TECH MEETS V. M. I. CADETS IN OPENER

Tech Exhibit At Fair Attracts Thousands

FLOOR SPACE INCREASED Departments Co-operate in Making Annual Event a Success

Housed in the Liberal Arts Building, Georgia Tech's exhibit at the Southeastern Fair attracted attention from all fair goers. The exhibit, considered the most complete and attractive in years, was the result of the efforts of Professor King, chairman of the committee; Professor Bush-Brown, of the Architecture department; Professor George M. Sparks, of the Commerce department, and the co-operation of every department.

Crowds milled their way through the exhibit, and looked with amazement at the many scientific achievements displayed. The display this year occupied more floor space than in former years.

The Commerce department acted as an information bureau for the entire public and all other departments contributed student work for exhibit.

Method of Nominating Student Council to be Put to Vote

Students Urged to Co-operate

At the meetings of the four classes of students to be held each week starting with the Sophomore Class meeting on Tuesday, October 9, a vote will be taken to determine whether the Student Council will continue to exist as at the present time or to be placed on a different basis of election.

The Student Council since its existence has nominated students for membership and the students have in turn been voted on by the entire student body. The students receiving the majority votes being placed on the council.

A different plan was brought up during the latter part of the past school year whereby the Council would be nominated and elected by the student body.

To determine the wants of the students these plans will be voted on by the four classes and therefore every student is urged to attend his class meeting.

Y. M. C. A. Straw Ballot to be Held on October 18

In keeping with the thoughts and activities of the present season, the Georgia Tech Y. M. C. A. will sponsor a Presidential Straw Ballot as announced in a recent issue of The Technique, to determine the choice of the students for the presidency. The date for the balloting is set for October 18 and the results will be announced as polled, during the day. Ballots will be placed in conspicuous places about the campus and students are urged to use judgment in casting their vote.

Such a program of straw balloting will increase a local interest together with a knowledge of our government and its functions.

VERY IMPORTANT

There will be a meeting of the Sophomore Class in the Y. M. C. A. Chapel at 11 A. M. Tuesday, October 9. This meeting is important because officers for this class will be elected and a vote on the method of electing the Student Council taken.

ED. HAMM ELECTED PRESIDENT OF STUDENT COUNCIL

Dean Skiles Gains Place in Who's Who in America

Tech has three Representatives

Dean W. V. Skiles is now represented in "Who's Who in America," as the 1928-29 edition reveals. With Dean Skiles represented in this annual volume of the foremost men in the country, Georgia Tech now has three representations. Dr. M. L. Brittain, president of the school, and Prof. George M. Sparks having been included for several years past.

"Who's Who in America" aims to give brief, crisp, personal sketches of the most notable living Americans in all parts of the world—the men and women whose position or achievements make them of general interest.

The outstanding men and women of the country are selected by the Who's Who organization and then important facts are obtained which are of general interest. This method of selection makes it a great honor to be selected for representation.

Evening School Expects Record Enrollment

Five Professors Added

Five new teachers, assembled from four of the largest universities in the country, have been employed by the new director, George M. Sparks, to teach more than fifty courses offered in the Georgia Tech Evening School of Commerce.

Additional teachers for the anticipated large enrollment is the result of having just closed a summer session enrollment twice as large as any previous summer session. The school is offering a full schedule in marketing, salesmanship, advertising, accounting, and business law for the session opening this fall.

Established in 1914, the evening school first began with only a few courses in accounting. The school soon grew until it became the parent of the day school of commerce on the Georgia Tech campus.

Courses for men and women are now offered in accounting, advertising, banking, business law, business English, business psychology, college English, credits and collections, economics, finance and investments, insurance and real estate, journalism, merchandising, marketing, retailing, salesmanship, Spanish, and business mathematics.

Blue Print Pictures to be Taken in Y Next Week

The photographer from White Studio arrived on the campus Thursday, October 4, and has set up his camera in the Y. M. C. A. lobby, ready to take pictures of Seniors and Fraternity men.

We are fortunate in having the photographer here this early in the year. Heretofore, his arrival later on has delayed the work of the staff and contributed greatly to the late delivery of the annual. This year's staff pleads and begs Seniors and Fraternity men to appear at the "Y" early to have their photo snapped. The tremendous amount of detail work connected with handling and (Continued on Page 8)

Meeting of Sophomore Class Called For Tuesday

Woodruff Appointed Business Manager of Technique

Edward B. Hamm, holder of the world's record and Olympic broad jump champion, was elected president of the Georgia Tech Student Council at a meeting of that body on Tuesday, October 3. At the same time, the following officers were named: Frank Waddey, vice-president; Ward Grantham, secretary; and Wadley Glenn, treasurer.

H. S. Woodruff, a senior in the chemistry department, was accepted as the business manager of The Technique to replace Hubert Leslie who was elected last term but who is not in school at the present.

The 1928-29 Student Council is composed of the following men: Seniors, "Buster" Harris, Wadley Glenn, Frank Waddey, Ed Hamm, Frank Player, with Ware Fitzgerald as alternate; Juniors, Ward Grantham, Warner Mizell, Hobby Law, Charles Witmer and "Dutch" Faisst as alternate; Sophomores, Earl Dunlap and Tom Jones with Ed Herron as alternate. Ex-officio members are Peter Pund, president of the "Y," Joe High Williams, president of the inter-fraternity council, and Burton Cloud, editor of The Technique. The Co-ops have been given representation on the council and they have elected two men to serve on alternate months. S. R. Parry and Earle Hilburn are their representatives.

The schedule for the various elections was set by the action of the council. The meetings will be held by the Sophomore Class on Tuesday, October 9; the Junior Class on Tuesday, October 16; the Senior Class on Tuesday, October 23; and the Freshman Class on Tuesday, October 30.

These meetings will be held in the "Y" Chapel at 11 o'clock a. m. There is a two-fold purpose for the meetings: the election of class officers and the voting on the question of the nomination of the members of the Student Council. It is very important that the members of the various classes be present in order that their vote may be cast. In the spring of last year, a petition was circulated for signature by a member of the out-going Senior Class which asked (Continued from Page 3)

Enrollment of 2105 Announced on the First of October

Total Number to Date

The yearly enrollment at the Georgia School of Technology has proven for many years that this institution is "a technical school with a national reputation." Again great numbers have answered the call of a school of Mechanical, Electrical, Civil, Textile and Ceramic Engineering, Engineering Chemistry, Architecture, Commerce, General Science and Industrial Education.

Below is listed the enrollment according to classes and departments, as of October 1, 1928, for day school only. Complete enrollment will be announced at a later date.

Freshman	733
Sophomore	551
Pre-Junior (Co-op.)	112
Junior	356
Senior	301
Specials	52
Total	2105
Enrollment by departments:	
Architecture	141
Ceramics	45
Engineering Chemistry	51
Commerce	379
Civil Engineering	217
Electrical Engineering	270
Mechanical Engineering	128
Textile Engineering	115
General Science	59
Engineering (unclassified)	690
Total	2105

Pi Delta Epsilon Convention to be Held at Tech

Date Set as Dec. 6-8

Great enthusiasm has been aroused on the campus over the forthcoming event of the national convention to be held at Tech from December 6-8 inclusive. This is considered a distinguished honor in college literary circles, and much praise is due to the faithful followers of Tech publications. Our delegates have worked hard to get the convention and we men of Tech should insure them a success in this adventure.

There are forty chapters in the (Continued on Page 8)

Captain Barnes Leads Flying Squadron Into Atlanta

CLOSE BATTLE PREDICTED

V. M. I. Eleven Shows Improvement Over Last Year's Team

Everything is set for the first whistle of the year in the 1928 football season of Georgia Tech. The Yellow Jackets are in prime condition for tomorrow's conference game and V. M. I. arrived into town yesterday well prepared for the initial contest.

There will probably be nothing but straight football coming from either team. It is customary to open the season with nothing but line-work, if possible, and the Tech boys will be in a position to do it admirably. Off tackle smashes, with Stumpy Thomas and Randolph doing most of the crashing through should predominate in the Golden Tornado offensive.

That doesn't mean that there will be no open field work at all. A well-run team must have some diversification of attack. Just what it will be from a Tech standpoint, has not been indicated by early workouts. They've got speed in the legs of Durant, speed as well as a driving power that hits the line with his feet still churning the ground hard and furious, the kind of a man that is hard to stop.

Defensively, the team is a mountain of strength. Averaging slightly over 178 pounds, schooled in line-work for over a month, they are in fine condition, and should show it. The two tackles, Speer and Watkins, weigh 196 and 182 respectively Coach Alexander has finally revealed. They are experienced linesmen, hard fighters (Continued on Page 9)

Techwood Drive Paved From North Ave. to Cain Street

Will Greatly Relieve Football Traffic

The paving of the southern end of Techwood Drive is nearing completion. This will be a 40-foot boulevard from North Avenue into the heart of the city and will afford a quick route to and from town at all times as well as a greatly relieved traffic congestion after games.

When the northern end of Techwood Drive is opened up it will probably lead to a viaduct across the Southern Railroad tracks at Brookwood. It will then become an important artery to the north side and will be the "Main Street" of the Tech campus.

And some interesting facts about this paving job. The street was laid out by the city engineers and the paving was done by the county at a cost totaling about \$50,000. It contains 24,267 square yards of Vitrolithic concrete pavement, being 40 feet wide and slightly over a mile long. The concrete was hauled from the Bellwood central mixer. Vitrolithic pavement is noted for its durability and it is expected that this will be giving good service for the next twenty-five to fifty years.

A number of Tech's friends and the co-operation of the city and the county are responsible for the paving of Techwood Drive at this time. It will be of great benefit to Tech and we are very grateful to those responsible.

NOTICE

There will be an important meeting of Pi Delta Epsilon at 4 o'clock, Wednesday, October 10, in the "Y" Cabinet room.

Tech Student Communicates With

JOHN HILLEGAS IS NOTED AMATEUR * *

Five Continents on Home-Made Set

Devotees of the vacuum tube, and others who merely listen in, would find it vastly interesting to get John Hillegas into a conversation. Mr. Hillegas, who is a radio fiend of the highest order, is also a junior co-op in the Electrical Engineering department. This lad came a long way to go to Dr. Brittain's School for Boys, as his home is in Santiago, Chile, where his parents are at present.

It is said that distance makes the heart grow fonder, but it is simply awful on correspondence. Imagine being broke and writing home to Chile for financial assistance, and then imagine getting it. No, our powers simply cannot reach such heights. Such a state of affairs confronted John, but being a man of action he set out to solve this knotty problem. This he did by constructing a short wave transmitter. Using a 50-watt tube, (Continued on Page 9)

he put together an excellent C. W. set a la Hartley.

A friend living in Santiago, who was also a radio hound, operated a short wave C. W. under the call letters 3AG. It was a simple matter to inaugurate a schedule whereby 4TU, which was Hillegas' call letters, would on every Thursday at five p. m. ring up 3AG in Chile. John's dad would be over at 3AG at that time and all the latest news could be swapped, loans requested and refused, and other data of importance. The station in Santiago was far enough the other side of the Tropical Zone so that the heat disturbances were negligible. One peculiarity was noticed and that was that using twenty meter waves, the signals would fade out at seven o'clock. Mr. Hillegas has not yet been able to assign any (Continued on Page 9)

RUSHING RULES

Editors note—

Noting the unusually large amount of rushing of the Freshmen during the past two weeks, The Technique wishes to call attention to the rules pertaining to this subject. If these rules are to enjoy success they must have support and co-operation from every man on the campus. It is unfair to the fraternities who adhere to these rules, to have them broken by a few chapters that think of little else than getting their men.

All freshmen should familiarize themselves with the rushing rules of the Georgia Tech Inter-Fraternity Council. These rules govern the subject of pledging men to the various fraternities established at Georgia Tech and are therefore important to the Freshmen, who will be governed accordingly.

ART. I—PLEDGING

Sec. 1. No man on his original matriculation shall enter Georgia Tech pledged to any fraternity. Any man entering Georgia Tech having been pledged to any chapter of a fraternity represented by a chapter on the Georgia Tech Campus shall have his pledge automatically broken upon matriculation.

Sec. 2. Any man pledged to a fraternity shall be eligible for initiation under the rules of Georgia Tech and of the Council.

ART. II—RUSHING

Sec. 1. (a) There shall be no rushing for the newly matriculated students until 12 noon of the first Sunday following the period for which the first school report is issued.

(b) Until the appointed time for rushing arrives fraternity men, both actives and alumni, are on their honor:

1. Not to talk fraternity matters with the new men under any circumstances.

2. Not to entertain the new

men at the theater, at meals, or at any other place off the campus, or to accompany them on dates or to dances off the campus.

3. Not to entertain the new men at the fraternity houses under any circumstances.

4. Not to visit new men in their rooms except on business connected with a recognized school activity.

(c) During the week preceding the regular rush week, a maximum of three engagements may be made with any new man for the week of rushing. One engagement shall be included only one meal.

Sec. 2. (a) Rushing shall take place, starting at noon on the first Sunday following the period which the first school report covers and ending at 2 P. M. on the following Saturday.

(b) No evening date shall last longer than 10 P. M. except on Friday night, when dates may last until mid-night.

(c) From 2 P. M. on Saturday of rush week until the following Sunday noon shall constitute a quiet period, during which no active or alumnus member of a fraternity shall be in the company of or shall enter into conversation with any rushee.

(d) At noon of the Sunday following the rushweek, each man who has received a bid will go to the house of his choice, alone or in the company of other new men. No fraternity shall send any person or vehicle for a rushee until after 3 P. M.

(e) No rushee shall wear or have in his possession the pladge button of any fraternity until after he has gone to the house of his choice on the appointed Sunday.

Sec. 3. No prospective Georgia Tech student shall stay over night in a Georgia Tech chapter house.

Sec. 4. Any student of the Georgia Tech Evening School is eligible for membership in a fraternity upon the completion of the first term of his second year.

Sec. 5. Students who enter Georgia Tech at any time other than at the beginning of the fall term must matriculate before being eligible for rushing or pledging.

SEND THE BAND TO NEW ORLEANS

Tomorrow we will see our band attired in new and colorful uniforms that will give credit to the institution which they represent. This is the first time as far back as the writer can remember, that the band has had a suitable uniform.

The next game scheduled after the V. M. I. contest is with Tulane in New Orleans. Why not send those white and gold clad music makers blasting forth down Canal Street. Then to the field to play the "Rambling Reck" and the other tunes that spur the Yellow Jackets on to victory. It would only serve as a greater impetus to the team but form an impression that would undoubtedly prove of benefit to the school.

The band is going to the North Carolina game but let's send them to New Orleans.

THE 70% RULE

Quoting from the rule book of the Georgia School of Technology, under the heading REGULATIONS CONCERNING DEGREES, subhead f., "Beginning with the class graduating in June, 1929, a student, to be eligible for graduating, must have grades of 70 or higher in at least 40 per cent of the subjects counted for the degree."

This rule was put into effect during the past school year and effects the present senior class. It is a splendid rule and has for its purpose the raising of the scholastic grades of the school. No degree will be granted to the old time 60 percenters. No more can the diploma pursuer ride

through four years with a mere pass and acquire the same reward that the student who has maintained a higher average for his work.

But it has caused much dissension among the student body, especially among those who hope to take a part in commencement exercises next June. This discordance among the students, who were on the rolls before the rule was passed, is absolutely right. They entered unaware that such a regulation would be run into the requirements of the school and in many instances have maintained an average below the 70% standard. As a result the rule is interpreted to mean that no degree will be granted if such is the case.

We again say that it is a rule with a good purpose but is it just to the students who had started on their Junior year, before it was put into effect.

VOTE FOR THE STUDENT COUNCIL

At your class meeting you will have the opportunity of voting to determine the manner in which the Student Council will function as to the election of its members. Since the Council was first organized it has nominated students from each class and the election of these men has been turned over to the student body. In this manner the Council has operated and done much good in the supervision of student activities.

Another plan was brought up during the latter part of the past school year by a member of the student body. This plan was to have the student body nominate members for the Student Council and then vote on these nominations.

The Constitution of the Student Council states, "In organizing the Student Council the Anak Society shall constitute the original nominating committee. Thereafter, nomination shall be made by the Council. For each of the eleven places filled by election from the several classes the names of two students must be placed in nomination. These students must be selected for nomination and election on the basis of their character, intelligence, school spirit, and capacity for leadership."

"The Student Council aims to represent the whole student body in matters affecting student interest; to afford a suitable and convenient medium of communication between the students and the school authorities; and, in general, to create and preserve excellent customs and traditions in the school."

To determine which manner of election the student body wants there will be a vote taken at each class meeting. In casting your vote you are urged to consider both plans, give them thought, look at what the Student Council has done for Georgia Tech under its present system of operation and then decide as to whether you think it desirable for this plan to be changed.

THE TECH EXHIBIT

The Georgia Tech exhibit at the Southeastern Fair was one that we could look upon with pride. The men responsible for this splendid display are to be congratulated on their thorough work and untiring efforts in making it possible.

The committee, composed of Professor King, chairman, and Professors Sparks and Bush-Brown succeeded in bringing before the public an excellent demonstration of the many opportunities offered in the courses at Georgia Tech. This exhibit not only served as an advertisement but brought added goodwill to the school from all parts of the state by people who were attracted to the Southeastern Fair.

Students desiring The Technique mailed to an address are urged to sign up for the paper at the Y. M. C. A. desk, giving complete name and address of recipient.

FORTY-ONE YEARS OF ACTIVE EDUCATIONAL SERVICE

On November 24, 1882, the General Assembly passed a resolution introduced by Honorable N. E. Harris to consider the establishment of a technical school. In 1885 the law was passed appropriating \$65,000 for the institution and on October 20, 1886, Atlanta was chosen as the location. Professor Higgins, of the Worcester Institute, was secured to supervise the new work, and on October 7, 1888, the installation ceremonies were held at the Opera House in Atlanta. Thus was the birth of Georgia Tech.

The seventh day of this month will mark forty-one years since these installation ceremonies were held and the Georgia School of Technology was officially started. We have only to look about us to see the progress that has been made, but to see ourselves as others see us, we are reprinting an article that appeared during the summer months in an issue of the Macon Telegraph, under the head of "Tech's Expansion":

"In behalf of the institution of which he is the head, Dr. M. L. Brittain has reason to feel proud, for the Georgia School of Technology, of the accomplishments attained. Not only in its recent graduation of a class of 301 young men whom it has fitted to go forth into the world so many constructive human forces, but in the magnificent additions to the property and plant which are to better enable it to do an even great work in the future.

"There are others of Georgia's educational institutions which have forged forward in programs of betterment and expansion and enlargement, but in a sense 'Tech' is a producer of a different form of educated young manhood; it supplies a different channel of the demands and necessities of our material and commercial life.

"No institution in Georgia has accomplished, in five years, quite what Georgia Tech has, where the property and plant investment has been added to through loyalty to and energy of the institution, its graduates and its connections at the rate of \$10 for every \$1 the State of Georgia has given it for new buildings and equipment. In this respect the annual report just made by President Brittain reflects one of the most encouraging and hopeful pictures of Georgia's future.

"But, looking back to the legislative days of 1883-85, how well justified in their judgment would 10 Georgians feel, if they were all living today, just to read the story of Georgia Tech of 1928. N. E. Harris, chairman; W. A. Little, Martin V. Calvin, W. A. Wilson, R. F. Watts, F. P. Rice, Richard B. Russell, and later by addition E. H. Beck, Tom Eason and W. N. Spence. Those gentlemen composed the special commission appointed by the Speaker of the House of Representatives in 1883, under a resolution introduced by N. E. Harris, to 'consider the propriety and expedien-

cy of establishing in this state School of Technology.' In the face of vicissitudes, institutional jealousies the time, which later dissipated; spite the handicap of a stubborn legislative opposition headed by Judge H. H. Webster, aided by Representative Usury and others, Chairman Harris and the comparatively few statesmen who were associated with him in the effort at the outset, succeeded in inducing the Georgia General Assembly to agree with the special commission's report that there should be such a school — and the Legislature appropriated \$65,000 for the establishment of said school. When that appropriation finally was made available, Governor McDaniels in January, 1886, appointed a commission composed of N. E. Harris, Bibb; S. M. Inman, of Fulton; O. Parker, of Newton; E. R. Hodges, of Clarke, and Columbus Heard, Greene, and this commission located and founded the Georgia School of Technology for the state.

"The first plant of the institution was completed by the commission, and turned over to the trustees on October 7, 1888. In the course of his address, at the opening exercises of 1888, former Governor Harris, of Tech, the author of the bill in the General Assembly under which it was created, used these expressions in something of an announcement of the completion of the first stage of that great work:

"Georgia began the agitation of this school years ago. The school took shape in the universal demand of the press in 1882, headed by the Macon Telegraph. * * * It is the work of the laborer, the workshop of mechanic, the college of the engineer, the university of the poor. * * * work is done, and with our hands outstretched in blessing and prayer we commit the child to the keeping of that great people into whose faith and affection it must now struggle to make its way."

"How well Tech has won that affection, how high it has established itself in the favor of that great people it is well bespoken in the story of its 1928 accomplishments. For years ago, the period of the school's birthday, the Georgia School of Technology and its creators could hardly have entertained more than a remote hope that in the intervening span of years it would have graduated a class of 301 finished young men, prepared to go into the world and enter professional and industrial pursuits to which this institution has in years contributed so largely and successfully. Certainly in those years it was not dreamed that love of institution 35 years later would have enabled it to add actual investment of the property in a five-year period of million dollars, with only one-tenth of that investment coming from the coffers of the state treasury."

WITH OTHER COLLEGES

It is reported that the Floating University was almost wrecked in the Sea of Matrimony on its lately completed cruise. It seems that some regions between the poles are still uncharted.

The Freshmen of Presbyterian College, South Carolina were laid down the following ultimatum:

We, the members of the Sophomore class, in carrying out our duty, require you to abide by the following rules during the fall session:

1. Wear a rat cap at all times.
2. Be prepared to furnish upper classmen with matches upon request.
3. In going to town parade down the

(Continued on Page 9)

TECH STUDENTS INVADE FAIR AND GAPE AT MANY WONDERS

According to the present ballyhoo, this year's Southeastern Fair contains finer hogs, larger bulls, bigger and better shows, more exhibits, classier automobiles, and more handsome women than has ever been equalled in this region before. That is, at least, since last year's Southeastern fair at the regular fairgrounds. What the publicity agents have failed to announce is that the cider is weaker than ever before in history, that the fare has gone up five-sixths of a cent by ticket or three cents by cash since last year, that the school as well as other exhibits are the same as for the past ten years, and that the Tech freshmen are as dumb and as often as those of the past have done.

It is, however, an actual fact that to anyone who has not seen this annual affair, the exhibits as well as the midway shows are a revelation. To one who has gone before, it is a pleasure to return to the greyhound, the whip, the old mill and, of course, the barker's show for old times' sake.

Among other things that it is absolutely necessary to see is the magnificent display of the Georgia School of Technology. This display contains exhibits of all work done in all departments and, through it, it is really easier to see what Tech is doing than at the institution itself. Prize-taking architectural masterpieces are exhibited along with chippendale-like woodwork done by students. The textile department shows the how and why of the South's coming industry. Civil engineers demonstrate among other things the construction of roadbeds. Interesting to all, the naval exhibit shows clearly a part of what

Tech sailors learn on land before putting out to sea. Then there is the display of the latest Chicago test and approved machine guns with other large and small weapons. As their part in making the Fair and all-around success, commerce students are acting as an information bureau for the public as a whole and Tech freshmen and new-comers in particular.

With but one day more of this gala event remaining, general advice to all is to buy that box of candy or shawl to start off with rather than try to beat the showman at his game, to get several samples of some brand of coffee rather than pay a nickel or dime for a cup at the hot dog stand, to be sure and sign up for a Coca-Cola calendar, and to remember that there is a barbed wire fence around the entire grounds. Above all, don't buy that bag or bushel of Habersham or Hall county apples until Saturday night when the prices are down.

OXFORD OBSERVES THREE TERMS

Oxford University observes three terms. College opens some time in October for a period of eight weeks. Then there is a vacation of something like six weeks for Christmas. Another eight weeks of school, and a six weeks vacation in honor of Easter and spring and "Lilac Time." Then comes a final term of eight weeks and a summer vacation three months. Little stress is placed upon lectures; the far-famed "tutorial" system is in vogue, and grading is almost entirely on examinations coming at the end of two or three years of work. With this system these people should be able to conserve the energy of their star athletes.

GEORGIAN TERRACE BARBER SHOP

Tech Men's Choice

"It pays to look well"

Many Honorary Frats Reward Outstanding Work at Tech

Established at Georgia Tech are a number of honorary fraternities that have for their purpose the rewarding of students who achieve distinction in as many lines of campus endeavor. Every man at Tech should make it his ambition to complete the necessary requirements for membership in the honorary fraternities.

Phi Kappa Phi is the highest scholastic honor than any man can receive at Georgia Tech. To be eligible for membership in this fraternity one will have to attain an average of 80 or above for three and one-half years.

Another honorary fraternity of high scholastic standing is the Tau Beta Pi. It is quite an achievement to make it as only the highest one-eighth of the Junior Class and the highest one-fourth of the Senior Class are eligible.

The highest honor conferrable on a textile student is to be elected to the Phi Psi fraternity. It is the object of this fraternity to promote a closer feeling between textile students. Only Juniors and Seniors of the textile department are eligible.

Membership in Beta Gamma Sigma, the Delta Sigma Pi or the Alpha Kappa Psi is the coveted honor of the commerce men. The purpose of these fraternities is to give prominence to the most deserving and to foster keener interest in modern commercial problems. A medal is awarded every year by the Alpha Kappa Psi to the student who is rated the best all-around man in the graduating class of the commerce department.

The ambition of all men who work on a campus publication is to be rewarded with election to the Pi Delta Epsilon. This is an honorary collegiate national journalistic fraternity and its purpose is to foster collegiate journalism. Men who have worked constantly for two years or

One Thousand Dollar Prize Offered for Student Essay

Mrs. James W. Gerard, wife of the former Ambassador to Germany, has offered two prizes of \$1,000 each for the best essay written by college students or graduates of not more than two years standing on the subject: "Why Alfred E. Smith Should Be Elected President of the United States." One prize is for women and the other for men. The contest will close on October 20th.

The New York World, Buffalo Times, Trenton Times, Raleigh News Observer, Richmond Times Leader, Arkansas Gazette, Gainesville, Fla. Sun; Columbia, S. C. Record; Nashville Tennessean, Lexington Herald, Nevada State Journal, Atlanta Journal and Providence News are co-operating with the College League in conducting the contest.

Essays may be sent to these newspapers or to the New York committee at 1775 Broadway, New York City; the Central Regional Committee at the Hotel Jefferson, St. Louis, Mo.; or the New England Committee at the Hotel Statler, Boston, Mass. Each of the various committees will pick the two best essays written by men and the two written by women that are submitted to it. Only these sectional selections will qualify for the money prizes.

The essays are to be limited to 500 words and will be judged on strength of argument, form of composition and excellence in English. They must be typed, or written, on one side of the paper. The name of the author, with college and class must be enclosed.

more on a campus publication are eligible.

A chapter of the Alpha Delta Sigma has been installed to encourage the work of advertising. Only commerce Juniors and Seniors who are majoring in advertising are eligible for membership.

SIZING UP THE SITUATION By Morgan Blake

The politician stopped a man upon the thoroughfare

"You seem to be far seeing, my friend, I judge by your air, Much depth of thought—alert and keen—a prophet in the nation—Pray tell me your reaction to the present situation?"

The man addressed smiled broadly, his enthusiasm keen,
"The situation is," he said, "the best I've ever seen.

We've got at least four backfields, all wizards with the ball.

I could not say to save my life which one would get the call.

To pick the best four of the lot, 'twould cause a furrowed brow,
And as for that old Jacket line, it surely is a wow!"

The politician seemed surprised, a frown came to his face—

"No, no," he said, "I asked about the presidential race."

The Tech fan laughed out loud and said, "I really have no data

Upon that point, I have no time for such a minor matter."

Dean Fields, at times, seems strong and stern,

But he has his weaker side;
He secretly called it Nellie,

And she was his joy and pride.

Now Nellie was an ancient Ford,
An ancient Ford was she.

The Dean bought her back in '98
To keep him company.

This man knew every tap and bolt—
Every nut and gear and screw.

How far would she run on a pint of gas?

Yes, he knew about that too.

What it cost I just don't know,
The Dean, himself, can't tell;

But in cash he'd not take millions
For the years she ran so well.

The Dean would look into her works
To see what made her last,

And cranking up, be on his way
While other cars sped past.

But this is the age of speed
With any sort of load,

So the Dean bought a nice new car
And now he rules the road.

Dean Fields, you know, is Dean of Men,

And must be up to date,

So he left the pal of his cradle days
To a most uncalled for fate.

Nellie's now in strange unfriendly hands

She'll miss the old school bell—
Ask her forgiveness, Oh faithless man

Cause you ain't done right by Nell.

The New Ford waits outside the school

Until the Dean appears,
And off they go in a burst of speed

With a meshing of the gears.

L'envoi

I'm not so wise as the lawyer guys
But strictly between us two,

I'd like to see the old Ford back
And I think the Dean would too.

—R. G. D.

HAMM ELECTED PRESIDENT OF STUDENT COUNCIL

(Continued from Page 1)

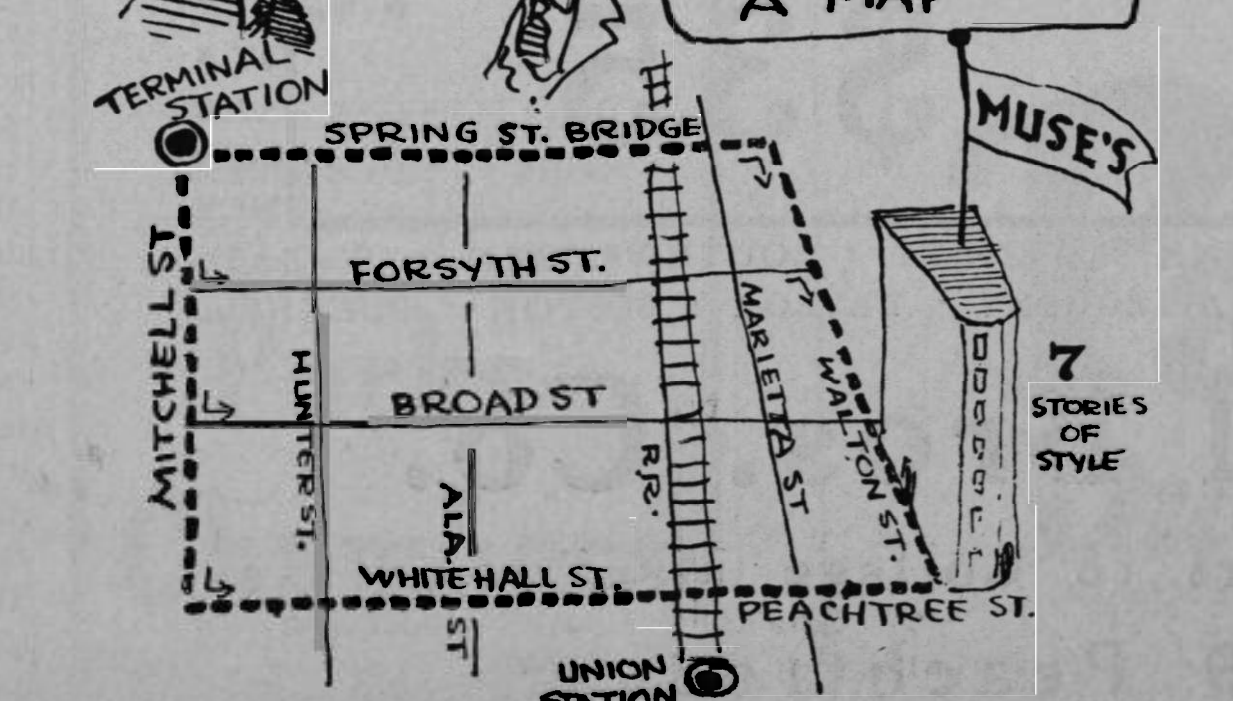

that the members for succeeding councils be nominated by the different classes in open class meeting. The gist of the argument being that the present system of the members of the out-going council nominating their successors served to make the council self-perpetuating. The petition received the required number of signers and was duly presented to the faculty who passed it. However, they have seen fit to return this matter to the student council with the power to act and to find the opinion of the student body on the matter.

The present system seems to be the most logical and practical. There are always old members on the council and they act as a check on the inexperience of the new men. Such a principle of government is age-old. Open nominations in class meetings are no gauge of a man's ability nor of his capability.

This is the matter that is to be voted upon at the meetings of the different classes and it is of vital importance than every man attend his class meeting and vote on this measure.

TECH TO BE HOST TO S. I. C. CROSS COUNTRY MEET

Tarheels Doped to Repeat 1927 Victory

Tech Squad Promising

On November 24th all of the South's best cross-country teams will meet here in Atlanta for the annual S. I. C. Meet. The South's leading schools will be represented and it is a regular Chinese puzzle to even try to predict who the winner will be.

For the past two years North Carolina has twice carried the highest honors, winning the meet by comparatively easy victories. North Carolina again bids fair to lead in the melee, but there are also many other promising teams.

Tech, as usual, will have a good cross-country team on the road, and probably has second best chance to win the conference. Capt. Brewer has a good number of men supporting him. Among the most promising are: Crisfield, Summerour, Rowe, Morgan, Furlow, Owen, and Beall. There are also a few freshmen from last year who showed up well in the cake race that will make strong bids for varstiy berths, mainly: Chapman, Wright, Ervin, Taylor, and Saks.

The Freshman Cake Race which is usually held in the spring has been pushed up to Monday, October 22nd this year. This is a decided help as it will bring out much promising track material that would otherwise remain undisclosed. Every freshman is required to run this race. The usual large number of cakes will be offered as prizes.

As an added inducement, the school has declared a half holiday in honor of the annual event.

An optimist is one who hops out of bed on a cold morning, saying: "Well, old bed, I'll be back to you in 17 hours."

A pessimist is one who hops in bed saying, "Geel! up again in seven hours!"—Columbia Jester.

Veteran Jacket Team Shows Brilliance in Practice

Frosh Strengthen Squad

If one treks down Grant Field way these days they will find a bunch of hard working football players who will try again to keep the Tech colors ahead of the rest of the Southern colleges in this fall's race for Southern Conference honors.

There are over four complete teams at work on the flats at present, and last years freshmen are liberally sprinkled amongst them. Maree, Dunlap, Lumpkin and others of the championship frosh team of last year will be big factors in this year's race for the flag. Nearly all of last years letter men are back, and it will be a hard job to pick a first string team, as nearly the entire squad is of first string caliber. Peter Pund, Tech's brilliant center, captains the Jackets this year, taking the place of Ed Crowley, veteran end, who was one of the stars of the East-West game last year in California.

Practice for the last few days has consisted of passing, running punts, tag scrimmage, and the other daily workouts. Serious injuries have not been reported, but Bob Horn, one of Tech's mainstays in the backfield is out of the play. Bob failed to make the required grade in a commercial subject.

The first game of the season will be played tomorrow at Grant Field, the V. M. I. Cadets being the visitors. Tech is doped to beat them, but if they do it will be a close victory. The Cadets, also strengthened by the influx of last year's frosh, will present a very imposing array of football warriors. One of V. M. I.'s best freshman bets is "Lefty" Williams. In his prep days he was a four letter man at Palm Beach Hi, down Florida way.

Of the six games played with V. M. I., Tech has come out on top in all the frays. The Cadets will do everything in the way of football to break this string of defeats. Albert Barnes will captain the visiting eleven, and with such men as McCray, Luke Hewlett, Bill Haase, Brow, Smith, Willard,

Southern Coaches to Select All-Star Grid Teams

Game to Benefit Charity

Similar to the East-West post-season game in Los Angeles last year the officials of the Southern Conference unanimously approved the selection of two All-Star football eleven composed of the best twenty-five football players in the South, to meet at Atlantic, on New Year's Day, January 1, 1929.

According to the plan, the college of the Southern Conference will be divided into two sections, the coaches of each school selecting twenty-five of the best players in that section, including their own players. The twenty-five players receiving the most votes will be selected.

The coaches of the two teams will be appointed by the Executive Committee, and all announcements and selections will be made within two weeks after the last Southern Conference game, on December 8. A selection by the coaches of the various schools must be in by one week following that game.

The game is to be played for the benefit of the Scottish Rite and Shriners Hospitals for Crippled Children, in several cities of the South. The plans were set before the Executive Committee by several prominent Atlanta business men, who are greatly interested in the development of football in the South. This game will be one of the most interesting games of the season and should attract a great deal of attention throughout the nation, rivaling the inter-sectional game held at the Tournament of the Roses in Pasadena, in this respect. Tickets will be put on sale several weeks before the date of the game.

Scott, Moss, Williams to help out, will be one battle royal.

The freshman team for this year very promising. Another bunch of huskies have found there way to Tech land, and bid to repeat the freshmen triumph of last year—capture the Southern conference junior flag. They play their first game Saturday week at Grant Field while the varsity is playing away.

Rambling and Rumbling

By Hank

Tomorrow, Georgia Tech's football team will open its conference season. Then will be your chance, Freshmen and Upper-Classmen to show the Yellow Jackets that you are with them. In no other game, probably, do fans have such an effect on the players. Rooting counts in football, and, if you are proud of the Golden Tornado eleven (and we are sure you are) be at Grant Field Saturday afternoon ready to yell yourself hoarse.

Coach Alexander at Tech Flats will have his Yellow Jackets well prepared for the Virginia Military Institute contest, which will be played on Grant Field tomorrow afternoon. The veteran Tech mentor, a man who can match his wits against the best of them and come out victorious nine times out of ten, is leaving nothing undone in his training sessions behind closed gates at Grant Field.

Coach Alexander is going to exhibit to the packed grandstands numerous plays which have never been used by the Golden Tornado eleven, but which have been practiced to such an extent that the players work them with perfect precision. It is not known whether these new plays are of a running nature or passing formations, but it is a safe bet that whatever kind they are, Virginia Military Institute will have its hands full in stopping them.

Successful college bands in the world which will be seen in action at the Tech-V. M. I. game tomorrow afternoon, is that of Georgia Tech, Frank Roman, Director. Including this year's Freshmen, the membership includes more than 125 students. The school itself owns about fifty instruments.

No beginners are accepted in this splendid organization, and the number of applications for band position makes it necessary to select only the better of those who are already able to play when they enter Georgia Tech. Under the training given by Director Frank Roman, many are preparing to become band and orchestra leader. Director Roman has had charge of the Georgia Tech bands for the past twenty-six years, and it is due to his untiring efforts, plus the accomplishments of a really fine musician, that the Golden Tornado Band has reached its present enviable state.

REMEMBER to cheer 'em.
REMEMBER you are for 'em.
REMEMBER your peanuts.
REMEMBER your chewing gum.
REMEMBER that pass book.
REMEMBER Captain Pund.
REMEMBER Stumpy.
REMEMBER Drennon.
REMEMBER Randolph.
REMEMBER all the boys.
REMEMBER that another conference championship depends entirely upon your support and spirit shown at the game.

TECH TO GIVE FROSH MORE TRAINING ON GRIDIRON

First Year Work Important in Building up Team

Team Work Stressed

Building Golden Tornado teams of the future, Georgia Tech coaches are going to give more attention and time to the Freshman gridiron eleven of the school this fall than ever before. Head Coach Alexander, who presides over the football destinies of the Varsity team, is determined that the system of football play which will be worked out by the coaches of the institution shall be taught to football aspirants during their first year. This scheme has been uniformly successful in the big western and eastern football schools, and it has been recognized that the same system must be adopted in the South, for it is impossible to turn out a finished gridiron product in less than three or four years.

Perhaps the fact that so many promising high schools and academy moleskin performers have been working out daily with Coach Clay, Freshman mentor, has had something to do with the elaborate plan being made for the reception of the first year athletes. Alva Clay, one of the best coaches in the South, will again have charge of the Freshman crew. Coach Clay will be assisted by Coach Mundorff and Mack Tharpe, of the greatest Varsity tackles of all time.

Under the leadership of Clay there were developed in 1926 and 1927 two of the greatest Freshman teams ever welded together in the South. The 1927 eleven went through an undefeated season and the 1926 squad lost only one game—and their power of offensive punch, and the steadiness of

Tech Well Represented in International Sports

Ed Hamm Sets Record

Georgia Tech was superbly represented in international sports during the summer season. On the U. S. Olympic team of 1928 three outstanding stars were to be found in the persons of Ed Hamm, Dave Young, and Major Chas. P. George, the last of the Class of 1906. These with Captain Bobby Jones, '22, and Watts Gunn, '28, of the present Walker Cup Team, give Tech a standing in amateur athletics that is second to none, both nationally and internationally.

During the summer Hamm reached the pinnacle in his rise to championship heights by setting a new record for the world in the running broad jump and by winning his specialty for Uncle Sam in the Olympic competition at Amsterdam.

Dave Young, holder of the intercollegiate backstroke record, was a member of the relay team which broke the Olympic record in the 800-meter relay.

Major Chas. P. George, now stationed at Sell, Okla., was in charge of the horses of the U. S. equestrian team. He took part in the riding events, but was disqualified by a technical ruling after taking first place in the cross country ride.

Bobby Jones and Watts Gunn left nothing to be added to their part in the remarkable victory of the American Walker Cup Team over the invading team from Great Britain. These gentlemen, and in particular the insuperable Bobby, continued to add to their laurels in the recent amateur golf tournament at Bræ Burn.

These men have covered themselves and their college with glory, and have added to the athletic and moral prestige of their county, and Georgia Tech, its students, faculty and friends extend to them their sincerest congratulations.

STUDENTS TO SEE GAME FREE

It has been the policy of the Athletic Association to tend an annual invitation to all students of Atlanta's high schools, preparatory schools and girls' colleges to the opening game, Tech-V. M. I. This custom will be resumed Saturday and admission to the opening classic will be free from charge.

Flying Squadron Tied by Fighting Richmond Eleven

Barnes Gains Consistently

Last Saturday at Richmond V. M. I. suffered its first disappointment of the 1928 season when the Richmond Spiders sent the Cadets home with a 6-6 tie instead of the expected V. M. I. victory. It was a hard fought game with Richmond holding the edge until the last quarter.

In the second quarter a nice pass, Sanford to Broadus, carried the ball to V. M. I.'s one yard line where it was bucked over. From then on until the middle of the fourth quarter it was a nip and tuck affair when an extended drive by Barnes and Hunter carried the ball across Richmond's

goal. V. M. I. failed to kick the extra point, so there the score stood at six all.

It was a decided disappointment to the Cadets as they were considered at least fourteen points better than the Spiders.

Without doubt, however, the Cadets will bring an improved eleven to Grant Field tomorrow, and they may give our Jackets more trouble than they are looking for. In Barnes, V. M. I. has one of the best backs in the South and he is expected to do much ground gaining during the present season.

The Freshman learning that the commerce prof. was from Illinois asked if he would show him his black jack.

Side Line Views

F. L. M.

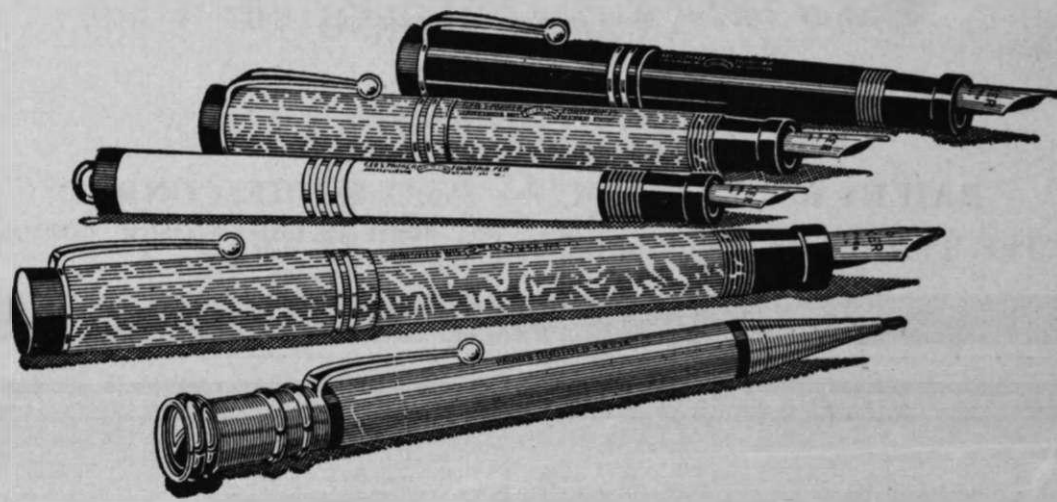

Coach Alexander's Charges will be in one of the toughest seasons than any Southern Team has ever tackled tomorrow afternoon when they engage the Flying Squadron from V. M. I. The Cadets have one edge on the Jackets in that they have already played two games, however both have been light games, while this will be the Jackets' initial battle. Captain Barnes has been the leading man on both the offense and defense for the Cadets and should bear watching. Little can be said in advance as to the outstanding Jackets as everyone on the team is very good in his position. The wonderful work of Capt. Peter Lund, Alt. Capt. Raleigh Drennon, Tumpy Thomason, Warner Mizell, and Bob Randolph of last year must not be forgotten. The dreaded ax of the faculty struck another blow at the team last week when Keen and Horn were cut off.

One of the land marks of Grant Field that has greeted some of Tech's fans for the past fourteen years, and the only source of shelter from the downpouring rain and baking sun has been removed. When the first permanent stands were built at Tech back in 1914, little thought was given the idea that Tech would ever need the

vast stadium that it now requires, so the West Stands and Sheds were built. Later as a product of the Greater Georgia Tech Campaign the Tech Bowl was planned and in carrying out this idea the present East Stands and South Circular Stands were completed. It then seemed that Tech needed more space and the North temporary stands were erected. There have been some rumors lately that Tech is planning Double Deck Stands for the East and West Stands, as well as completing the Bowl, and this seems to be the first step toward this end. Tech at present has the largest stadium in the South, having a seating capacity of approximately thirty thousand, and if this plan is carried out will have one of the largest stadiums in the country.

Something new in the football world is being tried at the University of Maryland this year. This is that there will be no Captain of the Football team until after the schedule has been completed. The Coach will appoint a man as temporary captain before each game, and at the end of the season the team will elect the captain purely as an honor and recognition of distinguished service. It is said that this action was taken on account of the influence of fraternity politics.

Technique Key is A Coveted Honor

The Technique offers to members of its staff a chance to wear a gold service key. A man is eligible, after a minimum of two years work on the staff, to recommendation of the editor-in-chief. This is quite an honor and very few men are wearing the key now. There will be a larger number of the men eligible this year than before.

This special recognition of service is a high honor and every man has a chance to try for it. The Technique tries in every manner possible to bring boys out for the staff and to keep them interested. The chance to wear a gold key is meant to inspire the men to good work for a long period.

TECH TO GIVE FROSH MORE TRAINING ON GRIDIRON

(Continued from Page 5)

their defensive play were marvelled at by many football wisecracks. Great as these teams were, Coach Alexander expects Clay and his assistants to turn out even a great combination of football stars this year.

Last season a number of the most dependable and valuable members of the Varsity squad were graduates of Clay's 1926 team. Stumpy Thomason, one of the most versatile men in the Golden Tornado backfield; Mizell, a fine backfield man, both offensively and defensively; Watkins and Speer, the giant tackles, all were scintillating members of the 1926 Freshman eleven. When Coaches Alexander, Fincher and Miller begin to fashion the Varsity football team for 1928, it will be from members of the Freshman teams of 1926 and 1927 that they will largely have to work.

Coach Alexander in speaking of plans being made for taking care of

Leon Brown to Lead Marionettes for Coming Year

Fall and Winter Plans Are Announced

The Marionettes held their first board meeting last Friday afternoon. At that time plans for the Fall and Winter programs were discussed, but nothing definite was decided. Three plays were proposed, however, one of which will be selected soon and work on the production begun. Several trips were suggested, and it is thought that two of these may be made before Christmas.

Due to the successful trips of last season, a number of engagements have already been requested for this Fall and Winter. The Marionettes like all other activities on the campus strive to make each year more successful than the preceding ones. Any who have had experience in glee club or dramatic work, or who will be interested in this work are urged to come out. Notices for the Fall try-outs will be posted within the next week.

The annual Spring Banquet was held last year after the last issue of the Technique was published. The election of officers was held at this time, the following men being elected for the year 1928-29:

Leon Brown, President,
Ansel Talbot, Vice-President,
Frank Sacha, Business Manager,
Dougal Barthelmess, Publicity Manager,

Howard Brewton, Stage Manager,
Hudson Edwards, Secretary and Treasurer.

the first year football men said:

"This year, the Freshmen team will have new equipment of the highest quality. We have set aside a field for the first year men, and they will have ample opportunity to work up their own plays and team spirit without being bothered by the presence of any other squad of players on the field.

"The schedule being arranged for Coach Clay's team will be the most attractive ever mapped out for a first year team of this school. Already games have been secured with Monroe A. & M. and with the strong Florida team. Then, of course, the first year men will have their annual game with the Georgia University Freshmen, a game which always arouses the keenest enthusiasm in both players and spectators. And we have other games in mind for the first year team.

"But it is in the hard scrimmage periods against the Varsity that the first year men really learn football," concluded the Tech head coach. "And we are planning to give them a great deal of this sort of work—it is invaluable for both the Varsity and for the Freshmen."

MANY HONORARY FRATS

REWARD OUTSTANDING WORK

(Continued from Page 3)

Those men who have proven themselves exceptionally efficient in military work are rewarded by being taken in the Scabbard and Blade. This honorary military fraternity has as its purpose to spread intelligent information concerning the military requirements of the country, to unite in closer relationship the military departments of various colleges.

The literary fraternity is the Mu Lambda Sigma and has as its pur-

Tech Postmaster Asks Co-operation in Getting Mail

At the beginning of the year there is always a great deal of trouble and confusion attending the getting of mail from the office in the Academic Building, and the postmaster wishes to call the attention of the students to the rules of the office.

The mail is set up at 12:30 P. M. and at 4 P. M. This always causes confusion because of the large number of students who try to get mail after lunch and before one o'clock classes. In the opinion of the postmaster would be better to have the mail given out at some other hour rather than at noon.

In spite of the fact that the boxes on the Academic Building steps have the word "Packages" written on them, letters may be mailed there.

All stamp, money order, and insurance business should be transacted at Mr. Houston's office, and all packages and registered mail should be taken there.

Students having boxes should have their mail sent to "Georgia Tech, Box No." Otherwise the mail may go astray in the down-town post-office.

All organizations on the campus—clubs, honorary fraternities, and the like—should leave the address of their office to which they wish their mail sent.

Those men who live in town should notify their correspondents not to go to "Georgia Tech" on their mail.

Students living in the dormitories are required to have boxes and those who do not already have these should see the postmaster at once.

pose the promotion of literary activities and plans the meetings of literary societies. Election to the society is based on one's ability to debate or to speak in public.

The Kappa Kappa Psi is the national musical fraternity. To make this fraternity should be the aim of every member of the Tech Band.

"DIGA"

THAT'S the telephone "Hello" in Madrid. In London, it's "Are you there?" But in many foreign countries, Americans find a universal language in the telephone salutations. It's good old "Hello"—a subtle tribute to the fact that the telephone is an American invention.

And so it is with elevator service. Even though they say "Diga" in Spain, the architects of the magnificent new Madrid Telephone Building unhesitatingly said "Otis" because Spain demanded the last word in elevators. You will find in Madrid the same type of Signal Control Elevators that are now installed in those monumental telephone buildings in America, in New York, Cleveland, St. Louis and San Francisco.

2-A

ALONG THE AVENUE

With the rush of school and the heaviest of schedules, ye olde scandal found has been hard pressed to get out amongst 'em as of old and get all the low down on these various 'young canine love' affairs, dansants, fetes, and on down the list to—well, guess, according to your own ideas.

With the passing of years comes the disillusionment of youth and shattering of ideals and traditions. Ours has been the misfortune to live in that day when there had to appear on the automotive market a worthy, though we of the old times would not call it so, successor for the original "Ramplin' Wreck." To us, who have witnessed its faithful service through the years and who knew every squeak and rattle and homemade device which it boasted, its passing is something of deep regret and is the passing of another tradition of our beloved Alma Mater.

Most of the Tech students cannot afford to even rent a costume for fancy dress, but when a member of the student body can step out to a shendig with a real imported sheik suit on, when is the time to shout the fact from the house tops. Well, it has happened and the wearer won some kind of a prize. According to eye witnesses to the affair, the prize was alleged to be a coat. (Bring on the Coty's and the Coty's.) "Full many a flower is born to blush unseen, and waste its fragrance on the desert air."

The Theta Beta Chi sorority, better known affectionately known as the O. B. X., has given its script dance for the year at Garbers. The affair was enjoyed by all present if such enter-

tainment appeals to the aesthetic souls of the male. Hope they made enough to give that big dance in December, and hope that they don't forget who either gives the razzberries or the bouquets. Faith (that we'll all get there); Hope (that they have it); and Charity (we gave or did we?), these three.

Football games start tomorrow and with them come that soreness of throat and spirit that comes from hard fought games. Soon the stands will be dotted with the myriads of color that make the stands look like a vast flower garden. And the rich boys will entertain the femmes and we poorer mortals with the real sex appeal will occupy that great area of the stadium known as the student section or grace the bench or bite the sod.

Unable to get a corner on the Tech money on Friday and Saturday nights, the Grabber boys have decided to give tea dances there on Saturday afternoons with Rudy and his Boys playing (Lollie included). The Biltmore is also running competition. Wonder if the Chi Phis are going to get generous and give their dances as usual? If so, we'd like to give all the little kiddies in our great radio audience the opportunity to guess who would have the crowd? Thetas not eligible to guess in the great contest. The prize will be collar greens and side meat for the country boys and chocolate milk for the city slickers. There are no rules, no holds barred, catch-as-catch-can—get in at once on this mammoth puzzle and get one of the valuable prizes. Each week we will announce the standing of the candidates.

West Stand Covers Pass in Favor of Double Decker

Sheltered Fans Fourteen Years

Every year since the building of the west stands in 1913, the crowds who have occupied these stands have been graced by a covering over their heads. For fourteen years this roof has sheltered the spectators from the torrential rains and the blazing rays of the sun. But now through the plans of the "Greater Georgia Tech Campaign" this roof has been removed.

Through the liberality of the late Mr. John Grant of Atlanta, other friends of Georgia Tech and the earnings of the Georgia Tech Athletic Association during the last four years, the school has been provided with an athletic field 900 feet long by 450 feet wide, in which to carry out its outdoor athletic program. This field was named the "Hugh Inman Grant Field" 'as a memorial to Mr. Grant's son.

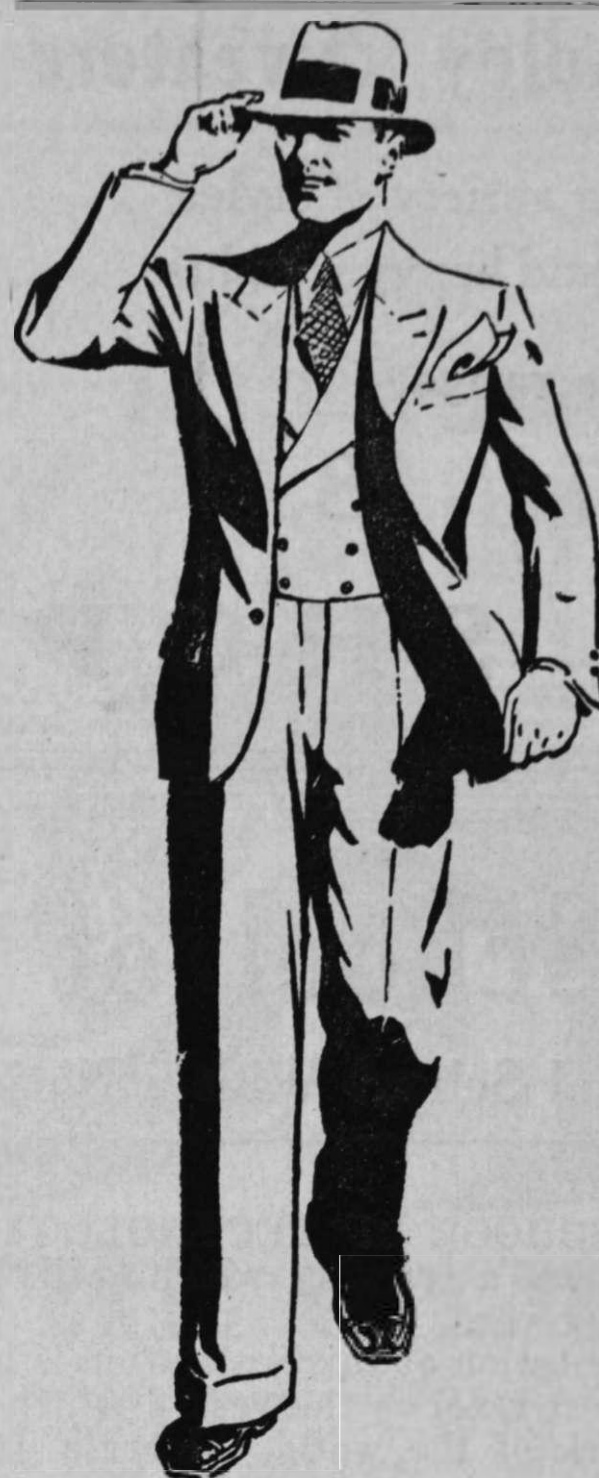

The first section, now known as the West Stands, was built in 1913. An addition was made to this in 1915 which addition completed the concrete stands on the west side of the field. These stands made possible a seating capacity of six thousand. In 1924, the handsome new modern structure on the east side was erected, 410 feet in length with thirty-seven tiers of seats, provided with locker rooms, bath rooms, stock rooms, coaches' offices and a running track under cover for early spring training. These two units have been joined together by a third on the south and the while field developed into a U-shaped stadium unequalled in the South and as complete as any in the country.

Due to the harshness in the contrast of the designs of the old East Stands and the new section, this roof was removed in order to help bring the old stands up to the high standard set by the new ones, and to help our stadium from becoming obsolete in the eyes of the public.

Those on-lookers who have tickets in the West Stands for the Georgia Tech-Virginia Polytechnic Institute game on Saturday, October 6, if it happens to rain that day, will find themselves better off if they bring a raincoat or an umbrella, for this time they will not find any roof overhead to shelter them.

Four Tech Fraterni- ties Acquire New Home

Plans Made for Additional Housing

Two Tech fraternities have recent-
ly moved into houses purchased or built
during the summer months. Chi Phi
and Delta Sigma Phi chapters are the
two fraternities concerned. Phi Kappa
Sigma and Chi Beta Sigma moved into
their locations.

The Chi Phi's moved into their new
home which was built during the sum-
mer months, located on Fowler street
and Fourth streets.

Delta Sigma Phi chapter house
Georgia Tech is now located in the
home on Williams street.

Phi Kappa Sigma moved to quar-
ters on Spring street, having former-
ly been located on the corner of Spring
and Fourth streets and Chi Beta Sigma
moved to North avenue.

Plans are now under way by many
of the fraternities to build in the fu-
ture and many changes will be made
before the next fall term of school
opens.

their visit with a menu of wholesome
Tech hospitality. The committee of
entertainment has not issued the
definite program, but trips to points
of interest around Atlanta will be
included together with a luncheon and
dance.

Georgia School of Technology

"A Technical School With a National Reputation"

THE GEORGIA SCHOOL OF TECHNOLOGY offers to young men of
ability and ambition a training which will fit them for positions of
responsibility and power.

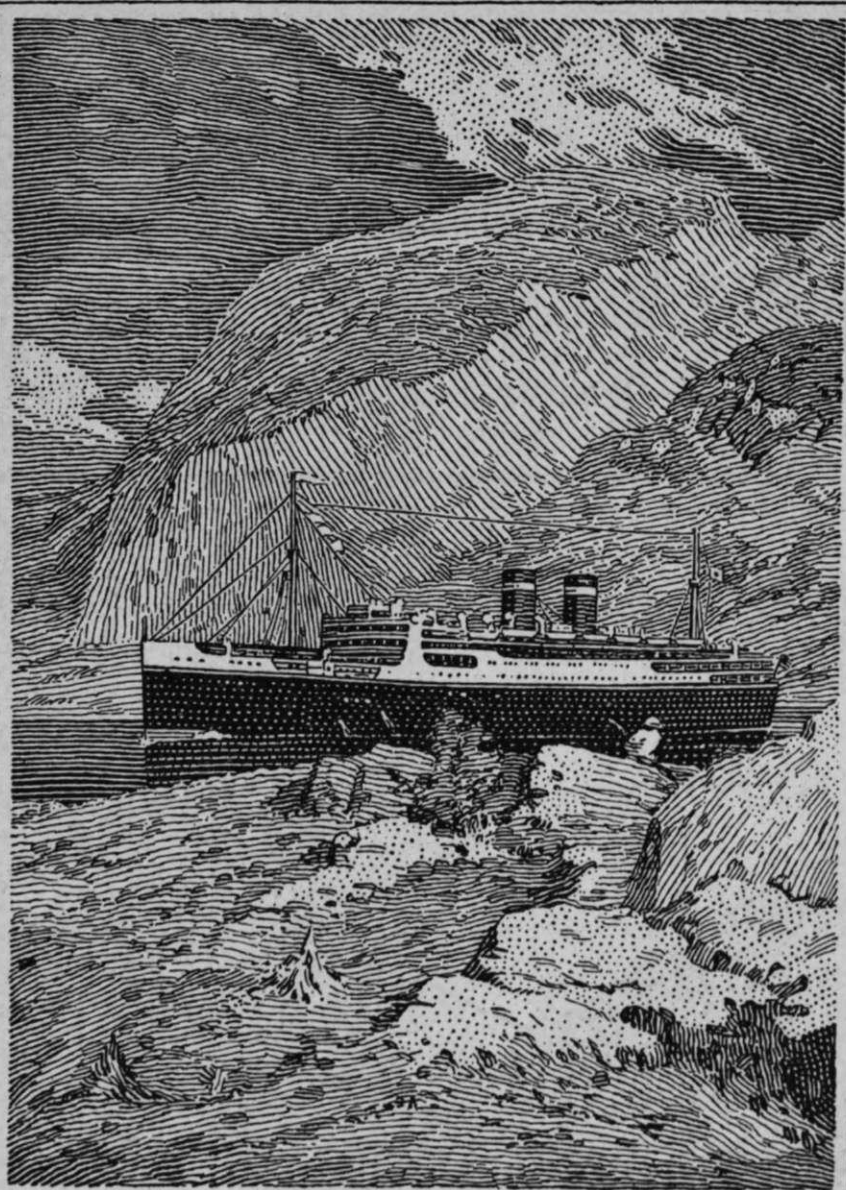

The national reputation of this institution is based not on claims, but on
results. Its greatest asset is the record which its alumni are making in
the productive work of the world. Georgia Tech graduates succeed be-
cause they have been trained both to think scientifically and to work
efficiently.

Courses in Civil, Electrical, Mechanical Textile, General, and Ceramic Engineering,
Engineering Chemistry, Architecture, Commerce, and General Science.

Coast Artillery, Signal Corps, Air Service, Infantry, and Ordnance Units of the R. O. T. C.

Electricity opens a new era of ocean travel

Miraculously quiet and vibration-
less, luxurious and swift, the new
electrically operated S. S. *California*,
largest American-built pas-
senger ship, has opened a new era
in ocean travel.

Electricity drives the *California* so
efficiently that the fuel bill for the
initial coast-to-coast trip was
even less than the Canal tolls.
Electricity mans the winches,
bakes the bread, makes the
ice, polishes the silver. And
electricity cools the
cabins and provides
passengers with the

comforts found in the finest hotels.

Complete electrification makes the
California an engineering marvel
and a commercial success; it is
booked far in advance, a sister
ship has just been launched, and
another is under construction.

On sea or land, in every walk of
life, electricity is in the van
of progress. Undreamed of
yesterday, the electric ship is
a symbol of the electrical in-
dustry's part in modern civil-
ization and a prophecy
of even greater ac-
complishment.

This monogram is found on great
motors that drive the *California*,
and on a multitude of electric
appliances which contribute to the
comfort of her passengers. It is an
emblem of skilled engineering
and high manufacturing quality.

Lockers on Campus for Atlanta Students

A great many of the students who live in town and who have no headquarters on the campus may find it necessary to have a locker in which they may put their books and other personal property. Lockers may be rented by applying to Mrs. Robinson, whose office is in the basement of the M. E. building. Fifty cents is charged and at the end of the term upon the return of the key there will be a refund of twenty-five cents. If the key is lost a new one may be procured also for twenty-five cents.

There are two sets of lockers on the campus—in the Shop's building and in the M. E. building. From those in the Shop's building, there is access to a wash room, while those in the M. E. building are larger, being the only ones which will accommodate a drawing board.

TECH STUDENT COMMUNICATES WITH FIVE CONTINENTS

(Continued from Page 1)

Reason as to why this happened. The last part of last year 3AG ceased operating, so the connecting link was broken. However, Mr. Hillegas states that if it is possible he will continue the schedule this year.

4TU is located at Mr. Hillegas's Atlanta residence, 744 Williams St. With this 50-watt outfit, he has worked stations in all five continents. When Donald MacMillan was at the North Pole, he was right there with him as far as communication was concerned. He has also been in touch several times with the U. S. Marines in Nicaragua.

Since he is such a dyed-in-the-wool radioist, it is only natural that when it came to getting a job for the working part of the co-op course he would locate with WSB. Also when the Radio Fair decided to pull a stunt it was only natural that he should get the job.

A specially constructed 80-meter outfit was installed in an airplane. A receiving set was located at the First Presbyterian Church because a direct line is constantly maintained between it and WSB. The transmitter was specially licensed for a short while under the call letters 4XB. Thus when Mr. Fred Snell, one of the noted radio engineers spoke from the plane in the air, it was received at the church, amplified, and then sent via wire to the studio at WSB, where it was rebroadcasted under more power so that everyone who had a set could easily get the speech.

During the last Florida storm, the only method of communication was by amateur radio. An amateur at West Palm Beach sent the news to an amateur, 4BN, who was temporarily installed in a hotel at Tampa. With "B" batteries as a power unit, 4BN sent the news to WSB. And that was the method by which the Associated Press reports of the storm came through. As an operator at WSB, John had a hand in all of this.

When questioned about the possibilities of television by radio down south, Mr. Hillegas stated that while WSB had practically all of the necessary apparatus, it was hardly possible that it would be used for some time due to the lack of transmitter. The demand being for a transmitter not more than twenty or thirty miles away for good work, while the nearest actual transmitter is in Washington, D. C.

WITH OTHER COLLEGES

(Continued from Page 2)

4. Answer quickly to rat volunteer.
5. Learn all college yells and the Alma Mater.
You will be expected to strictly abide by these rules. If you break them you will be punished to the fullest extent.

According to a recent splurge of publicity in a New York gazette, ninety per cent of college students study three hours per day, average only one hour per week, and never drink anything stronger than water. The "Crimson-White" of the University of Alabama adds that other things that happen around colleges as a matter of course are battle ships promading up and down and around the campus and student politicians saying, "Please vote for my opponent."

A.S.M.E. Announces Fall and Winter Programs

The Georgia Tech Student Branch of the American Society of Mechanical Engineers held its first meeting of the year on Tuesday afternoon, September 25, Chairman Wadley Glenn presiding.

A prize offered by the local branch was announced. This prize is to be awarded to a member of the society who will be selected by the members. It consists of a trip to New York City with all expenses paid to attend the annual meeting and the Power Show which is held the first week in December.

The meeting was addressed by Mr. W. O. Livingston, chief service manager for the southeastern states for the Olds Motor Works, makers of the Oldsmobile. Mr. Livingston pointed out many refinements made in automobiles and told why and how these were made. He made frequent use of the Oldsmobile chassis in the class room to illustrate his talk.

On October 2nd a moving picture will be shown entitled "Through the Oil Lands of Europe and Africa."

Other pictures to be shown this semester are as follows:

October 16—"Story of Power."

October 30—"Story of Gasoline."

November 6—"Arteries of Industry."

November 20—"Twelve Points of Safety." "Story of Lubricating Oil."

December 4—"Pillars of Salt." "The Moulder." "Revelations."

December 18—"The Telephone." "Electrical Transmission of Speech."

January 8—"Nature's Frozen Assets."

January 22—"Men and Management."

The A. S. M. E. meets every Tuesday at one P. M. There is usually a talk by some man prominent in the industrial world when pictures are not to be shown. Visitors are cordially invited to attend any of the meetings.

TECH MEETS V. M. I. IN OPENER

(Continued from Page 1)

and next to impossible to put out of the game.

The probable ends, Holland and Waddy, weigh in at 165 and 186 respectively, are both hard tacklers and ball hawks, as well as fast. The guards, alternate-captain Drennon and Westbrook, are hard workers and tip the beams at 183 and 178. Captain Peter Pund, outstanding center in the conference last year, is one of the truest passers in the country. He weighs in at 195. That line, as it stacks up, should prove impregnable on the defense and powerful on the offense.

The backfield will probably include Durant, a fast quarter who will skirt the ends; Thomason, the line plunger and broken field runner; Randolph, a hard hitter, and Mizell, a fast 174-pounder, who will do the kicking and passing, as well as a good percentage of the running.

As the team lines up, it will give the V. M. I. cadets considerable trouble. Some say that the Yellow Jackets outweigh the Cadets at least five pounds to the man, a formidable advantage. It is not the advantage it once was, though. Weight won't tell the tale before the game. In the old days, a team that outweighed its opponent that much or more was conceded the victory before the first whistle.

Now they wait till the last one.

The V. M. I. team is little known. It is light and claimed to be fast. According to pre-game predictions, it will rely but little on passes, depending on end runs and fast line bucks. Whereas weigh carries power, lack of it certainly indicates speed, as valuable in bucking the line as in broken running.

The V. M. I. aggregation came into town Thursday afternoon and betook itself to Grant Field immediately, where a light work-out was held.

The Golden Tornado will have its band at the game tomorrow with their brand new uniforms. They will get on the field between halves, and stage a triumphant march. It will be a march away.

The football season will be officially opened for Atlanta grid fans at 2 o'clock Saturday afternoon, Grant Field, rain or shine.

Last week a taxicab driver had change for a five dollar bill.

... with their feet on the ground

MEN of vision, yes. But don't overlook the fact that those old Roman road builders and empire builders kept their feet firmly fixed on the ground. They faced the facts squarely. They were demons for detail. They were the world's first great organizers.

Pioneering in the telephone industry is like that. It is a work of vision and of

leadership into new fields. But back of it all must be the ability to organize men, money, material and machines.

The telephone executive must coordinate his machine before he can run it. He must understand the possibilities in his organization before he can lead it. That done, his opportunity is empire-wide, vision-broad and ambition-deep.

BELL SYSTEM

A nation-wide system of 18,500,000 inter-connecting telephones

"OUR PIONEERING WORK HAS JUST BEGUN"

Navy Adds Sixty Men to Unit

HAVE NOVEL EXHIBIT AT FAIR

Due to limited facilities, from approximately two hundred applicants only eighty freshmen were allowed to enroll in the Naval R. O. T. C. this year. A bugle, fife, and drum corps of twenty pieces has been organized as a unit of the Navy and will soon play for the drills. Their first public appearance will be made at the Notre Dame game.

The place of Lieutenant Sayre, who has permanently left the Tech unit, has been taken by Lieutenant Mardera.

The yearly exhibit at the fair contains some new features this year. Among them will be a mine similar to those used by the Allies in the North Sea against Germany, and the after-body of a submarine showing modern electrical steering and propelling apparatus. There will also be some minor exhibits such as knots and splices used on board ship, a steering wheel and compass and a sounding machine.

A TOAST

TO you, little girl
Of modern days;
With shortened dresses,
And fetching ways—
With little pink undies,
And turned up nose;
A costly mink coat,
And silken hose.
You dine on chicken,
Lobsters and wine,
And nothing's too bad—
If it means a good time.
You live for today,
And love all the eggs;
Who drink with you deeply
Of life to its dregs.

That's the record of one Fish Brand "Varsity" Slicker owned by a University of Pennsylvania man. They're built just as Fish Brand Slickers have been built for ninety-two years—to wear—and how!

They're cut on authentic college lines—not skimped anywhere. The "Varsity" model is long enough to protect your legs and is full lined. It has a water-tight reflex edge in front. Olive-khaki, black or yellow. Buckle-front or buttons—strap or plain collar.

Go into the nearest store and put a small fraction of this month's allowance into a genuine Tower's Fish Brand Slicker—"The Rainy Day Pal." The best investment you'll make all year. A. J. Tower Company, Boston, Mass.

Lee Hayman's Store Open to Tech Students

With the recent opening of the establishment of Lee Hayman at 619 Spring street there has come to the door of the campus a modern clothing store.

Mr. Hayman, who was formerly located in St. Petersburg, Florida, has moved his headquarters to Atlanta. From this store at Tech the salesmen will go out to all the Southern colleges

—thus the styles used at colleges throughout the South will have their inception practically on the Tech campus.

Mr. Hayman, as well as Mr. Grubbs, who is sales manager for the firm, have both visited and catered to a large number of our country's leading colleges, and their store should be quite an addition to the community.

In the parlor there were three, Virginia, and the parlor lamp and me;

Three is a crowd, there is no doubt, So the parlor lamp was put out.

Be sure and drop in at Daniel's when you're in town, because they've sure got some swell college clothes. 45-49 Peachtree

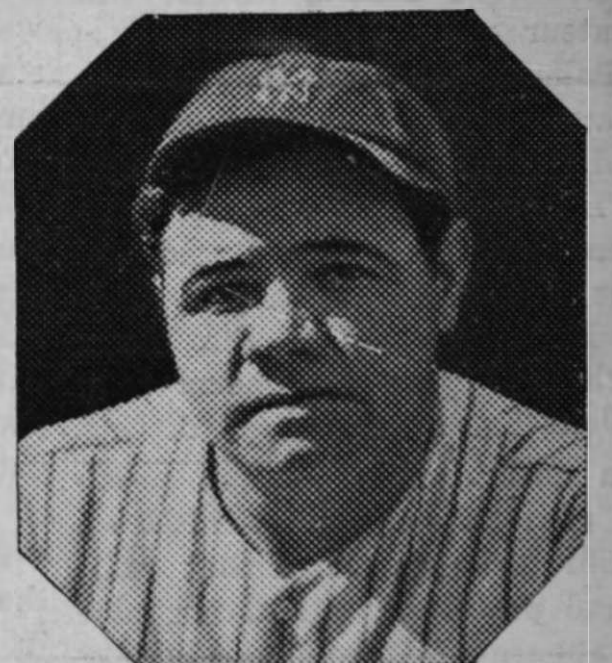

Old Gold hits a homer for Babe Ruth in Blindfold cigarette test

"Yes, I am well over 21 . . . so I could see no reason why I shouldn't make the blindfold test. As I tried the four leading cigarettes I kept this 'box score' on the results:

- No. 1 out at first
- No. 2 . . this one 'fanned'
- No. 3 . . out on a pop fly
- No. 4 (OLD GOLD) a home run hit!

"OLD GOLD'S mildness and smoothness marked it 'right off the bat' as the best."

Babe Ruth

The idol of the baseball world . . .
"The King of Swat"

BABE RUTH . . . making the test in the dressing room at the Yankee Stadium. He was asked to smoke each of the four leading brands, clearing his taste with black coffee between smokes. Only one question was asked: "Which one do you like best?"

On a non-stop flight to the bleachers! . . .

Why do they choose OLD GOLD . . . even in the dark?

What is this superiority that wins so many famous people? It's simply honey-like smoothness . . . the new and delightful quality that OLD GOLD has added to

cigarettes. And it comes from the heart-leaves of the tobacco plant . . . the finest tobacco that grows. That's why you can pick OLD GOLDS with your eyes closed.
