

# Globalization & Innovation & Development

The Sam Nunn School of International Affairs and the Center for International Strategy, Technology, and Policy proudly present the Globalization, Innovation and Development speaker series. This series provides insight into the dynamics of innovation and economic development in a globalizing world. Our aim is to engage Georgia Tech faculty and students with cutting edge research from a multi-disciplinary perspective and encourage new research activities and collaboration. Participants in this series are both leading and promising researchers, and will spend a day at Georgia Tech to meet faculty and students in addition to presenting their current research.

We cordially invite you to join us in this truly exceptional program. A reception follows each presentation.

Co-Sponsored by the Industry Studies Program  
of the Alfred P. Sloan Foundation

**David M. Hart, George Mason University**  
**“Immigration and High-Tech Entrepreneurship in the U.S”**

**11:00 AM, Tuesday, February 24, 2009**

**Piedmont Room, Student Center Commons**

David M. Hart is an Associate Professor at the School of Public Policy at George Mason University. He received a Ph.D. in political science from MIT in 1995 and taught from 1994 to 2004 at the Kennedy School of Government at Harvard University. Hart's research focuses on the formation of public policies that bear on technological innovation and economic growth at the state, national, and international levels. His books include *Forged Consensus: Science, Technology, and Economic Policy in the U.S., 1921-1953* (Princeton University Press, 1998) and *The Emergence of Entrepreneurship Policy* (Cambridge University Press, 2003). His article on the determinants of entrepreneurially-oriented state economic development policy, which was supported by a grant from the Kauffman Foundation, appeared in the March 2008 issue of *Review of Policy Research*.
