

A Proclamation

WHEREAS: The engineers are indispensable in peace or war, and

WHEREAS: They are builders of many projects that are classed as wonders of the world in which we live; the men who pace the advance of civilization and who build the machines that serve men; that remove their wearisome toil and add comforts and luxuries to their lives, now

THEREFORE: I, Herman E. Talmadge, Governor of Georgia, do hereby proclaim the week of April 22nd through the 28th as "Annual Engineers' Week," that we may be grateful for the service rendered by them.

In Witness Whereof, I have hereunto set my hand and caused the Seal of the Executive Department to be affixed, this the 9th day of April, 1951.

HERMAN E. TALMADGE,
Governor

White and Gold Club Applications Available

Lew Levenson, president of the White and Gold club, has announced that applications for membership to the club will be available at the information desk in the Administration building during the week of April 23 to April 27. These applications must be filled out and returned to box number 5458 by Saturday noon, April 28. All students except graduating seniors are eligible for membership in the White and Gold club.

The requirements for membership in the club consist only of a sincere desire to work for the club and by so doing, further school spirit. Although the club is relatively inactive during the greater part of the school year, it is one of the busiest and hardest-working clubs on the campus during the Fall quarter. The club is most demanding of a member's time and effort during the Fall quarter.

Runs Flashcard Section

It is obvious that the club should be most active at this time since it is only at this time that the flashcard section, which is the responsibility of the club, operates. It is the prime function of the White and Gold club to organize, plan, and direct the activities of the flashcard section. Although most of the direct work is done during the Fall quarter, a large portion of the preparatory work must be done during the Spring quarter.

The men elected by the club this quarter will find as one of their first duties the signing up of next year's flashcard section. This work will take approximately one week, wherein the new members will become more closely acquainted with the workings of the club, its responsibilities and its accomplishments.

Notified May 3

A candidate will be notified of his election on or about May 3. At that time he will be told of his election and instructed to attend the next meeting of the White and Gold club, which will be held May 8. He will

Parking on Fowler

Angle parking in Atlanta is forbidden by city ordinance. Therefore only parallel parking will be permitted on Fowler Street. Parallel parking will be allowed on both sides of the street but students are warned to keep their cars off the dirt track around Peters Park. These regulations will be enforced by the Atlanta Police Department.

learn of the plan for signing up new members, and the method which is used by the club to accomplish this purpose.

For further information about any phase of the workings of the White and Gold club, interested candidates should contact some member of the White and Gold club. Candidates are reminded that the deadline for applications is noon Saturday, April 28. Underclassmen are especially encouraged to apply for membership in the club.

Scholarship Awarded To Honor Graduate By Tulane University

By Harvey Hochman

Dean C. J. Morrow, acting dean of the College of Law, Tulane University, notified President Blake Van Leer that a full tuition scholarship to the Tulane University Law School is available each year to an honor graduate of the Georgia Institute of Technology. This scholarship is one of the regional scholarships awarded every year by the Tulane Law School.

The Law School at Tulane is having a special semester that will start this summer. The reason for this is the present national emergency. If the holder of a regional scholarship wishes, he may start at the law school during the summer.

In the last few years there has been a great need for lawyers with a technical background. Lawyers that are trained in some field of engineering are especially useful as patent lawyers or attorneys for large corporations. A lawyer with a technical background can understand and be able to solve the different problems that come up in a mechanized society.

Last year no student of the Georgia Institute of Technology took advantage of this great opportunity. Dean Morrow is hoping that some talented student from Georgia Tech will be able to further his education at Tulane University.

For students who are interested in this scholarship more information will be posted on the bulletin board in the administration building.

Tech Welcomes Public To Engineer's Week

Exhibits From All Schools To Be Center of Attraction

By Jerry Lavinsky

The tension is high around the Georgia Tech campus due to the many preparations for Engineers' Week. The big event is slated to be held on Thursday, Friday and Saturday, April 26, 27, and 28. This year as before, Engineers' Week will be sponsored by the St. Patrick's Council of Georgia Tech. The big events of the three days will include everything from mechanical brains to football teams.

Engineers' Week will formally open on Thursday at 2:00 p. m. with the Honors Day Exercise in the Georgia Tech Gymnasium. The guests speaker for the exercise is Erle Cocke, Jr. who is National Commander of the American Legion. His speech is one of the major talks after returning from his world tour, and since he is an outstanding authority on the conditions in Korea and other parts of the world, his speech is sure to be of special interest to everyone.

Exhibits

The center of attraction will be the exhibits in Crenshaw Field House. There will be exhibits from each school of specialization made entirely by the students. There will also be exhibits from the Military Department and the Radio Club. The exhibits will be judged and a cup will be awarded for the best exhibit at the Engineers' Ball on Saturday evening. The exhibit in Crenshaw Field House will open on Thursday, April 26, at 3:00 p. m.

The Mechanical Engineering Exhibit will show how the principal phases of this type of engineering are connected with such common-place devices as the refrigerator, washing machine, automobile, air conditioning and heating system. "Chemistry and Color" is the theme of the Chemistry display. They will attempt to show the layman how the various dyes are synthesized, how colors are used in the control of chemical processes, and how colors play a role in chemical analysis.

The Civil Engineering Exhibit will present a model and layout of a typical community, showing sewage disposal facilities, water supply system, and all types of transportation systems. The Physics Exhibit will center around apparatus used in atomic research. They are going to display such apparatus as a cloud chamber, a Geiger counter, and other instruments.

Uses of Light

The theme of the Electrical Engineering Exhibit is "Let There Be Light." A cross-section of many valuable uses of light in the home, in business, and in industry is presented. Basic methods of forming products made in the ceramics industry, are presented in the Ceramic Engineering Exhibit. To demonstrate how radio amateurs handle the transmission and reception of messages, the radio club has set up a small amateur radio station.

The Chemical Engineering Exhibit attempts to show three typical unit processes used in industry—partial separation, absorption, and the manu-

facture of sulfuric acid. The Industrial Management Exhibit centers around the uses of the International Business Machine is such business applications as accounting, statistical control, personnel, and office management. The Architectural Exhibit is an attempt to treat interspatial relationship from an aesthetic viewpoint by the use of models and drawings.

The Industrial Engineering Exhibit attempts to show the major phases of the profession by the use of a factory layout. The layout will be explained by charts and analysis forms. The Aeronautical Engineering Exhibit intergrates the major subjects of the curriculum into the complete design of a model airplane. The Military Department, through the courtesy of the Fort McPherson Army Engineers, are showing various types of demolition equipment including booby traps and anti-tank mines. The Textile Engineering Exhibit will show, with the aid of pictures and machinery, the processes that are required to convert raw cotton into woven fabrics.

Other Events

Other events of Engineers' Week include guided tours of the campus, different department buildings and laboratories and the special exhibits operating in the Hall of Engineering and buildings. There will be a full sports program which consists of baseball and track events, a 1951 football preview by Bobby Dodd, the football coach, and the "T" Day Football Game. The Georgia Tech Glee Club, one of the finest college glee clubs in the country, will present a concert on Saturday afternoon in the gymnasium.

To climax Engineers' Week, the Engineers' Ball will get under way at the gymnasium at 8:00 Saturday night. During the dance the Engineers' Queen of 1951 and her Court will be selected from among the candidates from the Georgia colleges.

Lost and Found

We have on hand several fine pairs of glasses that were misplaced by our students. They are too valuable to be thrown away and it is hoped that the men misplacing glasses will drop by the Dean of Students Office and look them over.

We also have a small amount of cash which when properly identified will be returned to its owner.

George C. Griffin,
Dean of Students.

Ramblin' Reck Club Gives Program Plans For Third Stunt Night

The Third Annual Georgia Tech Stunt Night will be held Thursday evening in the Tech gym, starting at eight o'clock. The program is open to the public, and all students are urged to bring their friends. A number of organizations have signed up for the program, and the audience is to be assured of an evening of fun and frivolity provided by original entertainment.

Program to Begin at 8

Ken Farmer, chairman of the Ramblin' Reck Club's Stunt Night Committee, has announced that the program will begin promptly at eight o'clock. Each organization will be given an allotted amount of time in which to produce their skit. There will be a break of a few minutes between each stunt so that the organizations can set up the next stunt. The committee promises some entertainment for the audience between the stunts, so that no one will have a chance to become bored with the proceedings.

IFC Cup Points

Points for the IFC cup are to be awarded to the winner of the Stunt Night competition. A cup is to be awarded to the winner by the Stunt Night Committee for the Ramblin' Reck Club.

The organizations will use the gym floor for their stage and the audience will be seated in the east stands. Their will be a twenty-five cent admission fee charged at the door to help defray the expenses of the evening.

It has been suggested by Chairman Farmer that this expression of Georgia Tech activities is well in line with the theme of Engineer's Week and all students should bring their friends to the program to observe another side of the Tech students' life.

Action to Be Taken To Abrogate Orders Of Enlisted Reserves

The Department of the Army announced that any Enlisted Reservist who would have less than one year to serve in his current enlistment on the scheduled reporting date will not be ordered into active military service.

However, the Army will continue to accept men in this category who volunteer for 21 months' active military service.

The Army's action affects those members of the ERC ordered to active military service as individuals under any of the Department of the Army recall programs and who were subsequently granted a delay in reporting.

Necessary action to rescind orders will be taken by the Army.

Honors Day, Thursday, to Begin Engineers' Week

Georgia Tech Representatives Attend Annual Pep Conference

By Harvey Lewis

Last week the Southern Collegiate Pep Conference held its annual meeting on the campus of the University of North Carolina. This is the third conference that the various schools of the South have held in order to bring about better school spirit and better school relations between southern colleges and universities.

As many know school spirit is lacking in such things as attending pep rallies, voting in school elections, and supporting the school teams. This is true not only at Tech but is found in many other southern colleges. It was attitudes of this nature that brought about the idea of the Collegiate Pep Conference. Since its formation they have done much to bring about a keener interest in the various school activities. There were over twenty-five of the leading colleges and universities that attended the conference, including Tech, the

University of Georgia, the University of Tennessee, Vanderbilt, Oklahoma A&M, Auburn, the University of Miami and many others. Each with the purpose of giving and receiving ideas for better school relations and spirit.

The conference is divided into four pannels, the first of which is concerned with the organization and activities of school pep clubs, the second is concerned with the promotion and betterment of the ideas that cheer leaders might use. The third division ex-

(Continued on page 8)

Professor I. Saporta Given Special Leave

I. E. Saporta, one of the country's outstanding city planners and associate professor of architecture at the Georgia Institute of Technology, has been granted a 30-day leave of absence effective March 26 in order to accept an appointment as a visiting critic with the School of Design of North Carolina State College, according to an announcement by Professor Harold Bush-Brown, director of the Georgia Tech School of Architecture.

Professor Saporta will present lectures on city planning, housing development, and slum clearance before all fifth-year architectural classes at the North Carolina institution. Recently he completed a set of designs for family-type air-raid shelters for use in the Atlanta area.

Dr. E. A. Walker to Dedicate New Hinman Research Building

The Department of Defense budget of \$650,000,000 for an integrated research and development program this fiscal year to provide our armed forces with the most effective weapons and equipment, and its implication upon the country's defense economy, will be discussed at a luncheon meeting at Georgia Tech on Friday, April 27, by Dr. Eric A. Walker, executive secretary of the Research and Development Board, Office of Secretary of Defense.

To Speak in "T" Room

He will talk in the "T" Room of Brittain Dining Hall to more than 200 Georgia industrialists, businessmen, engineers, scientists, government officials, and educators. This noon function will follow a morning session of the board of trustees and the advisory council of the Georgia Tech Research Institute and the faculty advisory council of the Georgia Tech Engineering Experiment Station.

Dedication

Following the luncheon, the dedication ceremonies of the new Thomas P. Hinman Research building on the Georgia Tech campus will be held. In his remarks on that occasion, Dr. Walker will point out the place of Georgia Tech research in the overall picture, and how the new building will more than double the space available to the Engineering Experiment Station.

Dr. Walker was born in Long Eaton, England, on April 29, 1910, and became a citizen of the United States in 1937. He was educated at Harvard University, receiving the doctor of science degree in electrical

engineering in 1935. After teaching at Tufts College and the University of Connecticut, he was appointed assistant director of the Harvard underwater sound laboratory in 1942.

Served As Civilian Scientist

During World War II, Dr. Walker served as a civilian scientist in the Office of Scientific Research and Development. He has also been active as a consulting engineer for a number of companies, including Colt's Mfg. Co., Pullman Co., Mine Safety Appliances Co., and the Koppers Co. He is regarded as an authority in the fields of acoustic properties of liquids, high voltage insulation, and electrostatic precipitation.

Heads Research Lab

Dr. Walker at the present time is on leave from Pennsylvania State College where he is director of the Ordnance Research Laboratory and head of the department of electrical engineering. As executive secretary of the Research and Development Board, he heads up a staff of civilian and military professional and administrative personnel. This group in turn staffs 14 committees, covering the various fields of research and development, such as aeronautics, guided missiles, medical sciences, ordnance, chemical warfare, human resources, etc. Under each committee are panels and working groups, composed of civilian and military representatives. Altogether, there are approximately 2500 part-time and 300 full-time personnel on the Board and its committees and panels.

While the Board does not control or administer research projects, it is charged with the responsibility for directing the Army, Air Force and Navy to initiate programs and projects for national security, and for completely and fully integrating these programs and projects.

Faculty Bulletin

Issued by the Department of Public Relations

1951-1952 GENERAL CATALOG—The new Georgia Tech General Catalog for 1951-1952 has just been published by the Public Relations Department. Faculty members are requested to obtain their copies through their department/school secretaries, since no copies are being issued without a requisition from the department/school.

VACATIONS AT SAVANNAH BEACH—Faculty members may obtain special rates at Riverside Lodge, Savannah Beach, Ga., by writing direct to Mrs. M. Levison, P. O. Box 35, Riverside Lodge on the Inlet, Savannah Beach, Ga. The lodge, formerly run by Mrs. R. C. Johnson, has been redecorated and renovated.

NEW FACULTY COMMITTEE MEMBERS—Mr. Edward T. Prosser and Dean George C. Griffin have been named by President Van Leer to serve on the Faculty Safety and Fire Prevention Committee, of which Mr. W. N. Cox, Jr., is chairman. Mr. Prosser will represent the dormitory activities and Mr. Griffin the fraternity house activities. Dr. Robert H. Lehrer, industrial engineering; Dr. A. H. Bailey, mathematics; and Dr. J. A. Stanfield, chemistry, have been named as new members to the Graduate Council beginning their terms on July 1, 1951.

DEDICATION OF HINMAN ADDITION TO RESEARCH BUILDING—All faculty members, wives and friends are invited to attend the dedication ceremonies on Friday afternoon, April 27, 2:30 o'clock, in front of the Research building on Cherry Street. Immediately after the ceremonies, everyone will be welcome to tour the various research laboratories in the building.

A.S.M.E. MEETING—Much of the success of the 1951 National Spring Meeting held in Atlanta, April 2-5, was due to the fine work and cooperation of Georgia Tech faculty and administrative members. Assisting as chairman or vice-chairman at the various functions were President BLAKE R. VAN LEER, Vice-President CHERRY L. EMERSON, Prof. A. D. HOLLAND, Prof. W. A. HINTON, Prof. ROBERT E. ESKEW, Prof. H. W. MASON, Prof. HOMER S. WEBER, Prof. R. T. STATON, Prof. RAY N. TROWBRIDGE and Prof. ROBERT M. LEHRER. Papers were presented by Prof. FRANK F. GROSECLOSE, Prof. JOHN B. DAY, Prof. WILLIAM N. COX and A. O. WHITE, JR. Prof. MARIO J. GOGLIA served as chairman of the Technical Sessions Committee and LESLIE F. ZSUFFA was general chairman for the meeting.

COOPERATIVE PURCHASING—Arrangements have been made whereby faculty and staff members may obtain a discount of 2c per gallon on gasoline and 5c per quart on oil at Howard Shell Service Station, Spring and Fifth Streets, upon presentation of their I.D. Cards.

OPERA TICKETS FOR SALE—Two aisle seats on Row H for Wednesday evening, April 25, The Barber of Seville, \$5.50 each. If interested contact desk at the Georgia Tech Library.

NEW FACULTY COMMITTEE MEMBERS—Mr. Edward T. Prosser and Dean George C. Griffin have been named by President Van Leer to serve on the Faculty Safety and Fire Prevention Committee, of which Mr. W. N. Cox, Jr., is chairman. Mr. Prosser will represent the dormitory activities and Mr. Griffin the fraternity house activities. Dr. Robert N. Lehrer, industrial engineering; Dr. A. H. Bailey, mathematics; and Dr. J. A. Stanfield, chemistry, have been named as new members to the Graduate Council beginning their terms on July 1, 1951.

FACULTY NOTES—Dr. W. A. EDSON, electrical engineering, this week addressed colloquium meetings of the Research Divisions of Bendix Radio of Detroit and of Pennsylvania State College in connection with his work on frequency control and oscillators . . . Dr. J. E. HOWEL, E. T. PROSSER and H. M. HERREMAN, physics, attended the Southeastern Section of the American Physical Society, April 5-7, in Chattanooga, Tenn. . . . Dr. LANE MITCHELL, head of the School of Ceramic Engineering, will attend the Annual Convention of the American Ceramic Society in Chicago, Ill., on April 27 . . . Dr. A. J. WALKER, head of the Department of English, went to Milledgeville, Ga., on April 20 to attend a planning conference of the G.E.A., of which he is the district chairman of the Department of High Education . . . Dr. PAUL WEBER, head of the School of Chemical Engineering, and Dr. H. C. LEWIS, chemical engineering, accompanied a group of chemical engineering seniors to the Southeastern Regional Convention of the student chapter of the A.I.Ch.E. at North Carolina State College in Raleigh, N. C., April 16-21 . . . Dr. F. O. NOTTINGHAM and H. B. DULING, electrical engineering, attended the A.I.E.E. Convention in Miami, Fla., April 11-13. Prof. NOTTINGHAM who is director of the Georgia Section, presented a paper entitled "Low Frequency Polar Vector Indicator."

Notice

Those students interested in joining the Tech chapter of the Circle "K" Club, are requested to drop a note in box 79 before April 27 giving your address so we may contact you. The only requirements are that you have a 2.3 point average or over and at least 5 quarters of school remaining.

Templeton's Program Said to Be The Finest Presentation at Tech

By Jerry Lavinsky

Sunday afternoon at 3:00 p. m., Georgia Tech students and faculty witnessed one of the finest concerts ever presented at Georgia Tech. Alec Templeton, world famous pianist, put on a musical program that will never be forgotten by those who saw it.

The program opened with "Jesus Christ, the Son of God," a chorale prelude by Bach. The other three pieces of the first part of the program were as follows: "Soeur Monique," by Couperin; "Fantasia in D Minor," by Mozart; and "Improvisations on a Classical Theme," by Templeton. The second part of the program, consisted mostly of serious music and some, in the lighter vein. Mr. Templeton played pieces by Chopin, Milhaud, Dudas, and Strauss.

The third part of the program was, without a doubt, the most exciting for the large majority of the audience. Alec Templeton played many of his own songs. Mr. Templeton asked the audience to call out five notes which they did, and he composed a song on the spot employing the same five notes. He then requested the audience to call out four composers. Mr. Templeton employed the five notes into different pieces played in the styles of each of the given composers.

Alec Templeton was called out for six bows and in response he played three extra pieces. Much to the surprise of everyone, he gave his impressions of today's singers and composers.

Tech's New Building Aids Experiments

Georgia Tech will dedicate a new addition to its imposing research facilities on April 27, according to an announcement today by Dr. Gerald A. Rosselot, director of Tech's Engineering Experiment Station. Named the Hinman Memorial building in honor of the late Dr. Thomas P. Hinman, long a noted Atlanta oral surgeon and staunch Tech supporter, this new addition has been constructed to form a wing of the Station's main Research building.

A bequest from Dr. Hinman, matched by an appropriation from Georgia Tech, made the new building possible. Its 22,000 square feet of floor space approximately doubles that previously available in the Research building, providing for much needed laboratories and offices. The Engineering Experiment Station's research project expenditures are currently running at the rate of slightly more than \$1,000,000 per year. The new building will permit further expansion in the Station's services to Georgia, the Southeast and the United States as a whole.

Annual Old South Weekend Celebrated by Kappa Alphas

By Norman S. Tarlin

For the past several weeks, it was quite evident that a group of Georgia Tech students were not using their Gillette blue blades on time. The bearded menace was observed by every student, faculty member and employee of this noble institution. This unshaved group were not going prospecting nor were they boycotting the local barbershops. These prospective Rip Van Winkles are all members of the Kappa Alpha Order of Georgia Tech. Along with the Kappa Alpha chapters at Emory, Mercer and the University of Georgia, the local chapter were preparing for their Old South Week-end.

As it is quite well known, the Old South Week-end is one of most colorful spectacles to be performed by any fraternity on this campus. This Old South Week-end was sponsored by the Kappa Alphas of the four schools to commemorate the founding of Kappa Alpha in the year of 1865. The fraternity was founded at Washington College, later Washington and Lee, while Robert E. Lee was president. It is strictly a southern fraternity with no chapters north of the famous Mason and Dixon Line. The local chapters have been known to allow a few yankees into their fraternal order.

Last Friday, the local chapter of Kappa Alpha had a house party at their new home located on Techwood Drive. The theme of the house party was in the form of foot-patting and floor-stomping. The brothers of the fraternity and their beautiful dates danced to the smooth music of Walter Roy May and his fabulous combo. A short time before the colorful week-end activities began, the local chapter of Kappa Alpha vacated their very historic, colorful domicile, located at Techwood and Third Ave., in favor of their week-end, out of town guests.

"Take out your Confederate money for the South will rise again" was the battle cry when the four chapters of Kappa Alpha paraded on Saturday, April 21. This Old South Week-end parade, an extremely colorful pageant, formed at the point where the two Peachtrees meet and from there the spirited procession marched onto the capital. Atlanta and Georgia were once again in the hands of rebellious, Yankee-damning, Dixie-sing-

ing "Confederates." The men with beards, sideburns, ruffled collars and cutaway coats marched briskly down to the state house. On their sides, the rebels carried sabres of the good old days, but on their arms were some of the most beautiful belles in the confederacy.

General Bush, the 105 year old Confederate soldier once again made his appearance in the parade. He rode in a carriage during the parade after key-noting the march with "To hell with the Yankees." Another one of the features of this years shenanigans was a huge confederate flag. This replica of the Southern Cross measures 20 yards by 30 yards and belongs to the great confederate state of Mississippi. Through the courtesy of the Honorable Fielding Wright, Governor of the state of Mississippi, the flag was forwarded to Atlanta so that it could be displayed in the Old South Week-end parade.

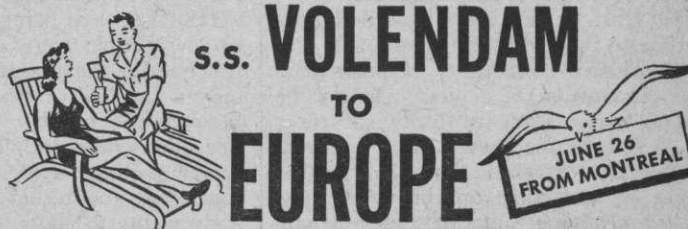

After the rebels took over the state, the formal surrender was made official by Attorney General Eugene Cook who represented the state of Georgia and also the fine people of Atlanta. After the official surrender, the confederate flag was raised high into the air and the songs and cheers of the loyal southerners were sung. Last year, Georgia's original ordinance of session was read. It stated "We do declare and ordain that the union now subsisting between the state of Georgia and other states, under the name of the United States of America, is hereby dissolved and that the state of Georgia is in full possession and exercise of all those rights of sovereignty which belong and appertain to a free and independent state." With that statement, the crowd went wild and the state of Georgia was once again in the hands of the rebels.

This year, the brothers of Kappa (Continued on page 8)

FOWLER STREET PARKING

Welfare committee praised for efforts to improve parking problem.

"What's the story on Fowler street?" That seems to be the question in the minds of many of the students driving cars today. We are afraid we don't blame the student body for their reaction to the confusion that exists now. We should like to take this opportunity to explain the conditions and their causes, and to try to get some order out of the present confusion.

The trouble all started when a group of students opened proceedings to get Fowler street made one way with angle parking on the west side of the street. The one small item we didn't know about was that there is a city ordinance against angle parking anywhere in the City of Atlanta. When Fowler was finally made one way, those students living in fraternity houses overlooking Peters Park naturally assumed that they were to park diagonally. Unfortunately this is not what was intended. As the situation stands now, those men parking on Fowler must either park parallel to the curb or have their cars towed away by the city. This in effect means that we have accomplished nothing by making Fowler a one-way street.

We should like to exonerate Barry Blemker, chairman of the Welfare Committee of Student Council from any blame for the conditions as they now exist. Blemker did his best to get what the students requested, and it is simply impossible to satisfy everyone. We believe that Professor Cox, of the faculty's Parking Committee is largely to blame for the confusion which now exists, for it was he who advised Blemker on the necessary steps. Perhaps Mr. Cox was ignorant of the city's regulations on this matter, but we believe that he should have investigated this matter thoroughly before any steps were taken. It is not the place of Student Council's Welfare Committee to improve parking conditions, but merely to recommend changes which will benefit the student body. The faculty committee could have performed this serv-

ice far more effectively and positively, and we believe that any blame should be borne by this committee.

On the front page of this paper will be found a box outlining the new policy on parking on Fowler street. The importance of student cooperation in abiding by this policy cannot be overemphasized, for it is a student-instituted policy. If the student body will not obey the regulations it sets up for itself, then there is no reason for us to expect the administration to trust us to aid in any other matters.

There are only a couple of things to remember, and we shall outline them again here to make certain that everyone concerned is made aware of them. First of all, there must be parallel parking only on Fowler street. Angle parking is forbidden by city ordinance, and violations of this regulation will be punished by the Atlanta Police Department. Parking will be allowed on both sides of the street, but those cars parked on the east side must stay off of the dirt track around Peters Park. This track is used by the Physical Education department, and if it is blocked, parking on that side of the street will again be eliminated.

As far as we are concerned, these regulations are quite simple and altogether agreeable to the student body as a whole. We hope that everyone will cooperate in obeying these regulations.

The Welfare committee of Student Council deserves a great deal of praise for this new arrangement, for it was they who obtained the new regulations. We feel that this arrangement furnishes a great deal more parking space than the old arrangement, and for this reason we should like to congratulate the committee on doing a job well. A great deal of work went into obtaining this arrangement; it deserves the appreciation of everyone who drives a car to school.

—DMJ

Honors Day

Student body urged to participate in ceremonies Thursday.

Honors Day is this coming Thursday afternoon. In view of the disgraceful showing last year, we felt that it might be appropriate to remind a few people this year that this is an opportunity to participate in the recognition of achievement on the parts of fellow students. Last year there were so few people present at the annual Honors Day exercises that the speaker thought he had come on the wrong day. We sincerely hope that this does not happen again.

At two o'clock Thursday afternoon Mr. Erle Cocke, Jr., the National Commander of the American Legion, will headline the list of speakers, and his words will be of tremendous importance to every Tech student. Mr. Cocke has just returned from a trip to the present trouble area of the world, and he is very well qualified to give a discussion of the situation in Korea.

We do not believe it should be necessary to convince anyone of the importance of this speech of Mr. Cocke's, for we believe that every Tech student should be interested enough in the engineering profession to participate in the opening of Engineer's Week. The justly deserved recognition made at the Honors Day exercises is simply a means of opening the proceedings for the week-end. There is no

reason why a good turnout can't be expected at the exercises in the gym.

It strikes us as being rather peculiar that so few people were present last year. A full holiday was granted to the school, and only a handful of students seemed to appreciate the holiday enough to attend a one hour program. This is beyond our understanding. Everyone on the campus complains about the tough grind, yet nobody wants to show any appreciation for a holiday when it is granted. Perhaps we are all too selfish; wanting to please only ourselves and having no thought about the welfare of our school.

The showing at Honors Day is an indication of the enthusiasm and spirit prevailing at Tech, and it is noted by many distinguished people. Mr. Cocke will carry away an opinion of Tech influenced by his reception on Thursday. We now have before us a simple choice: do we go from a full holiday to a half holiday to no holiday, or do we show some pride in our institution and our chosen profession by turning out in full force for the ceremonies Thursday afternoon? This is not the time for a "let George do it" attitude. This is the time for every student to make himself a committee of one to further the public relations of Georgia Tech.

—DMJ

World Situation

... is no reason for student apathy toward campus activities.

The Technique published, around the first of the winter quarter, an open letter to the students of Georgia Tech from the editor of the Engineer in which was expressed the need of that publication for staff writers and advertising salesmen. It was stated in this letter that unless the Engineer could sell more advertising, they would be in danger of having to close down as one of the leading college technical publications. Although the response was very weak, enough people joined the staff to keep it operating in the black.

Many reasons were offered for this lack of interest in the extra-curricular activities of the school, but the predominant one seemed concerned with the world situation and the possibility of the students being drafted out of college. Many students seemed to think that they were just marking time and began forming a "what-the-hell" attitude toward all phases of campus life.

Within a few weeks, the whole incident was forgotten, but now it has arisen again. This time it's The Technique that is out beating the bushes for people to work on the various staffs. In the past few issues of the paper, the business staff has actually been advertising for men to sell advertising space. The editorial staff has several times printed a small box on one of the front pages which stated, very slyly, that "there are still a few vacancies on The Technique staff." At the time this was, for the most part, true. There seemingly were only a few places that needed filling, but that is no longer the case. We need interested workers.

Again the question has come up concerning the lack of interest that is being displayed by the students for all campus activities. It seems that the answer remains

the same. Nobody is anxious about sticking his neck into campus activities when the possibility of his being drafted at the end of the quarter still seems to be present. But, as was stated by a writer in a recent issue of the Daily Californian "this is no reason for letting everything go to pot—academically or in the field of what have been aptly called 'co-curricular' activities. We may not be here for long; our successors on the campus may be forced to abandon many facets of peacetime university life. But if we're going to vegetate ... over the international situation, we might as well carry the attitude to its logical conclusion—drop out of school and loaf until the armed forces or the production chieftains put us to better use."

Obviously, there won't be a greater number of people who are going to take this idea to heart. There are probably, in fact, a great number of people who will do just the opposite and try to make the best of what is seemingly going to be a bad thing. It is to those that this editorial is primarily addressed. Take advantage of the time that you have.

The many activities on the Tech campus can cover almost any interest. Practically every extra-curricular group is lacking in members now, but as has been stated, The Technique is one of the organizations needing help the most. There are positions open on almost every individual staff with excellent opportunity for advancement into the salaried jobs. The business staff meets every Tuesday afternoon from 3 to 6 p.m. in the Publications Lounge of the YMCA. The editorial staff meets on Monday night at 7 p.m. in the same room. Don't pass up this opportunity of being a small service to your school as well as helping yourself financially. —WmED

Appreciation

... is expressed to blood donors by Atlanta Chapter of Red Cross.

Captain George C. Griffin
Dean of Men
Georgia Institute of Technology
Atlanta, Georgia

Dear Captain Griffin:

On behalf of the Atlanta Chapter of the American Red Cross, I want to express our sincere appreciation to the students and faculty of Georgia Tech for the success of our mobile unit visit on April 3rd.

We collected 79 pints of blood, in spite of the fact that many students who would have normally given blood were not eligible, due to the fact they had been given tetanus and typhoid shots.

We are especially indebted to Jack Martin, I.F.C. blood chairman; Col. Leslie F.

Zsuffa, Public Information; Bob Griffith, President; I.F.C.; Bruce Sams, President, Student Council; Don Judd, Editor, Technique, and Colonel F. F. Groseclose, Industrial Engineering, for their fine cooperation in carrying out the details involved in recruiting donors for this visit.

We will contact you during the month of September regarding visits during the school year of 1951 and 1952.

Many thanks for your fine cooperation in this worthwhile program.

Sincerely,

Mildred Hegenberger
Director of Recruitment
Atlanta Chapter
The American Red Cross

TECHNIQUE PLATFORM:

1. Student voice in matters of student interest.
2. Encouragement of school spirit.
3. Better orientation and vocational guidance.
4. More participation in the intramural sports program.
5. Promotion of active campus organizations.
6. Erection of an adequate library.
7. Erection of a Student Union building.

The Technique will at all times attempt to represent the best interest of the students in current discussions and controversies.

Stephens College Student Wants to See The South

By Marshall Graham

One of the fifty-three girls from Stephens College who were being entertained by Georgia Tech men during a recent week-end was Miss Pat Wright. Pat is from Williston, North Dakota, and is in her senior year at Stephens. Actually, this is her second year there, but since it is a Junior College she is classified as a senior. The majority of the girls who made the trip are upper-classmen.

Pat's hometown is a thriving prairie metropolis of ten thousand head of people. When asked why she decided to go to the state of Missouri to go to school she stated that she generally liked to be "shown." She has one brother and one sister, who also went to Stephens in the past.

Stephens College is located in Columbia, Missouri, along with a couple of other schools, one of which is the University of Missouri. This does not help the situation very much however, as Stephens girls have to be in at 10:30 every night except Saturday when they can stay out until twelve. Every year the College sponsors educational tours for the students who wish to go. Although they were discontinued during the war years, they have started back in full swing again and this year three different tours were offered — the Eastern, Southern, and Mexico trips. Pat chose the Southern tour because she had never been in the south before and she wanted to see what it was like.

For those of you who are thinking that such a trip would be a splendid opportunity to dodge some school work, such is not the case for the trips take place during the Spring holidays of the school and only last for ten days, which is also the length of the holidays. Each girl pays a certain amount to go on the trip; the Southern tour costs \$395.

The tour left St. Louis by plane and journeyed to New Orleans, where the young ladies remained for two days taking in the many interesting sights and customs that only New Orleans has to offer. From thence they flew to Havana, Cuba, for a short visit with one of our Latin American neighbors, before continuing on to Miami, Florida. In Miami, most of the girls tried to see how well a tan (or sunburn) they could receive in two short days. Pat was one of the more lucky ones, she became tan instead of a gentle shade of pink. From this Yankee capital of the South, they flew up to Atlanta, to enjoy the last part of their trip before returning to school.

During their stay here in Atlanta, Pat and her companions were entertained by the students of Georgia Tech with a dance given on Friday night in their honor. The girls remained here in Atlanta until Sunday afternoon when they boarded a plane back to Missouri.

When she completes her studies at Stephens, Pat hopes to go to the University of Minnesota to continue her studies and wishes eventually to be a physical therapist. (Line forms to the right.) She is nineteen years old, has blue eyes, and weighs one hundred and twenty. (Sorry, but it's 700 miles to Missouri.) When asked

what she liked most about Georgia, she replied, "I like the Tech men and the new sales tax because it lowers the price of liquor."

Better TV Pictures By Tech Engineers

Using velocity-modulation principles, M. A. Honnell, professor of electrical engineering, and M. D. Prince, research engineer, of Georgia Tech, have developed techniques to produce three-dimensional images on television, according to an article in the March 1951 Proceedings of the Institute of Radio Engineers.

The article contains pictures of the results of a research project jointly sponsored by the Georgia Tech School of Electrical Engineering and the Engineering Experiment Station. Also included in the report is an analysis of forms of television picture distortion heretofore overlooked.

Student Council Minutes

April 3, 1951.

President Sams called meeting to order at 7:00 p. m. with Dunwoody, Kimzey, Long, Shields, Wright and Pentecost absent.

Barry Blemker reported for the Welfare Committee, announcing that it is impossible to have funds for paper towels included in the school budget. Dan Blich announced that the walk had been installed between the parking lot and the T.E. building.

Homer Killebrew reported for the elections committee that petitions for spring Student Council members elections and class officers will be due May 1st.

Ned Wilson announced that the Athletic Board accepted the Student Council's recommendation for the 1951 football season sitting plan.

Ken Brown reported further on plans for entertaining Stephens College girls to be at Tech on April 6th and 7th.

Bill Kennedy and Randy Seckman reported for the NSA committee on a district meeting of NSA to be held at Emory on April 13 and 14. Everyone interested is invited to attend.

Randy Seckman moved that WSF students on campus be invited to attend council meetings. Carried.

Don Hartman reported for Dining Hall committee announcing that Mr. Barnes and Mr. Anthony are planning to invest \$10,000 in improvements for the Dining Hall including new refrigeration, steam tables, and decoration.

Bill Jett made the Student Council financial report.

Paul Liberman reported that the WSF committee has plans to affiliate with three schools in foreign countries, and that two travel scholarships are being offered Ga. Tech students by the Rotary Club.

Randy Seckman announced that selections for WSF students coming to Ga. Tech next year have been made.

Motion that Council pay its \$100 dues to the U.S. Natl. Student Assn. was taken from the table and passed.

McAllister volunteered to take charge of the

Tailored Suit Is Offered By Tech Tailors' Contest

By Norman S. Tarlin

Mr. Lou Shaw, manager of Tech Tailors, has announced that he will have a drawing for a Born-Custom Tailored suit. To be eligible for the draw, a student has only to make use of any of the services of Tech Tailors totaling \$1.00 or more. During the period of April 19 to May 25 students will have the opportunity to place their name in ballot box located at the store. On May 25, at 5:30 p. m. a qualified person will draw out the lucky name and the winner will be informed of his good fortune.

The manager of Tech Tailors, Lou Shaw, has had twenty years experience in designing men's and women's wearing apparel and he feels confident that he can serve the needs of the students to perfection. In co-operation with 200 custom tailors throughout the nation, Mr. Shaw is pleased to announce that he is the franchise holder of Born Custom-tailoring in Atlanta and that he joined with Born in celebrating their 75th Anniversary on April 16. Lou Shaw declares, "It is stores like ours and many others in our city who

enable the giants in each industry to grow as big as they are. This is only our first year with Born franchise and we feel proud to join in the celebration to commemorate Born's 75th year in business.

Besides the sensational services offered, Lou Shaw has devised a method which will allow students to make a substantial savings with their cleaning bills. All customers may secure a Tech Tailor's courtesy card. Each time a student has a garment cleaned or if a student uses any of the fine services offered, his courtesy card will be punched. When the card is punched 10 times, the holder of the card may have any garment (pants or suit cleaned free of charge. Courtesy cards may be secured from Tom Kirkpatrick, Box 1966.

Preliminary Night Scrimmage Labeled Successful by Dodd

Georgia Tech's football train, engineered by quarterbacks Darrell Crawford, Joe Salome and Pepper Rodgers, cannonballed through a very successful regulation-time scrimmage under the arcs at Grant Field last Friday night.

As a sort of preliminary to the annual T-Game, which Coach Dodd has announced will begin at 8 p.m., Friday, April 27, the Yellow Jacket gridmen exhibited their best performance of the season.

With the squad broken down into varsity and Redshirt components, the small number of quiet spectators on hand witnessed a preview of what will probably be the finest brand of playing at the Flats until the regular season commences with Southern Methodist here September 24.

Coach Dodd commented after the game that he thought the Blue offense looked very effective, and that they would have scored more if so many penalties had not been called against them.

Attesting to the equally effective varsity defense is the fact that the Reds tallied only once all evening. That score came on a roaring buck by fullback Art Ross at the final whistle.

Offensively the Blueshirts lined up at various times with the following men most prominent. At ends, John Weigle, Buck Martin and Jeff Knox. Lum Snyder and Hal Miller occupied the tackle positions with occasional help from Ed Gossage. Starting guards were Ray Beck and Ed (Pig) Campbell. George Morris played center with relief coming from sophomore Dick Inman.

In the backfield taking the hand-offs from Crawford, Salome and Rodgers were Leon Hardeman at left half and the quartet of Dick Pretz, Gordon Malloy, Bill Teas and Harry Wright at right halfbacks.

Veteran George Maloof, switched back to his familiar position, and sophomore Glenn Turner handled the fullback duties.

The defensive alignment had David Davis and Archie Griffin, freshmen from Valdosta and a member of the grid squad for only a week, at the left wing. A pair of incoming frosh, Frank Webster and Bobby Aycock, handled the right flank.

Captain Lamar Wheat was the lone right tackle. On the other side, junior Bill Thaden and sophomore David Anderson saw most of the duty.

Hugh Hardison and Orville Vereen paired up on defensive guard work, along with converted end Ted Shuler.

Directly behind the forward wall in a modified 6-2-2-1 defensive set-up were Clyde Young, Pete Brown and Alex Hunt. At wingbacks as pass defenders were Jack Patterson, Bobby Moorhead and John Hicks.

Courts Redford, signal-calling aspirant from Decatur but now a halfback, and Jack Patterson handled double safety duties. Patterson turned on plenty of steam in nicely running back Redshirt punts.

Tennis Team Divides; Drops One to Vandy, Whitewashes Wildcats

The Yellow Jacket tennis team split its week-end matches with the Vanderbilt Commodores and the Kentucky Wildcats.

Clark Hunt was the only Tech player to win a set as the Vandy team overpowered the Jacket 9-0 in Friday's play. Hunt's match with Wells Richardson went 6-2, 3-6, 6-3.

Coach M. T. Bush's Commodore netters have lost only one match in six outings. Tulane's powerful squad beat Vanderbilt 7-2 in New Orleans a week ago. But the Vandy mentor stated that all the individual matches were a lot closer than the final score indicates.

Tech bounced back in Saturday's match with the Wildcats and took them to the cleaners to the tune of 7-0. The Cats were plagued with injuries and were unable to field a No. 3 doubles team or a sixth man in the singles.

Coach Earl Bortell hopes that his team will keep up this brand of playing as they journey to the Bayou country to encounter the Louisiana State Tigers and Tulane over the week-end.

Vanderbilt Summary

Singles
Steve Potts (V) beat Jack Ransohoff (T) 6-3, 6-0; Kermit Stengel (V) beat Lowry Bell (T) 6-3, 6-2; Gordon Long (V) beat Bob Tyson (T) 6-2, 6-1; Harry Courson (V) beat John Gaddis (T) 6-3, 6-3; John Loomis (V) beat Ed Van Winkle (T) 7-5, 6-4; Wells Richardson (V) beat Clark Hunt (T) 6-2, 3-6, 6-3.

Doubles
Potts-Loomis beat Ransohoff-Bell, 6-2, 6-3; Stengel-Long beat Gaddis-Phil Rotholz 6-4, 6-1; Courson-Richardson beat Tyson-Van Winkle 6-2, 7-5.

Kentucky Summary

Ransohoff (Tech) defeated Price, 6-2, 3-6, 6-0; Bell (Tech) defeated Kanatzar, 6-3, 6-1; Tyson (Tech) defeated Lansaw, 6-1, 4-6, 6-2; Gaddis (Tech) defeated Williams, 6-3, 6-2; Van Winkle (Tech) defeated Scherer, 6-1 (default); Ransohoff and Bell defeated Price and Lansaw, 6-2, 5-7, 6-1; Tyson and Gaddis defeated Kanatzar and Williams, 6-0, 6-0.

Sports Writers!

Anyone interested in joining the sports staff of The Technique is invited to attend a staff meeting and find out about an interesting opportunity.

Regular weekly meetings are held at 7:00 p. m. each Monday in the Publications Lounge of the YMCA.

Cindermen Edged by Vols; Fowlkes Takes Four Firsts

By Karl Frankel

The University of Tennessee's track team eked out a 66 to 65 victory over the Yellow Jacket cindermen at Grant Field Saturday afternoon.

Tech, leading in the meet by a 65 to 61 margin with only the mile relay remaining, saw its hopes for victory vanish as Vol Alf Homberg outdistanced Tech's Jim Shiver on the last lap of the race to win the event and also the meet.

Jacket Buddy Fowlkes, an all-around track performer, had a great day as he swept to victories in the 100 and 220 yard dashes, the low hurdles and the broad jump. Fowlkes also took a third place in the discus throw.

The Jacket senior accounted for twenty-one of Tech's points and also had quite impressive times in the 100 and 220 yard dashes, being clocked in 9.8 seconds and 21.2 second respectively.

The Engineer thinclads swept all three places in the shot put. Jeff Knox, of Tech, heaved the shot 45 feet 7½ inches to take first place. Second and third places went to Tech's Ray Beck and Ed Baskin respectively. In the low hurdles Tech's Fowlkes, Shiver and Roy Ford finished in that order to sweep this event also. Shiver also placed first in the 120 yard

high hurdles while Tech's Ralston registered a win in the pole vault event.

Tennessee's Herb Neff, one of the outstanding high jumpers in the country and SEC titleholder in this event, showed his skill by leaping 6 feet 7 inches to an easy victory. Neff recently won the Southern Relays with a jump that exactly equalled his performance Saturday.

The Swedish born Holmberg, although a distance runner, showed his ability in the dashes Saturday. His last lap in the relay won that event for the Volunteer's and his speed enabled him to take the 880 yard run, but instead of winning this event alone, he chose to hold hands with teammates Frankie Albertson and Bob Reeder as they crossed the finish line to make a three-way tie. Holmberg captured the 440 yard run placing just ahead of Tech runners Dixon and Ward, who finished second and third.

Tech's outstanding distance runner, Red Smith, had to run swiftly to gain second places in both the mile and two mile events. Frankie Albertson, former Druid Hills High School ace, captured the mile run while teammate Trent took first place in the two mile marathon.

New Football Seating Scheme Result of Fall Enrollment Drop

By Tom Quinn

In response to the need of a new seating arrangement for next Fall's football games, due to a drop from 4200 to 3800 enrollment from last Fall, the Athletic Committee of the Student Council has proposed the following plan and had it accepted by the Athletic Association Board.

The flashcard section will occupy the lower half of sections "F" and "G" on the east side which is between the south forty-five and the north thirty-five yard lines.

The seniors without dates will sit

in the upper quarter of section "F" on the east side.

The seniors with dates will have the remaining parts of sections "F" and "G" and also the upper half of sections "H" and "I", which two sections are between the north thirty-five and fifteen yard lines.

The band will occupy approximately the lower one-third of section "H", which lies between the north thirty-five and twenty-five yard lines.

The juniors will occupy the remainder of section "H", the lower section of "I", and the upper half of section "J". Section "J" extends down to the north five yard line.

The sophomores will sit in the lower half of section "J" and in all of section "K" which extends to the north minus five yard line.

Freshmen will be confined to the temporary stands on the east side between the south forty-five and the north minus five yard lines.

The married students will be placed in the north stands.

A Story of Real Teamwork

A head coach needs assistants and a player needs guts and determination. 'Twas only a fortnight ago that Coach Bobby Dodd, chatting with his staff around the north goal post on Grant Field after a Saturday scrimmage, ventured a comment directed at end coach Bill Jordan that "with so many good boys out there I'll bet (Buck) Martin won't be playing much end this fall."

"How about trying the switch him to tackle where he'll probably get to play more?" offered the head mentor. With an expression that looked like a baby's when he's had a bottle snatched away from him, Coach Jordan came to life and sputtered dozens of reasons why he HAD to keep big Buck at a flanker spot. So a mild crisis was reached and passed over—for the moment at least.

Now two weeks of extra tutoring by Coach Jordan and real plugging by Martin have paid off handsomely. Mr. Dodd is very satisfied with the 6-4, 200 pound brute from Haleyville, Alabama. "He's trying awful hard and he really wants to play ball for us," Dodd conceded after last Friday night's head-knocking under the lights. It appears that Martin is ticketed for the starting offensive right end position come SMU on September 24. A spirit of teamwork like this fine example goes a long way in moulding a potent grid squad.

Successful Night Scrimmage

As a preliminary to the annual T-Game, which will be staged at 8 o'clock this coming Friday night, the Yellow Jacket pigskin forces were sent through a full-game night scrimmage on Friday the 20th. The coaching staff unanimously agreed that it was the best showing, by far, of a month's spring practice. About 300 scattered spectators viewed the workout.

Assistant head coach Ray Ellis declared that it was the best football we'd see until the regular season rolled around. The reason: the huge squad was split up pretty well into varsity and Redshirt groups, whereas this week will be spent dividing the camp into evenly-matched teams for the T-Game tussle.

Coach Dodd wore a contented smile beneath his light grey sombrero as the dimmers were thrown about 10:15 p.m. And why not? The passing game sharpened considerably. Especially noticeable was the fact that Darrell Crawford, Pepper Rodgers and Joe Salome all had good protection to take aim and whip away their aerials. By the way, the above three quarterbacks are the only ones left under serious contention as number one signal caller. Might check the order they're listed in—just an observation.

Of the non-vets coming up, bronco bustin' Leon Hardeman at offensive left half; young Billy Teas, a slender amount of greased lightning at right half (down from Baylor School and only a freshman); and Miami's spunky Orville Vereen at defensive guard, all played outstanding games.

Then there's kicking to contend with—not griping—but punting. David Davis stuck his mighty toe into one boot which flew over the safetyman's head and rolled dead a mere 95 yards from the line of scrimmage—that's unofficial yardage though. He was booming his lesser kicks in the range of 50 to 75 yards—just the right height and distance so George Morris, Lum Snyder and company could crack the intended receiver wide open as he gathered in the ball—ugh!

Benny's Hitched

Slipping away from the gory gridiron scene, we're going to chance a bit of exclusive society news. The hottest rumor around Cloudman Dorm last quarter was that a certain senior, no less than a guard on the basketball team, was going to get MARRIED! He'd shake his head, mutter "I don't know," then sneak a sly grin when questioned on the matter of a marital mate.

It's no longer rumor. Benny Register slipped and fell last Friday evening. About the time most of us were sitting down to supper, Benny was saying "I do" along with his lovely bride and high school sweetheart, Miss Betty June Day, in the Eastern Heights Baptist Church in Columbus, Georgia.

After a short honeymoon the newlyweds will return to Atlanta long enough for Benny to finish school. Although orders have not come through yet, he's planning on a tour of duty in the army immediately after June graduation. Good luck always.

Teeter Umstead was best man for his backcourt running mate. Joe Keener, Bill Cline, Pete Silas, Mickey Sermersheim, Jim Fritch, Barry Blemker and Bubba Curry (manager in 1949-50) were on hand for moral support before and during the ceremony—and for celebration after.

A pair of Yellow Jacket golfers came through nicely in the Dogwood Tournament a week ago at the Druid Hills Country Club. Scott Howell and Charley Harrison fired identical 309 totals in the 72-hole medal affair to share a tie for thirteenth place in a record field of over 400 contestants.

Athletic News Head Hosch Leaves May 1; Jackson Fills Post

By Frank Otto

Georgia Tech and the Southeastern Conference will lose probably the best sports publicity man in the South on May 1. At that time the resignation of Athletic Publicity Director Edward Hosch, better known to all as "Chick," becomes effective. He has accepted an exceptionally fine position in the newspaper publishing and printing field in his own home state of Mississippi at Indianola, where he previously served as Secretary of the Chamber of Commerce.

Hosch came to Tech in July 1948 after serving four years as Southern Sports Editor for the Associated Press. His experience with the newspapers, radio, and TV makes him one of the most versatile and popular

Edward J. (Chick) Hosch

sports figures in the Conference. At present Chick is President of the SEC Publicity Directors Association. His editing of the Conference record books has made available the most thorough of references guides on SEC schools.

Athletic Director Bobby Dodd announces the appointment of Jack Jackson, downtown sports writer, to fill the position of Mississippi bound Hosch. He has served as state high school sports editor for the Constitution, a factor which Coach Dodd feels may prove invaluable to the Athletic department.

Jackson is recognized for his fine work and is popular with the Associated Press as well as both downtown newspapers. Born and raised in Athens, he attended Athens High and Baylor School. His service time was spent in the Navy, making it possible for him to attend Columbia, Notre Dame, and Emory.

In 1948 he received a journalism

Track or Baseball?

Jacket Nine Drops to Florida; Wins Pair From Commodores

Tech baseballers won two games from Vanderbilt while losing one to Florida. Wednesday afternoon Florida took Tech to the cleaners by the score of 15-5. Haywood Sullivan, Florida grid star, smacked his first two homers. Sullivan collected three hits for four times at bat. Both of his homers were in the same spot; over the left field fence approximately 240 feet away. He drove in six of Florida's 15 runs.

Bobby North and Bob McCoy led Jacket batters. North was the prime power with a home run, and McCoy had two singles. No other man in the line-up had more than one hit. The second game scheduled with Florida on Thursday was rained out and will be played April 25 in Atlanta.

Friday afternoon Tech and Vanderbilt scored 25 runs on 11 hits. Tech won the title 14-11, which lasted for three hours. Chappell Rhino, the football halfback and fourth Tech hurler, whiffed Dick Royal to end the game.

But prior to that welcome act, 30 men walked, 25 runs scored, seven errors were made, and only 11 hits had been collected by both teams.

Coach Pittard's baseballers jumped to a 9-3 lead by virtue of a seven-run outburst, highlighted by Bob Lusk's tremendous three-run homer, in the third inning.

The Commodores charged back with three tallies in the seventh and four in the eighth to hold a 10-9 advantage. Pittard's charges rallied with a quintet of scores in the eighth frame to gain the victory. Bob Lusk got three of the five Jacket hits.

Saturday afternoon featured an

degree from Georgia and proceeded to join the Constitution staff. Jackson is 25, married, with one child of about eighteen months, Larry. Jack intends to do post graduate work at Tech and has already started his new duties on a part time basis to learn the ropes.

other Tech baseball-track game with the Vanderbilt Commodores. Again the Yellow Jackets won, but this time with a different score. After racing around and around Rose Bowl Field Tech came off with a 22-8 victory.

The deluge began in the first inning, when eight runs poured across for the Jackets on three hits, five walks and one error. Five hits, one a home run by little Red Crabbe, plus a stolen base helped five additional runs across in the third, and the score continued to mount.

Vandy collected only five hits, but wildness on the part of Tech pitchers, who walked 14, accounted for what opposition was offered.

Bob Lusk, who is now batting .470 for 15 games, had four hits in five times up to lead the Tech attack. Two were doubles and one was a triple.

Tech's next home games are with Florida, Wednesday, April 25 and with Auburn, Friday and Saturday, April 27 and 28.

Most Valuable Player Award Coming Friday

Friday night at the T-Game in Grant Field Stadium, Coach Bobby Dodd will present The Technique's Most Valuable Player trophy to the outstanding grid star of the 1950 season.

The award is based on a student ballot poll conducted by The Technique for two weeks immediately following the close of each football season.

Old South—

(Continued from page 3)

Alpha shocked the solid southerners with their new declarations. Because of world conditions and because the threat of communism, the Confederate Forces of Georgia offered their services to the United States of America as long as our country as a whole is in danger. As it is plainly understandable by the latest declaration, the Kappa Alpha have gone all out to aid the forces of democracy. General Vandivere accepted the services of the Confederate troops.

At the conclusion of the state house activities, the Kappa Alphas and their guests were present at many parties Dixie-land squired their fair damsels to the city auditorium where they danced to the rhythms of Dean Hudson and his orchestra.

changes and discusses different methods that college bands may use to improve the appearance and effects of their performance. The last of the divisions is for the purpose of working out new and impressive tricks that can be used in the flash card sections. With schools like Kentucky, who are allotted as much as three thousand dollars for the promotion of school spirit, there should be many good ideas coming forth that other schools may profit by.

This year's conference was sponsored by the University of North Carolina's "University Club." They provided for participation in one of the Universities school spring festivities, after which the meetings were held on the campus. Georgia Tech's representatives to the meeting were Jim Perkins from the Student Council, and Joe Gunness and Carlos Ygartua from the White and Gold Club. Their main interest was to get ideas for next year's freshman school spirit program. Next year the Conference will be held at the University of Kentucky.

Additional Phi Eta Sigma Initiates Hear Mr. Emerson at Banquet

By Bill Ross

Last Tuesday night, April 17, over thirty freshmen were initiated into Phi Eta Sigma, the freshman honorary fraternity. These freshmen became eligible for membership by their attainment of a point average of 3.5 or higher during the last fall quarter. After an impressive initiation ceremony, during which the new members received their Phi Eta Sigma keys, the group moved to the ODK room of Brittain Hall, where a banquet was held in honor of the new members.

Guests at this banquet, in addition to the officers and new members of Phi Eta Sigma, were: Professor A. H. Bailey, who is faculty advisor to the fraternity; Mr. C. L. Emerson, vice-president of Georgia Tech, who was speaker of the evening, and Pro-

fessor H. K. Fulmer of Georgia Tech's mathematics department.

In his speech, Mr. Emerson emphasized the opportunity that lies before engineering students today. He stated that while the demand for engineers is enormous, the supply is critical; this is a good time for young men to specialize in engineering. At this point Mr. Emerson gave his formula for success, "Do each day's work as you come to it, the very best you can."

Mr. Emerson went on to say that in graduate engineering work lay the greatest opportunities to be found in engineering today. "Go on," he urged, "if you like your work," he said, "it won't be work at all." Mr. Emerson closed by saying teachers of engineering are badly needed today, and urged the group to seriously consider teaching.
