**THURSDAY, NOVEMBER 4
FORD ES&T BUILDING
ROOM L1255**

DR. DAVID SHOLL

*Professor, Michael Tennenbaum Family Chair, &
GRA Eminent Scholar in Energy Sustainability
School of Chemical & Biomolecular Engineering
Georgia Institute of Technology*

***“Should Thinking About Climate Change and Energy
Challenges Change My Life?”***

By almost any measure, life in a developed country in 2010 is easy compared to all other times in human history. I will give a personal perspective whether the real and perceived challenges to the globe associated with energy supply and climate change create moral or ethical questions for first world citizens in general and working engineers and scientists in particular. Audience discussion and debate will be encouraged.
