

## 600 Men Pledge 26 Social Fraternities

This scene was repeated some 600 times Sunday as rush season ended with the greeting of the new pledges.

### Extensive Rush Season Ends; Chi Phi Signs Most Pledges

As a climax to the nine days of intensive rushing carried on by each of the twenty-six Social Fraternities on Campus, approximately 600 men participated last Sunday afternoon in pledging the group of their choice. Two weekends of parties, plus entertainment at "smokers" every night during the week, gave the prospective fraternity man ample opportunity to look over and pass judgement on what this phase of college life has to offer.

#### Fall Pledges

Following is the official listing, by fraternities, of the Fall Quarter pledges, as turned into the office of Dean John J. Pershing, Associate Dean of Students.

#### Alpha Epsilon Pi

Alpha Epsilon Pi turned in a total of seventeen new pledges: Donald Berger, Arnold Berlin, Jay Daneman, Joel Esmond, Stuart Flasterstein, Gilbert Greenbaum, David Greene, Leonard Greenstein, Gary Jacobson, Fren Kahn, Gerald London, Kenneth Lubel, Leslie Morganstern, Charles Schwartz, William Singer, Kenneth Slobody, Lawrence Solomon.

#### Alpha Tau Omega

Alpha Tau Omega's thirty-four new pledges are: Fred John Ayers, Lucius Anderson Barger, Clyde Richard Balch, John Kemberlin Butcher, John Edmund Caldwell, Davis Conner Collins, Richard Ernest Collett, Kenneth Marion Carter, Tully James Dawson, Joseph Julian Gray, Robert Charles Goetz, Frank John Geiger, Lawrence Kenneth Harmon, Jr., William F. Harmon, Jr., William Donald Read, John R. Howard, Jr., Richard Lawrence Jacobs, Peter Aird Kill, Walter Bevis Morton, Robert Henry McCauglan, Theodore S. McKenzie, Jr., Thomas Wayne Mewbourne, Davis Armstrong McNeill, James Richare Miller, Walton Landrum

New, Norman Edgar Reu, Ben D. Strickland, Harold Maurice Shadron, Harry Lee Street, Orson G. Swindle, Richard Eugene Stokes, George Lawson Vann, Larry L. Watson, Stephen M. Worsham.

#### Beta Theta Pi

Beta Theta Pi pledged 27 men this week: John K. Thompson, William F. Cordell, Hall Wightman II, Robert Van Hooser, Jr., Rufus R. Hughes, Ted Rempe, Lewis Reeves, Jr., Buzzy Peek, Gary Bailey, Ken Starling, Harold D. Neeley, Richard Lee, Larry Clark, Walton Sproles, James B. Tune, B. David Wil-

#### Blue Print Notice

Students who have not yet had their pictures made for the Blue Print may do so at Gasper Ware Studio, 876 West Peachtree, Monday, October 10 through Saturday, October 15.

liams, Edwin Scott Barland, Herbert L. McKelvey, Barney Wiggins, Harry A. Scarratt, Rowan C. Campbell, A. Cy Adams, Jerry Chalker, Robert Herliky, Benjamin E. Nash, J. Frank Kauffman, William Robert Johnson.

#### Chi Phi

Chi Phi's forty-two new pledges are: Lee Baumgartner, Toby Baxendale, Frank Beacham, Jr., Robert A. Brown, Grey Cammock, Jr., Tommy Cape, Gerry Craig, Don Cunningham, Temp Davis III, Richard Dolson, Harvey Enloe, Harleigh Ewell, Danny Hagler, Bill Harden (Continued on Page 5)

### CAMPUS CAPERS

Professor taking so long to answer a question that the student who asked it had fallen asleep before the prof finished.

New professor giving his class the "word": "Attempts have been made to know me by the best, but they've all failed."

Two Cuban students singing Dixie with great exuberance at a recent football game.

### Reserve Meeting

All those interested in joining the Army reserves, are asked to meet at 11:00 on Tuesday, October 11, in Room 8 of the Army ROTC Armory to take the qualification test. The test will require approximately 30 minutes. No slide rules or previous studying will be necessary. For further information about the reserves, interested persons may contact Johnny Hunsinger from 9:00 until 5:00 at WA. 1805.

## IFC Plans Activities In Expanded Program

By J. B. MICHAEL

The Interfraternity Council has on tap for '55-'56 plans to improve not only relations among local chapters, but also among all Southeastern schools having fraternities. Also, as part of its program, the IFC has expanded its social activities, says President Stan Gumble.

#### New System

Beginning next Tuesday, IFC meetings will rotate among the various chapter houses on the campus. This will give the members of each chapter a chance to meet and discuss their problems with the IFC representatives. Also, the IFC men will get a firsthand look at each chapter, its house, its high-points, and its shortcomings.

"We hope that this system will not only improve fraternity relations, but will help to strengthen each chapter, individually," said Stan. "Also, by visiting the various fraternities, we hope to be better able to plan our activities, as to benefit all groups."

The system is voluntary and any fraternity can refuse its turn. The IFC meets two times a month,

## Forty-Seven New Members Ease Crowded Departments

Since June of this year, forty-seven new members have been added to the Georgia Tech faculty. Twenty-four of these men have been added on a full time basis.

The Electrical Engineering and Engineering and Drawing Departments each have five new members. The Electrical Engineering Department has added G. B. Hawthorne and S. N. Witt, Jr., as lecturers; N. J. Exarchou and H. E. Meadows, Jr. as instructors, and Jones A. Aderhold as a special lecturer. The Engineering Drawing and Mechanics Department has added J. W. Adams, T. C. Linthicum, J. W. Middleton, and A. J. Sheridan, Jr. as lecturers, and Instructor R. J. Smith.

All those new members added to the Electrical Engineering Department are on part time basis. J. L. Hammond, Jr. has been added as assistant professor along with Instructor N. M. Exarchou to the Electrical Engineering Department, on a full-time status.

The Civil, Mechanical, and Industrial Engineering Departments have added members as follows:

Instructor J. R. Fincher and Special Lecturer J. A. Aderhold to Civil Engineering Department; Assistant Professor C. W. Gorton to the Mechanical Engineering Department; and Instructors C. G. Johnson and N. K. Rogers and Lecturer T. H. Hitt, Jr. to the Industrial Engineering Department.

The Architecture, Chemistry, Math, and English Departments have added the following members: Assistant Professor A. F. Beckum,

## Activities Fair Scheduled Tonight

By DAVE WAY

The Activities Fair, sponsored each fall by the Georgia Tech Activities Council, will be held tonight at 7:00 p.m., on Grant Field immediately after the LSU pep rally. All interested students are welcome.

The goal of the Activities Council, formed in 1951, is to introduce Georgia Tech's many organizations to new and old members of the student body through the Activities Fair. At the beginning of each Fall quarter, each participating organization sponsors a display explaining its purpose, activities, and the way it generally operates. This

year the participating organizations are:

American Institute of Industrial Engineers, DramaTech, Physics Club, Eta Kappa Nu, American Institute of Electrical Engineers, Y.M.C.A., Baptist Student Union.

Also participating are the Lutheran Student Foundation, Wesley Foundation, Canterbury Club, New-

man Club, Institute of Radio Engineers, Radio Club, Society for the Advancement of Management.

American Association of Textile Chemists and Colorists, Delta Kappa Phi, Camera Club, Glee Club, Blue Print, Engineer, Technique.

The Activities Council will issue a list of meeting times of its member organizations which will be published soon in the Technique.

The President of the Activities Council is John Klinke; Bill Moss is head of the Activities Fra Committee.

Pictured above are scenes from the Activities Fair of 1954. Tonight over 21 organizations are expected to be on hand to greet the freshmen and other interested students.

#### Increased Dues

IFC dues have also been increased since last year. They are one dollar and fifty cents for fall and winter quarters and three dollars for (Continued on Page 3)

**Graduate Club Meets**

The quarterly Graduate Club luncheon will be held October 11, at 11:15 in the ODK Dining Room

at Brittain Dining Hall. All graduate students are invited to attend. Tickets will be on sale by departmental representatives for \$0.50. This price includes lunch.

## Local Research Ranks With Nation's Leaders

The Georgia Institute of Technology did \$1,950,000 of research last year, which makes it the South's largest and the nation's fifth largest among state engineering college research organizations.

Based on the Biennial Review of Current Research published this week by the Engineering College Research Council, Georgia Tech ranks 11th among the 103 public and private engineering institutions listing their research expenditures. Two years ago, Georgia Tech was 13th.

Georgia Tech's high ranking in research was made possible by approximately \$1,750,000 in research and development projects sponsored by industry and government through its Engineering Experiment Station.

Elsewhere in the South, Texas A&M College had \$1,370,000 in research; University of Florida—\$1,000,000; and North Carolina State College—\$438,000. No other Southern institution had more than \$250,000.

Nationally, Pennsylvania State University led all state institutions with \$4,222,000 spent on research. It was followed by the University of Illinois with \$4,200,000; University of Minnesota—\$2,500,000; Ohio State University—\$2,093,000; and Georgia Institute of Technology—\$1,950,000.

## McClatchey, MacKay Speak To Y-Sponsored Meetings

Pictured above are the speakers for YMCA-sponsored activities for the coming week. On the left is Mr. Devereaux McClatchey, and on the right Mr. James A. Mackay.

Outstanding among Y-sponsored activities for the coming weeks are the Wednesday breakfasts sponsored by the Religious Programs Committee, and the luncheon meeting of the Triangle club. Both of these groups meet on Wednesday in the ODK Room of Brittain

Mr. Devereaux McClatchey Speaking to the next 7:00 a.m. breakfast will be Mr. Devereaux McClatchey, prominent Atlanta attorney. He was graduated from Em-

ory University receiving two degrees, B. Ph., and LL.B. Among his many civic activities he is presently the president of the Atlanta Board of Education. His presentation will be the second in the series of religious programs for all Tech students and faculty. Cost of the breakfast is fifty cents. The program will conclude in time for students to get to eight o'clock classes.

### Mr. James A. Mackay

At 12:00 on Wednesday another prominent attorney from this area, Mr. James A. Mackay, will address the regular luncheon meeting of the Triangle Club. His subject will be, "Politics Need Engineering."

Mr. Mackay is a practicing attorney residing in Decatur. He was graduated from Emory University and the Emory University Law School. A veteran of 52 months in the United States Coast Guard, the speaker is now serving a second term as Representative from DeKalb County in the Georgia General Assembly.

The weekly meetings of the Triangle Club include a lunch that costs one dollar. The program and meal last approximately 45 minutes. All students and faculty are invited to attend.

## New Faculty List

(Continued from Page 1)

Jr. and Instructor C. M. Gailey to the Architecture Department; Assistant Professor J. K. Carlton, and Instructors D. M. Matthews, E. G. Vassian, and D. A. Mathews, Jr. to the Chemistry Department; Assistant Professor W. R. Smythe, Jr. to the Math Department, and Instructors J. B. Benson, W. J. Dempsey, and R. J. Smith to the English Department.

The Physics Department has added Assistant Professors W. K. Purley, W. C. Simpson and Instructor C. D. Bailey. The Industrial Management Department has added two instructors, M. V. Law, Jr. and J. E. Morgan, Jr.

Other departments adding members to their staffs are as follows: Assistant Professor B. A. Gilbreath to Physical Training Department, Lecturer M. W. Ecke to the Social Science Department, and the following officers to the military branches.

The Navy Department has added Captain Leland R. Lampman, Commandant, Lt. Cmdr. W. L. Roberts, and Lt. John H. Koach. The Army Department has added Lt. Col. K. M. Roberts, Capt. W. W. Millican, and 1st. Lt. N. D. Morgan. The Air Force Department has added Captain K. W. Kroepsch.

Bill: "There are two things bridge has taught women—concentration and self-control."

Jim: "Not to mention the art of opening cans and how to pick up a meal at the delicatessen."

**FLASH! COLLEGE STUDENTS  
PREFER LUCKIES**

Luckies lead all other brands, regular or king size, among 36,075 college students questioned coast-to-coast. The number one reason: Luckies taste better.

## Student Parking Regulations Will Be Rigidly Enforced

The two watchmen who have been stationed at the entrances to the main campus during the past have been removed in the interest of economy. Signs have been erected at the two entrances stating when student cars are not allowed on the hill.

It will be up to the student to obey the signs. If the signs are disobeyed the student will be given a ticket by one of the campus policemen who finds his car where it should not be. In cases where the car is illegally parked and the space is needed the car may be towed away and the student will be forced to bear the expense.

The first ticket a student gets will cost three dollars and the second six dollars. Any other tickets

will increase in cost to be determined by the parking committee. Towing charges will amount to five dollars and fifty cents.

Each student was given a copy of a map of the campus showing where he will be allowed to park. The map is clearly labeled showing the legal places in green color and those that are forbidden in red. During the year some of the legal places may be declared off-bounds for student parking. When this is the case the parking places will be clearly marked with signs stating that they are forbidden for student parking.

All student cars must be registered with the school parking authorities. Those that were not registered on registration day must be registered in room 107A in the Knowles Building. No freshman will be allowed to operate a motor vehicle on the campus unless he obtains permission from the Dean of Students. Permission will be granted only in extreme cases.

Once a student has registered his car he will be given a sticker signifying his permission to park in the designated student parking areas. This sticker must be on the windshield of the student's car.

All faculty members and employees must obey the fifteen mile per hour speed limit on the main part of the campus. They must also obey the stop signs and look out for students walking on the streets. Faculty members and employees who fail to obey the regulations are subject to losing their permits to park on the campus.

## Toastmasters Active For Faculty Members

By JIM ROBINSON

One of Georgia Tech's more active campus organizations is the White and Gold Toastmasters Club. This club, in which membership is open to employees and friends of Georgia Tech, is a chartered chapter of Toastmasters International. Meetings are held each Thursday from 12:00 noon til 2:00 p.m. in the "T Room." The meetings consist of a luncheon, several prepared speeches, impromptu speeches and criticisms of each speech.

### Purpose

The purpose of the club is to help improve the speechmaking habits of its members. At each meeting, one of the members is designated as the "toastmaster", or chairman of the meeting. Since speech practice is purposeless without proper instruction, there is usually a brief instruction period on some part of the art of speaking to a group. After all the speeches have been given, the "master evaluator" makes criticisms of each speaker and leads the group in making an evaluation of each speaker's effectiveness. Due to the fact that membership is limited to thirty, every member gets some speech practice at each meeting.

### Officers

The officers of the club for the coming year are: President, Dale Barker, Associate Director of the Georgia Tech Library; Administrative Vice President, Jack Fagan, of Home Life Insurance Company; Educational Vice President, Dr. Nathan Sugarman; Secretary, Bob Duggan; Treasurer, Bill Gresham; and Sergeant at Arms, Admiral Dick Williams, all of the Georgia Tech Experiment Station.

WILBUR JUST WOKE UP TO THE FACT THAT HE'S IN CLASS!

### KEEP ALERT FOR A BETTER POINT AVERAGE!

Don't let that "drowsy feeling" cramp your style in class... or when you're "hitting the books". Take a NoDoz Awakener! In a few minutes, you'll be your normal best... wide awake... alert! Your doctor will tell you—NoDoz Awakeners are safe as coffee. Keep a pack handy!

## Student Council Minutes

October 4, 1955

The meeting was called to order at 6:45 p.m. by Pres. Harris. Puentes, Hardie, Mori, and Osborne were absent. The minutes of the last meeting were read and approved.

Frank Lewis presented the aims and charter of the proposed Veterans Administration Group to the Council.

Bill Scott presented the aims and charter of the Society of Explorations Geophysicists to the Council.

Committee Reports: Davis gave the Welfare Comm. report on the proposed parking stickers. Bolger reported on the new football seating plan and athletic I. D. cards. Killian gave the Academic Committee report on the Faculty Evaluation Forms. The Council went on record as being in favor of having these forms filled out every quarter and turned over to the department heads. Hollis gave the financial report. Van Leer stated that ten members were to be elected to the Student Trial Board.

Old Business: Barron gave a report on the progress of the Student Activities Building Committee. The situation of slowness in the cashier's office was discussed and referred to the Welfare Committee. The crowded conditions in the post office were discussed and referred to the Welfare Committee.

New Business: Cobb presented the proposed nominations for selection into "Who's Who."

There being no further business the meeting was adjourned at 8:10.

Respectfully submitted,  
Dick Rossetot, Sec.

## IFC Plans Activities

(Continued from Page 1)

Spring Quarter. Something new in the financial line is a dollar pledging fee. This fee is to be paid to Dean Pershing's office not later than Tuesday, November first. It was initiated to cover the expanded social program.

The IFC plans to add to the social calendar at least one big-band concert each quarter which will be free to fraternity men. Groundwork is already being laid for IFC weekend which takes place during spring quarter.

## Football

### Student Seating At Games Source Of Many Problems

As in past years there seems to be a great many questions about the student seating at the Grant Field football games. Most of these questions are due to ignorance, though not necessarily the fault of the students. Many of the questions are aimed only at getting a better seat at the football game. Each student must keep in mind that only a limited number of people can sit on the 50 yard line. Somebody, of necessity, must sit in the poorer seats.

Student seating for the Auburn game, which will be played here on October 15, will be nearly the same as it was for the SMU game with a few changes. One of these changes will be the shifting of the freshman off of the temporary bleachers to sections 31 and 32. All freshman will be required to sit in these two sections. These bleachers vacated by the freshmen, starting at the 50 yard line and extending toward the end zone, will be occupied by the juniors and sophomores. In addition, the juniors and sophomores will also occupy sections 30, 29, and half of 28. Seats 1 through 8 in section 28 and sections 27 and 26 will compose the senior section—exactly the same as at the SMU game. The Tech band will again sit in the bottom nine rows of section 28.

The juniors and sophomores were not allowed to sit in the temporary bleachers last game because it was felt that the game could be seen better from a higher position in the stands even though the seats would be closer to the end

zone. However, there were many complaints on this plan, thus bringing about the change. Many students have questioned the fact that there are enough seats for the juniors and sophomores. Using the new plan there will be 2,243 seats for these two classes. They need 2,225 seats—896 for the juniors and 1,329 for the sophomores. There should not be any reason for students sitting in the aisles. This is a definite hazard and also creates a great deal of inconvenience to many students. During the last game there were also several students sitting on the concrete wall at the top of the stands. No one would like to see a student fall off of this wall.

This brings up the use of student ushers at the games. These fellows are in the stands to assist the students, not argue about the quality of any individual seats. These ushers would like to see every one sitting in the senior section just as much as every student would like to sit there. Remember that the seniors had to earn that privilege the same as every underclassman must.

Many students had to stand in line for an unreasonable length of time before getting into Grant Field for the SMU game. This was primarily due to the new tickets. Plans have been made to open the gates slightly earlier for the rest of the games. Remember—patience is a great virtue!

Incidentally, the loudspeakers directed toward the student stands will be in operation for the Auburn game.

## Is Our Rush System Sensible?

By GAVIN PARISH

Now that the mad scramble for rushees is over, many a fraternity man has had time to sit down and give a little thought to just how well he chose. In the coming weeks he will be able to determine whether he was right in making his selections the way he did. Doesn't that statement sound like someone putting the cart before the horse? It's after the rushing, bidding, and subsequent pledging that fraternity men have to decide whether they got the "right" boys.

Let's face it, there's something sadly lacking in our rushing system on this campus. When a group as selective as a fraternity is supposed to be, has to choose its prospective members in what amounts to just over a week, they can't be giving their selections the consideration they deserve. Out of an average mob of 100 rushees about one third are extended bids by most fraternities. With just a few exceptions most of those bids are extended to boys who were either recommended by alumni or friends, or pushed through by a member he knew, who saw to it that he met everyone. It is a necessary evil to resort to these devices for what else can be done in so short a time? If the average member spends as much as one hour with each rushee it doesn't take a slide rule to figure out that he didn't sleep during rush week. The result is that a rushee's character must be summed up in an

average of not more than fifteen minutes. And that is just so much hogwash.

There are many schools who have faced this problem in the past. Some of them have found what they think is a satisfactory easement to the problem it not a solution. At these schools rushing is conducted over a full quarter or semester as the case may be. It is not until the second period of the school year that bids are given out. At the beginning several parties are thrown and smokers are held as is the usual case. For the rest of the first school period a general open house is declared at each fraternity and the rushees spend at least several months getting to know the fraternity and vice-versa. Some arguments will crop up about the expense of such long open house season. In the long run it probably is more expensive but not excessively so because at these schools it has been found that invariably the rushees begin to stick to one house in particular after the first couple of weeks. Since pledge fees are nominal in most cases anyway not a great deal is saved by not having any.

A solution is not an easy one to come by, but the one above has been tried and seems to work. It certainly would be an improvement by virtue of the fact that fraternity members would be able to discuss rushees with some authoritative insight instead of the drivel which now passes for character analysis.

## New Method of Conversing

By FRANCIS DASHER

Another chapter in the progress of the human race from a barbarous to a more cultured state has been written. Civilization is the degree to which man is able to adapt himself to his environment and to control and utilize it for his own purposes.

Since time began, man has been always struggling to better himself. He learned to use stones and metals; he learned the basic principles of arts and sciences. Later he learned to use his knowledge to make such products as gunpowder and machinery. Recently he has mastered the principles of flight and the atom. Now he has taken another significant step forward.

On a telephone line near Americus, Georgia, on October 4, 1955, man's ability to utilize his environment hit a new peak. This was dramatically demonstrated by the transmission of a telephone conversation by electricity produced by energy released by the sun. Although this was far from the first experiment with solar energy, it marks the first to prove efficient enough to be practical.

This modern miracle was accomplished by use of a solar unit consisting of 432 wafer thin silicon cells, about the size of a quarter. Each cell transforms up to 11% of the energy it receives directly into electricity. The entire unit will produce 100 watts per square yard of effective surface, which is enough to operate a telephone system. Excess current is stored in a storage battery for use at night and during bad weather.

The solar unit was invented by three Bell Telephone scientists, G. L. Pearson and D. M. Chapin, physicists, and C. S. Fuller, a chemist. The unit, which fits on top of a telephone pole, is fifteen times more efficient than any other previous solar energy converter. Since it has no moving parts and contains no corrosive chemicals, the unit is expected to last indefinitely. Officials from Bell Laboratories, which developed the unit, have termed the experiment a great success.

The south Georgia farmer who called a warehouseman to inquire about his cotton has the distinction of being the first man to benefit by an invention which may well usher in an era. Time marches on, and man is getting in step.

## More From Les

By LES HORN

### Bored On Weekends?

What to do in Atlanta? I wonder how many Techmen are plagued by this query every time the weekend rolls around. True, this does represent a vexing problem for the dateless ones, but the surprising thing about the situation is the large number of Don Juans who find themselves choosing the time-worn movies or the same old dance and late visit to the Varsity instead of taking advantage of the really interesting entertainment opportunities available in the Atlanta area.

This is indeed a problem, but have courage men, as there are quite a few ways at your disposal to get around the dilemma. You can (1), vaporize, (2), transfer to Georgia U., (3), add a little variety to your dating such as an early visit to the Varsity and then a late trot at the nearest dance emporium, or (4), use your heads and really weed out what is to be had in the way of genuine entertainment.

To facilitate the latter, the Atlanta Chamber of Commerce has put out a booklet to remedy this dire state of affairs. Their suggestions are well worth repeating so I've taken the opportunity to present a few of them to you here.

On these balmy Autumn afternoons a young man's fancy turns to the great outdoors, and where can he be better accommodated than in Atlanta's public park system. The city boasts a total of 88 parks covering an area of 1,600 acres,

many equipped with ample picnicking and sporting facilities. Piedmont Park is the prime example, combining the above mentioned with an excellent 18 hole golf course. And speaking of golf, if you're a turf beater, you came to the right place; twenty-two golf courses lie within Atlanta's city limits and most are open to the public at nominal charge.

If you feel like making a day of it, it would be worth your time to take a jaunt up to Stone Mountain or to Kennesaw Mountain National Park. Stone Mountain is reputed to be the largest blob of granite in the Southland. It should prove to be interesting. You will find that Kennesaw is well endowed with stumping grounds for picnickers and offers in addition much historical lore. But if your forte is delving into history you can't miss with Grant Park's Cyclorama or the Georgia State Capitol Historical Museum. These edifying exhibits make the past a reality and will leave you with a few valuable thoughts along with a good time—and while you're in the retrospective mood, a trip to the home of Joel Chandler Harris, writer of Uncle Remus stories, might be in order.

There is a bit more to be said about weekend recreation, but the bottom of the page is fast approaching; so if you'll hang on 'til next week I'll be back same time, same place, and will lay the word on you concerning various of the lesser-known entertainments in Atlanta.

## Not Enough Time

### Engineering—Five Year Course?

By BILL KILLIAN

A great many engineering colleges in this country now require their students to spend five years in college to get their engineering degree. Although Tech is still a "four year school," there is a great deal to be gained by the extra year requirement.

The traditional four years is simply not long enough to give the nation's future engineers training of a technical nature as well as a balanced education. The great majority of graduates from engineering colleges, Tech included, are well versed in their own field of specialization, but they are at a loss when it comes to art, music, politics, and many other topics of general information.

Of course there are exceptions to this. Some few engineers will take it upon themselves to read books, keep up with current events, and broaden their knowledge on their own. However, this is a small minority.

MIT has recently formally accepted a plan to broaden the engineer's education in the humanities curriculum. This is an experimental plan whereby the students will spend at least forty per cent of their time in the humanities and social studies. MIT will expand its social science course, but the new humanities course will rotate around two major themes, American Industrial Society and Philosophy and Literature. Since science and engineering will be the center of the plan, these students will, in reality, be taking a double major.

A five year engineering curriculum would not only aid in making the graduate a fine engineer, but a broadened, well-rounded, cultured, and interesting individual.

Why do more college  
men and women smoke

# VICEROYS

than any other  
filter cigarette?

Because only Viceroy  
gives you 20,000 filter traps  
in every filter tip, made  
from a pure natural substance  
found in delicious fruits  
and other edibles!

1. Yes, only Viceroy has this filter composed of 20,000 tiny filter traps. You cannot obtain the same filtering action in any other cigarette.
2. The Viceroy filter wasn't just whipped up and rushed to market to meet the new and skyrocketing demand for filtered cigarettes. Viceroy pioneered. Started research more than 20 years ago to create the pure and perfect filter.
3. Smokers en masse report that filtered Viceroy's have a finer flavor even than cigarettes without filters. Rich, satisfying, yet pleasantly mild.
4. Viceroy draws so easily that you wouldn't know, without looking, that it even had a filter tip... and Viceroy's cost only a penny or two more than cigarettes without filters!

That's why more college men and women smoke VICEROYS than any other filter cigarette... that's why VICEROY is the largest-selling filter cigarette in the world!

**20,000**  
Tiny Filter Traps...  
plus that Real Tobacco Taste

## Why Chancellor Adenauer reads The Reader's Digest

"In my country more than 500,000 people read the Digest in German each month. And they read not only about the people of the United States, but about the people of all nations. The Reader's Digest has forged a new instrument for understanding among men."

## In October Reader's Digest don't miss:

**ALL ABOUT LOVE.** How can we tell the difference between true love and physical attraction? Can we really fall in love "at first sight"? What makes us fall out of love? Scientist Julian Huxley brings you a biologist's view of our most complex emotion.

**THOSE CAMPUS MARRIAGES.** How do student marriages work out? Are young couples able to cope with studies and household chores? What happens when babies come along? Report on today's college graduates who promise to love, honor—and study.

**19-PAGE CONDENSATION FROM \$4.00 BEST-SELLER: "MY PHILADELPHIA FATHER."** Whether blue-blooded Anthony J. Drexel Biddle was teaching jujitsu to the Marines, singing a dubious tenor in opera, hobnobbing with pugilists or raising alligators in the house, he did everything all out—and then some. Here, told by his daughter, is the laughing, loving life of "America's happiest millionaire."

**AMERICA'S TOP LABORITE: GEORGE MEANY.** Life and beliefs of the man who may lead 15 million workers when the CIO and AFL merge.

## Jacket B Team Beats Florida State; Play Hurricanes From Miami Next

In the first of their two games this season, the Tech B team defeated the Florida State B team 19-14.

Bobby Dover started things rolling early when he spurred 52 yards to a touchdown. A few minutes later he scored again as he grabbed a 15 yard pass from Bill Linginfelter inside the end zone. Fred

Teague closed out the scoring by taking the ball 74 yards for the final touchdown. Bob McCauley added the 19th point with a perfect boot.

The B team's second and final game of the season will be late this month when they travel to Miami Beach to face the Miami B team.

Coach Bob Bossons is B team football coach.

Dick Gookin, Tech's 170-pound fullback, charges into the Mustang line for three yards during the first quarter. Helping to make way are teammates Johnny Menger and Bill Fulcher.

### Frosh's First Game With Clemson Tigers

Tech's frosh football squad will meet Clemson University's freshman team this Saturday evening, October 8th, in the first game of the season.

Their next game will be with the University of South Carolina on November 11th.

### Wreck Squad Meets LSU In Fourth Game of Season

Saturday night, October 8, the Rambling Wreck football squad will meet an unpredictable LSU team at Baton Rouge, Louisiana. Coach Bob Bossons, who has just returned from scouting the Tigers, reports that they are very strong, and the Engineers must take every advantage of every opportunity offered.

Last week the Tigers tied Rice Institute, however Coach Bossons reports that every Rice score was caused by an LSU mistake. Texas A&M won over LSU by the same route, but LSU seemed to make no errors when it beat Kentucky 19 to 7.

Sophomore Billy Smith, Tiger end, is the nation's leading punter. Senior backs, O. K. Ferguson and Don Stinson, along with sophomore quarterback M. C. Reynolds have shown sparkling offensive ability in their first three games this season. The LSU line is strong and the entire team possesses a reserve of spirit, as shown by their last minute touchdown against Rice. If they hadn't missed the extra point following that touchdown, they could have won.

Last year LSU was one of two teams to score three touchdowns on the Yellow Jackets.

Tech enters this competition with a record of 9 wins for 10 games against LSU. Coach Dodd announced that Dickie Mattison and Paul Rotenberry would not be in the starting lineup. The lineup will be basically the same as the SMU game.

### Jackets Won 222-0 Against Cumberland 39 Years Ago Today

By MICHAEL HUTTON

Georgia Tech's 222-0 victory over Cumberland University on October 7, 39 years ago today has often been termed as the greatest rout in football annals, but O. K. Armstrong's article, "The Funniest Football Game on Record" appearing in the current issue of Reader's Digest throws a different light on the multi-record-breaking game.

The reason given in the article for the enormous score was that the Alumni and students wished to avenge a one sided Cumberland baseball victory which occurred in the spring of 1916. The Alumni suggested dividing the squad into two individual teams, each playing a quarter then resting a quarter, so as to thoroughly trounce the Cumberland team, with the team scoring the most points winning a steak dinner. The competition was so keen that six records were broken in the game. These include the record for the biggest score, greatest number of touchdowns and points after touchdowns, highest score for one quarter, (63) most points after kicked by one player in one game, greatest number of players making touchdowns (13) and the greatest number of yards gained in one game (978).

"To which must be added another record," says Albert Hill, business executive of Louisville, Ky., one of Tech's Quarterbacks, "Neither team made a first down, Cumberland couldn't and Tech made touchdowns instead."

## World Series Over

Now that the nerves have gone back to normal after the havoc of the past World Series, we can think about the regular Saturday tournaments. However, let us not leave without reminding you that we picked them Bums to take the gravy—so where is my 6:30 time card?

### Hold That Tiger

After lassoing the Mustangs from SMU, and adding another trophy to their game room, the Yellow Jackets travel to Baton Rouge to try their hand at taming the Tigers from LSU. While at the beginning of the season, the Tigers were rated as one of the weaker SEC teams, in some of their games they have out-done the experts. To start the season off, they skinned the hides off the Wildcats from the Blue Grass country, one of the top-ranked SEC teams.

In its next attempt, LSU was unimpressive; however, against a strong Rice team they managed a tie. The score does not tell the true story as LSU outplayed the Owls all the way.

While the LSU team could be a formidable challenge for the Dodd-men, the Jackets have the team to win. The Tigers have a good offense; however, the big touchdown machine of the Flats, which came to life against the Mustangs, out-class the Baton Rouge team. Tech's offensive line, which was one of the main reasons for Coach Dodd's insomnia, has matured into a strong group of path-clearers. Even with Paul Rotenberry and Dickie Mattison out of the backfield, the Engineers have enough depth to handle the Tigers.

In SEC standings, there is a three way tie for the top position. While the Jackets and Auburn are the only unbeaten SEC teams, the LSU Tigers have not lost a conference game and thus share the limelight. The winner of the Tech-LSU could take over the circuit leadership since the Auburn team meets a strong Kentucky team.

### Other Predictions

In other games around the conference, our odds favor: North Carolina over Georgia—The Tar-Heels are just too much for the Bulldogs.

Auburn over Kentucky—The Plainsmen beat Florida last week and have the leading offense in the SEC.

TCU over Alabama.

Mississippi over Vanderbilt.

Tennessee over Chattanooga.

Tulane over Mississippi State.

Florida over George Washington.

## Cross-Country Team Opens Season Today; Dean Griffin Coaches

Dean George C. Griffin's cross-country team will open its 1955-56 season against the University of Alabama this afternoon at the Tech cross-country course at 4 p.m. Dean Griffin has so far chosen no team to carry the White and Gold banner in the meet. He stated that "the situation doesn't look too good at present" although he believes that "the team will do fairly well at the end of the season but now I don't know."

He said that there are three returning lettermen and two sophomores plus quite a few freshmen out for the team. The returning lettermen are James Goode, Richard De Vane and Ted Cook of whom Dean Griffin expects much; with able assistance from sophomores Byron Cole and John Potts.

The schedule facing the team includes seven meets with the Conference meet in Atlanta terminating the season on November 21. The schedule is as follows:

Oct. 7—Ala. at Atlanta  
Oct. 15—Bryan Univ. at Atlanta  
Oct. 18—Georgia at Atlanta  
Oct. 24—Florida at Atlanta  
Nov. 5—Tenn. at Knoxville  
Nov. 14—Auburn at Auburn  
Nov. 21—Conference meet in Atlanta

## Player of the Week

# Vann Unmatched In Passing; Reliable Short-Yard Gains

By DARRYL LEITER

Ronald "Tippy" Vann, a Junior from Rossville High of Rossville, Georgia, is the Technique's choice of Player of the Week. Vann, a strong runner, excellent passer and good signal caller who has the knack for calling the right play at the right time, maneuvered all three touchdowns in Tech's game against SMU last Saturday. Tippy was the spark plug of the team.

Tippy has never had a pass intercepted, a record unmatched by any member of Tech's team. He is also valuable for his reliable short yard gains on the Quarterback sneak play, and the Belly-Keep play. Vann, on occasions, has also

been used as an extra-point kicker.

According to Tech statistics, Tippy is rated 1st in scoring with four touchdowns made, and first in passing with eight completed passes out of nine attempts. A phenomenal record considering that he was rated last in scoring and third in passing during the 1954 season.

Tippy resembles Pepper Rodgers in the way his playing technique appeals to football fans. His actions on the field are colorful and daring, and his aggressive game indicates him as a good man for the offensive team. As head football coach Bobby Dodd says, "Tippy's a good man to have around."

## "I represent 30,000 people"

That's the population of the Mason City, Iowa, area where Jack MacAllister (Iowa U., '50) is Manager for Northwestern Bell Telephone Company. How would you like this kind of job?

"As Telephone Manager I represent Mason City to my company, and vice-versa. Among my customers are bankers, farmers, housewives, merchants... each with different questions and problems about telephone service. Through public information and good business

office service, my people and I do our best to furnish the answers.

"My assignment calls for varied activities—sales, public relations, office supervision. One minute I'm describing a new construction program to a group of businessmen... the next explaining a new service to a rural customer.

"It's a job with lots of variety and responsibility, and I enjoy every day of it. My supervisor is 75 miles away," says Jack, "and that puts me pretty much on my own—which is the way I like it."\*

Jack MacAllister graduated with a B.S. in Commerce and started with Northwestern Bell about five years ago. As Telephone Manager at the age of 28, he is typical of the many young men who are building careers in telephone work. Similar opportunities exist today with other Bell telephone companies... also with Bell Telephone Laboratories, Western Electric and Sandia Corporation. Your Placement Officer has all the details.
