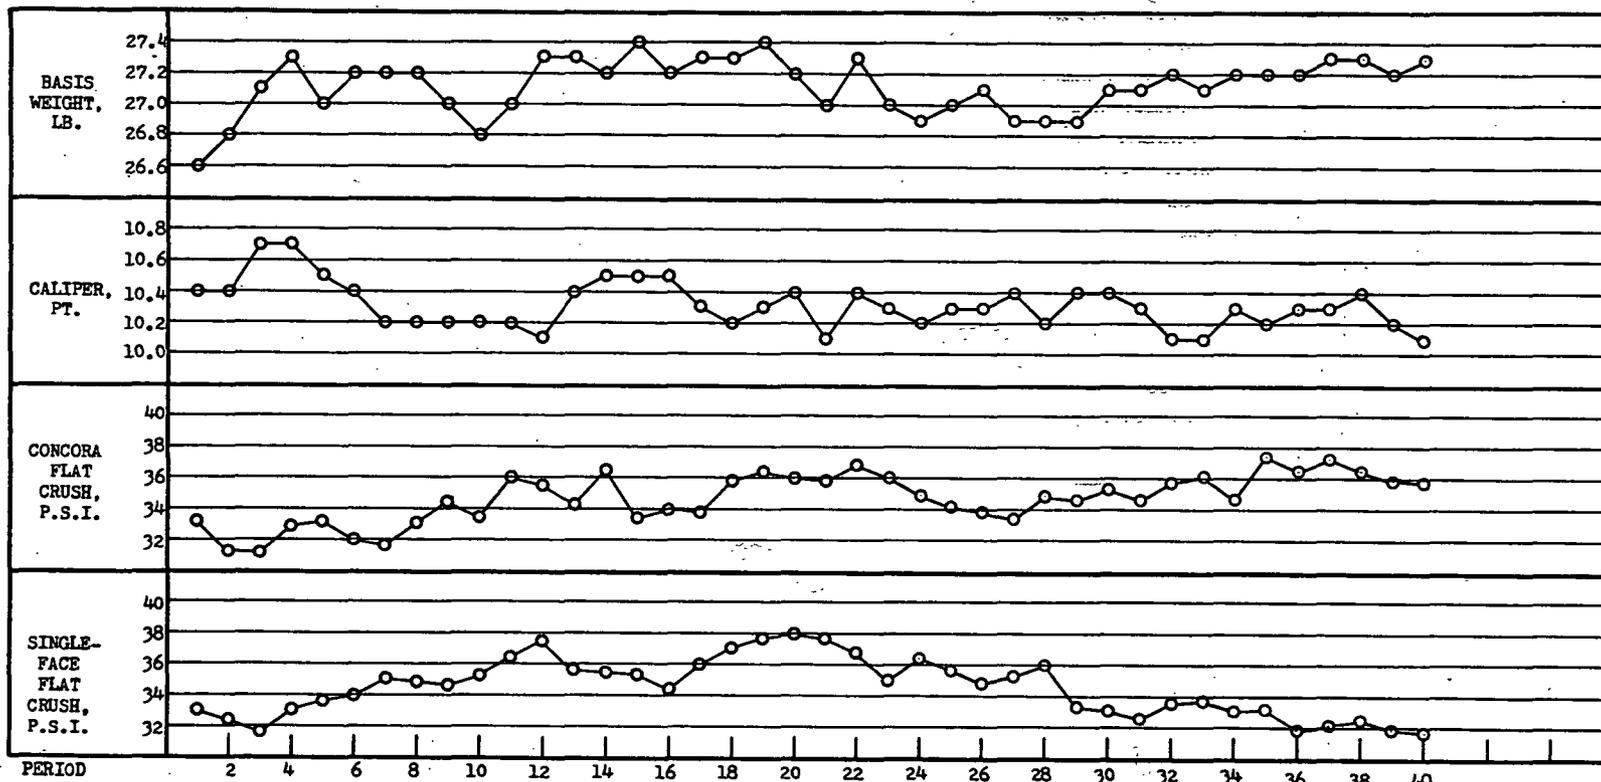

Figure 1

Comparison of Current F.K.I. Averages for Periods 1 Through 40

(3) Concora flat crush has exhibited no sustained trend but is maintaining a higher level today than at the start of the program.

(4) Single-face flat crush is difficult to interpret in view of the fact that a new Langston corrugator has been used since the 29th period. It may be seen in Figure 1 that since this time, the single-face flat crush level has been lower. This depression in values is believed to be related to the new corrugator and not to the quality of the corrugating medium.

These statements characterize the long-range trends and hence ignore some short-range trends. The latter trends often are more evident when the results for the twelve-month period are considered alone. The current F.K.I. averages for periods 29 through 40 are given in Table II and plotted in Figure 2 where the following may be noted:

(1) Basis weight has shown a slight upward trend from 26.9 lb. for the 29th period to 27.3 lb. for the 40th period.

(2) Caliper has varied from a high of 10.4 pt. to a low of 10.1 pt. with no sustained trend being evident.

(3) Concora flat crush exhibited averages which ranged from 34.6 to 37.4 p.s.i. There were indications of an upward trend.

(4) Single-face flat crush varied from a high of 33.8 p.s.i. to a low of 31.7 p.s.i. A downward trend was evident.

Shown in Table III for periods 29 through 40 is a tabulation of the number of rolls of corrugating medium submitted from each machine. It may be noted that the total number of rolls evaluated during each period varied from a minimum of 70 to a maximum of 121.

Note a. Participation in the program was initiated during the 37th period.

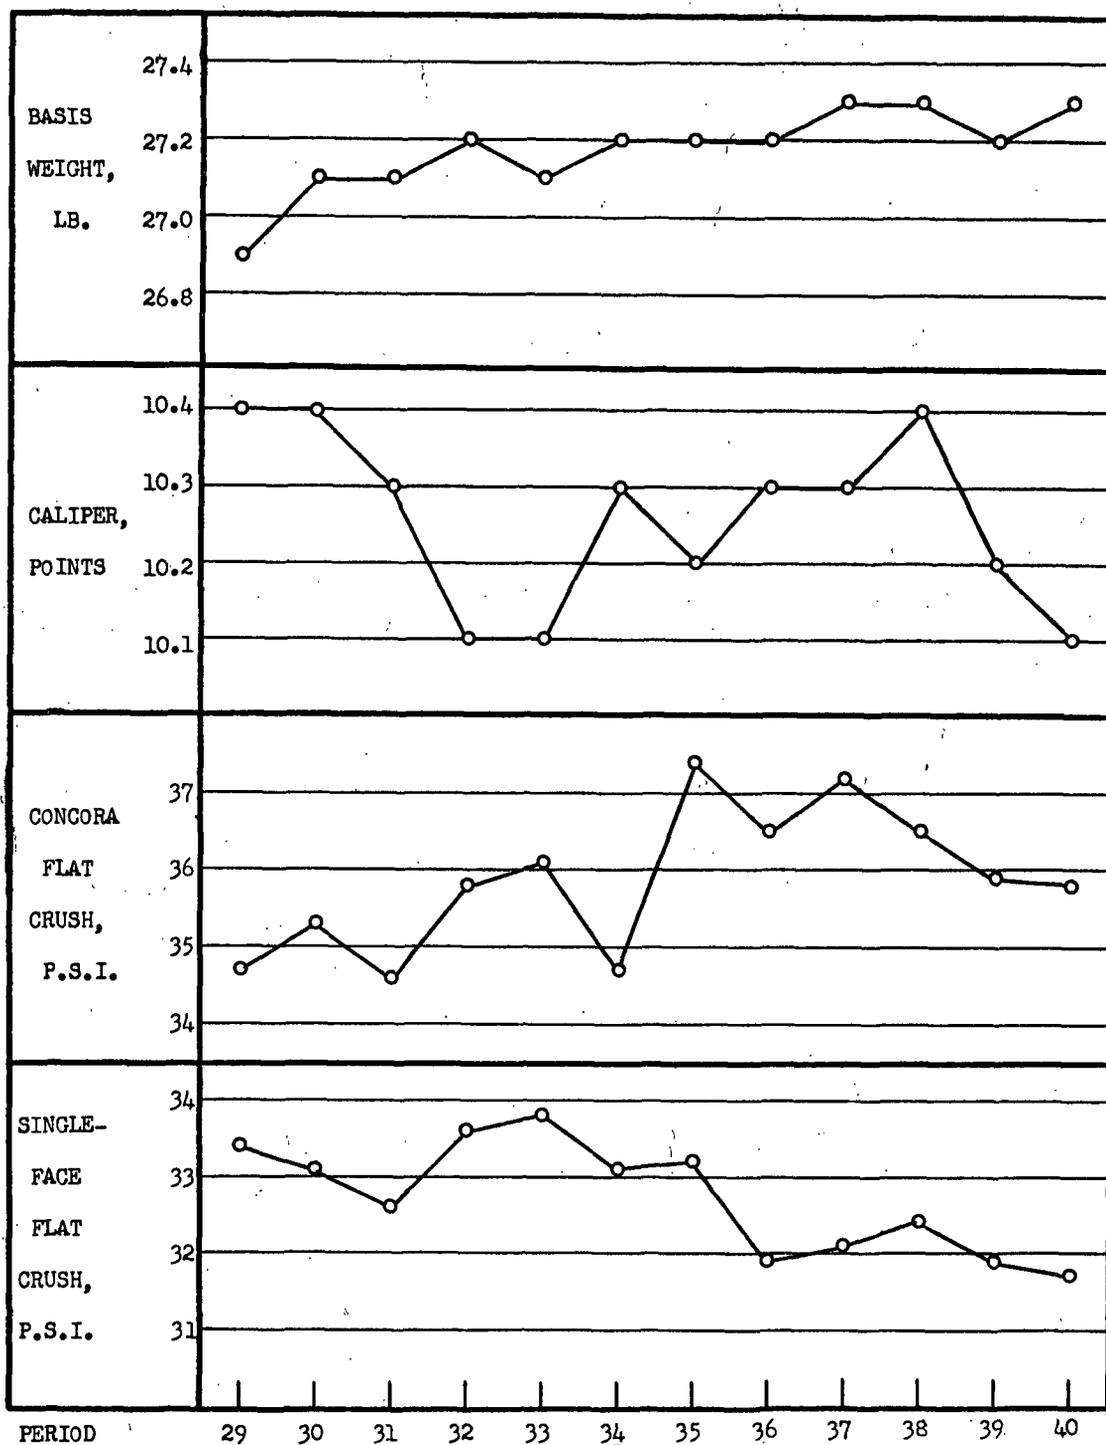

Figure 2  
 Comparison of Current F.K.I. Averages for Periods 29 Through 40

The results obtained for each machine during periods 29 through 40 have been compiled in tabular form and plotted. This involved the preparation of twenty-one tables and a corresponding number of graphs. Needless to say, discussion of the results for each machine in the usual formal way would probably be uninteresting as well as wasteful of space. Therefore, in order to present these results as concisely as possible, Table IV was prepared in which the following information is given for each machine:

1. Table number and page on which it is located.
2. Figure number and page on which it is located
3. Brief trend summaries for each test

In Table IV, therefore, it is possible at a glance to locate the page numbers on which are shown the tabular and graphic presentations of data for any given machine and, at the same time, to review the brief trend notations for each test. For example, in the case of Machine A, it may be noted in Table IV that the test results are given in Table V on page 14 and presented graphically in Figure 3 on page 25. In addition, the succinct trend notations reveal that basis weight has varied from 26.8 to 28.4 lb., that caliper has varied from 9.1 to 10.7 pt., that Concora flat crush has been uniform varying only from 32.5 to 37.5 p.s.i., and that single-face flat crush has been rather variable as reflected by a range of 28.6 to 35.1 p.s.i. Information like that just described for Machine A is available quickly and conveniently in Table IV for all twenty-one machines. Therefore, no further discussion of the results for individual machines will be given in this text. The reader is referred instead to Table IV.

TABULATION OF CURRENT AVERAGES BY PERIODS FOR MACHINE D

Period	Basis Weight, lb.	Caliper, points	Concora Flat Crush, p.s.i.	Single-Face Flat Crush, p.s.i.
29 Apr., 1958	26.7	10.6	35.3	34.0
30 May, 1958	26.4	11.0	33.7	32.3
31 June, 1958	26.2	10.4	35.1	32.5
32 July, 1958	26.6	10.3	33.8	33.1
33 Aug., 1958	26.6	10.6	38.0	35.5
34 Sept., 1958	26.4	10.8	33.7	33.3
35 Oct., 1958	26.4	10.4	38.4	34.0
36 Nov., 1958	27.5	10.4	37.8	33.4
37 Dec., 1958	26.1	9.8	37.0	31.8
38 Jan., 1959	26.3	10.2	34.7	32.3
39 Feb., 1959	26.8	9.7	34.0	30.7
40 Mar., 1959	26.8	9.5	35.2	31.9

TABLE IX

TABULATION OF CURRENT AVERAGES BY PERIODS FOR MACHINE E

Period	Basis Weight, lb.	Caliper, points	Concora Flat Crush, p.s.i.	Single-Face Flat Crush, p.s.i.
29 Apr., 1958	26.7	10.3	34.4	32.8
30 May, 1958	26.7	10.4	35.7	33.9
31 June, 1958	27.0	10.6	34.1	33.6
32 July, 1958	26.6	10.0	36.1	33.1
33 Aug., 1958	27.0	10.6	35.6	33.7
34 Sept., 1958	26.5	10.7	34.8	31.4
35 Oct., 1958	26.7	10.8	37.4	32.8
36 Nov., 1958	27.1	10.3	36.9	31.9
37 Dec., 1958	27.1	10.2	37.8	32.9
38 Jan., 1959	26.8	9.8	37.7	33.4
39 Feb., 1959	26.9	9.9	35.6	32.8
40 Mar., 1959	26.6	9.8	34.5	31.4

TABLE X

TABULATION OF CURRENT AVERAGES BY PERIODS FOR MACHINE F

Period	Basis Weight, lb.	Caliper, Points	Concora Flat Crush, p.s.i.	Single-Face Flat Crush, p.s.i.
29 Apr., 1958	26.8	9.3	32.8	32.0
30 May, 1958	27.7	9.3	32.9	31.0
31 June, 1958	26.9	8.9	30.8	30.2
32 July, 1958	No rolls submitted during this period.			
33 Aug., 1958	27.7	9.3	33.2	30.9
34 Sept., 1958	27.5	9.2	33.0	32.5
35 Oct., 1958	28.3	9.5	41.2	34.6
36 Nov., 1958	27.5	9.3	37.6	29.3
37 Dec., 1958	No rolls submitted during this period.			
38 Jan., 1959	28.3	9.8	36.0	30.7
39 Feb., 1959	27.4	9.2	36.8	31.0
40 Mar., 1959	28.0	10.1	34.9	25.1

TABLE XI

TABULATION OF CURRENT AVERAGES BY PERIODS FOR MACHINE G

Period	Basis Weight, lb.	Caliper, points	Concora Flat Crush, p.s.i.	Single-Face Flat Crush, p.s.i.
29 Apr., 1958	25.7	9.5	35.3	33.2
30 May, 1958	26.9	10.0	35.6	33.8
31 June, 1958	26.0	9.5	34.1	32.8
32 July, 1958	26.7	9.7	34.5	33.2
