NO. 7

WINK DAVIS IS FRESHMAN PRESIDENT

Phi Eta Sigma Elects New Men

Turnbull is President

Sophomores who made the required grades during the second half of their freshman year for the honorary society, Phi Eta Sigma are announced as follows: C. E. Hale, A. Hyatt, F. E. Lott, W. E. Owens, and W. R. Rushing. These men are to be initiated in the near future.

In order to be eligible for the society, a freshman must have an average grade of 86 for his first semester of academic year or the same average for the two semesters of his first year. Under the new grading system at Georgia Tech a corresponding high grade will be the standard for eligibility. After the end of the first semester last year fourteen freshmen were found to have the required grades and so they were initiated last April. The five new men will bring the membership of the local chapter to nineteen.

Officers of the sophomore year are as follows:

President, Willard Turnbull.

Vice-Pres., R. J. West.

Secy. and Treas., W. E. Wilkerson.

Membership in Phi Eta Sigma is the outstanding recognition which can come

(Continued on page 3, column 2)

Nightingale Heads Cotillion Club

The Georgia Tech Cotillion Club conducted its first business meeting of the year Thursday, October 23, at which time officers were selected to serve the rest of the school term. The election which was very spirited, brought forth the following results:

Billy Nightingale, president.

Tom Wilson, vice-president.

Bill Herrin, secretary.

Randy Whitfield, treasurer.

Plans for an active social season were discussed and arrangements were made to select a new man for Cotillion Club membership at the next regular meeting, which will be held at 7:00 P. M., Thursday, Nov. 6, at the Tech "Y." Every member is urged to be present.

Sparks Returns From Y.M.C.A. Convention

Tech Leads in Turner Campaign Gifts

On his return from Chicago where he was Georgia Tech representative to the meeting of the National Council of the Y. M. C. A., Professor Geo. M. Sparks revealed that in supporting the Gene Turner movement in China, Georgia Tech leads all other schools in the south, and is equalled only by Princeton. This rating is based on money contributions to Foreign Work. This interesting fact was revealed in a report of Mr. Wilson W. Fryar, Chairman of the Foreign Work, and President of the N. W. Ayer Advertising Agency, which is one of the largest in the country. As everyone knows, Gene Turner was once an outstanding student at Georgia Tech and was directly responsible for the establishment of the Technique, the Yellow Jacket, the Blue Print, and other campus activities. He is now engaged in educational work in China where he has accomplished a great deal. Mr. Sparks stated that he was not shot while in Chicago, although he encountered some gentry who were "half-shot."

ROBERT AND PEELER ARE OTHER OFFICERS

Chip Robert

Wink Davis

Tom Peeler

Marsfield Will Head Frosh "Y" Club

At a meeting of the Freshman "Y" Club held last Monday night, R. L. Marsfield was elected president, Robert H. Tharpe, vice-president and J. D. MacFarlane, secretary. Jack Sanders and George Breffell of the Y.M.C.A. cabinet, are the advisers.

Monday night, November 3, the members will get together for a supper. This will be the first affair of this kind given by the club this year, and from all indications it will be a great success.

Senior Election Now Going On

At the freshman class election held last week W. A. (Wink) Davis, of Atlanta, Phi Delta Theta, was elected president of the class; Chip Robert of Atlanta, Sigma Alpha Epsilon, was chosen as vice president; and Tom Peeler, of Macon, Alpha Tau Omega, was made secretary and treasurer.

The senior election of class officers is now in progress and the other elections will follow, sophomore next week and junior the week after that. Printed forms will be found at the ballot boxes in the Academic Building and at the Y. M. C. A.

Dr. Poteat Honored At Banquet

A most enjoyable dinner was given for Dr. E. M. Poteat, Jr., the speaker who entertained so many Tech students last week with a series of most interesting and helpful talks.

Among those attending the dinner were: The Board of Directors, The Y. M. C. A. Cabinet, The Editors of the Tech Publications, The Student Council, and The Interfraternity Council.

The dinner was held at six-thirty on Thursday, the 23rd of October, in the Tech Y. M. C. A. Building. It proved to be a most enjoyable occasion.

Architectural Society Stages Soiree

Freshmen Honored

Last Friday evening the annual Soiree given by the Architectural Society for the Frosh of that department was held in the library of the Physics Building. A very interesting and instructive program was carried out.

Mr. Harry Coley, president of the society, opened the meeting with a few words of welcome to the Freshmen. He then introduced Prof. Bush-Brown, the first speaker, who spoke a word of encouragement to the new men and offered his help.

Prof. Morenus gave a most instructive talk on "The Practical Side of Architecture."

Prof. Axline then added his welcome and offer of assistance to those of the others. Prof. Jorgenson, Freshman instructor, who made a trip to Paris during the past summer, gave a very interesting talk on the Beaux Arts School.

The next speaker, M. Buffington, is an alumnus of Tech and has just returned from a fourteen month's tour of Europe. He spoke on the arts schools of Paris and how the students spend their time.

The next number on the program was the presentation of a book, Harbeson's (Continued on page 7, column 3)

Visitors' Day Here November 8

On November 8, Tech is to have its first "Visitors Day" or reception day, as it may be called. This day has been set aside by the faculty for the purpose of acquainting the public with the efficiency and outstanding qualities of the Tech shop management. On this date the public at large is invited to inspect all details of the operations carried on in the workshops and laboratories.

The idea was conceived as being the best way to show students' parents and outsiders how well managed are the Ga. Tech shops and to give them some idea of the varied and complex work taken up by the student in these courses.

Debating Club Holds Spirited Meeting

Club Favors Unionization of Southern Workers

The meeting of the M. L. Brittain debating society held on Tuesday, October 21, in the chapel was the most interesting thus far. A large attendance of all interested in debating was noticed by the members of the society.

Spirited speeches were made by Mr. John B. Hale and Mr. Ralphall Cleveland in defence of the topic "That we favor the unionization of Southern industrial workers." These gentlemen were met by deadly word bombs hurled by Mr. Felix DeGolian and Mr. Russel Brooke who represented the invading forces of the negative side of the question.

Mr. Cleveland, as usual, spoke with a vigor that tended to shake the confidence of his opponents. Then Mr. Brooke made up for his seeming lack of heat by giving an extremely forceful argument, clearly stated.

After the members had voiced their opinions both against unionization a vote was taken and the affirmative was declared the victor by a nine to five majority.

TECH ENCOUNTERS CAROLINA

Ceramic Society Meets

Officers Elected

The Student Branch of the American Ceramic Society held its first meeting of the year on Wednesday, October 22nd, at 7 P. M., in the Ceramic Building.

The following officers were elected to serve for this year:

T. N. Howard, president.

E. A. Rogers, vice-president.

R. K. Whaley, Jr., secretary & treasurer.

Many plans for the coming years were discussed, and it was definitely (Continued on page 2, column 5)

Navy Day is Observed

Navy Day was given much attention and recognition by the members of the U. S. Navy all over the country last Monday. In Atlanta a large celebration was observed, for numerous programs held the interest of many Atlantians. The Ga. Tech Naval R. O. T. C. sponsored one of the most interesting of the programs, a broadcast from the Ansley Hotel Sunday night. Dr. Brittain made a most interesting talk, as did Commander Jones. These were supplemented by the Tech Band and the Navy Bugle Corps. Tom Wilson directed the band and his ability won respect from all those who saw and heard the program.

All proofs for the Blue Print pictures have been returned and are now obtainable at the desk in the Y. M. C. A. lobby. If you haven't gotten yours see about it today and help the staff clear up this part of the work. Choose the proof you want and return them as soon as possible.

Captain Strud Nash

Game to Be Played in Keenan Stadium

The following lineups will start the game:

Tech	Position	N. C.
Jones	L.E.	Johnson
Maree	L.T.	Thompson
Edwards	L.G.	McIver
Farmer	C.	Lipscomb
Brooke	R.G.	Fysade
Speer	R.T.	McDade

(Continued on page 4, column 2)

New Men are Chosen By Kappa Eta Kappa

The Zeta chapter of the Kappa Eta Kappa, professional electrical fraternity, was host at a smoker Wednesday evening, October 22nd, held at the Sigma Nu House. The smoker was attended by several members of the junior and senior class in the department of Electrical Engineering.

The following seniors were invited to pledge: G. C. Carson, J. C. Greene, J. D. Veal, and John McGaughey. The juniors who were invited to pledge were: C. B. Cole, G. A. Baird, G. A. Mathews, T. C. Murphy, E. V. Hungerford and L. I. James. The pledging ceremonies will be held next Thursday evening. There will be a campus initiation (Continued on page 5, column 3)

Oil Can Club Meets

The Oil-Can Club held its first meeting of the year at the Atlanta Athletic Club last Saturday night. The Oil-Can Club is a local honorary society for senior mechanicals. The members discussed plans for the work to be done this year, it being the objective of the club to accomplish at least one task that is of benefit to the school. A dinner was served during the course of the discussion.

Professor Duncan of the Mechanical Department, was the guest of the club. He is a very enthusiastic supporter of the organization, and with his aid the club should have a most successful year.

Students, in order to receive Yellow Jacket must sign up for it at the Y. This announcement is made by the Business Staff, and your co-operation in the matter is expected.

Class Elections

The officers of this year's freshman class were elected during the past week in one of the most spiritless elections ever held on the Tech campus. If the freshman, who as a rule takes more interest in campus affairs than the upperclassman, pays no more attention to a class election than this, what can be expected of him when he becomes an upperclassman? Only 281 votes were cast out of a possible 770, the number of men enrolled in the class. The election was managed well enough. There were ballot boxes in convenient places and the ballots were printed with precise instructions and distributed on time. The fault was with the members of the class entirely.

This is a beautiful example of student irresponsibility. How can there be any hope for class spirit or school spirit as long as the individual student does no more than this to contribute to it.

In the remaining elections it is probable that the same condition will prevail. Why not at least take enough time from personal affairs to vote for your class officers?

Come On, Seniors

Long has there been wailing and gnashing of teeth because the Senior Section was invaded by underclassmen and outsiders. Criticism has been heaped upon the Athletic Association from every side. But that criticism is only partly their due. The senior class must have enough consciousness, enough pride, enough spirit and organization to help the situation themselves.

Last week an attempt was made to remedy the situation. The association issued to each senior through a representative in the different departments of the school a reserved seat ticket for the section. No one else was supposed to be in the Senior Section. But when many of the holders of these tickets arrived at the game they found their seats occupied by either an outsider or an upperclassman. Sophomores, juniors, men with long beards, and even women (we don't say ladies) were in the section. In the first place these people should have respect enough for the seniors to stay out, but if they don't they deserve the embarrassment which ejection necessitates. The seniors should claim their seats, willy nilly, and they should be sup-

ported by their fellow classmates around them to the extent of picking the intruder up bodily and throwing them out of the stands. If a person does not hold a ticket calling for the senior section he can have no comeback against such action. For an outsider to sit in this section should be as serious a breach of the unwritten law as to sit on the senior bench—and it can be made so.

The Athletic Association was at fault in that it did not provide sufficient protection. There were not enough guards or ushers on duty to handle the situation properly. More and bigger bouncers are needed. Many of the ushers did not even ask for the ticket stub but simply asked the question "Senior Section?" Of course others will take advantage of such procedure.

So the fault is partly that of the association and partly that of the seniors themselves. The association is going to try to do its part by having more ushers and more careful ushers at the Vanderbilt game when the experiment is to be tried again. If the seniors will do their part the experiment may prove a success.

Why the Navy Band?

The band and those who have to do with its management deserve only praise for past performance, especially at the Tulane game, but still the question is persistently asked: *Why does the drum and bugle corps of the Navy tag along after the band as a calf follows its mother?* The corps seems to add nothing to the music of the occasion and it certainly does not look well. In the formation of the "T" the blue uniforms appear very nicely at the tips of the letter but at all other times it appears as just what it is—a separate and distinct unit under another leader which has nothing in particular to do and does it. The symmetry of the picture from the stands is all but spoiled by such a tag-along. Why not the White and Gold alone on the field parading as a unit?

Keep the Tech Spirit

General improvement in spirit and in the expression of that spirit in cheering was apparent last Saturday. The freshmen made a better showing than ever before and upperclassmen joined in to a greater extent than at the other games. Perhaps the cards which were used by the cheerleaders to announce which yell was to be given were responsible for this, but at any rate all the support that could be asked was given the team.

In spite of the fact that the game was being lost most of the students continued yelling their heads off. That is the old Tech spirit, the kind that has not been seen at the flats in many a moon, the kind that is needed. Win or lose, let's keep the Tech spirit.

Scholarship Hints

Attend every class and prepare every lesson for the first six weeks.

Have a study program—with a definite time for each lesson.

There should be as few distracting elements as possible. Keep pictures out of the way. More than one roommate is usually a handicap.

A regular place to study makes for good work.

Work should be done while sitting in a straight chair at a study table.

Too many lessons should not be left until night.

Arrange studies so that there will be a change of work.

The thoughts should not be allowed to stray while at the study table.

An attitude of study will help you get down to work. If you have something to write, pick up the pen and start—even if you have no ideas at the time. They will flow out of the pen.

Good mental work necessitates a healthy body. Eight hours of sleep, and good wholesome food at regular periods will help.

Pleasant surroundings are important. A clean, well-lighted room will help your scholarship.

Julian Foster, 215-pound end at Vanderbilt, is Young Stribling's double. In Atlanta, his home town, he frequently is taken for the ring battler.

There's no expedient in which a man will not go to avoid the labor of thinking.—Thomas A. Edison.

Famous last sayings: "Say, Mr. Hamm, can you jump over that step?"

* * *

Tulane, a tidal wave.

* * *

At last a successor to Rudy Valle is found. There is one, and in Atlanta, too, who can out-croon THE CROONER, himself. But this new find is not wasting his talent over a mere national network, mooning and crooning to the public at large. No indeed! He is concentrating the torment on a small crowd of about fifteen thousand people who are forced to listen to him. These people are so situated that they cannot merely reach over and switch the dial for deliverance. No! They have to sit and be tormented at the will of the tormenter. And what torment! Yes, what torment! Give us Rudy Valle—sure, that's who we mean; and yes, we've heard him sing?—(We're in our right mind, too) now, give us Rudy Valle a thousand times over rather than that dripping voice of last Saturday's game. W-h—aa-t-l-e-y g—o-e-s o-o-ver r-i—g—h—t e-n—d f—o—r a g—a—i—n of t-h—r—e-e y-a-r-d-s. Oh, gush, gush. BLAH! !

CAMPUS CHATTER

Garbage.

About the funniest thing we have heard in a long time is the unconfirmed but very interesting report of the trials and tribulations of one of our foot-ball heroes. It seems that this particular member of the varsity team had recently been equipped with a shock-proof gold tooth. In his overanxiety to masticate some delectable morsel served at the Tech Cafeteria, his newly installed tooth loosed itself from its setting and fell unnoticed to the plate. Some hours later when the loss was discovered, a thorough search was made in the kitchen and finally our hero rooted, unabashed, through the refuse receptacles outside until the missing tooth was found therein.

Blaw Bugles, Bloo.

Have you ever heard Pete go tweet, tweet, tweet? No. Neither have you ever heard the grand associated congregation of drum blowing and bugle beating musicians (?) render a single sweet note since their conception. Here is a fine opportunity for someone with experience and determination to get up a snappy, well trained fife and drum corps that would be a credit to Tech and to the unit it seeks to advertise. As the matter stands now, the dreary sound of the weakly blown bugles, the drabness of the uniforms, and the utterly wretched drilling of this group is creating much comment that is neither complimentary nor beneficial to anybody.

Standard Equipment.

Well the freshmen now have a set of officers — standard equipment — but what are they going to do with them? Nothing. The class of '34 is doomed to be an insignificant one as far as the united efforts of its members are concerned. With only about one man in four taking even interest enough to vote for his own officers, what can you expect the class to accomplish that will be remembered along with the deeds of the spirited classes of early Tech days.

Co-Ops to the Front.

Our hat is off to the freshman cops who raised their green penant to the heights of the flag pole top last week. We wonder what's the matter

Sir John Each, Kt.

Twelve pears were hanging high,
Twelve knights came riding by;
Each knight taken a pear
And left eleven hanging there what's that?

Monday was the horse's name.

with the "regulars". The class of 31 set their flag flying, the class of 32 proudly watched their wave for about a week from the same place, and the class of 33 showed themselves loyal to tradition in the same way. The class of '34 evidently has no one with enough —how shall we say it? No. But at any rate the challenge is still flaunted and the freshmen have not acted.

Ceramic Society Meets

(Continued from page 1, column 2) decided that the Society would meet the first Wednesday in every month at 7:00 P. M.

The Club anticipates one of the best years since they have been upon the Tech Campus, and if their plans materialize, many nice trips will be made

RICH'S SECOND FLOOR.

RICH'S

HERE WE ARE

Dear Ma:

Well, Ma, as we said last week there was a smouldering heap on Grant Field Saturday, but the Yellow Jacket was far from the top of the heap. The Greenies from Tulane seemed to have things their way most of the time. Some of the best players that have been on Grant field in a long time were here Saturday with the Greenies. Zimmerman, a sophomore halfback, seems to be going well toward replacing the loss of Banker, and Dalrymple played an excellent game at end—one of the best we have seen. There are no alibis in the Tech camp. The team was defeated by a superior team. Congratulations, Greenies. All eyes are turned to the invasion of Chapel Hill tomorrow. May the Jacket resemble the days of old and surprise the Gentlemen of the Press with a victory over the Tarheels.

Another football game meant another Chi Phi tea struggle. Nothing different from the ones in the past. Practically the same CROWD, the same girls, the same orchestra, in other words, just another Chi Phi tea dance.

At last the three letter boys have crashed into the social whirl when the Betas gave a house dance honoring their chapter from Tulane. An excellent idea; too bad more activities of this kind are not held on the Tech campus. A good way to promote a much better understanding between the same fraternities in different schools. A good dance, too, a bit crowded but not as crowded as the usual house dance—there was a little room. Congratulations, Beta Theta Pi, an excellent reciprocation of the dance that Tulane gave you last year in New Orleans.

It seems that the well-oiled political machine that we told you about in last issue was defeated by the friction group. Their activities in the first meeting being unsuccessful acted as a boomerang and the boys of the friction faction profited by the mistake and saw that they were well organized to the extent of a three to one victory. Everything looks rosy for this exclusive (?) organization, unless the dean sees fit to throw a monkey wrench into the machinery and then a well planned political campaign by two factions will bite the dust in another defeat. We hope that the boys are allowed to continue with the organization. After all, "all work and no play makes Johnnie a dull lad."

Tonite is the nite of nites for the Debs. The TYBM will be in their full glory when the annual Nine O'Clock ball is held at the Piedmont driving club. This starts the campaign and after that the Royal Mounted police of society will go forward with various tactics to accomplish their desired goals. A newcomer to the club is the first to announce her party. Here's where the college man starts rating. Of course there is method in the madness of the throng, but Debs must be popular and such popularity must be deserved (?), so fellows, get the old tux out of the moth balls and get ready to exchange your fraternity dance for one of the Debbies' gatherings. The publicity director didn't do so well this week, either. The brides and brides-to-be seemed to take most of the space. Don't worry, tho, the Nine O'Clock ball will begin the hundreds of inches of wasted space for society's and the Debbies' sake.

Speaking of publicity, it seems that one of the sororities at the Seminary—ten thousand pardons, I almost forgot that there are no sororities at the Seminary, I should say one of the clubs made up of the elite of the college set got a lot of space Sunday. The newest of the groups, too, looks as tho they are tired of being the third of the group and desire to wend their way to the top of the heap. Well, SYT's, it pays to advertise.

There seems to be an advent of a great deal of factionalism in a number of groups on the campus. You can bet that the groups that are operating on this basis will accomplish very little. Teamwork pays in the long run, misunderstandings are costly and the purpose of an entire organization may be defeated by some petty jealousy or misunderstanding, on the part of a few—like "one rotten apple spoiling a whole barrel." Let's defeat factionalism, realize our mistakes or help the other fellow to see his. Let's be reasonable and considerate of the other man and make

Tech a better institution because of the presence of the various organizations. Let's pull together, because after all, coordination of all concerned leaves a better taste in everybody's mouth.

Aha! a convert, another to the ranks of the buttermilk, long may they wave; not necessarily the buttermilk but the real girl and not the SYT. (Thanks, Charles Chatter.) We, too, are for barring the SYT from the beauty section, or changing the name to politician's paradise or what have you?

While the Tech team is in North Carolina the Stormy Petrels of Oglethorpe will engage Furman in what looms to be a big battle. Furman defeated Florida Saturday and Oglethorpe has tasted defeat only once and that was at the hands of the Bulldogs of the University of Georgia. We don't believe that it would be a wasted evening for the Rambling Wreck to journey to the scene of the battle. After all, the Petrels are so close that we feel they are part of Atlanta and wish them lots of luck over Furman. As we see it they will need lots to emerge victors.

Navy Day was celebrated by Tech Sunday in a number of different ways, one of them being a broadcast by the Tech band and an excellent address by Dr. Brittain. Congratulations, Navy; that's the spirit, let's show them that the inland Navy has the old Tech spirit and does things in a big way.

We notice the advent of the Troubadours and this year under the direction of Mr. Garing. You know what he has done for the band, and with this in mind we are looking forward to the club of clubs musically. Wonder where the Marionettes have disappeared to?

Your son,

PETER.

Freshmen Show Pep

It is true that the Freshmen did not show much pep during the South Carolina game. This, however, can be explained by the fact that Freshmen are naturally more or less dumb, and with them being in a new atmosphere accompanied by their usual timidity and backwardness, not much spirit could be expected of such an obstinate bunch. However the gross criticism cast upon them by some few veteran Tech men seemed to have knocked off that first coat of greenness, and now they are beginning to get right. It is kind of like a terrapin coming out of its shell.

It was during the Auburn game that the rats found themselves and realized that they were also human beings. It was then that they overflowed with pep and the old Tech spirit. They stuck behind the team when they were behind, and didn't stop yelling until the game was over. After the game was over the spirit was still high, and rival Freshmen engaged in a little cap snatching. Bobbing heads like yellow apples on a wild mill pond, could be seen as the yelping Freshmen clambered over row after row of seats in vain effort to get away or recapture their caps. This kind of sport continued far into the night.

To add to the fact that the Freshmen have awakened; prior to the Tulane game, placards and signs could be seen tacked up all over the campus, some of the reading plainly "Down With Tulane," while others had pictures representing some sort of monster tearing another to bits or pictures to that effect. Anyway it showed that the old Tech Spirit is no longer lacking in the Tech campus in so far as the freshmen are concerned.

Yelling "to hell with such and such a college" or relieving a rival freshman of his cap is not bad sportsmanship, but is that real college which helps win football games.

—A FRESHMAN.

Phi Eta Sigma Elects New

(Continued from page 1, column 1)

to a freshman. Since its establishment at the University of Illinois in 1923, the worth of such an organization has been recognized by other institutions, until today it has expanded to a national organization with twenty-three chapters in the leading colleges and universities of America. The Tech chapter of the Phi Eta Sigma was installed only last year, but it is rapidly becoming established on the campus.

Student Supply Will Sponsor Fraternity Cross Country Race

Scheduled for Nov. 5

The student supply will sponsor an interfraternity cross country race on November 5, under the direction of Coach Griffin and Bill Herrin.

A beautiful loving cup fifteen inches high and artistically decorated will be presented to the fraternity that has the winning team. Individual prizes will also be given to the competitors coming in first and second.

The race will cover the regular cross country course, out to the water works via fourteenth street and back.

All active members of the fraternity are eligible to participate in the race, except members of the track and varsity cross country runners. The first five members of the fraternity coming in first will compose the team of the fraternity. The fraternity whose five men come in first will receive the loving cup.

All fraternities should enter a team, as the loving cup is a beautiful thing and will look good on some fraternity's mantle.

Anyone desiring more information can do so by seeing Bill Herrin at the student supply.

BEAU BRUMMELS

By Peter

UNITED STATES NAVAL ACADEMY

Located in historic Annapolis where the "Severn joins the tide" of the Chesapeake, is located the training station of Uncle Sam's future admirals.

The massive structures and beautiful campus are a sight to behold. It is little wonder that this school has produced some of the world's most foremost figures. Imposing structures with massive appearances give the Navy one of the most beautiful campuses in the country.

Three publications, *The Log*, the news and comic magazine combined, *The Lucky Bag*, one of the foremost of college annuals, and the *Trident*, the literary magazine, give those that have a journalistic trend excellent outlets for their thoughts and ire.

This week's column was made possible by the able assistance of Midshipman Charles Edward Robertson, Delta Tau Delta (Cornell), Plebe baseball, '30, staff of the *Log* of the U. S. Naval Academy, etc. Thanks a lot, Charles,

we hope that you will call on us if we can ever be of any assistance to the Academy, the *Log*, or yourself.

Football, always a big sport at the Naval Academy, is holding practically all of the limelight at the present time. When the "Big Blue Team" trots out on Farragut field it may be said that regardless of the opponent that the charges of "Navy Bill Ingram" will give them the battle of their lives. The well-dressed football man wears the Navy Blue and Gold Jerseys. The team this year had two bad games, meeting defeat at the hands of Rockne's Irish from Notre Dame and the Blue Devils from Duke. They more than redeemed themselves Saturday when they administered a defeat to the lads from Princeton. The regiment is going to practically all of the games this season. It is quite an imposing sight to see the maneuvers of the regiment at the games. It makes

STEPPING INTO A MODERN WORLD

They shut the door on hybrid styles

Quantity production of equipment has long been practiced by the telephone industry. Telephone designers years ago shut the door on many hybrid styles—seeking first to work out instruments which could best transmit the voice, then making these few types in great quantities.

This standardization made possible concentrated study of manufacturing processes, and

steady improvement of them. For example, the production of 15,000,000 switchboard lamps a year, all of one type, led to the development of a highly special machine which does in a few minutes what once took an hour.

Manufacturing engineers, with their early start in applying these ideas, have been able to develop methods which in many cases have become industrial models. *The opportunity is there!*

Green Wave Inundates Jackets 28 to 0

Grey Devils Upset By Bowden College

Offsides on Extra Point Costs Game

An offside penalty caused Coach Mack Tharpe's Tech Gray Devil aggregation to go down to defeat by a 7-to-6 score at the hands of Coach Bud Harris' scrapping Bowdon College eleven Friday night on Grant Field. On a try for point after Bowdon's lone touchdown, one of the Tech linemen was offside, which automatically gave Bowdon the extra point that was the margin of victory.

Bowdon got its touchdown early in the first quarter after a short punting duel between Gooding, of Tech, and Downing, of Bowdon. From the Grey Devil 48-yard line Shivers, of Bowdon, punted out to midfield and a beautiful gain of 17 yards. On the next play, Downing passed 11 yards to Shivers, who fought his way the remaining 20 yards to the goal line. It was on the try for point after this touchdown when an offside penalty gave Bowdon the extra marker, that won the ball game.

The Jacket scrubs' touchdown came in the second quarter after Gooding passed to Lawrence for a 35-yard gain which placed the ball on Bowdon's 5-yard stripe. Two bucks by Weatherford put the oval on the 2-yard line and one the next play Gooding sliced over left tackle for the Grey Devil score. That touchdown marked the first time Bowdon's goal line has been crossed in two years.

In the last few minutes of the game the Grey Devils started a drive that carried them from midfield to Bowdon's 10-yard line, but on their attempt to

Jackets Migrate to Chapel Hill

(Continued from page 1, column 3)

Herron	R.E.	Parsley
Dunlap	Q.B.	Wyrick
Hart	L.H.	Maus
Barron	R.H.	Nash
Cain	F.B.	House

This Saturday the Yellow Jackets will trek to Chapel Hill, where they meet the North Carolina Tarheels at Kenon Memorial Stadium.

The Tarheels won their first game from Wake Forest 13 to 7. The following Saturday V. P. I. was the next victim and went down 39 to 21. A week later the Tarheels battled Maryland on an even footing for three quarters, but finally emerged victor after a sensational return of a punt by Johnny Branch for 94 yards. Branch and Magner, both subs, each accounted for two touchdowns in defeating Maryland 28 to 21. The following Saturday North Carolina suffered defeat at the hands of the over-powering Georgia Bulldogs. The Tarheels were kept on the defense throughout the game and were unable to check the speed of the Bulldogs "Thousand Backs." Georgia had little trouble in winning 26 to 0.

Against Tennessee the Tarheels met a team more of their match. Although coming out on the short end of a 9 to 7 score, they showed an improved offense over the preceding Saturday. With the game apparently lost, 9 to 0, "Rip" Slusser, North Carolina halfback, tore through the Tennessee line for a touchdown during the last two minutes of play.

The Tarheels are boasting a flock of fine halfbacks and fullbacks. In Captain Nash they have one of the finest

(Continued on page 8, column 1)

Georgia, 'Bama, Tulane Win in Conference

'Bama, Led by Suther, Defeats Vandy 12-7

Furman Upsets Florida

In a flashy, hard-fought sixty minutes of football at Birmingham last week, Wallace Wade's Crimson Tide eliminated the powerful Vanderbilt eleven from the conference by a score of 12-7. It was a beautiful battle, but the Dan McGugin team was absolutely unable to dent the charging Alabama forward wall. Only Mouse Leonard, of all Vandy's threats, was able to break into that impenetrable phalanx, and that but seldom. However, on two separate occasions, he was stopped by barely a hair, only being held by one foot, after long runs. Flash Suther was the man who killed the Commodore hopes in this game. He did not go over or under them, but right through and by, with his extreme speed and with the power of his attack.

Georgia, this fall, seems to have every requirement for a championship team: Plenty of undiluted strength, a deceptive passing attack, an elusive running game, and a staunch defense coupled with a fighting never-say-die spirit. Auburn, in Columbus last Saturday, put up a game argument about Georgia's 39-7 victory, but their tired first string was unable to hold up through the second half, and Georgia went wild. With three Auburn men on the injury list, and playing against an inspired team, the result was inevitable. But let's look out everybody for Auburn next year. The Tiger has awakened.

Tulane, after the game last Saturday, is the third team which still remains in the conference, but the honors will in all probability go to either Georgia or Alabama.

Florida, up to the time of the Furman victory, was rated as Conference material, but in a game against the untouted Furman Purple Hurricane, a supposed Florida setup, the final whistle blew on a score of 14-13, Furman. An excellent line coupled with a pair of passers and receivers above the average are what really spelled defeat for the 'Gator eleven. Bethea who played such a starring game several weeks ago, seemed to be unable to get away. Overconfidence was the probable cause of the unexpected score.

Shipwreck Kelly, and a brilliant exhibition of ball carrying on the part of the Kentucky team as a whole completely routed the Virginia Cavaliers a week ago, they being plainly outclassed from the outset of the game. Reserves of both teams conducted the major part of the fray.

The Tennessee Volunteers took a thrilling hard contested game from the North Carolina Tar Heels in Knoxville last Saturday. The Tennessee score of a safety on North Carolina, in the second quarter proved to be the deciding factor of the scoring, both teams crossing the goal line in the last quarter. Hackman, and Bobby Dodd, both played showy games for the Vols, while Slusser, scoring for the Tar Heel tally with four straight line bucks, stood out above the other North Carolinians.

Duke, not in the least perturbed by the beating suffered early in the season from South Carolina is keeping right on with the good work, having crushed Wofford college 14-0. Duke seems to be another of those things that make one forget the existence of football dope.

Mississippi, following in the footsteps of the Florida 'Gators, went north to cut Chicago to pieces, but was a bit stopped by the resultant 0-0 score. Mississippi has a powerful team, but the Chicagoans held them very successfully.

Led by Speedy Berger, the Old

(Continued on page 5, column 2)

Freshmen Show Power In Furman Win

Score Twice in Last Period

A bewildered crew of youngsters wearing the nondescript grey of Georgia Tech's freshman football squad, after being played off its feet in the first half, gathered itself into a smart and vengeful unit in the second half to score twice and take a 12-0 decision from the Furman freshmen at Grant field Saturday morning.

Scientists might be interested in knowing that tornadoes, embryonic ones, are more devastating than hurricanes, also embryonic. Two touchdowns more devastating, in fact. Also that tornadoes, embryonic ones, require approximately 30 minutes more to reach the heights of effectiveness than do hurricanes, also embryonic.

Tech's juvenile tornado was tossed and twisted through the entire first half by a purple-clad attack which surged powerfully. Not, however, with enough power to score points.

Twice the yearlings from Greenville, S. C., whipped their devious ways to the shadow of the Tech goal line, and twice they halted in that shadow. Both drives were staged in the first half.

Tech opened up in the third quarter, making two stabs which were checked near the Furman goal line. But the youngsters in grey came back again. They took Smith's punt on the Furman 40-yard line and started blasting their way ahead. They ran to a first down on the 27-yard line. They passed to another on the 11 yard line. And Ferguson knifed his way off tackle and twisted and dived for those remaining yards.

The embryonic tornado had gathered force. That was six points in the bag. Young Willie Hutt sifted through to block the try for the extra point.

The two clubs battled again without getting anywhere until the yearlings from the Flats tired of the calm and went out to blow up some more dust. Smith punted 50 yards over the Jacket goal, and the Jackets drove 80 yards

(Continued on page 6, column 1)

Tornado Crushed By Powerful Team From Tulane

Offense Powerless

Suffering one of the worst defeats that the Golden Tornado has received for many a year on Grant Field, the White and Gold bowed to the Green of Tulane University 28-0 last Saturday. The game was certainly a heart breaker for the Tech supporters, for although the dope generally favored Tulane, everybody around these parts that really loves Tech had an idea that the Jackets were going to find themselves in this game and keep going for the rest of the season, but they were doomed to disappointment.

It wasn't hard to see who was the master in that game. The Wave was faster, more alert, much more tricky, and more powerful. The so called "inexperienced" pony backfield looked about as experienced and powerful a quartette as has galloped the sod of old Grant Field in two years. The only "green" thing in that backfield was the material in the boys' jerseys. Did anyone happen to notice those boys on Tulane's flanks? Yes, Ralrymple and Holland. The Gold never rounded either end for anything like a real gain during the whole fight. Those ends should have been taken out at least half of the time, but it didn't appear that they were out any of the time. The balance of the line was just an ordinary stone wall most of the time, so of course our boys got stopped on the rock pile on the majority of plays through the center of said wall. This left the air route open to the Jackets who are decidedly poor airmen. The results were disastrous. They tried 12, completed 1, and had four intercepted one of which was carried over the goal for a touchdown. The Jackets, on the whole, seem to be in exactly the same fix they were in last year. They can't gain anything from scrimmage, due largely to lack of interference. A man cannot run around end without a couple of good men in front to entertain

(Continued on page 5, column 1)

SPORT GLANCES

The migration of the Tech forces to Chapel Hill has started. All day long the familiar sound of the old Ford warming up has been ringing out in the vicinity of the flats. Students are availing themselves of every known means of conveyance and by noon tomorrow the people up around Chapel Hill will be hearing plenty of that "Give 'em all, Tech."

The more fortunate of the students, at least whos fathers didn't lose money when the First National Bank of Ludowice went broke, will make the trip in style on the special train leaving tonight, (\$15.03 a throw.) The band will be on this train and they are expected to burst the North Carolina city wide open.

* * *

Last year the Tarheels started Tech on that downward trend in football, from which they have not been able to snap out so far. It would certainly do me plenty of good if the Jackets could start back up hill at the expense of the North Carolinians.

The Jackets will have the pleasure of seeing the flying heels of little Mr. Johnnie Branch again, but this time it will not be unexpected. Can Speer, Marce, et al., stop this phantom of the Tarheel squad? We'll know by tomorrow, anyway.

* * *

After Saturday's game, it looks as if Wallace Wade is going to terminate his stay at Alabama with a championship aggregation. What the Crimson Tide did to Vandy last week will be the talk

around Birmingham for years to come. It was just a case of "Flash" Suther behind the greatest forward wall that Alabama has ever placed on the gridiron. In beating the Commodores 12-7, the Crimson Tide didn't gain an inch by the forward pass route. It was straight football. The big question seems to be, what the Crimson Tide will do if they really open up.

The Commodores, encouraged by a crushing defeat of Minnesota, played a great game, but it is doubtful whether a charge of shrapnel would have stopped the determined march of that powerful Crimson forward wall.

Of all the teams in the Southland to date, only one has a possible chance of stopping Wade's great eleven. The Georgia Bulldogs have a chance to do the work over in Birmingham, Thanksgiving Day, and boy, that should be some battle.

* * *

George A. (himself) Tech ran true to form in the nautical racket last week. Out of five tries he picked six of them wrong. His clients protested, but in vain, but "Tornado" just sat there with his feet in his shoes and snickered. He seen he had 'um.

When asked for a bit of advice on next week's contest, he dug down into the old desk and pulled forth an old chart. After several minutes of deep thought, during which time the canary bird burst forth into glorious song, he gave his report for publication.

He advises that you buy plenty of

Tornado Crushed

(Continued from page 4, column 5)

the opoising end of one or two of the other backs. This little fact was affirmed in last Saturday's game. Tulane showed just what a few fleet backs can do if they are provided with a little interference.

The Green started the game with a rush. Receiving the kick-off they attempted a couple of simple plays and then exchanged punts with the jackets. Here they started a series of long gains down the field that was terminated with a fifteen yard run by Zimmerman, Tulane back, through the left side of the line and over the goal for the first blood. The Tornado seemed to tighten down somewhat after the next kick-off stood in the middle of the field and swapped blow for blow with the visitors until just before the quarter ended, but here Tech's defense weakened and the Green Wave rolled on down the field again, drowning Yellow Jackets on every play, and finally breaking over the goal for another six points that made it 2-0, not in favor of the Gold.

Tulane again kicked off and Frank Speer returned it fifteen yards to the 34-yard line, but here the Jackets were stopped cold. The Green flankmen were too good for them, and they were forced back for eleven yards, where Maree, in his new role as punter, kicked to Tulane's 45-ward line. The visitors swapped punts for a gain of several yards and found themselves on Tech's 32-yard line. Dawson threw Holland a long pass which was broken up by Barron who interfered with him, so the pass was ruled complete on Tech's 4-yard line. This was about the first interference exhibited by the Tornado, and it seemed to be the wrong kind. Two tries gave only two yards, but Glover, Green half, rounded right end untouched on the next play for the third touchdown. Tech was off-side on the try for extra point and the score was 19-0. Tech again received and Colvin returned it to the 38-yard line. Hart, Isaacs and Strickland made a first down in three tries, but Pat Barron muffed the ball here, and Tulane fell on it. They were held for downs, and the ball went over. Tech in turn was held for downs and the half ended.

The second half showed a slightly improved Tornado, but due to Tulane's big lead, the Jackets were forced to take chances, which failed to the tune of one touchdown and a safety, in the final period. Tulane kicked off and the Tornado brought it back to the 38-yard line. Cain was forced to punt here. The Green was held for three tries at their 30-yard line and was forced to punt. The kick was poor and the Jackets for the first time threatened to score, but the wave tightened and held them for downs. Tulane then punted deep into Tech territory and the Tornado failed to threaten again that day. The end of the third quarter found Tech in possession of the ball on their own 15-yard line where Capt.

Grey Devils Upset

(Continued from page 4, column 1)

buck for the score, Bowdon held and the ball went over. Bowdon punted out to midfield and again the Devil crew went deep into the visitors' territory. The scrubs tried to make the remaining distance via the air route, but the passer was rushed and thrown back on every attempt.

Coach Bud Harris, former Howard ace, put a hard fighting little team against Tech's Grey Devil outfit. In Shivers and Downing he has two backs who can cause a lot of trouble to any team they meet this year. Shivers was the greatest ground gainer on the field Friday night and the punting and passing of Downing was of no small caliber.

Little Ed Hall, Charlie Gooding, Bus Weatherford, Captain George Verieck, Bud Ritchie and Hawk Lawrence looked best for the Ramblers. Branch, DeLoach and Southerland played hard and flashed form on several occasions worthy of a varsity regular. Gooding did everything there is to do with a football. He ran, punted and passed, and did all three duties in excellent style. George Verieck, the Grey Devil captain, seemed to be in every play. His defensive work was outstanding and he ripped off several nice gains on reverse plays.

New Men Are Chosen

(Continued from page 1, column 4)
ation preceding the formal initiation for the new pledges and a few of last year's pledges, which have been carried over, sometime this fall.

The Kappa Eta Kappa fraternity will hold their National Convention, November 7 and 8, at the University of Kansas in Lawrence, Kansas. Mr. Bowden Palmer, secretary of the Zeta chapter will go as the delegate from the Georgia Tech chapter.

Georgia, 'Bama, Tulane Win

(Continued from page 4, column 3)

Liners of Maryland defeated their old rivals, the Virginia Military Institute's Flying Colonels 20-0. V. M. I. made no decided drives, and made but one threat, when they reached the Maryland seven yard line by a series of passes, but were held.

L. S. U. came out from the back of a losing streak in its game with the University of the South, 12- nothing, this being its first winning of a great conference game this year. Before a gala homecoming day crowd the drubbing was administered most heartily. A revised L. S. U. lineup added materially to the victory.

A rejuvenated Woolpack team representing North Carolina State College tasted its first conference victory in two years a week ago, when Red Cagle's Mississippi Aggies were turned back by a score of 14-0. The Wolfpack goal was not even once threatened.

Virginia Tech just managed to eke out a 20-19 game over Davidson last week, in a game full of all kinds of excitement. The teams were quite equally divided, and Davidson put up a good scrap.

William and Mary bowed down to Saint John's 7-0.

Dunlap had intercepted a Tulane pass. Maree's punt was short and the wave got the ball near the center of the field. Felts punted to Tech's 4-yard line. Dalrymple and Holland broke through and stopped Dunlap behind Techs goal for a safety on the next play. Tech 0, Tulane 21. Tulane got her last touchdown a few minutes later on an intercepted pass. Felts caught it on the Gold's 25-yard line and ran it over. Zimmerman added the point. This made it 28-0, and was the final score. The balance of the period and game was fought back and forth in the center of the field, neither team threatening.

Don Zimmerman, Tulane half, was the real star of the game. He made two of the Green's touchdowns, kicked one point after touchdown, and gained twice as much ground as any other man on his team. It is hard to name any outstanding man on the Tornado eleven. Both Jones and Herron fought hard, but fruitlessly against the green interference. Dunlap played a hard game as did Barron and Cain. Buck Flowers looked better on the punts than has any Yellow Jacket this season, and averaged over three yards per try through the line, but was in for a comparatively short time.

The Tornado did everything but look good last Saturday, and it is certainly evident that there has got to be a big improvement in every department of the game if the White and Gold expects to win the majority of the remaining games. It is certain that our coaching staff will do all in its power to make the improvements by the time of the Tarheel struggle at Chapel Hill.

NOTES OF SPORTDOM

STUMPY PLAYS WITH BROOKLYN

Stumpy Thomason former Georgia Tech halfback, has signed with the Brooklyn Dodgers, professional football team, it was announced today. Thomason, who established himself as a star in southern football and played a prominent part in Georgia Tech's 8-to-7 defeat of California at the 1928 Tournament of Roses game, will make his first appearance with the Dodgers Sunday against the Long Island Bulldogs.

(Continued from page 4, column 4) in not so many plays. Peterson and Peeler battered off 69 yards of the distance in a number of dashes, and Wink Davis, who graduated from the Purple Jerseys of Boys' High only a year ago but who has acquired, evidently, an active dislike for them in that short time, sliced off the balance to a touch-down. This time the kick was low, but 12 points is a dozen and a dozen is a lot when the opposition has none.

This Davis and Peeler, who ran the team expertly from his quarterback post and added yards to the Tech total by smart running, and Peterson, and Galloway, who played well both on offense and defense, led the Jacket marching attack behind a stout line. Laws and Lackey took over the leadership in that in the forward wall.

Willie Hutt, expressing an antipathy for anyone not in purple in every driving tackle and every pounding lunge through the line; Frank Smith, always threatening to break loose and often doing it; and Staley, a tackle who will make Dad Amis' heart leap next year when he joins the varsity squad, stood out among the fighting band who came from Furman with high hopes and left with the knowledge that they'd played a good game. They scored 12 first downs to 10 for Tech and fought the good fight all the way.

The lineup:

Tech Fr. (12)	Pos.	Furm. Fr. (0)

Furman Freshmen	0	0	0	—0

Beau Brummels

(Continued from page 3, column 5) all of us envy the man that it as Annapolis.

Whether it is a gathering over the week-end at The Carvel Hall, or a short breathing spell for a "dope" and a "fag" at Al Moores, or even an informal meeting in front of Tecumseh (a bronze figurehead in front of Bancroft hall) right after formation, the well-dressed midshipman will be seen wearing one of the several uniforms of the Navy. They are: Blue Service: Double breasted blue suits, 6 brass buttons, trousers without cuffs, white shirt and black tie, black shoes. White Service: Single breasted blouse, trousers same as above except white, white shoes. (Blue) Full Dress: "Monkey Jacket" double breasted, cut to the hips; trousers white without cuffs. "Whites": A nondescript, ill-fitting attire, resembling a nonship's uniform. This is used for seamanship drills and dirty work on the cruises. Blue and White: Blue coat and white trousers. Caps: White eight months of year, blue four months. Gloves: White, worn for dress and when on duty; grey, with overcoats. Swords: Worn by "stripers" at drill, and by Mid. officers on duty.

But when on leave the broad shoulders of the Cadet are emphasized by the styles that are prevalent, Hart, Schaffner and Max, Kuppenheimer, Brooks Brothers, Finchley or what have you contribute to the styles of the well-dressed midshipman on leave. The leaves are few and styles change practically every time that they have a chance for cits, therefore the cits play only a minor part in the wardrobe of the Beau Brummel of the Navy.

Social Life—Lots and lots of social activity are in the make-up of the regiment. This year there is a series of six hops, spread over the school term. These are open to the 1st, 2nd and 3rd class only. The plebes are out of luck as far as these are concerned. Then June Nite—the ball of balls—farewell to the 1st class, anchors aweigh to ports unknown—for comrades for four years a sad thought indeed, but on the eve before the graduation is June Nite and much merrymaking is in order. A warm June Nite, the placid waters of the Chesapeake, mellow strains of a wonderful orchestra, a maze of white uniforms, beautiful girls from every part of the universe—a picture that Dan Cupid must have had a hand in from the beginning. No wonder so many midshipmen annex a mate for life as the result of these dances.

The favorite pastime of the Midshipmen seems to be "running" plebes, and,

Orientation is Ended

The course in Orientation, a course for freshmen only, came to a close on Thursday, October 23, 1930, for the Engineering freshmen and on Friday, October 24, 1930, for the Commerce, Architecture, and Co-Op freshmen. This course is held primarily to acquaint the new men with the ways and customs at Georgia Tech. This is done by a series of lectures by the professors and important men at Tech.

The lectures for the course this year were:

1. Student Honor, by Professor Mor-ton.
2. Fraternities, by Dean Fields.
3. Grit, by Dean Fields.
4. Health, by Doctor McGhee.
5. If I Were a Freshman, by President Brittain.
6. The Three Cardinal Virtues, by President Brittain.
7. Importance of a College Record, by Mr. Caldwell.
8. How to Study, by Dean Skiles.
9. Sex Hygiene, by Doctor Bowden.
10. Spiritual Values, by Rev. Poteat.
11. Lectures on the three main

gee, how they are "run." Ratting at Tech is paradise compared to "running" at Annapolis. Talking, sometimes football, and sometimes just talking, bulling, boning, sailing boats, and drilling (quite, yes, quite popular), seem to occupy the minds of the Midshipmen when they are not busy with studies.

Leaves are an event and are looked forward to with much gusto. The Christmas leave consists of the days of heavenly freedom. After the Penn game there is an overnight leave in Philly. That's all, and we gripe about the fewness of holidays at Tech.

Lucky Strikes seem to be the most popular fag at the Academy while pipes run them a close second due to a little trip to Scotland Mr. Dunhill thrived on the Academy.

Sorry we couldn't use North Carolina this week, but without an answer to our questionnaire it is impossible to write them up. Hope this won't happen again.

Next week—Vanderbilt University.

Depression Hits Part Time Work Students

The once "cloistered" college is today getting experience of trade depression and unemployment at first hand. Many students accustomed to earning part of their expenses are up against a bleak outlook for the year owing to the sharp decline of jobs in the summer, and the drop in prospective part-time work now available.

Students have made their way into some businesses in droves. The department stores in New York City employ hundreds of college girls on Saturdays and at rush seasons as extra clerks. Theaters call for batches of college men as "supers." Post offices engage them as extra clerks at busy seasons. Libraries employ them regularly, and large companies use them as filling station attendants, extra factory hands, train conductors, and statisticians.

Altogether the earnings of students last year amounted to over twenty-six million dollars. The break-down of many industries in which students previously earned considerable, has placed a great hardship on many.—N. J. C. Campus.

courses by the heads of the departments.

Dean Fields, Dean of Men at Tech, was in charge of this course. While talking to him the other day he said, "The Freshmen Class this year is the most cooperative group and has followed out instructions better, than any group which has taken this course since I have been in charge of it, which has been for the past six or eight years. There were also fewer absentees this year than any year since I have been in charge of it." This speaks well for the present freshman class, and gives the impression that it will develop into a very important class before it graduates.

The freshmen all end this course with the feeling that they have derived many benefits from it, and that it will help them greatly in their future life at Tech.

National Student Federation Schedules Four Debate Teams

Four university debating teams will arrive in New York Oct. 21 to undertake extensive tours arranged by the National Student Federation of America, meeting over 100 colleges and universities in debate, mainly on questions of international interest.

The teams will come from Cambridge, the National Union of Students of England, corresponding to the N. S. F. A. in America, the Scottish universities and the National Union of Students in Germany. This will mark the first year that a debating team has been brought to the states from a non-English speaking country. The debaters will, however, use English as their medium.

The questions for debate were proposed by the visiting teams in large numbers, and a committee of coaches made a selection of four or five questions upon which the teams will be prepared to debate. Such questions as: "That Great Britain should immediately grant Dominion Status to India," and "That the emergence of woman from the home is a regrettable feature of modern life," will be debated by the Cambridge team.

The German team will discuss such questions as: "That the Young Plan cannot be the final settlement of the reparations problem," and "That the foreign indictment of American culture is justified." The Scottish team will meet Bates College in a special debate over the National Radio Broadcasting

Company on the question, "That frugality is not a virtue." Their other questions deal with nationalism, democracy, and mechanical progress. Taking a divided position, the English Universities Team will discuss the resolution: "That this House deplores the increase of Socialism in the modern world." They will also consider the tariff problem, the machine age, and the Federation of Europe.

The teams are scheduled to appear in various parts of the country, Cambridge taking the Middle West and South, the Scots centering in the East, the Germans in the North East and Middle West, and the English Universities team on the Pacific Coast.

John M. MacCormick, of Glasgow University, on the Scottish teams, has carved for himself a prominent position in public life at the age of 25, having organized the Scottish Nationalist Association, which came within 66 votes of defeating Stanley Baldwin with its candidate. MacCormick is known as "King John", and is the first Nationalist Parliamentary candidate to be adopted in Scotland. His colleague is from Edinburgh, where he held many student offices, and took a leading part in sports.

The debaters on the other teams have all taken leading roles in local and national student activities, and are regarded as powerful speakers and thinkers.

Chemical Engineers Hold Informal Smoker

F. J. Coleman Speaks

In a most interesting talk before the members of the Tech branch of the American Society of Chemical Engineers, Mr. F. J. Coleman, the National President of the A.S.C.E., related some of his experiences. Mr. Coleman is on a tour of the various sections of the A.S.C.E., his entire job being to travel and address the students representing the organization in different parts of the country. On last Thursday morning, Oct. 16, Mr. Coleman paid a visit to Tech, addressing a gathering of students in the Mechanical Engineering Building on the subject, "Foundations." Following the talk to the Tech A.S.C.E. members, at the Atlanta Athletic Club a banquet and informal smoker were held, at which pipes, cigars, cigarettes were furnished free. Practically the entire Tech chapter was present.

Westinghouse Displays World's Smallest Motor

What is believed to be the world's smallest synchronous electric motor is shown by C. E. Skinner, Assistant Director of Engineering for the Westinghouse Electric and Manufacturing Company. About the size of a hickory nut, it runs on ordinary house current. Its rating is approximately one-half cricket power.

This motor is used in delicate devices which require a constant speed with very little power.

Even brain-workers and frat-house fans get "ATHLETE'S FOOT"

YOU don't have to be an athlete to get "Athlete's Foot." Men who do their daily dozen in the library giving the old bean a big workout; and the boys who do a mental marathon in class but never try for the track—as well as those who really do give their muscles to Alma Mater—any and all are just so much good red meat to the tiny germ which has spread this ringworm infection everywhere. *Tinea trichophyton* is its name and it's the cause of "Athlete's Foot."

In universities from Pennsylvania to California, it has been found that 50% of the men have it. The U. S. Health Service has reported that "at least half of all adults suffer from it at some time." Co-eds are not immune from this trouble, either.

It lurks in the very places where we all go for cleanliness and health—on the edges of swimming pools and showers—in gymnasiums—on locker- and

Physical Culture Class Conducted for Students

Mike Miles in Charge

The newest addition of physical culture on the campus is the gymnastic training given by Mike Chambers from eleven to twelve o'clock on Tuesdays and Thursdays.

There are seventy pupils in the class, and each one gets a real work-out twice a week. These boys were unable to gain admission to the Navy or Army units due to some physical defect.

Each boy receives the type of exercise required in order for him to overcome his physical trouble. Some of the boys are crippled, some are unable to see well, others have difficulty in hearing and endurance, and there are several other minor cases, all of which this training will help and probably cure.

Mike is certainly doing some wonderful work with these boys, and it is very unfortunate that more of us cannot be benefitted by it.

A good paint job will conceal the years, but the lines tell the real story. Wherein a modern girl and a car are very much alike. — Mars College Hill-top.

Dr. Poteat of N. C. State Addresses Students

During the past week Doctor E. McNeill Poteat has given a series of lectures to freshmen, fraternity men, and faculty members. Doctor Poteat came as the guest of the Tech Y. M. C. A., and his lectures were of an inspirational nature to the students attending. In his lectures, he featured his career as a football player in Carolina, and his later life as a student, traveler, lecturer, and finally as a professor in Shanghai University where he spent twelve years.

Doctor Poteat addressed the Blue Ridge Conference last summer and all Tech men who heard him there were glad to again have that opportunity. Doctor Brittain rates him as the foremost young thinker and pulpit orator of the South and stated that Tech was very fortunate to obtain his services for an entire week.

Doctor Poteat is at present the student pastor at North Carolina State College and is very interested in the welfare of students throughout the country.

Dr. Brittain Entertains At Reception

A very enjoyable reception in honor of the new professors and wives, was given by the Tech Woman's Club, Tuesday evening, October 21st, at the home of Dr. Brittain.

The Tech Woman's Club was formed by the wives of the Professors of Tech, and is carried on by them in order to have social entertainments and in order that they may keep in contact with one another.

The reception lasted from eight-thirty till ten-thirty and was a great success. The receiving line consisted of Dr. Brittain, Dean and Mrs. Skiles and Prof. and Mrs. H. W. Mason. Mrs. Mason is President of the club and has certainly proved herself a valuable member.

Invitations were extended to all members of the faculty and their wives and nearly all were present. There were about one hundred and sixty attending the reception.

The house was beautifully decorated with white and yellow chrysanthemums and to perfect the Tech color scheme, there were platters of white and yellow mints placed on the tables.

The new members of the faculty and their wives were welcomed and after introduction had been made and everyone knew everyone else, a very enjoyable evening was had by all.

SPEAKING OF COLLEGE BANDS

The Trojan band of the University of Southern California takes the lead on the Pacific Coast with 150 playing members. Its colorful uniforms and "bag of stunts" have evoked considerable comment this season. The Washington State band has increased its membership from 50 to 100, and is wearing the new type uniforms designed last year.—Oregon State Barometer.

Architectural Society Stages

(Continued from page 1, column 5)

"Theory of Design," to Mr. H. W. Phillips. This book is presented to the Sophomore who made the highest average in his Architectural subjects in his freshman year. Mr. Philip's average in these studies was 93.3.

The last speaker was Dr. Brittain. Everyone was very pleased to have this chance to hear our "Silver Tongued President" speak. He gave a most interesting talk on Architecture and the honor which this department has brought to Georgia Tech. At the conclusion of this talk, everybody adjourn-

ed to the hall where refreshments were served.

The following new men were elected to the society: G. D. Barret., A. L. Haskins, K. C. Smith, C. C. Galloway, Frank Hall, Tom Harmon, Scott Ritter, John Maddox, Jimmie Griffith and Earle Wolfe.

Sport Glances

that Kentucky common because it is going to pay big dividends this week end. Unload all the consolidated Crimson Tide that you have in your possession and sink the roll in Kentucky common. In spite of the down-

ward trend of Yellow Jacket preferred, he advises heavy buying because he says Yellow Jacket is due for a rise this week-end.

When asked about that new issue of Old Miss common, he advised buying outright because of the turn which was taken last week. He believes the sky is the limit now and he says Vandy will be sacrificed by the big boys in order to drive the Ole Miss issue to the top.

He advises Clemson as a good investment this week-end if you have plenty of margin. He thinks that Tennessee has about reached its highest level and from now on it will be on the downward trend.

Georgia School of Technology

"A Technical School With a National Reputation"

THE GEORGIA SCHOOL OF TECHNOLOGY offers to young men of ability and ambition a training which will fit them for positions of responsibility and power.

The national reputation of this institution is based not on claims, but on results. Its greatest assets is the record which its alumni are making in the productive work of the world. Georgia Tech graduates succeed because they have been trained both to think scientifically and to work efficiently.

Courses in Civil, Electrical, Mechanical, Textile, General, Ceramic, Chemical, and Aeronautical Engineering, Architecture, Commerce and General Science

Timken Heavy-Duty Mill Type Quad Bearings 29½" bore, 46½" outside diameter, 29" width. Capacity 7,000,000 pounds.

"Man Who Has Done the Most for His College"

THE better you feel, the more you can do for yourself as well as everyone else. The "senior who has done most for his college" is the one who always has the energy and strength to put things over.

Shredded Wheat helps you to lead in campus activities. Two Shredded Wheat Biscuits swimming in whole

milk every morning will put you on your toes for the business and pleasure of the day. It gives, in readily digested form, all the food elements essential to a nourishing vitality-producing breakfast.

SHREDDED WHEAT

Timken Bearings are Licking the Toughest Jobs in Industry—Hence their Vital Importance to Student Engineers

Sweeping on and up with an irresistible rush, Timken Bearings soar to greater and greater heights of achievement as they are pitted against the toughest jobs that Industry can produce... upsetting all preconceived ideas of production and production costs—revolutionizing anti-friction requirements... brushing aside old theories and traditions to make way for new standards of anti-friction efficiency, economy and endurance.

Terrific pressure loads such as are met in steel rolling mill service—as high as 7,000,000 pounds, are being carried by Timken Bearings in many of the country's largest steel plants.

Hair-breadth accuracy such as is demanded by the finest precision machine tool work is maintained as a matter of regular daily routine.

And thrust and weight and shock—no matter how severe, are handled with equal capability and sureness whether encountered in such widely different types of heavy duty service as automobile operation, paper mills, transcontinental limited trains, oil field equipment or any other kind of machinery.

Wherever wheels and shafts turn, "Timken Bearing Equipped" is the modern symbol of protection and saving.

Student engineers of today must be prepared to carry on in industry's war on waste, and they will find "Timken Bearing Equipped" one of their most potent weapons—the modern symbol of protection and saving wherever wheels and shafts turn. The Timken Roller Bearing Co., Canton, Ohio.

TIMKEN Tapered Roller BEARINGS

Yellow Jacket Appears On Campus

"The Opening Number" was the name of the first issue of the Georgia Tech Yellow Jacket which made its initial appearance this year on the campus last week. Filled with a fine variety of newly inaugurated feature columns, the Yellow Jacket points to a year of unusual popularity, and recognition as the outstanding collegiate comic in the South.

The page devoted to verse was thought especially interesting, as was the "New Books" page, both appearing for the first time in the Yellow Jacket.

The jokes and exchanges were acclaimed universally on the campus as "better than ever," and the art work was admired by many.

The art editor's fine workmanship, the business manager's 3,000 copies (more than ever before) and the editor's introspection of what the students like, clearly indicate that the Yellow Jacket of 1930-31 is in able hands.

N. E. Harris Bust Presented to Tech

A bust of Governor Nathaniel E. Harris, founder and life long friend of the Georgia School of Technology, has recently been presented to Tech. The bust is now in Dr. Brittain's office where it awaits the arrival of Mrs. Harris who is to be the first person to see it. After she has seen it, the decision will be made as to whether it will be placed in the school library or in Harris Dormitory.

The bust is the work of F. P. Zimmer, 659 Delmar Avenue, Atlanta, Georgia, and was done under his direction in Germany. Mr. Zimmer has gained fame both in this country and abroad as a sculptor, and it is said that the Harris memorial is particularly a fine work of art.

Georgia Tech is indeed fortunate in securing such a fitting memorial of its greatest friend.

Miss Cheatham, Long Ill, Soon to Return

The Commerce Department has been without the valuable leadership of Miss Mary Cheatham since she had to drop out for awhile on account of illness. Miss Cheatham has been out of school for five weeks, but is expected to return within two weeks.

Miss Cheatham is secretary to Dean Noel, and also teaches several classes of typing and office appliances. Besides this, she also has classes at evening school. Thus we see that she takes a large part in college work.

The vacancy created by Miss Cheatham has been filled by a very competent person, Miss Blackman. She has been aiding the freshmen, and her work is greatly appreciated.

Jackets Migrate

(Continued from page 4, column 2) runners in the South. Then, there is the powerful manager, the elusive Slusser and Branch, and Maus, House and Erickson, all veterans, and a brilliant sophomore named Chandler.

Johnny Branch needs no introduction to the Atlanta public, for it was no other than he, who defeated the Jackets single handed last year. He has so far been unable to show his old form of last year, but is still considered a dangerous back by opposing teams.

Jim Magnér and Nash shared honors with Branch last year in defeating Tech. Manger was suspended by Coach Collins before the Tennessee game, but he will no doubt see action against the Jackets.

Of the five games in which Tech and North Carolina have met, Tech has won four. In 1915 Tech won 23 to 3, in 1916 by 10 to 6, in 1927 and 1928 by 13 to 0 and 20 to 7. Last year Carolina ran through the Engineers 18 to 7.

The Georgia Tech Cotillion Club will meet at the "Y" at seven o'clock, Thursday, November 6. Election of new men will be held, and all members are urged to attend.

Minnesota Opens New Omnibus College

As another step toward developing the needs of the individual student of exceptional ability, the administration of the University of Minnesota has instituted an experiment to be known as the "omnibus college" this year.

Heretofore, students registering at any college of the university, were obliged to fulfill the prescribed curriculum of that college, not being permitted to select electives in any other col-

lege. Some students found that their objective demanded that they take courses in several different colleges, and that their college work was seriously hampered by this ruling.

The "omnibus college" has been established with the purpose of giving more freedom to the exceptionally intelligent student, who knows what he wants, and has a definite objective in mind, according to Dr. John T. Tate, professor of physics, chairman of the committee of 22 campus educators who are directing this college.—Minn. Daily.

Matson and King Heard By A.S.M.E.

Professors King and Matson, of the Mechanical Department, were host to the officers and chairmen of various committees of the A. S. M. E. student branch at the Tech dining hall on Oct. 21. The event took place in the President's dining room on the mezzanine floor.

The purpose of the affair was to draw the officers closer together with the faculty advisors, and to discuss

plans for the future. Professor Matson gave a number of suggestions that will prove to be beneficial. Bill Miller, president of the student branch, discussed his plans for hoking this the most successful year in the history of Tech's oldest engineering society. Suggestions of approval and criticism were offered by the other officers in a round table discussion.

Those present were: Jimmy Minter, E. P. Jones, Harold Breedlove, J. W. Parker, A. Newcomer, and Dick Treverton.
