ANAK SOCIETY SELECTS NEW MEMBERS

Bell Laboratories Outlined for Engineers

Mills Speaks Under A. S. M. E. Auspices

John Mills, who is prominently identified with the research of the Bell Laboratories, the great organization that conducts such a volume and variety of scientific investigations in the effort to constantly develop telephony and all its kindred fields, spoke to several hundred students Tuesday afternoon at 1 P. M. in the main lecture room of the Physics building. The talk was under the auspices of the Student Branch of the American Society of Mechanical Engineers, and Mr. Mills was procured through the co-operation of the Southern Bell Telephone Company with the Mechanical Engineering department here at Tech.

Mr. Mills is a graduate of the Massachusetts Institute of Technology, and holds degrees from other colleges. He was a member of the faculty at M. I. T. and elsewhere after his graduation, and his talk showed a keen insight into the problems of the older undergraduates in an engineering school which could only have come with intimate association with numerous individuals who were facing them. While a college faculty member Mr. Mills was interested in Physics, and research in the pure sciences.

In the first few minutes of his talk to the Tech students Mr. Mills (Continued on Page 3, Column 2)

M. E. Department Makes Additions to Its Faculty

Professor Stovall Returns From Leave of Absence

There will be two new instructors in the Mechanical Engineering Department beginning of next semester. Prof. Samuel C. Stovall, Jr. returns from leave of absence of two years to the Ga. School of Technology to take up his position as assistant professor of Mechanical Engineering. Prof. Stovall is a graduate of Ga. Tech, having the degree of B. S. in M. E. During the past two years Prof. Stovall has pursued studies at Yale, looking forward towards a Doctor's Degree. He has also traveled extensively in this country and Europe, making a study of engineering projects. With the knowledge gained (Continued on Page 3, Column 3)

Pi Delta Epsilon Sponsors National Competition

Awards to Be Made for Best Editorial Published in Present Academic Year

Cash prizes will be awarded for the best editorials published in college journals during the academic year 1927-28, according to announcement made here by Henry Grattan Doyle, dean of men of George Washington University.

The awards will be made by Pi Delta Epsilon, the honorary collegiate journalism fraternity, sponsor of the competition, which will be directed by Dean Doyle as grand vice-president of the society. The purpose of the contest is the stimulation of greater interest in university publications and the elevation of the quality of their editorials. If successful, it will be made an annual event, with additional prizes later for other journalistic features. College "comics" are barred from the competition.

Identical prizes will be awarded in two groups, as follows:

Group A—Open to all college journals and staffs.

Group B—Open to members of Pi Delta Epsilon on staffs of college journals in institutions where the franchise is held.

(Continued on Page 2, Column 5)

Fraternity Pledges Will Soon Be Initiated

List of Eligibles to Be Posted in Three Weeks

The time is now almost at hand for the initiation of the pledges into the many fraternities on the campus, and the freshmen are looking forward to the great event with a mingling of pleasant and unpleasant emotions—with something of pride but also of awe and fear.

As is well known a pledge who is deficient in more than twenty-one equivalent hours of academic work may not be taken in, so the initiation cannot be held until after a report of eligibles is made.

The Registrar will post his first list about Tuesday, February 14. Therefore most of the initiations will probably take place on the Friday and Saturday nights following or on February 17 and 18.

X. E. Department Engaged in New Line of Work

Department Does Pioneering Work With Ammonia Vapor

The Experimental Engineering Department is at the present time engaged in conducting an experiment concerning the characteristics of the transfer of ammonia liquid to brine and ammonia liquid and vapor to water in double-piped, cooling condensers.

This is one of the first, if not the first, experiments conducted in the analyzing of ammonia liquids and vapors when they are changed to brine.

This research is of commercial as well as scientific value. It will yield data that up to the present date has not been obtained. This experiment should interest all manufacturers, but particularly those who are engaged in the manufacture of refrigeration apparatus. This result of this experiment will be announced in approximately two months.

The Experimental Department is also engaged in making apparatus that is to be used in the standardization of air flow measurement equipment. This apparatus is not only being made by this department but also was designed by it. The department hopes to have this equipment completed before the coming June.

Automobile Chassis Presented to M. E. Department

Oldsmobile Company Is Donor of Valuable Gift

An Oldsmobile chassis direct from the recent Auto Salon in New York City has been given to the M. E. Department through the courtesy of Mr. M. C. Wilson, Assistant Manager of the Atlanta branch of the Olds Motor Works. His son, who is a student at Tech, is really responsible for this generous gift as it was his suggestion. The chassis is the same type as was exhibited at the Southeastern Fair last year. All moving parts are cut away and painted in contrasting colors to show their construction and operation. The cylinders, selective gear case, etc. are covered with glass and practically the whole outfit is nickel-plated.

The car is to be jacked off the floor and will be operated by means of an electric motor inserted in place of the starter. It is indeed a valuable piece of equipment as the students, in the future, will be able to observe what actually occurs in an automobile while it is under operation.

All Regular Students Wishing to Change to the Co-op Course Must Register with Prof. McDaniel before Jan. 28.

Martin, Cabaniss and Hood Receive Great Honor

Men Chosen at Pan-Hellenic Dance

At the annual mid-year Pan-Hellenic dance, which was held at the Biltmore Hotel on last Friday evening, formal announcement was made of the name of those members of the senior class who were elected to the Anak Society. Founded in 1908 by Chip Roberts, this organization, to which only seniors are admitted, is regarded as the highest honorary society on the campus, and those men who are fortunate enough to be elected to it are indeed deserving of praise. It is a coveted honor to wear the red band with the "1", the "eye" and the "3".

"Firpo" Martin, Alpha Tau Omega, one of the new members, has, during the three years he has played varsity (Continued on Page 2, Column 5)

Southeastern Inter-Fraternity Advisory Committee to Meet

Program Includes Discussions of Some Interesting and Important Subjects

The Southeastern Interfraternity Advisory Committee is going to hold their annual meeting on Saturday, January 21 at the Atlanta Athletic Club. Following are the program and speakers of the occasion.

1. Report of New York Interfraternity Conference.
2. General Survey of Fraternity Conditions on each campus.
 - a. Alabama—Borden Burr—Birmingham.
 - b. Mississippi—L. E. Thatcher—U. of Mississippi.
 - c. Georgia—C. H. Candler.
 - d. South Carolina—Dr. F. H. Calhoun—Clemson.
 - e. Florida.
3. High School Pledging.
 - a. From the High School Standpoint—Will Beyer, Central "Y".
 - b. From the College Standpoint—Dr. W. S. Nelms, Emory Univ.
 - c. From the Fraternity Standpoint—William Huger, Boston Tech.
4. Fraternity Scholarship—Discussion Topic.
 - a. Second Session.
 - b. Dinner.
 - c. Guest of Honor and Speaker: Dr. Francis W. Shepardson.
 - d. Subject: The Interfraternity Movement.

This Conference is being held in the interest of better co-operation between fraternities and a better understanding of the problems of student life which concern the college fraternity.

G.S.T.

R.O.T.C. Holds First Parade of Year

Review Held in Honor of Dr. Brittain

The R. O. T. C. of Georgia Tech went through its first parade of the year when a formation was held on Grant Field last Thursday morning. This was followed by a regimental review on Monday afternoon.

The review showed that the cadet officers were taking advantage of the minor mistakes which had shown up in the previous parade the same day and presented their best appearance of the year when the regiment passed in review in honor of Dr. Brittain on Thursday morning.

NOTICE TO SENIORS
Class Meeting, Tuesday, Jan. 24
at 11 A. M. in "Y" Chapel

Modern Language Department Offers Prizes to Students

Rules of Contest Are Announced

The study of modern languages at The Georgia School of Technology, as announced by the professors of that department, has a two-fold aim,—a utilitarian and a cultural. Primarily its purpose is to enable the student to translate into his own tongue with ease and precision the articles which are constantly appearing in foreign magazines on his profession subject, (Continued on Page 3, Column 4)

Ceramic Society Holds Annual Banquet

Dr. Henry to Make Speeches Before Georgia Exposition and Rotary Club

The Annual Banquet of the American Ceramic Society was held at the Henry Grady Hotel, Thursday, January 12, and was featured by hilarity and good spirits; one of the seniors entertaining at the piano with one finger. Mr. Vaughn gave an interesting talk on Installation of Ceramic kilns, which he illustrated with lantern slides. Several of the Seniors and Juniors made impromptu speeches and toasts.

The Tech branch of the Society is very active and is well known in professional circles. They have a pottery exhibit at the exposition of Georgia Arts, which is now going on, and Dr. Henry and Professor Rush-Brown are scheduled to make speeches at the exposition this week. Dr. Henry will also talk before the Rotary Club on Georgia Kaolin. The Constitution requested him to write an article on Ceramics for a series which they are running on "Georgia mineral sources."

The Ceramic department is doing pioneer work in making Georgia minerals known and appreciated by the public. This work helps, not only the school, but the entire state as well, as Georgia is very rich in minerals which are little known and exploited. We like the spirit with which the department works, both professors and students, and we hope they will keep it up.

MORE PICTURES

The photographic staff of the Blue Print announced Tuesday that another photographer would be on the campus about January 25, or shortly thereafter, the exact date to be announced by appropriate signs on the campus.

A number of seniors and fraternity men have failed to co-operate with the staff in having sittings earlier in the year, and as this, the last visit of the photographer is chiefly for resittings and will necessarily be brief only a limited opportunity will be given for those who have procrastinated. The appearance of the senior section of the book will suffer materially unless the remaining seniors have pictures made.

Proofs from the last visit of a photographer are being returned to students for their selection, and the staff has asked that these selections be completed promptly.

SCHEDULE AND INSTRUCTIONS FOR EXAMS ISSUED BY THE REGISTRAR

First Term Schedule January 30-February 8

Examinations will be held in the rooms where the classes regularly meet unless otherwise announced by the departments concerned.

- Monday, January 30, 8 A. M.
Chem. 17—Quant. Analysis.
Com. 47—Corp. Finance.
E. E. 7—Elec. Eng'r.
Ex. E.—Steam Lab.
Hist. 11—U. S. History.
M. E. 41—Thermodynamics.
T. E. 41—Weaving.

- Monday, January 30, 1 P. M.
Arch. 35—Sanitation.
C. E. 51—Water Supply.
Com. 33—Accounting.
Com. 61—Auditing.
Com. 79—Salesmanship.
E. E. 9—A. C. Machinery.
(Continued on Page 6, Column 1)

Registration Begins February 6

All students except Seniors, Freshmen, Special Textiles, No. 1, and students in the Commerce and Architectural Departments will register with Dean Skiles—Juniors on February 2, 3 and 4, and Sophomores on February 6, 7 and 8.

Students in Architecture will register in that building on any morning during the examination period.

Commerce students will register as follows at the office in the Commerce Building:

- Monday, February 6—Seniors and Juniors.
Tuesday, February 7—Sophomores.
Wednesday, February 8—Freshmen.
All Seniors will register with the department in which they are taking their major work.

BATTALION ATHLETICS

Not every one can play varsity football or basketball. Only a few can participate in the sports which represent the entire school, but there are plenty of other opportunities open for those who wish to take part in athletic contests.

Battalion athletics have done much to arouse the spirit of the students, and to keep them interested in the athletic contests as a whole. They furnish an opportunity for physical development to many more students than can be reached in any other way. They present a topic of conversation around the fire-side almost as important as any varsity game.

Too, they give an opportunity for the coaches to see other men than those who have tried out for the varsity, and to select men who through their own modesty or timidity have kept in the shadows but who really have the makings of varsity players.

Nearing the end of the battalion football season we should pause to pay tribute to those who make possible this wider range of activities which includes basketball as well. Battalion athletics have become a well established institution in the range of activity and their importance can hardly be over estimated.

To Coach Alexander by whose kindness equipment is obtained for the use of the military teams and to those who have given their services as coaches of the various squads the students owe a debt of gratitude, and to the officers of the military department who have stood behind the contests and have made them possible much credit is due for their success.

BLUE RIDGE

This is the first of a series of articles that will appear each week in the Technique in the interests of Blue Ridge and endeavoring to bring it to the attention of the student body. These articles will give information concerning the time, place, aims and purposes of this great student conference.

These conferences are held each year shortly after school is over at Blue Ridge, North Carolina, and are composed of representatives of all the outstanding colleges of the South. Blue Ridge is two and one-half miles from Black Mountain; fifteen miles from Asheville, and is in the heart of the mountains of North Carolina, famous the world over for their beauty and places of interest. A few of the outstanding sights that are near the conference grounds are Chimney Rock, Mount Mitchell—the highest point in Eastern America—Catawba Falls, the Vanderbilt estate, and many others equally as interesting.

As a place of rest and recreation after a hard year of school work, it has no equal. There are tennis courts, golf links, lakes and canoes with plenty of moonlight nights, a swimming pool and gymnasium. In fact, everything that goes to make up a perfect summer. Perhaps some will think that there is one thing missing—the young ladies that help make life bright for the poor college boy. They are there in large quantities, in short, the mountains and surrounding country abound with the "fairer sex" and many happy hours have been spent in this wonderful environment is just such a manner. Of course all these things are more or less incidental and later on in these articles the other side of the conference will be stressed, for there is another side—a far more important one.

Next week there will be another article telling more about Blue Ridge, the colleges represented, and some of the activities.

News From Other Colleges

Three o'clock in the morning is the time for the closing of the junior prom at Boston University next spring, according to a new ruling just made. By the same ruling inter-departmental functions must close at 2 o'clock, and fraternity dances must cease at one.

Approximately one out of every six students at the University of Michigan works to help meet financial expenses while at college. The number of students working this year is slightly higher than former years, due possibly to the poor industrial conditions.

Crooked work and the selection of a cow for the beauty queen of the campus will not take place this year at Ohio State University, if authorities can help it.

Each year for the home-coming celebration, the campus has elected a co-ed beauty queen. Last year election returns were thrown out because of crooked politics, and a cow, Maudine Ormsby of the College of Agriculture, was accorded the honor and crowned in the stadium. This year a committee of judges instead of the entire campus will select a beauty queen, and she will be a human co-ed, they say.

The student-faculty social committee of Washburn has decided to try the plan of entirely barring stags from school varsity dances. The plan is merely an experiment and is to apply to two dances.

Despite the Volstead law fifty gallons of whisky are shipped into the United States every year from London. The forbidden liquor is

contained in four thousand plum puddings. This year we expect to get "plum" drunk.

The faculty was graded and ratings were published in the College of the City of New York last fall. Five professors did not pass.

In this rating the prime consideration has been the professor's general ability as a teacher. Personality and knowledge of the subject have been secondary factors. "Ability" has been taken to mean the capacity for instilling a sincere interest in the subject matter of a given course and the power to impart the information necessary as a basis of such interest. Blistering, platitudinizing and liberal posing have been marked very low, as creating an ephemeral and specious interest.

Dr. Wells, professor of botany at North Carolina State University, says that every college man should get married at the end of his freshman year, and that our educational institutions should be co-educational.

Almost ten per cent of the student body of the Massachusetts Institute of Technology come from foreign countries. Of the 234 foreign students registered at the institute this term, representing 51 nationalities, 42 are of Chinese extraction, and 28 come from Canada. Eighteen students live in Russia, while there are 10 from Mexico and 10 from England.

The Miami Student, of Miami University, claims to be the oldest college paper west of the Alleghenies, having been established in 1823. The paper is now a semi-weekly.

CAMPUS CALENDAR

Friday, January 20:	Merrimakers Dance (Garber Hall)	9:00 P.M.
Saturday, January 21:	Merrimakers Dance (Garber Hall)	9:00 P.M.
Sunday, January 22:	Sunday School	9:45 A.M.
	Church	11:00 A.M.
Monday, January 23:	Blue Print Staff Meeting ("Y" Basement)	5:00 P.M.
	Technique Make-Up Staff Meeting ("Y" Basement)	8:00 P.M.
Tuesday, January 24:	Yellow Jacket Staff Meeting ("Y" Basement)	11:00 A.M.
	Glee Club Practice ("Y" Chapel)	4:00 P.M.
Wednesday, January 25:	Technique Staff Meeting ("Y" Basement)	4:00 P.M.
Thursday, January 26:	Yellow Jacket Staff Meeting ("Y" Basement)	4:00 P.M.
	Glee Club Practice ("Y" Chapel)	4:00 P.M.

Versely Bray

By M & M

(Famous Last Words)

A WOMAN—THAT'S ALL

They say that you are pretty,
And I'll admit it's true;
They say that they are pleasing,
And I'll say that too.

'Tis said that you are sweet,
And pure as can be;
That you're as good as any girl,
And that's not hard to see.

'Tis murmured that you're perfect,
Both body and in mind;
That you're just the type of girl
A man is proud to find.

I could sing your praises onward,
'Till they tower in the sky—
And make you think of angles;
As thru the heavens they fly.

But your name is woman,
And your traits are bound to fall,
To the realms of damned fickleness,
And lying most of all.

With a sweetness of immortal touch
You led me to believe,
That there was only one for you—
Oh, God! How you deceived.

Your kisses were like aged wine—
That stimulates the heart;
They gave to me a faithful trust—
To you, another start.

You took me for a plaything,
And used me in your way;
But now the time has come to pass
And this alone I say—

Others may sing your praises,
But I will dare to say:
"Here's one that's ended singing,
For many a new-come day.

—L. B. M.

RICHARD CORY

Whenever Richard Cory went down town,
We people on the pavement looked at him;
He was a gentleman from sole to crown,
Clean favored, and imperially slim.

And he was always quietly arrayed,
And he was always human when he talked;
But still he fluttered pulses when he said,
"Good morning," and he glittered when he walked.

And he was rich—yes, richer than a king
And admirably schooled in every grace:
In fine we thought that he was everything
To make us wish that we were in his place.

So on we worked, and waited for the light
And went without the meat and cursed the bread;
And Richard Cory, one calm summer night,
Went home and put a bullet through his head.
—Edward Arlington Robinson.

TO THE VIRGINS, TO MAKE MUCH OF TIME

Gather ye rosebuds while ye may,
Old Time is still a-flying;
And this same flower that smiles to-day,
To-morrow will be dying.

The glorious lamp of heaven, the sun,
The higher he's a-getting,
The sooner will his race be run,
And nearer he's to setting.

That age is best which is the first,
When youth and blood are warmer;
But being spent, the worse and worse
Times still succeed the former.

Then be not coy, but use your time,
And while ye may, go marry;
For, having lost but once your prime,
You may forever tarry.
—Selected.

MARTIN, CABANISS AND HOOD RECEIVE GREAT HONOR

(Continued from Page 1)

football for Tech, shown his ability and proved himself one of the outstanding men on the campus. In addition to his football supremacy, he has been active in other lines—a member of the Koseme, Bull Dog, and Cotillion Clubs, and of the Student Council and Pan-Hellenic Council.

Bill Cabaniss, Chi Phi, is, in addition to being one of the best track men the school has produced, a most popular member of the Senior class. Belonging to the Bull Dogs, the Skull and Key, the Cotillin Club, and the Civil Crew, he has stood out in many activities and deserves the high honor he has received.

"Papa" Hood, Delta Tau Delta, the third of the men elected to the society, has been active for four years in all forms of athletics at Tech—football, track, and lacrosse, and, as a member of the Koseme Society and the Spiked Shoe, has been a most popular figure on the campus. His election is approved and endorsed by all.

With the three new men, the club now consists of six of the leading students, Walter James, Ed Crowley, and Ernest Kontz having been initiated at Commencement last year.

PI DELTA EPSILON SPONSORS NATIONAL COMPETITION

(Continued from Page 1)

ternity has a chapter. The first prize in each group is \$50; second, \$35; third, \$25; fourth, \$15; fifth, \$10.

A board of judges composed of editors and writers of national repute will read the editorials submitted and make the awards. They are Ira E. Bennett, editor, Washington Post; Claude G. Bowers, editor, New York Evening World correspondent; Oliver P. Newman, Washington journalist, and Frederic William Wile, Washington correspondent and author.

The competition closes July 1, 1928, and the editorials submitted must have been written by undergraduates and published during the academic year 1927-28. Monthlies, quarterlies, literary magazines, alumni publications and comics are not included in the competition.

"Pi Delta Epsilon is nearly twenty years old and had about 3,000 living members," said Dean Doyle. "It has chapters in forty-five of the leading colleges and universities and, by this initial competition for editorials, hopes to contribute something new and more later to the betterment of college journals and the encouragement of wholesome campus life."

The officers of the fraternity are: grand president, George McIntosh Sparks, Georgia School of Technology; grand vice-president, Henry Grattan Doyle, dean of men, George Washington University; grand secretary, Harold E. Lobdell, assistant dean, Massachusetts Institute of Technology; grand treasurer, Joseph C. Patty, Greenville, O.; grand editor, Robert Hooper McNeil, instructor in journalism, Colgate University.

The judges are nationally known newspaper men. Mr. Bennett was formerly Washington correspondent of the San Francisco Chronicle and has been since 1905 editorial writer and since 1908 editor of the Washington Post. Mr. Bowers was formerly editor of the Fort Worth Journal Gazette, has been since 1923 editorial writer on the New York World and is also well known as an historian. Mr. Ludlow has been Washington correspondent of the Indianapolis Star and is now Washington correspondent of the Columbus Dispatch and Ohio State Journal. He is the author of "From Cornfield to Press Gallery" and "Senator Solomon Spiffledink." Major Newman is a journalist of long and varied experience and was Commissioner of the District of Columbia under President Wilson. Mr. Wile is a famous war correspondent, author and political writer who broadcasts weekly talks over the N. B. C. Blue Network on Wednesday evenings on "The Political Situation in Washington Tonight."

The director of the contest, Dean Doyle, is a former instructor at Harvard who has been a member of the faculty of George Washington University since 1916 and has also taught at Cornell University and Johns Hopkins University.

G.S.T.

The Pennsylvania railroad has now put on a smoking car for women. But we'll bet they didn't put it just back of the tender.

ALONG THE AVENUE

Is it possible that we may leave the immediate environs of the Avenue and travel to that land where dollars and the white stiff shirt are the prevailing mode and re-enact that mob scene of last Friday night which was called by the social contingent, Mid-year Pan-Hellenic? And it may almost be authoritatively said that every Fraternity freshman on the campus made his debut either with or without Tux. But nevertheless they swelled the crowd and added shekles to the coffers of the "Council." And that foreign bunch of musicians, who called themselves Ross Gorman and his Band, from somewhere outside of Atlanta and Buckhead and College Park, certainly did get hot and bring forth more music and entertainment than the gang has been used to in many a moon. (And this Blase' Atlanta crowd actually applauded! Will the age of wonders and miracles never pass). To watch the antics of that little Monkey man trumpet player was well worth the price of admission alone. We must not lay all the blame of the crowd on the budding frosh, but must recall that there were numerous out of town Bells, "Aluminum" shining with a fresh polish, and most anything else that you may have or desire. Well, anyway, that was one seething mass of humanity and that is no Scheherezadean dream. It is a pity that James Cruze or some of his noble band of directors could not have been here and saved that much money on the filming of a mob scene. That would have saved so much money on the extras that they could have presented the entire company to passes to their latest productions. But all that free entertainment would not appease the anger and ire aroused by the use of my corns (not in pints this time) as a Champs Elesys or Malecon de Cuba.

In the old days there was a song entitled "The Last Part of Every Party Is the Best Part of All." Well, that was in the olden days when the old hay burner, without rumble seat, was in vogue and the party ended with refreshments at half past nine. But now it is the middle part that is so good if the rush for sandwiches and cakes can be the criterion of good time. It took Frenchy and his crew of Ethiopians running at full speed the best part of the hour of intermission to fill up the yawning craws. But those sandwiches with these slices of ham sliced to infinitesimal thinness just could not fill some of those whose hunger was at a high pitch. There was many a Scotchman or member of some other tight order that had neglected to eat for the past two or three meals and who thought that that was the time to get his share. Well, they just about got it. They surely broke all of old Emily's Rules of Etiquette. Right in the middle of the dance, the Anaks made their fall tap. Everything went off smoothly except that Doug overlooked Papa and how he did it more than we can see. How anybody can overlook that two hundred odd pounds of masculine beauty among a bunch of mere hop scotch girls is beyond compare. But Papa is an Anak and power to him.

As a fitting climax to the festivities of the evening, some of the boys loved their tuxes so well that they attended class in them Saturday morning. Oh! for a picture of Jimmie Dugan's face or the Judge's.

After that monster struggle in the early evening when hundreds were turned away from the gate at the basketball game, the gang journeyed to Garber's and Ross and the Monkey Man again held sway and played to the amusement of all. The Tech Athletic Association which gets more cussing than most anybody else during the year again came in for its share and they did miss quite

a few ducats which would have served some admirable purpose that we could think of. But getting back to Garber's real quick by Aladdin's lamp: Above the novelty of the new orchestra, everybody was gladder to see Miss Nora back up there after so many months that the feeble vocabulary of man can express. Miss Nora is a great character and the love which she has for the terrible younger generation cannot be any greater than the love which they have for her. Atlanta did a noble thing when they selected her as one of the outstanding citizens for the past year.

The In-Axe have elected for the winter. Firpo Martin, Billy Cabiniss and Papa Hood were those who were so signally honored. The whole campus joins in the heartiest congratulations to this trio. "Firpo," who derives his name from that famous pugilist, had to play the dual role of white wing and prize fighter and sweep Peachtree for Mayor Ragsdale. Billy had to pose as John Gilbert in Parks-Chambers, Inc. Papa became a poiper boy for the afternoon. The highest honor that Tech can bestow came to this nobleman of nature in the hour of his greatest sorrow.

The Tau Epsilon Phi entertained at a house dance on last Saturday night. A good time was had by all.

G.S.T.

Y.M.C.A. Offers Free Coaching Lessons

Through the efforts of the Y. M. C. A. cabinet, freshman coaching classes have been organized. These classes will meet twice a week for the next two weeks without charge to the students.

Bill Dunkin will lead the freshman drawing classes, Norris and Evans, junior chemicals, will take charge of chemistry, and Irving Hitchcock will aid the freshmen in Algebra. Other classes will be organized if at least four students petition for one class.

The "Y's Ideas," a weekly news letter, has made its initial appearance. In it will appear further notices pertaining to coaching classes, and it will give other "Y" and campus news. Copies may be secured at the "Y" desk. Mr. Cashion and Tony, the editor of the news letter, will gladly accept contributions and ideas.

BELL LABORATORIES OUTLINED FOR ENGINEERS

(Continued from Page 1)

outlined the organization of the Bell Laboratories and the method of handling the problems that have been solved during the years he has been there. He explained several illustrative problems and then sketched the solutions which have vastly improved telephone service, and brought about the development of such well known recent achievements as electrically cut phonograph records, Vitaphone, and Telephoto, as almost casual "by-products."

Mills then asked leave to discuss the work that is open to the engineer, and started out by entirely exonerating the engineer who seeks a career. He defined a career as the expression of ones personality through some medium. He then presented a rather original and very interesting method of analyzing one's personality, and again the fields of industry, and fitting them together to the end that a man may enjoy a well ordered life that is compatible with his own individual temperament.

Mr. Mills is the author of several excellent books on Physics and kindred subjects, several of them being along electrical lines, as well as one or two in more general fields.

His talk was one of the most profitable that Tech students have heard recently, and perhaps the best attended.

M. E. DEPARTMENT MAKES ADDITIONS TO FACULTY

(Continued from Page 1)

Prof. Stovall returns to Tech in a much better position to handle his class room work than ever before.

Prof. R. G. Sawyer comes into the department to take up an entirely new line of work. Prof. Sawyer will organize the Industrial Educational work so as to provide teachers for the various technical high schools, and, also, Smith-Hughes work. The demand for instructors along this line has been so insistent that Dr. Brittain, after careful survey of the State decided that Georgia Tech was the logical institution to supply teachers for this work. The result being that Prof. Sawyer, with his wide experience has been selected. Prof. Sawyer will also organize summer instruction for Smith-Hughes teachers, and, also, High School teachers, who find it necessary to improve their knowledge of technical shop instruction.

Prof. Sawyer comes to us from Jacksonville, Florida, where he was Director of Vocational Education of the combined City and County School System. Mr. Sawyer obtained his early training from the Decatur Illinois High School, James Millikin University, Stout Institute and the University of Florida. Mr. Sawyer has had extended experience in teaching and his practical work covers work with such companies as The Pullman Car Co., Chicago, Illinois, Wabash Railroad, The H. Mueller Mfg. Co., and several other industrial companies.

The addition of Mr. Sawyer to the Georgia School of Technology Faculty means that Georgia Tech is taking one more step to serve the interests of the State of Georgia and to bring up its educational system to first rank. There is no school in the Southeast offering such training as is proposed at Georgia Tech.

MODERN LANGUAGE DEPARTMENT OFFERS PRIZES

(Continued from Page 1)

because translations of even the best technical literature are not made into English for years after publication in their original form. Secondly, its aim is to call attention to the magnificent works found in these languages and to arouse in the student a living interest in their great literary productions—an interest so strong that he will continue to read their masterpieces.

Seeing the great benefits to be reaped through a promotion on the cultural side of the Department, and of the student's interest in the countries with which the United States are most closely connected in commerce and also in intellectual development, alumni have offered a prize of \$250 to the student, one in the Spanish and one in the French Department, who makes the highest ranking in his class work and in a competitive examination at the end of the session. These prizes are to be used for expenses of a trip to France, Spain, or some Spanish-American country, by the two fortunate students.

To compete for this prize the student must be taking advanced modern language. He must first be exempt of the final exam, and then stand the examination. In connection with the course, he must be prepared to write a paper on some subject of French or Spanish Literature, this to be announced by the heads of the departments. The two prizes are then awarded to the student in his department who is best qualified on examination and presents the best theme on the collateral work.

Last year the two students who were so interested in the study of modern language as to win the prizes, were, in the French Department, Pat Napier, and in the Spanish Department, W. O. Patrick. Napier made

a very enjoyable and successful tour of France during the last summer. Patrick has just returned recently to his school work, after a most delightful and beneficial trip in Spain and France.

To all of you who can appreciate Emerson when he wrote: "The world—this shadow of the soul—lies wide around. Its attractions are the keys which unlock our thoughts and make us acquainted with ourselves," and to all of you who desire to have revealed before your own eyes the greatest historical spots of Europe, it is suggested that you begin now and work for these prizes offered by men who take such a keen interest in our school.

G.S.T.

E. L. Motherhead, 19, freshman at the University of Mississippi went to bed one night on top of a triple-decked bed. Since he was planning to get up early and catch a train for a football game, he placed his alarm clock right at his ear. When the alarm went off it frightened him so that he fell from the bed, and received injuries which caused his death.

Pharaoh Wrote Few Letters

POST OFFICE, CAIRO, EGYPT

Now during the tourist season, the mails out of Cairo are tremendously heavy. And no wonder! Everyone who travels in Egypt, who comes into contact with the most ancient of civilizations, must say something about his impressions to someone—even if he has hitherto been a lazy correspondent. He may send only a postal card showing the Great Pyramid with "X showing the spot where I ate my luncheon." But he must write something!

And since the discovery of the tomb of Tutankhamen, tourists have multiplied, impressions have been voluminous, and the mails have increased enormously. "Of course, you can't imagine it without being here, but I simply must tell you about....." And so on.

It is very lucky for the correspondents that with her wonders of antiquity, Egypt did not also inherit the ancient postal system. Only the Pharaohs and the great

officers of state could indulge in the luxury of corresponding with a foreign country—and a letter from the King of Egypt to the King of Babylon might take months in transit. Some of these royal letters have come down to us. They are very long, full of elaborate salutations and important news—as if their writers considered their composition the event of a season.

All things considered, we may be grateful that the modern postal system of Egypt is what it is—efficient, orderly, up-to-date. Of course, the Cairo Post Office is equipped with Otis Elevators.

So with the advance of civilization, Otis, the symbol of twentieth century convenience, has been put at the service of the Pharaohs of Egypt in spreading their fame far beyond any worlds which they could even have dreamed of! The pyramid builders would, we feel sure, appreciate the marvel.

JACKETS DEFEAT CLEMSON, 42-24

SPORTS

Bulldogs Overcome Jacket Lead To Win

Tennessee Will Battle Jacket Five Tonight

The Jackets face the Nashville Volunteers tonight in what is expected to be one of their toughest games. The Jackets were successful in defeating the Clemson Tigers for their first win of the conference engagements but with the improvement that they have shown in the last few days, and if the Vols have a cage team that will compare favorably with their gridiron production a very tough battle will be staged on the gym floor tonight.

This game will be the Jackets last engagement until they journey to Athens to meet the Georgia Bulldogs in a return engagement on the night of January 28, 1928. The university five will play University of North Carolina, Duke University and North Carolina State next week. Displaying the same improved teamwork in evidence against the Georgia Bulldogs, the Jacket cagers took the visiting Clemson Tigers into camp Tuesday night at the Tech gym, by the score of 42 to 24.

The first half was fought almost on even terms, the score at the half-way point being 18-11, in Tech's favor. The starting players, Williamson, Harris, Heeke and Goldin, were held down by the fighting invaders, who towards the end of the period rang several long shots. The passing of the Jackets, during the first half, was a bit ragged, but improved towards the last two or three minutes.

The second half saw a great improvement in the teamwork of the Tech players. The team was aggressive, fast and the passing was lots better than in the initial twenty minutes. The scoring was also better, the Jackets accounting for 24 markers in this stanza.

CAPTAIN NICK GEORGE

Inter-Dormitory Track Meet to Be Held

All Students Eligible

Another inter-dormitory track meet will be held Saturday, January 28, which will be different from the last one in that all students from freshmen to seniors will be permitted to run. The varsity candidates will also be able to compete in the meet, but large handicaps will be given them. The meet will be started promptly at 4 o'clock. Hank Saks was the first dormitory freshman to finish in the last meet, but he will have plenty of added competition to overcome Saturday if he hopes to repeat in this meet. This is the first inter-dorm run that the varsity has been able to compete in, they are usually barred from participation in meets of this sort.

Heeke and Player Score for Jackets In Thrilling Game

Jacket Defense Works Well

The Georgia Bulldog came to Tech flats last Saturday to take on our own Yellow Jackets in the initial basketball game of the season, between the two schools.

In retaliation for the stinging defeat handed them by the Jackets on the gridiron last fall, the fighting Bulldogs from Athens town came out on top of a 33-30 score. It was a fast, tight game for the entire distance. At the half the locals were leading by the score of 17-14, and it looked as if the men from Georgia might again feel the sting of the Jackets, but it was not to be so, and when the final whistle blew it found the Bulldogs in the position stated above.

Georgia Tech started the scoring early in the first quarter, and prevented Georgia scores by closely covering the visitors' sharpshooters, namely Florence, Keen and Drew. Heeke and Captain George of the locals were responsible for the Tech scores in the first half, their combined efforts giving the Jackets the edge in the first half of the fray.

Between halves, the Athenians talked the game over with a good deal of vigor, it seems, as in a couple of minutes of furious action, the visitors soon had the score above even. Once ahead of the Jackets, the Bulldogs proceeded to kill the ball at every chance, long arms and legs kept the ball beyond reach of the stock Tech players. It was, needless to say, very aggravating, but yet it was good judgment from the visitors' standpoint.

According to sports writers the visitors seemingly had the best fighting edge, but this is very doubtful, it could not be possible for a team to fight harder than the Jackets. Fouls were one of the main undoings of the locals. Foul goal after foul goal was chalked up by the visitors, these gave the required points to win that big three.

The crowd that packed the gym on Techwood Drive was mostly made up of Tech students, and not many townsmen could find room in the overly packed court. The game was originally scheduled for the city auditorium, but was finally run off in Tech's own gym.

The line-up follows:

Georgia (33)	Pos.	Tech (30)
Florence (9)	F	Player (8)
Keen (11)	F	Harris (2)
Drew	C	Heeke (10)
Martin (4)	G	George (2)
Palmer (9)	G	Goldin (8)
Tech subs—Wilson for Player; Bullard for Heeke.		
Referee—Sullivan.

ALT. CAPT. FRANK PLAYER

Coast Artillery and Air Corps Tie for Lead

Navy Beats Ordnance

The Battalion football game Wednesday, January 11, between the Infantry and the Signal Corps was featured by a brilliant thirty-five yard by Shule, left halfback for the Signal Corps team. After a hard struggle the Signal Corps boys finally triumphed to the tune of 6 to 0. This run by Shule resulted in a touchdown, and another touchdown was barely missed when a pass was completed just outside the end zone line.

Besides the splendid work of Shule, McNeely, center, and Lee, fullback, also starred for the Signal Corps. Both teams showed plenty of fight and the running and blocking was very good. Most of the game was played in the Infantry's territory and it was mainly through the fine work of the Infantry tackles that the score was held to one touchdown.

Two very good football games were played Saturday, January 14 on Grant Field. In the first encounter the Navy aggregation defeated the Ordnance team by the score of 6 to 0, and in the second played at 3:30, the strong Air Corps outfit emerged victors over the Signal Corps.

The first engagement was a hard fought battle, and a fine brand of football was displayed by both teams. Wiggins, the left half for the Navy, was the outstanding star. He got away several times for nice gains. The Navy fullback also played good football and made quite a few nice tackles.

In the nightcap the Air Corps came out on top by the score of 12 to 0. This was another hard fought game and was featured by a number

Jacket Baseball Practice Starts February 6

Schedule Announced

Opening the baseball practice season February 6, Coach Kid Clay has announced the 1928 schedule which calls for 28 diamond combats. The four outstanding games will be with the University of Georgia, which will be played in Athens May 18 and 19, and in Atlanta May 25 and 26.

The schedule is an eventful one. Opening the season with the Atlanta Crackers March 16 and 17, the Jackets will take on Ohio State and Mercer at Grant Field in order. From there they travel to Auburn where they battle the Tigers April 16 and 17. Next they take on Auburn at Atlanta, and Alabama in Tuscaloosa, returning April 27 and 28 to play the Tide in Atlanta, Tennessee, Vanderbilt and South Carolina come to Grant Field for two game series, and then comes the series with the Bulldogs. Games will also be played with the Oglethorpe Petrels. This is the hardest schedule of a Jacket baseball team in the last few years, but with many regulars back, Coach Clay should win the championship, or come mighty close to it.

of brilliant plays. The Air Corps in this game showed the best attack that has been demonstrated in Battalion football this season. The first touchdown was scored on a beautiful twenty-five yard line which placed the ball on the Signal Corps' twenty-yard line, from which place it was carried over on line bucks. The second touchdown resulted from a fumble by a Signal Corps back. The left end and Crane, fullback, starred for the winners, while Lee, fullback, and McNeely, center, were outstanding for the losers.

As a result of the games Saturday the Artillery and the Air Corps are leading the pack, each having two wins and one tie to their credit.

The schedule for the remaining games is as follows:

Tuesday, January 17, Coast Artillery vs. Navy; Wednesday, January 18, Air Corps vs. Ordnance; Saturday, January 21, 1:30, Infantry vs. Air Corps; Saturday, January 21, 3:30, Navy vs. Signal Corps; Tuesday, January 24, Coast Artillery vs. Ordnance; Wednesday, January 25, Navy vs. Infantry.

A student failed in an exam in all the five subjects he took.

He telegraphed to a brother: "Failed in all five. Prepare papa."

The brother telegraphed back: "Papa prepared. Prepare yourself."

Jacket Frosh Defeat McCallie, 42-27

Hoffman and Jones Play Brilliant Games

Rats Play Cumming A. C.
 Preceding the Tech-Georgia game, the Tech freshmen engaged the McCallie School of Chattanooga with very successful results. Headed by Hoffman, the demon forward, the Rats scored 42 points and held their adversaries to 27 well-earned markers.

The Tech Frosh were also successful in their foul shots, completing 6 out of 10, while McCallie made 5 out of 13, Tech shot 18 field goals and McCallie accounted 11. The game was fought hard throughout, but nevertheless, was extremely clean.

Hoffman was the star of the battle, gathering in a total of 15 points, 14 of them being field goals. Tom Jones of Monroe A. & M. was another Junior Jacket star. His playing was of the highest degree, his passing being superlative, and he made eight points, being the second high point man of the Rats. Lumpkin, of football fame, also played a fine game, scoring seven points.

Of the blue-clad McCallie players, Duncan, forward, stood out above his cohorts. Scoring nine counters and exhibiting good floor-work, he was high point man of the Chattanoogaans. Tate, guard, also was outstanding, marking up six chalkers. The refereeing of "Fat" Elrod was splendid, being partial to neither side. The summary follows:

Tech (42)	Pos.	McCallie
Hoffman (15)	F	Breitenbacher 4
Tippin (3)	F	Duncan (9)
Jones (8)	C	Garnett (2)
Colvin (2)	G	Watson (5)
Maree (2)	G	Tate (6)

Substitutions — Tech, Brooke for Hoffman, Griffith for Tippin, Lumpkin for Jones, Isaacs for Colvin, Vestal for Maree. McCallie—Hunt for Breitenbacher, McLeod for Duncan, Fisher for Watson. Field goals, Tech, 18; McCallie, 11. Free throws, Tech, 6 out of 10; McCallie, 5 out of 13. Referee, Elrod.
 G.S.T.

Tennis Prospects for Great Season Are Bright

Good Team Predicted

An outstanding player in collegiate ranks will be sorely missed this spring when the tennis candidates assemble for practice. This young net star is Berry Grant, captain of the 1927 team and mainstay of the Tech tennis team last year. Williamson and Lewis were also lost through graduation and the loss of these two sterling players will also be felt.

Merry, ranked number two last year, will probably lead the court men the coming season. This diminutive star showed up exceedingly well in the 1927 season, and great things are expected of him this year. Lewis, Cabaniss and Merkle have also returned to school, and another good team is anticipated.

With good men from the freshman team returning to school, together with the varsity players, there is a fine possibility that the Conference Championship, won last year, will remain in the possession of Georgia Tech.
 G.S.T.

Jacket Tankmen Start Season's Practice

Great Schedule Made

With the first call for both varsity and freshmen on tap for January 10, the Tech swimming season will soon be under way. Most of last year's team will again be present, many freshmen have also announced their intention of trying for the team.

No regular coach handles the reins for the team, but the team usually receives many pointers from veterans while training at the downtown athletic club.

The first few weeks will be taken

Tech Rifle Team Announces 1928 Schedule

Eleven Matches Arranged

The firing for the Fourth Corps Area R. O. T. C. match will be finished between January 2 and February 28. The National R. O. T. C. match will come between February 15 and April 15.

Captain H. W. Robinson has announced that other challenges have been sent to various colleges and other matches will probably be arranged. The following men now compose the team: L. V. Storey (captain), Martin, Adair, Bell, O'Bear, Smith, Myers, Spangler, Anderson, Ramsey, Baggaly, Moorhead and White.

The complete schedule has not been finished, but the following are the matches already arranged:

The following gallery matches have been arranged, small bore rifle:

- Iowa State College, January 14;
- University of California, January 21;
- Mississippi A. & M., January 21;
- Oregon Agricultural College, January 21;
- L. S. U., January 28;
- North Dakota State College, February 11;
- V. P. I. Rifle Club, February 11;
- New Mexico Military Institute, February 18;
- West Virginia University, February 18;
- A. & M. College of Texas, February 25;
- University of Cincinnati, March 2.

up with setting up exercises in preparation for the water grind. Actual swimming will start around March 1. This will be under the direction of the varsity captain. The freshman captain will be chosen at a later date.

The freshman team bids to be strong with many men from the balmy waters of Florida ready to show their form.

Soundings From The Flats

F. L. M.

The Yellow Jacket team demonstrated an entirely different brand of basketball Saturday night against the University of Georgia five and Tuesday against the Clemson Tigers. Their play in the Georgia game showed a great improvement over their previous exhibitions against the A. A. C. and Auburn. The Jackets took their first conference engagement by defeating the Clemson team, and although their passing was not as good as in the Georgia game they showed more accuracy in shooting. With the Jackets having emerged from their slump they should give Tennessee a great fight tonight.

The freshman five revealed some great material as well as wonderful teamwork in their victory over the McCallie school of Chattanooga, Tenn., winning easily by a one-sided

score. They seemed to be able to score at will, passing the ball with astonishing accuracy. Hoffman, Frosh forward, proved to be the most outstanding player, shooting 15 points for high point man, with Jones of the Frosh and Duncan of McCallie holding second honors.

The announcement of the baseball schedule of the Jacket nine reveals that the season will be opened with two games with the Atlanta Crackers, as well as that four games will be played with the Bulldogs, two in Athens and two in Atlanta as a climax to the season. Although actual practice has not begun, a bright season is expected, because the team did not suffer but a few losses due to graduation, and a wealth of material came up from the freshman nine.

Open day for conflicts.

Please report any conflicts or omissions at once to the Registrar's Office. Owing to the fact that there are so many irregular students it is impossible to make a schedule which will suit everybody. Please do not request changes except to avoid actual conflicts.

Seniors who are entitled to re-examinations in first term subjects must take these as scheduled above. For re-examinations in second term subjects apply direct to the departments concerned. Re-examinations are allowed only to candidates for graduation June 1928, who have deficiencies carried over from last year.

SCHEDULE FOR EXAMS

(Continued from Page 1)

According to the announcement made by Dean Fisher, the registration of the freshmen for the second term will be as follows:

All students who rate as freshmen, including Special Textiles, No. 1, and all irregular freshmen, except those in the departments of Commerce and Architecture, are to report in chapel at the regular orientation period at eleven o'clock on the morning of Tuesday, January 24. The registration will be made at this time and it is very important that every one classed as above report at this time. Cards must be filled out prior to the

orientation period so that the students can be properly grouped and assigned to sections. Anyone failing to fill out these cards at the appointed time may not be able to get his schedule because of the sections being filled.

The new schedules will be ready for delivery February 7 and 8, and all students are due in classes at eight on the morning of Thursday, February 9. Fees may be paid any time prior to February 9, and the receipt must be presented to obtain a schedule.

Freshmen in Commerce will pay their fees and take the receipt to the Commerce office at any time on Wednesday, February 8, when they will be registered and given schedules.

In the Architecture Department freshmen will register any time during the period of examination in the Architectural Building, when they will receive their schedules.

S.P.

Dispatch from navy received January 18, 1928. Commander J. J. London, U. S. Navy, the P. N. S. & T. School of Technology as American Ambassador to Havana for Pan-American since. Commander London is attached to the Mayflower while on national duties at the White House during the administration of President Wilson in 1918.

Georgia School of Technology

"A TECHNICAL SCHOOL WITH A NATIONAL REPUTATION"

THE GEORGIA SCHOOL OF TECHNOLOGY offers to young men of ability and ambition a training which will fit them for positions of responsibility and power.

The national reputation of this institution is based not on claims, but on results. Its greatest asset is the record which its alumni are making in the productive work of the world. Georgia Tech graduates succeed because they have been trained both to think scientifically and to work efficiently.

Courses in CIVIL, ELECTRICAL, MECHANICAL, TEXTILE, GENERAL, AND CERAMIC ENGINEERING, ENGINEERING CHEMISTRY, ARCHITECTURE, COMMERCE, AND GENERAL SCIENCE.

Coast Artillery, Signal Corps, Air Service, Infantry, and Ordnance Units of the R. O. T. C.

To smoke wisely and well, choose Camel

THERE'S an irresistible reason for choosing this famous cigarette. Not for its popularity alone, but for that superior quality that produces it.

Camel wins its prestige with modern smokers by forthright value. It is rolled of the choicest tobaccos that money can buy, and its blending is the taste and fragrance triumph of tobacco science.

The Camel smoker is tobacco fit. He has the best, with no scrimping or dealing of cost. There are no four-wheel brakes on Camel; no brakes at all. It is full speed ahead, straight for quality.

Select Camel for smoking pleasure, and you'll join distinguished company. Particular modern smokers have found it on the principle of superiority. "Hose a Camel!"
