

Global Economics and Modern Languages (GEML)

If you're looking for a program that combines rigorous training in economics with extensive foreign language study, then GEML could be perfect for you. The **School of Modern Languages** and the **School of Economics** offer a joint Bachelor of Science degree in Global Economics and Modern Languages (GEML), with separate language concentrations in French, German, Japanese, and Spanish.

GEML provides graduates with a unique set of skills that industry and government agencies require. As a GEML major, you will:

- understand the economic and social complexities in an economically interdependent, multilingual, and multicultural global environment;
- gain in-depth knowledge of cultural differences and the capacity to function effectively in a second culture;
- learn to apply fundamental economic concepts to the international area of your choice; and
- have the advantage of instant access to economic data in the language of origin as it is released in media, corporate, and government reports.

Foreign
Trade

Language requirements for the degree:
