Undergraduate Student Government Elections Presidential Candidates

Adam Bernstein
USG Presidential Candidate

Major: Computer Science
Class: Fourth Year
Campaign Website: www.votebernstein.com

SGA Experience
Computer Science Representative
Undergraduate Judicial Cabinet
Academic Honor Committee
Academic Integrity Committee
Publications Board
Service on 4 SGA Committees

Other Experience
FASET Leader
Peer Leader/Advisor
Alpha Epsilon Pi
Homecoming/Greek Week Committees
Georgia Tech Chapter of the Association for Computing Machinery
Lambda Sigma: Treasurer
Psych 100 Team Leader
Sting Break Concert Committee (April 8th 2004, Fuel)
Gamma Beta Phi

Platform
We are ONE Institute. We are ONE Community. There Is ONE Way To Vote. This defines Adam Bernstein's platform: to unite the Georgia Tech campus behind ONE candidate who believes in making Georgia Tech number ONE in academics and number ONE in student life. As President of the Student Government Association, Bernstein has made a personal commitment to the students of Georgia Tech to make Student Government proactive and as diverse as the student body. He plans to hold weekly office hours, host '**Complain to the President**' days, return e-mails and phone calls within 48 hours, meet with **the Presidents of other organizations** once a month to discuss relevant issues, and maintain a list of initiatives Student Government is pursuing on the SGA website. His vision is to have students understand what SGA has to offer and how it can help.

Institute Issues
There are a number of Georgia Tech policies and procedures Bernstein would like to see changed. He advocates having a more diverse group of students sit on **the Institute Wide Committees** that determine much of Georgia Tech policy. Additionally, he envisions the future academic class at Georgia Tech as a dynamic entity where students **evaluate the class periodically** throughout the semester and the class adapts to the strengths and weaknesses of its students. This will also allow for improvements in the **effectiveness of TAs** so that students do not have to work with a TA that never has a clue what was taught in class that week. He also wants to see **more academic support** for three thousand and four thousand level classes, **faculty mentors** for small groups of students, and **increased faculty/student interaction** by adding a value or service component to the curriculum.

Student Life
Bernstein feels a top-rated school should offer top-rated services. He has identified a list of services that need to be maintained or improved. Bernstein will push for the implementation of the Leadership Certificate and Extracurricular transcript despite the budget cuts. He wishes to see the Music Department offer a more diverse curriculum and work in improved facilities, including the possibility of a new building. The CRC needs to have a section on its website that allows intramural teams to find other groups to scrimmage against. The Student Center Commons needs to offer its services up until midnight, including a late night coffee shop. The Post Office can increase its services to be on par with other Post Offices across the nation. Lastly, Georgia Tech can offer more avenues for Tech students to express their pride and love for Georgia Tech, including Gold and White Days and drawing on the Student Center windows.

Closing
Adam Bernstein is the only candidate who possesses the necessary characteristics to represent student opinion effectively in combination with proposing new ideas and implementing a transparent and accessible Student Government. He does not make redundant promises that will happen next year no matter who the President of Student Government is. There really is only ONE way to vote.

Bernstein's website, **www.voteBernstein.com**, has many more details about his background and platform. He can be e-mailed at gte706u@mail.gatech.edu with questions or comments.

Ashley Case
USG Presidential Candidate

Majors: International Affairs/Modern Languages
Class: Second Year
Campaign Website: www.change-of-pace.net

Platform
I observed SGA over the past years and my hopes for the interaction between the students and "their government," which serves as a liaison voicing student concerns to the administrators, were not met. Student Government must be more connected to you and your wishes.

As I became more involved in the inner-workings of SGA as class president, legislative representative, institute-wide committee member, and advisory member, I realized the incredible resource the students could have in SGA. I am convinced that if the students were truly aware of the differences they would see on campus by further utilizing SGA, Georgia Tech would be a more fulfilling experience to many people.

I feel that my connection to the student body lies with my involvement on campus in such things as GT Tours, Housing Staff, the Greek community, Ambassadors, Ivan Allen College Student Advisory Board, Freshman Council, Drama Tech, and my major – International Affairs and Modern Languages. Also, you can find me at many sporting events – I am a huge baseball fan. If I don't know how to take care of your needs, I am capable and very willing to help you get in touch with someone who does.

Of course there are things that I personally want to see SGA do for you, such as an extended weekend to study before finals. Many of our peer institutions (UGA, MIT, Cal. Tech) have one or two days off at the end of Dead Week. This gives them a longer time period to prepare for the stressful week ahead. We are competing with these students for graduate school entry, yet they have a significant edge over us because of the extra time allowed to them. Georgia Tech also needs a similar structure for a more complete preparation for exams. Perhaps the last days of Dead Week could even be used for optional review classes.

I believe every Tuesday and Thursday from 11-12 p.m. should be open for student organizations to meet. I will work to ensure classes will not be scheduled during this time so student organizations can have a time when most members should be able to attend.

The institute, as well as students, would benefit from a more well-rounded education through the expansion of Ivan Allen College. The institute would see an increase in national rankings and students will be able to present themselves as more diverse graduates from a technical institute.

If you are interested in hearing about more thoughts and ideas, please visit http://change-of-pace.net/platform.html. But, most importantly, I want to hear about what YOU need. This is your government – do what you want with it.

I'm a hard-worker, very organized, a great listener, and incredibly passionate about Tech and everyone apart of the special culture we have here. I would greatly appreciate your support for Student Body President. Thank you.

Ryan Johnson
USG Presidential Candidate

Major: Industrial and Systems Engineering
Class: Fourth Year
Campaign Website: www.smiles4pres.com

SGA Experience
I am currently the Co-op Representative in the Undergraduate House of Representatives, and I serve on the newly created Georgia Tech Lobby Board.

Platform
If elected SGA President I plan to lead the SGA on a campaign to make Georgia Tech a happier and more fun place to live and work. The issue of the student's happiness is at the core of my platform because I believe student's morale and Tech pride need a considerable boost.

I don't want to sound moronic when I say I want happier students. Happier students get involved more; they get better grades; they buy more goods and services, which are all good for this campus.

I am not your typical SGA-minded individual. I represent the fresh perspective. I represent the common student, the everyday student. I am the only engineer on the ballot. I can also admit that I am not perfect. I have retaken classes here, and seen the unglamorous side to Tech—as well as the glamorous. I have learned from my faults and grown the wiser because of them.

Because I come in with a fresh perspective, I also come into this with more enthusiasm and the will to do more. I want people to get fired up about being at this school!

Whenever someone asks me, "How's Tech?" unfortunately, the first thing that comes to mind is that, "It's hard." or "It sucks." I need people to say, "It's fun. There is a lot going on. I'm having a good time here." To do this, we need to cut programs that have wasted the student's money in the past with poor attendance or lack of interest. We need to initiate plans to get people outdoors and enjoying themselves more. Ideas like mass barbeques before football or baseball games could be done.

I want people to be able to express themselves in whatever form they want. Let's have Art/Music Appreciation Days. This school is very conservative by nature. I don't want to see talent stifled or go dormant for the four years you're here by all of the technical work we do.

Do you know why MTV doesn't come to our campus and do Campus Invasion or Campus Crawl? Do you know why local radio hosts think of our school as a place where "a bunch of dudes hang out?" We have a reputation of being a bunch of guys who study all the time. Although there are those few, a majority of us appreciate a good time and enjoy quality entertainment. I am here to change our image and stop the bookworm stereotype. When concerts come to campus or we have GT Night at places around Atlanta, it will be the "thing to do" that night.

I also don't understand it when people talk about how they desperately need to graduate. They need to "Get Out" as soon as possible. NO YOU DON'T! The college years are supposed to be the best time of your life. Experience everything. Study abroad and co-op are good ways to start. Your time here is precious, and you have your whole life to work. Vote for me, and I can guarantee the best times of your life next year.

I will be an energetic, receptive, and imaginative President that will work to improve social events and student's rights concerning academics. My leadership style is one of honesty, frankness, aggressiveness, all encompassed around my
love for Tech. I have real world experience, and my attitude and work ethic are what sets me apart from others.

In this short synopsis of my campaign I cannot say everything I want, so please take some time to visit www.smiles4pres.com for more information.

Undergraduate Student Government Elections Presidential and Vice-Presidential Candidates

Amy Phoung
USG Presidential Candidate

Major: International Affairs
Class: Third Year
Campaign Website: www.amy4pres.com

SGA Experience
UHR Treasurer- Exec Member
Junior Class President
Joint Finance Committee
Student Center Governing Board
Buzz Port Steering Committee
Honors Recognition Program Committee
Women's Resource Advisory Board
Sophomore Class Representative
Campus Services Committee
Public Relations Committee
Governmental and External Affairs Committee
Student Involvement Ad-Hoc Committee
Up with the White and Gold Committee

Other Experience
Special Events Intern at Leadership Atlanta
FASET Master Leader
Housing Community Advisor
Executive Round Table
Tech Beautification Day- Director of Fundraising
Homecoming Committee
Campus Civitan- VP Membership
Team Buzz Projects Committee

Platform
Leadership is seen through honesty, integrity, examples, and effective results. Throughout my career at Georgia Tech, I have already made strives in improving the quality of student life. Such examples of my dedicated efforts include class unity events such as "Juniors @ Junior's," providing student organizations with a tool of fundraising methods and resources, aiding in executing "GT Night @ Six Flags," maintaining free sporting tickets for students, designing effective ways to increase advertising and storage space, and finding methods to increase overall student involvement.

As SGA President, I will focus on issues that matter most to students throughout the year and work with a strong team of leaders to achieve these real, action-oriented goals:

Increase Student Life Initiatives
1.) Improving GT Night @ Six Flags by running all major rides at full capacity, allowing season pass holders free admission with a student ID, and making the ticket distribution more effective.
2.) Maintain and bring other Student Life Initiatives such as Picnic in the Park (Free Lunches on Skiles), Bigger Campus Wide Concert, Movie on the Lawn, and Diversity/Cultural Events
Improving Services on Campus
1.) Working with the Parking Department to establish an Online Payment of Parking Tickets, develop a system of 15-minute warning tickets, build a system to voice student concerns on parking and transportation
2.) Alleviating the problems with campus space reservations by providing a centralized location/system of reserving campus space (banners, chalking, rooms)
Continuing Relations with the Athletic Association
1.) Maintaining FREE Football and Basketball Tickets for Students
2.) Assuring adequate student seating at games
Advancing Academic Excellence
1.) Increasing the number and quality of campus wide study areas
2.) Pushing Drop Date Back
Aiding Student Organizations to meet their goals
1.) Ensure that student organizations are a funding priority
2.) Establish electronic advertising space on campus
3.) Create a resource center for student organizations that includes office supplies
Maintaining Campus Safety
1.) Increase lighting in various campus areas
2.) Improve the quality of safety in parking decks

I AM Your Voice
To meet the needs of students, I will dedicate my time to actively seek the opinions and input of the student body and effectively direct an administration to initiate and implement changes. I will continue the successful campus-wide surveys we implemented this year and provide students with an easy, online system of voicing their concerns, needs, and issues. I will actively listen to all students and build a bridge from the students to all facets of campus and the administration, and I plan to push for more diverse student involvement with SGA.

Experience Matters
I have the knowledge of working with several past SGA Presidents, the experience as an SGA Executive Officer, the proven leadership through several campus positions, the networking skills with influential leaders outside of Tech, and the established, professional relationships with several administrators, faculty, and staff across campus. Not only am I experienced but most importantly, I am dedicated to truly meeting the needs of the student body and will constantly follow through on the promises I set forth.

Abi Hung
USG Vice-Presidential Candidate

Major: Mechanical Engineering
Class: Third Year
Campaign Website: www.abiforvp.com

SGA Experience
I feel I can really combine my experience from various organizations with my new ideas, passion and enthusiasm to foster a renewed SGA. My freshmen year I was involved with FreShGA, where I worked to add options to meal plans and helped create Tech Trivia. This year I am the Mechanical Engineering Representative as well as the Campus Service Chair.

As ME Representative I co-authored bills for GT Motorsports, Up With the White and Gold, ACUI 2004 International 9 Ball Tournament, the ASME National Conference, as well as the Students of Objectivism Conference.

As Campus Service Chair, I've tried to perfect and better publicize the GT Booktrade. I have also worked to better the online appointment service for the Health Center. I am currently working with Housing to create additional swap days, with Auxiliary Services to get additional cameras in Curran Parking Deck and expand BuzzCard usage, and with the library to amend the cell phone policy. I also sit on a number of campus-wide committees that deal with Housing and the Health Center.

Other Experience
Outside of SGA, I am involved with President's Council Governing Board, Up With the White and Gold, ASME, the Filipino Student Association, and the LEARN Mentoring Program. I have previously been involved with the Student Foundation Investment Committee, the Women's Leadership Conference, the Housing staff as a Peer Leader, the programs committee of RHA, and the Freshmen Activities Board as both a member and advisor.

Platform
As Executive Vice President, my main function would be Chair of the Undergraduate House of Representatives. My first action would be to arrange the agenda so individuals being appointed or students representing an organization being chartered are allowed to speak first. Following would be organizations requesting allocations with a representative present and, finally, internal SGA issues would be discussed last. I would also like to enforce time limits on all speakers in hopes that our meetings progress with less redundancy.

Most importantly, I want to ensure that each representative is really vocalizing the opinions of their constituents. I want to encourage and facilitate all major representatives to meet with their administration to ensure that all departments are providing for their students professionally, academically, and socially. To promote class unity, I will also encourage all class representatives to plan unique programs for their peers.

I also have a broad range of campus wide initiatives that I feel will better the campus as well as the overall Georgia Tech experience. I would like to continue working on the issues I have started as Campus Service Chair. I would also like to work with Auxiliary Services to bring a better atmosphere to the library with a more social relaxing area. Academically, I hope to encourage each department to provide a study area for their students in their respective academic buildings.

I have a number of other goals for the upcoming year and I hope you will visit my campaign site, www.abiforvp.com. Remember elections are March 29, 30 and 31. And don't forget to get HUNG UP ON HUNG! VOTE Abi for VP!

Hunter Oates
USG Vice-Presidential Candidate

Major: Earth and Atmospheric Sciences
Class: Third Year
Campaign Website: www.prism.gatech.edu/~gtg375a

SGA Experience
I have been involved with SGA for the past 2 years, serving as the EAS major representative. During my terms as a representative, I have served on the Joint Campus Organizations Committee, the Public Safety Committee, the SGA Awards Committee, the House Advisory Committee, numerous conference committees regarding bills and have acted as Parliamentarian in House meetings. I am a very active participant in SGA meetings and functions, including assisting with GT Night at Six Flags, Ramblin' Nights programs, meetings with officials such as Lt. Gov. Mark Taylor and many others.

Other Experience
Other activities that I participate in on campus include the Georgia Tech Chorale, the Georgia Tech Wesley Foundation, Anime O-Tekku Club and ORGT. I have served as the Vice President of External Affairs for the Chorale for the past 2 semesters. I am also the incoming President of the Wesley Foundation for the Summer '04 semester. Currently, I am employed as a research assistant for Dr. Ellery Ingall in the EAS department.

Platform
As Vice President, I will work hard to make a better, more efficient Student Government. I plan to initiate a series of procedural reforms within the House as to enhance the performance of SGA. These changes include: a more rigid debate structure, representative training in parliamentary procedure and protocol for Q&A sessions with organizations before the House, up-to-date financial reports for every meeting, and by-law amendments mandating appointment dates for critical committees such as JCOC, HAC and JFC.

Issue meetings will return, this time resulting in plans of action, not just spoken words. I plan to utilize the incoming caucus system to the fullest extent, allowing for more direct interaction between the Student Body and the representatives. I will also work hard to bring about a new camaraderie between House members. As Vice President, I will also strive to minimize friction between the Graduates and the Undergrads. All these and more will bring about an improved SGA which will be a benefit to us all.

If elected, I will strive to improve Georgia Tech, which has given me so much. Issues that I will tackle as Vice President include; support for the music programs at the Institute, expand the Public Safety Committee so that students have a greater say in the security of their community, pushing for a kinder, gentler Parking Dept. and making sure that Dead Week stays dead. Funding for student organizations will be a top priority as well.

As Vice President, I will give my full support to the issues that the President deems top priority. If elected, I will endeavor to make it possible that every student can be heard regarding the issues that will face our Student Body through e-mails, a grievances and issues forum, office hours with SGA members and any other communication means necessary. Together, we can, as a fundamental principle of camping states, leave Georgia Tech better than we found it.

Undergraduate Student Government Elections Vice-Presidential Candidates

Lamar Stewart

USG Vice-Presidential Candidate

Major: Industrial and Systems Engineering
Class: Third Year
Campaign Website: www.lamar4vp.com

SGA Experience
 SGA (Member-At-Large)

Other Experience
 GT Ambassador
 Lambda Delta Chapter of Kappa Alpha Psi
  Fraternity, Inc.,(Vice President)
 National Society of Black Engineers
 African American Student Union
 Office of Minority Education and
  Development Team Coach

Platform
I am running for Vice President to make a difference. When I initially got involved with SGA, I never dreamed of running for an office like Vice President. But as I became more involved in the organization, I saw areas that needed improvement. I know that as the Vice President I can ensure that the organization will accomplish some much needed changes. This role will allow me to express my ideas and implement strategies and initiatives that will improve the quality of life for all Georgia Tech students.

¨**Lamar's Four Points of a Diamond**¨

1) Defending the Quality of an Undergraduate's Education
With the current state of the economy and Georgia Tech's impending budget cuts, SGA must take an active role in ensuring that students' educational needs are not neglected. My vision is to create a more advanced and in depth version of the Lobby Board. The Lobby Board would be responsible for: Monitoring the upcoming bills in the Georgia General Assembly and their impact on Georgia Tech. Lobbying Congress members, the Board of Regents, administrators, and faculty to maintain current funding for undergraduate education. Increased correspondence to Congress members that would include letter writing campaigns and campus invitations to express campus concerns Georgia Tech students work to hard to have their education diminished in any way!

2)Fighting Budgets Cuts to Student Organizations
Due to the recent funding requests from departments that provide student services, most notably the Campus Recreational Center (CRC), there has been serious debate regarding significantly reducing funding for student organizations. My vision is to actively pursue alternative funding options such as: Alumni donations and sponsorships Corporate sponsorships Use of the Student Life fund Georgia Tech should not use the easy options (i.e. increasing student fees or cutting students organizations' budgets) without looking first at alternative options. Student organizations should not bear a disproportionate reduction in funding under any circumstances.

3)Enhancing the Relationship between Georgia Tech and Incoming Students
Although the transition process at Georgia Tech is better than most schools for incoming freshmen and transfer students, there are areas that need improvement. My vision
is to help incoming students to: Develop a "hands on"process for introducing students to the Georgia Tech community Providing a "Helper" or "Buddy" to assist with financial aid, transferring credits, tutoring, class selection, parking tips, and general campus questions While FASET, Freshman Experience, Peer Leaders, as well as the school departments give assistance to this process, many students still feel abandoned when they arrive to an urban campus like Georgia Tech. This process will consist of pairing a student up with people who have an overall knowledge and love of Georgia Tech to assist them in their transition to a full campus life.

4) Improving the Efficiency of the House
There has been improvement in the House's Productivity over the past year, but there are two areas that will increase productivity in the House. My vision is to: Implement mandatory workshops for all undergraduate House members and to ensure that caucuses are conducted effectively and efficiently SGA should be operated more like a business. With a $3 million budget to manage, representatives need to treat House meetings seriously at all times because it is, hypothetically, a "business."

Will Welch

USG Vice-Presidential Candidate

Majors: International Affairs/Modern Languages
Class: Second Year
Campaign Website: www.willwelch.com

Platform
Foster Cooperation Between the Executive and Legislative Branches
As both a committee chair and a house member, I have had the opportunity to work with extensively within the executive and legislative branches of SGA. As Vice President, I would work to ensure that the House and the student body are aware of all initiatives being undertaken by SGA and are able to voice their opinions to the executive branch through direct channels.

Ensure the Success of the SGA Student Lobbying Board:
I am currently Co-Director of the SGA Student Lobbying Board (Lobby Board), an outgrowth of SGA's Governmental and External Affairs Committee, of which I am chair. Georgia is facing severe budget crises that are likely to soon have an impact upon every student at Tech. After having co-founded Lobby Board, I, along with the other members of the Governmental and External Affairs Committee, have taken a very active role in deciding the future direction of the organization. We are currently developing the methods by which we will contact legislators and get them to weigh heavily the concerns of the Georgia Tech student body when they cast their votes. In my opinion, ensuring the viability of Lobby Board is one of the pressing concerns of SGA, and, with my intimate knowledge of the organization, I feel that I am in a unique position to positively affect the group through the vice presidency.

Ensure A Full House:
A school with as many intelligent, dedicated, and capable students as Georgia Tech should never have shortfalls in membership in the Undergraduate House of Representatives. As Vice President, I would work to ensure that as few positions are left open as possible, and to make sure that full attendance is achieved at all meetings. I strongly believe that all members of the Undergraduate House are entrusted with a duty to serve their constituents, a duty that is not fulfilled with low House attendance. It is my goal that all representatives will take seriously the trust placed in them by the studnets they serve.
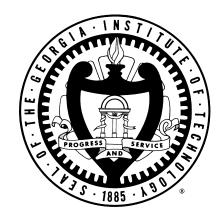

Ensure the Fiscal Viability of SGA:
As many of you may have read in the Technique, SGA has had budgetary difficulties. Although I wish that SGA could provide everything all student organizations ask for, our budget simply does not allow us to achieve that. As Vice-President, I would strive to see that representatives carefully weigh their decisions on all bills. Rather than simply serve as a rubber stamp, SGA should be a body endeavoring towards the judicious, rather than haphazard allocation of funds. By making sure that SGA pays only for what is necessary, we will ensure that ALL organizations will be more adequately funded.

Ensure the High Morale of the House:
There have been many times when, pressed with WebAssign or an impending test, I have wanted our House meetings to end as quickly as possible. It is an unfortunate fact that meetings do drag on longer than is truly necessary - as Vice President, I would do everything within my power to ensure that debate is germane to the topic at hand, and that the House remains focused. Whiile the time issues may primarily be of concern to members of the House, I feel that a focused House, free of frustration from debates that drag on and on, will be better able to make decisions based upon the merits of a bill, rather than a desire to leave. The student body is better represented by representatives who truly want to be there, enjoy what they are doing, and are willing to spend the "necessary" time to consider bills.

Graduate Student Government Elections Presidential and Vice-Presidential Elect

Kasi David

GSG President Elect

Majors: MSE
Class: Ph.D
Campaign website:

SGA Experience
MSE Senator
Member of Joint Finance Committee
Member of Joint Campus Organization Committee
Chair of Graduate Conference Fund

Other Experience
Caribbean Students Association: President
Black Graduate Students Association: Treasurer

Platform
Healthcare/Insurance:
As graduate students, we pay for health insurance each year, mainly through the plans offered by the school. There are certain issues concerning health insurance which I aim to work on next year. The first one is the cost associated with the insurance plans. Over the last few years, there has been a considerable increase in insurance costs, and my goal is to find a way to make insurance more affordable and available to graduate students here at Georgia Tech.

Safety:
Safety on campus is another issue that I plan to work on next year. I believe that many students would feel safer if there was a more visible police presence on campus, more specifically increased foot patrols. I will work with the police force to improve the avenues of communication between the students and campus police.

Student Government:
Concerning the Student Government Association, I plan to work with the undergraduate Student Government council to bring the constitutions of both the graduate and undergraduate organizations more in line with each other. This will help to increase the level of efficiency and effectiveness of Student Government as a whole.

Graduate Student Participation:
One of my biggest goals is to increase the level of interaction among graduate students on this campus, by initiating and supporting events which serve to bring graduate students from different departments together.

Lisa Brown

GSG Vice-President Elect

Major: Public Policy/Bilody
Class: Masters
Campaign website:

SGA Experience
My leadership experience at Tech includes acting as the treasurer for the Biology Graduate Student Association and senator representing Biology from 2002-2003, senator at large in academic year 2003-2004 and acting as the Joint Finance Committee Chair from 2003-2004.

Platform
My name is Lisa Brown and I am pursuing a dual Masters degree in Public Policy and Biology. I have been a full time graduate student at Georgia Tech since the Fall of 2001.

My experiences have strengthened my communication, organizational, professional and leadership skills. These skills along with my strong academic background make me a strong candidate for the position of Vice President of the Graduate Student Government.

As Vice President, I will help the executive board deal with the harsh budget constraints ahead. I will also focus on increasing the number of graduate students represented in the Senate. I also believe that strengthening the bond and communication between the undergraduate and graduate student bodies as well as executive branches is imperative to a successful Student Government Association.

SGA Elections How to Vote

Voting will take place online at **http://elections. gatech.edu.**

Undergraduate elections begin Monday, March 29 at 8 a.m. and run through Wednesday, March 31 at 4 p.m.

Please direct election problems via email to **elections@sga.gatech.edu.**

SGA Elections Grad Update

Graduate elections were held this week. Since both the graduate presidential and vice-presidential candidates ran unopposed, Kasi David and Lisa Brown were elected to serve in the positions next year.
