Attention: Mr. J. Maresca
Contracting Officer's Representative

Subject: Monthly Performance Summary No. 28 for period 1 April 1959
through 30 April 1959. Contract No. DA 36-039 SC-73133,
"Bibliography of Radar Reflection Characteristics"

Dear Sir:

DJ✓
Distribution of the subject bibliography was completed on 14 April 1959 and the receipts for classified material have been returned by 61 of the 66 recipients. It is hoped that the bibliography will find acceptance by organizations concerned with radar reflections despite some loss of timeliness of information resulting from the delayed distribution.

As previously stated, all classified reports furnished for use on the subject contract have been returned to their sources. The remaining classified material is now being screened for destruction, and the contracting officer will be requested to approve retention of some items which would be of continuing use to the Contractor in performance of other Government work.

Since the specified end product has now been delivered, and it is expected that the task of formally closing out this contract will be completed in the near future, this constitutes the final Monthly Performance Summary.

Sincerely yours,

H. A. Corriher, Jr.
Project Director, A-314
