### **Games, prizes and more during Auxiliary Services loves Students Week, Feb. 8-14**

## News Bulletin

**Melissa Moore**  
Director of Communications  
Auxiliary Services

Effective Feb. 1, Rosalind R. Meyers accepted new duties at Georgia Tech. She became the Vice President for Campus Services. Her new responsibilities include management of Auxiliary Services, Human Resources and Business Services (formerly part of Financial Services).

Auxiliary Services will remain with its existing departments, the bookstore, BuzzCard Center, Dining Services, Health Services,

Rosalind R. Meyers recognizes her employees continually for outstanding work. This time, she has been recognized herself, with a promotion to Vice President for Campus Services. She is pictured above with the Auxiliary Services November 2009 Employee of the Month Jay Jenkins (left), project management coordinator, and Steve Johnson, project manager.

Housing, Parking & Transportation and the Student Center. A search for an associate vice president to fill Rosalind's former position will be conducted later this year.

Human Resources will add Career Development and Training, formerly part of Organizational Development.

The Business Services unit includes procurement, accounts payable, travel, logistics/surplus property and property control.

Join the new Campus Services team and wish Rosalind congratulations in her new endeavor!

Kyle Hanofee (Management major) shops for specials at Burdell's in the Student Center Commons. If it's on sale at Barnes & Noble @ Georgia Tech, 48 5th Street (Technology Square), Atlanta, it's on sale at Burdell's too!

# New dining options planned for campus

by Sarah Gilbreath  
Communications Intern  
Auxiliary Services

If you are in the mood for a taste of something new on campus, you're in luck. Plans to make changes to four areas on campus are already underway, and some may be ready as soon as the end of this semester.

After the resounding success of the new Dunkin' Donuts in the Student Center, people on campus are eagerly anticipating the next restaurant. The one scheduled to open first is Tech's very own Waffle House, which is moving into Tech Square. But this will not be just any Waffle House, the entire restaurant will be Tech themed, from the statues of Buzz to the seating upholstery based on the

inside of the Ramblin' Wreck.

The menu will also differ slightly, placing a heavy focus on to-go orders and including new "to-go friendly" items. It will even include a wi-fi lounge and an outdoor patio.

The Student Center will also be getting quite a facelift. Downstairs, Pandini's will be closing to make room for a secondary food court containing three new restaurants: Subway, Taco Bell, and a bigger Chick-fil-A.

This new Chick-fil-A will have more menu options than the smaller one currently on the second floor. The new Taco Bell could possibly serve its full menu, including those elusive Cinnamon Twists.

"We'll also be bolstering the burger menu at Jackets," said Student Center Director Rich Steele. "We want this food court to have more traditional, American foods." The entrance to Jackets will be redone to give the area a more open feeling, and more seating will be added.

"One of the best things about this new design is that we will be able to keep one or more of the

Follow North Avenue Apartments Dining Hall construction updates on Housing's website at [www.housing.gatech.edu/projects/NAA-DiningHall.cfm](http://www.housing.gatech.edu/projects/NAA-DiningHall.cfm)

new restaurants open later at night and possibly on the weekends," said Steele.

"There's a real need for more evening options."

Pandini's will close in early March and the full renovation should be completed by August.

Not to be outdone, the current Food Court on the second floor is also getting a makeover. In the space of the current Chick-fil-A, there will be an Indian concept restaurant.

The Burger King will also be leaving, though burgers will still be available in Jackets. In its place will be a Mediterranean-style eatery, which will serve foods like "wraps, kabobs, and falafel," said Steele.

"The whole food court will have an international flair."

The changes should be completed by August.

Last, but certainly not least, the North Avenue Apartments

will be getting its own dining hall. Set to open fall 2011, the dining hall will be "a beacon for East campus," said Steele.

"It's the first new dining hall Tech has built [in quite some time]. We get to start from the ground up."

Occupying the space recently vacated by Quiznos and the convenience store, this new dining hall will have more ethnic foods and longer operating hours.

The walls will be glass to let in as much light as possible and there will be an enclosed courtyard area.

The façade around the dining hall will also be changing and will include a glass elevator, new stairs, and a ramp up from street level.

Construction will begin this May on the project, which, as Steele said, is "our latest and greatest project so far."

eastside Market/BuzzBy Hours of Operation

| Day       | Hours    | Evening Hours |
|-----------|----------|---------------|
| Monday    | 11am-2pm | 7pm-1am       |
| Tuesday   | 11am-2pm | 7pm-1am       |
| Wednesday | 11am-2pm | 7pm-1am       |
| Thursday  | 11am-2pm | 7pm-1am       |
| Friday    | 11am-2pm | CLOSED        |
| Saturday  | CLOSED   | 7pm-1am       |
| Sunday    | CLOSED   | 7pm-1am       |

## Barnes & Noble @ Georgia Tech is wireless!

It's not news that Barnes & Noble @ Georgia Tech in Technology Square is wireless on the Georgia Tech network, but it is news that now customers may enjoy Barnes & Noble @ Georgia Tech as a hotspot with total wireless connectivity beyond the Georgia Tech network!

# Dr. Maureen Olson joins Stamps Health Services

Stamps Health Services is proud to welcome its new Medical Director, Maureen L. Olson, MD, FACEP.

Joining the team on February 8th, Olson will take control of all clinical operations.

A graduate of the Morehouse School of Medicine, Olson completed her postdoctoral residency at the Emory University School of Medicine in the Department of Emergency Medicine.

In addition to being Board Certified in Emergency Medicine, Olson is the Immediate Past President of the Georgia College of Emergency Physicians. She also serves on two committees of the national council for the American College of Emergency Physicians. Olson was recently appointed to the Disabilities Services Medical Review Group by the Governor of Georgia Sonny Perdue.

Dr. Olson calls her role at Stamps Health Services "an honor and a privilege. The future national and world leaders in various disciplines are being trained and educated here at Georgia Tech."

Eager to start to work, Olson shares her desires for the future. "We will strive to continually provide high quality, state-of-the-art health care to the Georgia Tech community."

## Moving forward with Parking & Transportation

by Sarah Gilbreath

If you have been on campus this semester, then you have probably noticed Parking and Transportation's newest change: a brand new fleet of buses and trolleys.

Following a contract with Groome Transportation, the fleet began running in January. While the trolleys are comparable to the older model in size and design, the new buses are more spacious and boast a brand new Tech-themed

design on the side. This design, which includes golden hive-like hexagrams, has been a topic of some debate among students.

"We've had several students tell us that bees have hives and yellow jackets don't," said Torise Battle, Communications Officer for Parking and Transportation.

"We've done the research and we have several pictures; yellow jacket nests have that same hexagonal pattern."

*continued next column*

### *Parking continued*

"The design is right; we promise!"

Not only have the buses changed, but some of the routes and stops have changed as well.

Due to the completion of the construction on the 14th Street Bridge, the Green Route has changed.

"It's actually just reverted back to the route it had three years ago before the construction started," said Battle.

Additionally, more of the stops now have LED screens displaying the approximate time of the next bus's arrival. More will be installed soon.

Another change taking place is the Stingerette ride requests. Instead of calling an operator, students can now request a pick-up online or through an automated phone system. Of course, students can still talk to an operator if they choose.

"This system was designed to alleviate the phone system, which backed up," said David Williamson, associate director,

Parking and Transportation.

"This method is much quicker and easier."

The system has a memory, making orders much easier. There are more than 400 pick-up and drop-off locations on campus.

Of course, there are always more changes and innovations on the horizon.

The next big upcoming change is switching the bus and trolley fleet from regular fuel to a product called B20.

"It's a product that mixes 80 percent regular fuel with 20 percent biofuel," said Williamson.

"We can turn the waste from Dining Services into bio-fuel, and the B20 will make our vehicles much more economically friendly. I'm all for any new technology that burns fewer fossil fuels."

When will this switch take place?

Williamson responded, "Hopefully by the end of this semester. But then, I'm always optimistic."

**New Stingers and Tech Trolleys came to campus the beginning of Spring Semester. Check them out as you make your travels across campus.**

Looking for the contest? You've found it. The first 50 people who e-mail Melissa Moore ([melissa.moore@gatech.edu](mailto:melissa.moore@gatech.edu)) the correct answer to the computation will win an Auxiliary Services flash drive. The computation is how many years has Auxiliary Services held its

Auxiliary Services loves Students Week plus what day in February did Rosalind R. Meyers accept her new duties as Vice President for Campus Services plus what year is the new North Avenue Apartments Dining Hall scheduled to open.
