Subject: **FINAL REPORT: GCATT 90.03G, "Assistance to Teacher Development for School Systems", Reference GIT project B-10-F63**

Dear Jim:

As we discussed two weeks ago, I believe we are now in a position to begin the use of the Teacher's Workstation and its related software/hardware tools. I believe that the ultimate utility of such a system will depend upon the teacher and support given her in getting by the technical stuff. As such, the work that you and your people will be doing in collaboration with the "field trials" at Dunwoody High will be critical to the outcome of our projects. In that connection, I have taken our discussions from earlier in the planning for these GRA projects as direction to focus the three sub-projects (ie., GRA GRANTS) on the common goal of development of a useful, transportable Workstation which will support both Macintosh and PC applications, and which will allow for a variety of connectivity, display, and input modes.

Enclosed is a diagram of the "final" form of the Teacher's Workstation, including the ShareView software and hardware provided by you. I have also included, for the record, the equipment we are loaning to Dunwoody High for use in this venture. Clearly we can provide other loaned equipment, such as a laser-disc player, from our laboratories, should such be needed; however, since such items were not a part of the Grant purchases, their loan would be on a "not to interfere" basis.

The product of this and the other two grants is essentially what we discussed and agreed to last Spring, allowing for advances in certain of the component parts. I believe the efforts we have expended on this task are consistent with the intent of the originally proposed work statement, and the required deliverables, as we have discussed.

Since there have been a great many changes in the state of the technology since our initial submittal of this proposal, I am recommending that we primarily

focus on those applications of the technology which can have payoff very quickly. In keeping with the GRA focus on economic development and the need to assist Georgia Industry, we should explore possible linkages and applications which will result in identifiable market opportunities or will assist others in the application of those areas education, including distance education, that may provide early payback.

Please let me know if you have any questions or issues with our proposed delivery plan. Otherwise, I would expect that either I or Markus can be available on a limited basis to support you and your staff in completion of the trials and the subsequent reporting that you may feel is appropriate.

Yours truly,
