

## Undergraduate Men's Average Rises While Coeds' Declines

Undergraduate men's point average for the 1959-60 academic year is 2.2537, reflected an increase of 0.0014 over last year's average.

A consistent riser for the past five years, the coed average dropped 0.0090 to 2.2537.

The Kappa Epsilon, which was second among fraternities last year with a 2.8068, moved to first place this year with a 2.4710. Chi Psi, which was first last year, took second place with a 2.4272.

These fraternities were followed by Phi Gamma Delta, 2.4254; Lambda Chi Alpha, 2.3770; and Sigma Chi, 2.3663.

The fraternity men's average was 2.2737 for the year and 2.2297 for the spring quarter. The undergraduate men's average was 2.3459 for spring quarter.

There were 10 fraternities which had averages greater than the undergraduate men's average.

### Researchers Get \$80,489 For Quartz Investigation

Engineering Experiment Station has received a \$80,489 contract from the United States Signal Supply Agency to investigate stability of quartz crystals for this country's satellite program.

Physicist Richard B. Belsler will be the project director for this work.

Research at Tech on aging studies of quartz resonators has been supported by the Signal Corps since 1950. Recent developments in space exploration and missile programs have indicated a need for special quartz resonators of greater stability for satellites.

Techniques for the production of stable quartz resonators of lower frequency than that needed have been developed here at Tech. It is the purpose of this study to develop stable units of higher frequency.

Radiation facilities to be used in this investigation will be those of the Radioisotopes Laboratory including the particles accelerator.

The National Science Foundation has given Tech \$28,000 to support research entitled "Vibrations of Piezo Electric Quartz Crystals."

Use of this grant will be directed by Dr. Arthur L. Bennett, chief Physical Science Division, Engineering Experiment Station.

## Computer Center Sponsors Two Seminars This Quarter

Rich Electronic Computer Center is holding two seminars this quarter.

A seminar on the "Bell General Purpose System," which began Monday, will be held from 4 to 5 PM in room 249 of the Classroom Building. This seminar is open to all Tech faculty members and students, and will last about four weeks.

The classes, which are being conducted by Mr. A. P. Jensen, require no previous seminar or course work.

A second seminar, which also started this week, is being con-

Point averages for the 1959-60 academic year are as follows:

1. Tau Kappa Epsilon	2.8710
2. Chi Psi	2.4272
3. Phi Gamma Delta	2.4254
4. Lambda Chi Alpha	2.3770
5. Sigma Chi	2.3663
6. Delta Tau Delta	2.3667
7. Alpha Epsilon Phi	2.3461
8. Phi Kappa Phi	2.3172
9. Pi Kappa Alpha	2.3060
10. Phi Beta Theta	2.2973
11. Kappa Alpha	2.2904
12. Beta Theta Pi	2.2871
13. Alpha Tau Omega	2.2811
14. Theta Xi	2.2802
15. Sigma Alpha Epsilon	2.2752
FRATERNITY MEN	2.2737
16. Phi Sigma Kappa	2.2659
CO-EDS	2.2537
UNDERGRADUATE MEN	2.2537
17. Sigma Phi Epsilon	2.2346
18. Phi Epsilon Phi	2.2285
19. Kappa Sigma	2.2244
20. Delta Sigma Phi	2.2236
NON-FRATERNITY MEN	2.2095
21. Tau Epsilon Phi	2.1877
22. Chi Psi	2.1745

23. Sigma Nu	2.1041
24. Theta Chi	2.1450
25. Delta Upsilon	2.1450
26. Pi Kappa Phi	2.1389
27. Phi Kappa Sigma	2.1324

### '61 CLASS RINGS

Students classified as second quarter juniors or above will be able to order 1961 class rings on Tuesday.

A representative of I. G. Balfour and Company will be located in the information booth right outside the Registrar's Office in the Administration Building between 10 AM and 2 PM on Tuesday to take orders.

## Infirmary Offers Polio Shots; New Clinic Hours Take Effect

By TOMMY PROCTER

"Students are still not taking advantage of the free polio and typhoid shots offered by the Infirmary," stated Dr. J. B. Riggsbee, director of health.

Riggsbee added, "Many students who were supposed to have had their third or fourth polio shots have not done so."

Last week, more than 450 doses of polio vaccine were returned unused to the drug company. Only 50 polio shots were given during the entire first six months of 1960," continued Riggsbee.

Students who want to take advantage of these free shots should go to the Infirmary between 7:45 and 11:30 AM any weekday.

The Infirmary has a new address.

### YMCA Sponsors Dance For All Students Tonight

A sport dance will be sponsored by the Tech YMCA tonight at 8 PM for all students.

Admission is \$25, and the dance will be held outside the YMCA Building.

Attending last week's dance were 40 Tech students and 35 girls from Atlanta nursing schools.

The Recreation Council is co-ordinating the dance. "We provide transportation for the girls, program the music, and furnish refreshments," commented Sherman Green, president.

Students who drive are paid for their gas, added Green.

"We meet at 8:15 PM on Monday nights and will welcome students who would like to become a member of the council."

"We hold a steak fry for active members each quarter," concluded Green.

## EE Completion Set For Spring Of 1961; Four New Dormitories To House 764

By BILL ZACHRY

Evidence of Tech's growth is the expansion of campus facilities.

Housing space will be augmented by the addition of four men's dormitories which are scheduled for occupancy in the fall of 1961.

The 764 future residents will have at their disposal built-in furniture, intercom systems, and grating over windows to block sun glare.

Completion of the new \$3,900,000 EE Building is set for spring, 1961. Improvements will include

a complete air conditioning system, modern lighting, increased lab and research space, and new, flexible design concepts.

Also planned are a 582 seat circular auditorium and a new antenna research facilities on the roof.

Crenshaw Field House, replacing the former building of the same name, will be located at the intersection of Ponce de Leon and the Expressway. To be in use by March, 1961, it will house Band, Drama Tech, and

other student activities.

Tech's research reactor and lab on Atlantic Drive should be in use by the summer of 1962. Bids for the project will be opened on September 7.

In March of next year, the Physical Plant staff will move to 915 Atlantic Drive, according to Mr. Claude Petty, director. Petty stated that the move will enable the Plant to gain a central warehouse and storehouse, a new shop, and new administrative offices.

### Tech Topics

## SL&EC Gives Musical Tickets

Student Lecture and Entertainment Committee is distributing 1700 general admission tickets for the July 20 performance of "The Chocolate Soldier" at the Theater Under the Stars, Chastain Park.

Costing \$1000, the tickets were distributed to the student body during the week. Faculty members may obtain their tickets today in room 339 of the Classroom Building between 11 AM and 2 PM.

An educational grant of \$1500 has been received by the School of Chemical Engineering from the American Cyanamid Company.

Civil Engineering pre-registration will be held in the Civil Engineering Building, Wednesday night, July 20, between 7 and 8 PM.

Regular first and second quarter freshmen will not pre-register at this date. Third quarter freshmen should report

to room 108 at 7 PM.

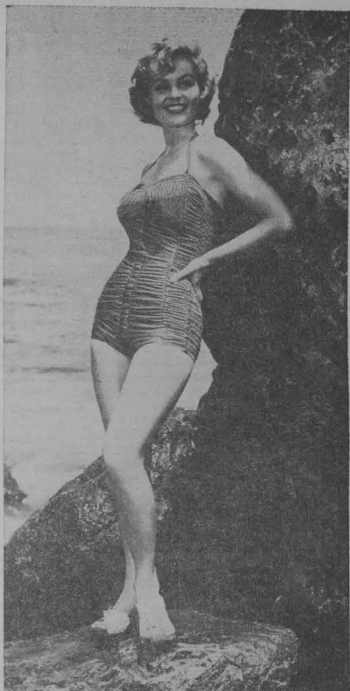

Students who have not been assigned an adviser should report to room 107.

Students having legitimate excuses to miss pre-registration should contact their advisers to make appointments according to Dr. Robert E. Stiemke, director of the School of Civil Engineering.

Students who fail to pre-register will not receive time cards.

The School of Chemistry has received an additional grant of \$7820 from the National Science Foundation to support an undergraduate research program.

Total funds for this project are \$11,750. The project is under the direction of Dr. John H. Dyer.

DAMSEL ON THE ROCKS . . .

## Write Letters To Editor

The power of the press comes from the people. A newspaper writes articles and editorials to inform the public and channel thinking.

The only way, in many instances, that a paper can find out what its readers are thinking is through Letters to the Editor.

For this reason, the editors want and ask for your views in a Letter to the Editor whenever you feel conditions warrant it.

Feel free to express yourself.

## Don't Put Things Off

Why didn't you come to our party?

We needed your participation to write our report in black ink, and it was such a lovely blast.

We had our executive committee busy for months in advance coordinating the publicity, entertainment, decoration, and refreshment committees.

We checked for conflicting events the weekend wanted. We cleared with Pershing.

We put up posters, made announcements, and printed the word. We invited the whole school! We sold tickets at all hours.

In short, we worked our buttons off.

*Well you see, Sir, you had your shindig the seventh week of the quarter, the week that I caught finalitis. Only after I had taken my final final did my condition start to improve.*

*Why didn't you have your party earlier?*

## History In The Making

Once again politics are in the headlines. The greatest demonstration of democracy in the world is in full swing: electing a president for the United States of America. History is in the making.

Your taking an "active interest" in the conventions now, and the campaigns and election later on are not enough. Everybody that places a nickel bet on his choice to win is taking an active interest. This nickel bet does not elect a president though.

The right man in the presidential chair may keep you from having to carry a rifle through some stinking jungle because a war was prevented, or you may be able to get a good job in a booming economy because of a correct decision from the White House. If you pick your man and vote for him, you've had a part in these things; if not, you cannot very well complain.

Why don't you practice living democracy.

EXPRESS YOURSELF!

## WIDE WORLD Our Leaders Face Problems

By RATTAN HEMRAJANI

Perhaps the year 1960 will go down in history as a year of revolutions, and independences, some tragic, others a welcome sign for freedom and democracy.

The start of this decade has been marked by many new developments that have caused concern and fear to many people across the world.

Revolutions in Turkey and Korea. Riots in Japan: Uprisings in Africa. Worsening relations between the US and Cuba. Threats of Communist retaliation in countries where the US has its bases. And now the tragic happenings in the Belgian Congo where many Europeans have lost their lives and property because of rioting by the natives and the army.

Another dark cloud of International Communism has threatened to settle down in Italy, which has always been rocked by communist-led agitators. Many people have died in these agitations.

What is the nature and cause of all these developments? What can be done about it? Where is democracy drifting and what is going to be the outcome of this decade? These questions puzzle us all and are perplexing worries to leaders.

These and other immense responsibilities await the next US President. Who is going to take this great office? First, the two conventions are going to decide the two best men. And then finally you the citizen will have to make the responsible decision of electing the best man for the biggest job.

### Falsies Fail To Fool Alert Beauty Judges

Dishonesty was present in both the Miss USA and Miss Universe contests last week.

It seems that many of the contestants cheated in filling out forms—there own that is. In all, over two dozen girls were caught wearing falsies.

One really can't blame the girls for trying, however. It is a well known fact that, "It's what's up front that counts."

Miss USA, Linda Belmont of Utah, finished way out in front of the others and was crowned Miss Universe. Of course, the girls who finished near the top received expensive prizes. The girls who were caught cheating, however, went home flat busted.

One spectator felt the cheaters should have received booby prizes, but, let's face it, that would have been ridiculous.

The incident just seemed to reinforce the old saying that, "Nowdays, so many girls are putting up false fronts that it is difficult for a man to tell what he is up against."

## Grey Hodges

### 'Dern Fools' Cussed, Countries In Upheavel

Four years ago everybody was talking about that "dern fool general" that made a mess of the US. Now people are talking about "dern fool Catholics and vice-presidents."

When an election comes up, I think about the "crooked politicians" and "that crazy government" up in Washington, and I think about the people that call them this.

But I think also about a nation of people that slaves to complete the latest 10 year plan and gets another shoved on them by their "governments." I think about people fighting for a bearded bandito into to get another government just as bad, and about "citizens" that shoot and kill the people that gave them their new "democracy."

I think about these facts and get this thought: I wouldn't trade our "dern fools" and "crooked politicians" for anything else.

## Wesley Foundation Building Will Offer More Modern Facilities For Members

By CARL PIRKLE

The new Wesley Foundation building, under construction at the corner of Fourth and Fowler streets, will offer many new advantages to the Foundation membership next year.

Designed by Samuel T. Hurst, a professional architect now on the faculty at Auburn University, is two-story brick structure, with its smooth, clean exterior features, neatly terraced landscaping, and complete air conditioning, reflects the present campus-wide trend toward more modern

facilities.

The building will feature an attractive glass front which will allow for more sunlight. A clever use of both red and white brick will also enhance the exterior beauty of the building.

Projected plans also call for the construction of a hexagonal-shaped chapel to the rear of the main building. The remainder of the back area will be used for outdoor recreation.

According to the Reverend Bob Davis, foundation director, the

first floor of the new building will contain three offices as opposed to the single office in the old building.

Permanent bedroom facilities will be available on the east side of the first floor and are expected to provide comfortable housing for six students. A private bath will be furnished for the rooming students, while separate rest-rooms will be available for nonresident members.

The main assembly hall will be located upstairs and will feature a disappearing stage to be used for brief skits and dramatics. Adjacent to the assembly hall will be the dining room and kitchen. Students will be able to enter the front part of the kitchen counter and be served cafeteria style.

Remaining facilities on the second floor include a television lounge and a reading room. Also a front stairway leading from Fourth Street will allow members direct access to the upstairs.

All in all, the new Foundation building should be very appealing to students looking for a quiet, comfortable place in which to worship, relax, or enjoy the fellowship of others.

## Stars, Hit Musicals To Appear At Theater Under The Stars

A galaxy of brilliant young stars have been announced by the Theater Under the Stars for the 1960 Summer Season, which opens July 19 at Chastain Amphitheater.

Beautiful Metropolitan Opera star Jean Fenn will re-

turn again this season to sing in the opening show—"The Chocolate Bonnet." Co-starring with her will be toner Glenn Burris. Mr. Burris, who is making his first trip to Atlanta's outdoor theater, has for the past three years played Jeannette McDonnell's leading man in "Bitter-sweet."

Singing "Some Enchanted Evening," "There's Nothin' Like A Dame," "Younger Than Springtime," "Bali Hai," and all the other wonderful hits from "South Pacific" will be a superb cast led by Gene Hoffman, who starred in the Theater Under the Stars production in 1959.

Betty Jane Watson, who has wined rava notices for her previous "South Pacific" performances at other outdoor venues, will co-star as Nurse Marie Forbush. Beatrice Krebs, who sang Bloody Mary in 1956, will return.

Others in the cast will be Jim Tucker, who played the lead in "Bales in Toyland" last summer, a cable and newcomer Pua Shalom as Lia. "South Pacific" will appear July 26-31.

"Kismet," with music skillfully drawn from Alexander Borodin themes, is another past success that will be brought back to Chastain this summer—August 2-7.

Earle MacVeigh, who played 100 performances with the original company, will play the leading role of Hajji, the beggar-poet who becomes Emir of Bagdad in a single miraculous day.

Co-starring with him will be lovely Jan McArt, who sang Musetta in CBS's TV production of "LaBohème." The romantic plot, colorful sets and beautiful costumes combined with hit songs such as "Stranger In Paradise" and "Bubbles, Bangles and Bend" make a musical perfect for the outdoor stage.

## Girls Practice On Campus; Entertain During Afternoons

By HOWARD ARNOLD

It is amazing what can happen right under the Tech student's nose and for him not to know it's even happening.

A prime example concerns some 20 young ladies, dressed in the tightest of ballet costumes, that prance around on the stage of the O'Keefe Auditorium just about every day, obviously in hard training for a "Theater Under The Stars" presentation.

Of course, not all the girls are attractive. Some look like Smithfield Hams, others resemble bags of marbles; but for the most part they are mighty appealing. If you can't be sure of a girl when she's wearing leotards head to toe, when can you be sure?

Now one might ask, "How do I meet these sweet young things attired so skimpy in their black leotards?"

I wish I knew. When one walks into O'Keefe Auditorium, the temperature seems to be about 20 degrees lower without benefit of air-conditioning. In other words, these young ladies are not likely to give up a night of ballet for a date with a Technician.

So to any Tech student who wants to take on the challenge, might I suggest O'Keefe High School Auditorium on Sixth

Street, on just about any weekday afternoon.

Also under the heading of "things to know about" is a new club called "The Four Bits," located right across the street from the Fox Theater. "The Four Bits" claim to fame is that everything sold there costs four bits (That's Yankee for 50 cents). This includes everything from beer, to whiskey, to potato chips.

The physical features of this club consist of an 85 foot bar that surrounds a dance floor. The reason there's a dance floor is because there's a band that plays rock 'n' roll music. The lady behind the bar told me the leader had made a record (who hasn't?) and that he was really the stuff.

The decor of "The Four Bits" has the charm of a blockfoot mud hut, and the general workmanship of the bar, tables, etc., look as though they were put together as a Cub Scout match-stick project.

The lady behind the bar said, "Don't come if you're under 21." I say, "Don't bother at any age."

# A's Bring Up Bud Blemker

Former Tech baseball and basketball star Bud Blemker was recently called up by the major leagues by the Kansas City Athletics.

Blemker was serving on the

pitching staff of the Shreveport baseball club of the Southern Association when the call came. At that time, he possessed an 8-5 record with the club.

Last year, the little lefthander from Huntingburg, Indiana, post-

ed an 8-2 record with Sioux City.

Blemker is the first Joe Pittard-coached Techman to make it to the majors. The last Techman to reach the big time was big Jim Hearn.

BUD BLEMKER

## Maxie Baughan, Floyd Faucette To Play With College All-Star Team In Chicago

Former Tech footballers Maxie Baughan and Floyd Faucette have been selected to play in the annual College All-Star football game.

This year's contest, which will feature the Baltimore Colts of the National Football League, will be played in Chicago August 12.

Three other SEC grid stars who will appear in the game are: Charlie Britt of Georgia,

and Zeke Smith and Jackie Burkett of Auburn.

The last Techman to play in an All-Star game was Carl Vereen in 1957. Don Stephenson was invited to play in 1958 but had to decline because of his announced plans to play Canadian football.

Tech and the University of Miami have signed to meet on the gridiron in 1964. The contest, which is set for

Grant Field, will be the Yellow Jackets' second game of the season.

The last time the two schools met was in 1953 when Tech won, 14-6, in a nationally televised contest.

Don Shi, who posted a 1.15 earned-run average for Southwest High School's baseball team last season, has signed a grant-in-aid with Tech.

Frank Nix's contract with Los Angeles was among those voided by action of American Football League Commissioner Joe Foss.
