### Bachelor of Science in Economics (ECON)

Offered by The School of Economics

The B.S. in Economics provides students with a strong and broadening overview of economic thought and policy and prepares them for productive careers in a number of fields. Modern economics is analytically rigorous, requiring a background in mathematics and statistics. At the same time, it is critically linked with other social sciences and humanities, as well as to the more practical management and policy studies. Economics students examine topics such as international trade, economic and financial modeling, and econometrics.

### Bachelor of Science in Global Economics and Modern Languages (GEML)

Jointly offered by The School of Economics and The School of Modern Languages

The jointly sponsored B.S. in GEML is offered with separate language concentrations in French, German, Japanese, and Spanish. The degree serves the requirements of industry and government agencies by developing in students an understanding of the global, economically interdependent, multilingual, and multicultural environments in which we exist. Students gain in-depth knowledge of not just their own cultures, but also the capacity to function effectively in a second culture.

### Bachelor of Science in History, Technology, and Society (HTS)

Offered by The School of History, Technology, and Society

The B.S. in HTS is designed to help develop an understanding of the complex social issues associated with our technologically advanced society. Courses in sociology and history foster an appreciation of our multicultural and multiracial past and present, especially as they relate to science, technology, and industry. The focus of the HTS degree is on the social origins and impact of industry, science, and technology.

## Bachelor of Science in International Affairs (INTA)

Offered by **The Sam Nunn School of International Affairs**

The **B.S. in INTA** provides training in technology, ethics, and scientific analysis; international security and scientific analysis; comparative politics, cultures, and societies; and international political economy. INTA majors are strongly encouraged to enhance their education through participation in study abroad programs, internships, and a host of relevant on- and off-campus programs. The School sponsors rigorous summer study abroad programs in the European Union (Brussels), China (Shanghai), Costa Rica, Cuba, and Argentina (Buenos Aires).

## Bachelor of Science in International Affairs & Modern Languages (IAML)

Jointly offered by **The School of Modern Languages** and  
**The Sam Nunn School of International Affairs**

The aim of the jointly sponsored **B.S. in IAML** is to expose students to the politics and logistics of dealing with foreign cultures and societies as well as international businesses and organizations. Foreign language training includes separate concentrations in French, German, Japanese, and Spanish. IAML majors are strongly encouraged to enroll in the intensive summer programs in Languages for Business and Technology (LBAT): French is taught in Lyons, France; German is taught in Weimar and Munich, Germany; Japanese is taught in Fukuoka, Japan; and Spanish is taught in Madrid, Spain, and Mexico City, Mexico.

## Bachelor of Science in Public Policy (PUBP)

Offered by **The School of Public Policy**

The **B.S. in Public Policy** focuses on solving real problems in the United States and abroad by understanding the historical roots of policy issues, by recognizing their impacts on diverse groups, and by applying scientific methods of research and analysis. The School of Public Policy is ranked fourth in the nation in information and technology policy. Courses are designed to build student interest in strategic areas such as law, environmental policy, biotechnology and ethics, risk management and communication, and information policy.

## Bachelor of Science in Science, Technology, and Culture (STAC)

Offered by **The School of Literature, Communication, and Culture**

The **B.S. in STAC** gives students the opportunity to explore literary, scientific, and technological culture. Majors graduate with communication skills, analytical skills, knowledge of literature and culture, and expertise in state-of-the-art electronic media. STAC majors in the Media Studies track graduate with knowledge of the history, techniques, and technologies of film, television, and digital media. Because the program emphasizes theory and production, students gain an understanding of the theoretical underpinnings of media and have the ability to design and create a variety of media objects, including videos, Web pages, and CD-ROMs.
