No. XV

New Dining Hall Will Have Finest Equipment in South

Students Will Serve Own Plates

The new dining hall for Tech has at last become a reality inasmuch as the contract for building and equipment has been let. The building is to be of the same architecture as the Julius Brown dormitory and is to be a permanent part of the Tech policy of expansion, not only in design but in the completeness and efficiency of the cafeteria proper.

The interior of the hall is to be one of the most sanitary as well as attractive in the South. Around the inside of the hall will be a balcony for the use of the inspectors. A private grill room is provided for the use of the faculty and distinguished guests. In the panels of the wall will be worked the coat of arms of Tech with the famous block T that is famous throughout the South.

Work is to begin in the very near future on the hall although whether or not the cafeteria will be completed in time for use this year has not been decided. The building will be located between Harris Hall and the baseball field.

Cafeteria service of the new dining-hall will have only one peer in the South—Morrison's of New Orleans.

The kitchen of the new building is an institution in itself. A refrigerating plant, in which will be made all the ice cream and frozen delicacies, is one of the innovations, a storage room and ice plant is another feature. A \$2,000 electric oven will be purchased to accomplish all the baking and widen the present range of cooked foods. Steam-heated and glass-sealed tables and cabinets are of the last word in sanitation. All operations are to be as near mechanical as possible.

The arrangement of the kitchen is such that all view is shut off from the dining room. Ten girls will be stationed behind the steam serving counter to dish out the food.

Fifteen hundred students can be fed during each meal. No longer will the dining periods be of only twenty minute duration, but two hours can be devoted to each meal if the student so desires.

Rates and charges for meals, at the new dining-hall, under Prof. Jeffry's supervision, will be on a new basis.

The student will purchase a book of tickets containing a ticket for each meal in the month. Incidentally, there will be a Sunday night supper. At each meal, the student takes his choice of each one of the foods as he passes down the counter. When he reaches the end, he tears out one ticket, giving it to the cashier. The charge for the book will be the same as the monthly rate now.

This method saves time and is more convenient for the student. The building will be ready by September 1, according to present plans.

A. A. I. B. L. Honors Merriwether

Judge Merriwether, instructor in Tech's law department, has been appointed secretary and treasurer of the American Association of Instructors in Business Law.

The society has over 500 members, who are from many of the leading universities of the country. Dean T. W. Noel and Judge Merriwether were representatives of Tech at the convention, held this year at Washington, D. C.

The other officers, of note, for 1928 were Dr. James C. Reed, of University of Pittsburgh, President, and Dr. Nathan Isaacs, of Harvard University, Vice-President.

Southeastern Fraternity Meet Discusses Issues

ALUMNI OF TWENTY NATIONAL ORGANIZATIONS AT CONFERENCE

Marionettes to Make Tour of Carolinas

Trip to Begin February 17

After the success of the Marionette trip to Forsyth and Macon the club is now in search of greater achievements and new laurels.

Plans are being made to carry the players on the longest trip ever made by the club starting February 13th and carrying them through South Carolina and well into North Carolina. If negotiations are completed the dramatic organization will travel two hundred miles further on a single trip than ever before in its history.

Some of the places expected to be visited by the Marionettes are Gainesville, Ga., Anderson, S. C., Spartanburg, S. C., Greenville, S. C., Gaffney, S. C., Rock Hill, S. C., Charlotte, N. C., Gastonia, N. C., and Greensboro, N. C.

Performances cannot be given at all these places however, as the club will only make a one-week trip.

Hi-Tension Club Seeks Charter of Kappa Eta Kappa

The Hi-Tension Club, founded at Tech in 1924 and which is composed of seniors in the Electrical Engineering Department, is petitioning Kappa Eta Kappa, national electrical fraternity, for a charter. This organization was founded at Iowa State University in 1923 and now has chapters in the leading technological institutions in the country. The petition is now in the hands of the Kappa Eta Kappa executive committee and the active chapters, and if everything is favorable, the installation of a Tech chapter will take place about the first of March, 1928.

If the charter is granted, it will be a signal honor for Ga. Tech to obtain such an addition to the fraternities on the campus.

Pete Law Chosen Class Historian

Class Memorial Discussed

Pete Law was elected class historian of the class of 1928 at the meeting last Tuesday morning.

A committee was appointed to find a suitable class poet as one did not present himself at that time. A discussion of the senior memorial resulted in a committee composed of Clem Ford and Hugh Martin who will work on the design of some sort of stained glass window to be put in the new mess hall.

Aeronautics Added to Curriculum of Tech Night School

Aeronautics is the latest course to be installed in Tech's night school.

There are quite a number of people around Atlanta very much interested in this subject, and the demand for such a course practically grew up of itself.

Prof. Moody, of the Mechanical Engineering department, is the instructor. His experience in this work and technical knowledge will prove of much benefit to the students.

At first, the course will deal only in elementary theory, and will gradually broaden in proportion to the interest manifested.

Dean Fields Represents Tech

The Southeastern Interfraternity Committee, which is under the supervision and direction of the Executive Committee of the National Interfraternity Conference, met last Saturday, January 21st at the Atlanta Athletic Club for the purpose of discussing fraternity matters in the southeast.

Alumni of twenty college fraternities were present, the college representatives being: Mississippi: Professor A. P. Hamilton of Millsaps College; Alabama: Professor J. M. Robinson of Auburn and Dr. H. A. Trexler of Birmingham Southern; Georgia: S. G. Backman, Dean of Men at the University of Georgia, Dr. W. S. Nelms of Emory, M. C. Wiley and G. Peyton of North Georgia Agricultural College, and Professor McDaniell, Professor H. B. Duling, and Dean Floyd Field of Georgia Tech; South Carolina: Professor A. M. DuPre of Wofford and Professor D. H. Gilpatrick of Furman; Florida: Professor H. W. Chandler of the University of Florida.

The afternoon session lasted from two until five o'clock, when a most interesting discussion was held. The report of the New York Interfraternity Committee was had, and then fraternity conditions at the various colleges represented were discussed, these including local fraternities, faculty co-operation, and fraternity scholarship.

The main topic in the afternoon, however, was the much discussed one of high school pledging. The representatives endeavored to see this from the viewpoint of the high school, the fraternity, and the college. Reports were heard from the principals of nine different high schools of this and neighboring states. They expressed themselves as strongly opposing this practice. The Superintendent of Public Instruction in Atlanta, Mr. W. A. Sutton, was also very emphatic in his condemnation of high school pledging, especially in the junior high schools.

At six o'clock the forty representatives met at the Atlanta Athletic Club for dinner, and listened afterwards to a very inspiring and instructive address made by Dr. Francis W. Shepardson, who spoke on the subject of the interfraternity movement during the past nineteen years, stressing the progress made in co-operation among the fraternity officials, between the college authorities and the fraternities, and among the individual members of the fraternities. Dr. Shepardson is President of Beta Theta Pi, Editor of the Beta Theta Pi Magazine, and Editor of Baird's manual. He was formerly Dean of Chicago University, but is now devoting his entire time to the interests of college fraternities.

Kappa Kappa Psi Initiates Members

Iota Chapter of Kappa Kappa Psi, national honorary musical fraternity, held its annual initiation last week. The men honored with membership at this time are Bill Wade, Lawrence Quinlan, Raymond Meredith, J. H. Rainey, Tom Newberry, H. M. Baxter, and Day.

Members of the band who have been outstanding in their work are eligible for membership. The fraternity uses its influence to increase interest in the band and its activities.

S. J. Meares is president of the lodge with G. H. Trimble as vice-president; S. L. Huff, secretary; H. E. Burke, treasurer; and Frank Roman, bandmaster.

Ga. College Officers Convene Here Today

Prof. Caldwell Presides

The twelfth annual meeting of the Association of Georgia Colleges will be held in Atlanta, January 27-28. Officers of the Association are: Registrar H. H. Caldwell, Georgia Tech, President; Pres. R. H. Powell, Georgia State Womens College, Vice-President; Prof. W. D. Hooper, University of Georgia, Secretary.

The Association will hold its business session January 28th at the Henry Grady Hotel. The question of college admission is to be discussed. Talks on topics pertaining to college admission will be given by Vice-President Leon P. Smith, Wesleyan College, President George P. Butler, Junior College of Augusta, Dean Peyton Jacob, Mercer University, and Registrar W. G. Stukes, Agnes Scott College.

Reporters, Notice

All members of the Technique reportorial staff be present at the Technique office in the "Y" basement at four o'clock on Wednesday afternoon, February 8th. This means all first and second year reporters and any new men who are desirous of making the staff.

Work of Tech Men Features Art Exhibit

During the last week and a half, the attention of the entire state was focused on a very noteworthy exhibition of strictly Georgia art, sponsored by the Atlanta Art Association with the co-operation of the Davison-Paxon Company. This exhibition was held on the sixth floor of the Macy Building and was well attended throughout the period of display. A feature of the display, as with most every other exhibition or movement of progressive Atlanta or Georgia, was the large and diversified display of work done by students of Tech.

In connection with this exhibition there was held each day a program of gallery talks by the leading artists of the state. One of these was given by the head of the Architectural department, Professor Harold Bush-Brown. He spoke on the Architecture of today and gave a very interesting and illuminating talk on this subject. He was introduced by Dr. Brittain who is a member of the advisory board of this association.

Professor Maurice Siegler, also of the Architectural department, exhibited some of the most beautiful and unusual works of art in the whole display. These were three genuine frescoes done by him since he came to Atlanta. These were the first ever exhibited in Atlanta and naturally attracted much attention. Mr. Siegler has spent several years in the best art schools in this country, as well as in Europe. He attended the Fontainebleau school of fine arts near Paris, and Tech is very fortunate in having as an art teacher, a man of his talent and ability.

Dr. J. H. Gailey, an old master of watercolor, and Professor Dean both of the Architectural department, had on display several paintings and architectural designs. The works of these professors consisted, by no means of the majority of the collection. Quite a number of paintings, pastels, pencil drawings, and architectural designs were on display from that department. The Ceramics department had an interesting exhibition of Casting Pottery. Uncle Heinie and his woodshop boys were also represented by two beautiful pieces of

Sophomore Co-op's Elect New Officers

Quigley Leads First Section

At a meeting held in the chapel January 17th, the first section sophomore co-ops elected the following officers:

President—Q. S. Quigley.
Vice-President—H. E. Clements.
Secretary-Treasurer—J. C. Greene.
Class Reporter—L. C. Smith.

O. F. Olsen had charge of the meeting and he and V. E. Fuller made short talks stressing the value and importance of organizing the class, electing officers and working together as a body.

After Quigley was elected president, the meeting was turned over to him while the other officers were elected.

Quigley, besides being the honor student of last year's first section freshman Co-op class, is a natural leader and the class feels that they have given the place of authority to a competent person.

Scout Magazine Will Publish Story of Tech

Tech Selected From Entire South

Some time in the near future, "Boy's Life," the official organ of the Boy Scouts of America, is going to publish an article about Tech, telling of the kind of work done here and of the spirit of the school. Every month of this year this magazine runs a story about some college, and Tech has been selected from all of the Southern colleges for a forthcoming issue.

To be used in connection with this article will be numerous pictures—of the campus, the stadium, and of the insides of the buildings, showing the students at work. During the past two weeks the photographer has taken many of these—showing oxy-acetylene cutting, the experimental engineering lab, the chemistry lab, the draughting room, the foundry, the physics lab, and others.

Dr. D. M. Smith, who has been in charge of these pictures, announces that from now on a numbered file is to be kept of all pictures that are taken on the campus. This will allow anyone at anytime to find the photograph he wants, and it will prevent duplication. The school has to pay for all such pictures taken and a great deal of money will be saved in this way. Requests are always coming in from publishers all over the country because of the stadium and the success of the team, and henceforth pictures can be furnished them more quickly and at less expense.

The article which "Boy's Life" is going to publish will make Tech known to thousands of people who have not heard of it before. The magazine goes into the hands of boys at the age when they are thinking of going to college, and for that reason alone will be a boon to the school. Tech is becoming better and better known in a national way.

handcarving and inlaid work, a writing desk, and an inlaid table. Each piece of this work lacked that amateurish appearance that is characteristic of the usual school display, and each piece reflected considerable credit on its artist, and on the school as a whole.

The entire exhibition was a complete success and was one that did justice to the wealth of artistic talent in the state. It showed the development of interest in things of an artistic nature in the state, an interest which has grown very much in Georgia during the last twenty-five years. This exhibition should become a yearly event.

W-G-S-T

"Station WGST, the Georgia School of Technology, in Atlanta. Tonight, ladies and gentlemen, we are presenting, etc." How often have you listened to the announcer as he spoke those words, and yet how few times have you thought of all that it takes to make it possible for him to say them.

Next time you tune in on Tech's radio station and hear W. W. Merkle, or his assistants, Turner and Smith, telling the world, take a little time to think about all that is going on to make possible the programs.

Mr. L. D. Tabler of the Electrical Engineering Department is the director of the station this year, and his job is to keep the station in running condition, to make improvements in the various pieces of equipment, to carry on experimental and research work with the various pieces of equipment, and to keep an eye on things in general. He also handles all the correspondence, and this in itself is no small task. Mr. Tabler was a radio operator for several years on the high seas.

Some of the letters he receives are quite interesting. One which was

received while the station was known as WBBF came from Sheffield, England, and was evidence that the station had been heard across the ocean.

J. M. Griffin and W. B. O'Neal, the former of whom holds a first-class commercial operator's license and the latter a second-class commercial operator's license, are the station operators. Their job is to put the station on the air, to make preliminary tests of the batteries, adjust the frequency by means of a crystal oscillator, and to keep the station going during the program. The frequency is adjusted to the required value every fifteen minutes during the broadcast. After the program is over the operators take the station off the air, take readings of the batteries and see that everything is in good condition.

Some of the recent improvements in the equipment of the station is the addition of a new Kellogg microphone which will give better quality than the old. The old one is to be rigged up as a spare and for use with a fading panel when there is to be an orchestra broadcast. A filter in the microphone circuit, a shielded line amplifier, and a bigger modulator choke are other things which have been added to improve the quality of reception.

A new station monitoring system has been installed to enable the operators to see just how the broadcast is being received. It includes a receiving set with a loudspeaker which picks up the broadcast by means of a small antenna. The set is completely shielded from the static and magnetic effect, due to the closeness of the station. Situated on the top floor of the E. E. building the loudspeaker is directed so that it will furnish entertainment for any who wish to avail themselves of the opportunity during the broadcast.

Because of the hum experienced by using generators to furnish power it was necessary to change to batteries, but now with the construction of a suitable filter the generators can be used without the

production of a hum. This makes power available from either batteries or generators.

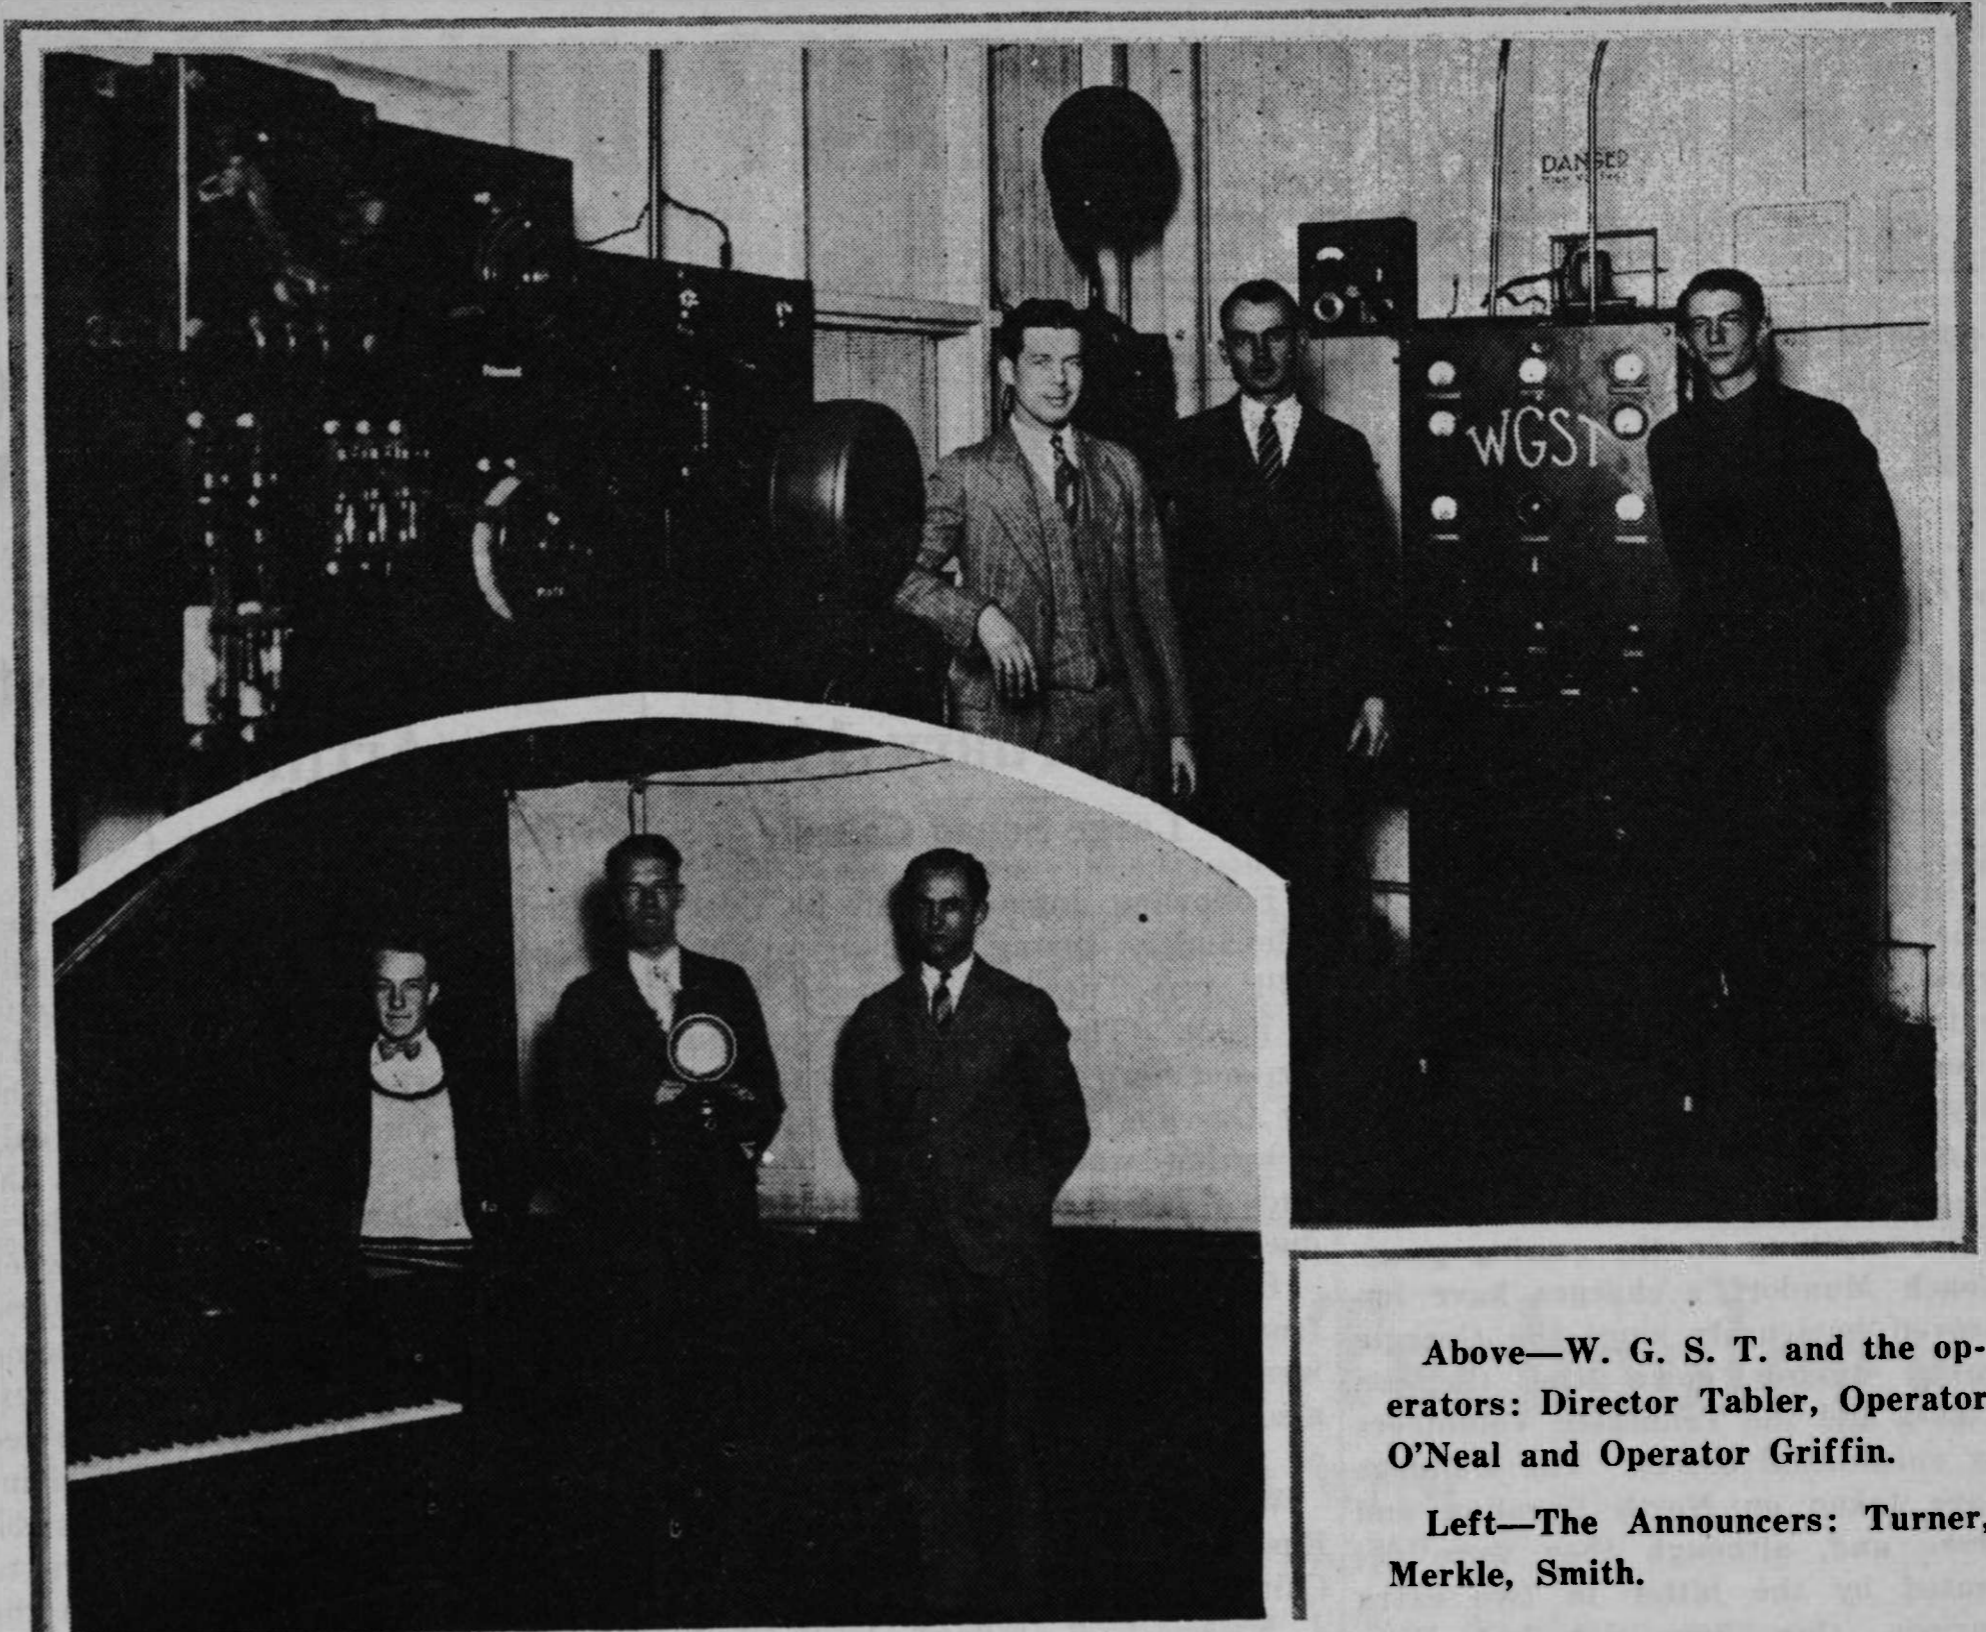

Technical advice is given to the personnel by Professors Fitzgerald and Siedell. The Radio Committee is composed of Professor Seidell, Mr. Tabler and Professor G. M. Sparks. Mr. Tabler has charge of the Monday night programs, and Professor Seidell has charge of the

Thursday night programs. Professor Sparks has charge of the publicity.

WGST was presented to the Georgia School of Technology in 1923 by The Atlanta Constitution, and has been in operation ever since. Improvements have been made from time to time and are still being made. Recent letters have indicated that the quality this year has been

better than ever, and especially during the last few weeks.

Although the old practice of giving station stamps has been discontinued, anyone who receives WGST and sends ten cents in coin or stamps, giving the date of reception and the number received, will be sent a beautiful Tech sticker with the call letters of the station and verification of reception.

Above—W. G. S. T. and the operators: Director Tabler, Operator O'Neal and Operator Griffin.

Left—The Announcers: Turner, Merkle, Smith.

WHO MAKES THE EXECUTIVE?

(Continued from Page 2)

ing a new position, to look over its difficulties and disadvantages as well as its rosy aspects and not to leave a firm that you like and respect without being sure that the new one is equal in integrity, as sound, and will offer as permanent employment as the one with which you are associated.

"As for personal advice, I would say the best guarantee of success is to keep physically healthy while forcing your brain to be ever active and progressive.

"No man can choose an executive position for himself. If he shows courage, initiative and intelligence, and is willing to assume real responsibility he will find, however, that other executives will elect him to membership in their ranks."

TECH MEETS GEORGIA IN SECOND CONTEST

Jackets Invade Classic City For Game Close Battle Seen

Invading Athens for the first time this year in the second of a two-game series, the Yellow Jackets will entrain for the Classic City, where they will take on the Georgia Bulldogs, Saturday night.

After holding the favored Bulldogs to a 33-30 count, Tech is risking everything on the coming game. Coach Mundorff's charges have improved immensely since the Georgia game, taking down the Clemson Tigers and the Tennessee Volunteers by substantial scores. The Bulldogs have taken on North Carolina and Duke and, although they were defeated by the latter in two extra periods, they have not lost their punch. The veteran combination of Florence, Drew and Keen has been going great guns during the present season and the Jackets will do well to hold them as close as they did in the previous game.

The Georgia game is the only one of the week for the Jackets, affording them plenty of time for practice, while the Athenians have the North Carolina fracas on Monday as well as the Tech game on Saturday. Coach Mundorff has gathered together a lot of good material, and the team should do well in the coming game. The Tech-Georgia game is always heralded as one of the best games in the conference, and indicates the keen rivalry which exists between the two schools.

Spring Football Practice to Start February 14 Large Squad Called

Following announcement by Coach Alexander, spring football practice will start Tuesday, February 14, at 4 p. m. The usual custom, begun by northern colleges and followed by Georgia Tech in recent years, of a spring workout, will be renewed and a large body of aspirants are due to report on the above date.

Each man must draw equipment from Major Smith and be ready for work by February 14. They will also be assigned lockers. The list of men who will report follows:

W. A. Muse, H. R. Pund, W. H. Rusk, W. H. Backus, H. G. Law, J. R. Cain, J. A. Murray, R. E. Drennon, A. J. Hieke, J. B. Lillard, J. J. Westbrook, J. Kent, J. O. Brooks, W. J. McKee, W. S. Coffee, G. C. Watkins, R. Lumpkin, Brock, F. P. Daniel, E. M. Swartz, F. L. Holt, G. L. Maree, Ed Herron, G. A. Holland, C. R. Brumky, M. A. Morrison, G. G. Sanders, W. H. Edwards, John Jones, A. B. Nicholson, W. E. Preston, J. Quinn, R. J. Durant, J. R. Frink, R. E. Strickland, H. E. Russell, S. Colvin, H. Milligan, C. W. Fitzpatrick, R. L. Horn, N. F. Oltz, Faisst, R. L. Randolph, R. C. Read, J. G. Thomason, M. S. DeVaughn, J. C. Jetton, R. C. Luna, E. Dunlap, M. J. Flowers, F. H. Tharpe, Guice.

In addition to the above men, the men who make the all-battalion football team are invited to come out for spring practice.

W. A. ALEXANDER, Football Coach. G.S.T.

Nobody has ever been able to figure out the high cost of being suspicious.

Wiggins Stars as Gobs Trounce Coast Artillery

Ordnance Ties Air Corps

The Navy advanced another step towards the battalion championship when they defeated the Coast Artillery, 14-6, on Tuesday, January 17. This marks the second game that the Navy has won this year, their only loss being to the Air Service at the first of the season. The Artillerymen scored early in the game when Kinnett, after receiving a lateral pass ran 50 yards before being downed. A completed pass, a few line bucks and the ball was carried over for a touchdown. The point after the touchdown was not made. After that the Navy settled down to holding and the half ended with the score 6-0.

Shortly after play was resumed the gobs took the ball down the field by bucks and end runs and finally Parshall took the ball over the line. Wiggins ran the ball across the goal line for the extra point. From then until near the end of the game the two teams fought with the ball between the 20-yard lines. With about two minutes to play, Wiggins took the ball from the scrimmage, and aided by excellent interference, ran 82 yards for a touchdown. Parshall passed to Russ for the extra point.

On the following day the light Ordnance team held the league leading Air Corps to a scoreless tie. The Air Corps was doped to win but was outplayed by the smaller team.

The two teams battled back and forth, one being almost to a score, then the other taking the ball away and carrying it up the field until almost at the goal line.

The Ordnance was in the five-yard line at least four times but could not make the best of their opportunities. Once they were on the two-yard line and a touchdown seemed imminent but the whistle blew for the end of the half. The second half was a repetition of the first part of the game.

Crane, the star fullback for the Air Corps, was seriously hurt on the fourth play of the game. For this team Gaston and Stetler were the outstanding players, while Snooks, Ramsey and Renfrew of the Ordnance made life miserable for the Air Corps.

Tech Swimmers in Fine Shape for Season

Prospects Are Good

The Tornado Tank Team has been hard at work for the past three weeks and is now beginning to show flashes of the form which made them Southern Conference champs last year. Though the schedule for this year is not yet complete the following contracts have been signed:

Duke University, February 25; U. of Florida, date to be set; U. of Miami, date to be set; Citadel, date to be set; Clemson, date to be set.

Besides the above meets, engagements with Georgia, Alabama and several other universities are expected to be arranged soon.

This year's squad of Mer-men is to be composed mainly of last year's letter men. Dick McKinstry, who swims the 50 and 100-yard dashes, has already made the century in less than one minute, which is exceptionally fast time for this stage of training. Captain "Red" Holleman has the job of coaching the squad and if his proteges will only follow his example they will be hard to catch. "Red" holds the record time for the Southern Conference for navigating the 220 and 440-yard distances. Billy Wardlaw makes the third member of the team, his specialties being the 100 and 220-yard splashes. The diving for the crew is done by "Buster" Harris, who also takes care of the breast-stroke. The relay team will have three positions taken up by last year's veterans, namely: "Red" Holleman, Dick McKinstry and Billy Wardlaw. The fourth man for the team is somewhat of a problem, but at present it seems that C. Uriah Haggerty, sophomore, in the best bet for the position.

C. Y. House, Billy Beers and Uriah Haggerty have come up from last year's Frosh team and are out to make a desperate effort for a varsity berth. Beers is trying out for the 220-yard distance; House swims the breast-stroke in good time and Haggerty is a promising man for the relay team and the back-stroke. A number of other men are out for varsity positions and will be ready to step right in the regulars' "steps" if they should falter.

Jackets Defeat Tennessee Vols in Close Game

Tech Shows Great Form

Last Saturday night Tech trimmed the University of Tennessee's basketball team to the tune of 31 to 26. It was a hard-fought game.

In the first half Tech's defense was so perfect that Tennessee was only able to score one field goal, and that by Captain Butcher, that well known Southern football star. The score at the half was 19 to 6. It looked as though it was going to be a run-away for the Tech boys.

When the rest between half was up the Tennessee team came back with a surprising amount of pep. Captain Butcher, center, and Sharpe, forward, ran wild. At one time they came within one point of tying Tech. It was neck and neck—24 to 25. At this stage of the game Coach Mundorff made a good move by putting Hank Heeke back into the game, who shot three field goals right off the reel, and put the game on ice for Tech.

Heeke was the hero of the night, shooting 16 points. He was closely followed, however, by Butcher with 13 points.

Sam Glassman, referee, handled the game much to the approval of the spectators and players. Only once was there a dispute.

Tech (31)	Pos.	Tenn. (26)
Harris (4)	F	Dykes
Williamson (4)	F	Sharpe (10)
Heeke (16)	C	Butcher (13)
Goldin	G	McKeen
George (4)	G	Barnhill

Substitution: Tech, Oltz, Pelaterri, Wilson, Bullard, Waxelbaum, Player (3), Brant; Tennessee, Johnson (2), Kendrick (1).

G.S.T.

Second Annual Steeplechase to Be Run February 11

The second annual steeplechase, the second event of the kind to be held at Tech and in the south, will be run off on Grant Field, February 11. The steeplechase is on all British track menus, and it has been adopted by the East where its popularity caused it to be tried at Tech, where it met with great success last year.

Robert Young of Georgia, won the chase last year. Roy Brewer and Jack Slein of Tech took second and third places. Young, Brewer and possibly Luny Smith of Alabama, will be a few of the swift entrants who will enter this year, besides many other talented cinder path athletes.

The novel event is run over a course of 3,000 meters, which is equivalent to 1.8 miles, a little over seven times around the Jacket track. There are four hurdles and one water jump to be overcome in each quarter mile of the course. It takes a speedy man with much endurance to finish this kind of race.

Later in the season the famous Cake Race. All men are eligible, all freshmen must run. It is a three and one-half-mile race and the first 125 to finish get the cakes.

These two big events are spotlights at the flats and attract much attention. The Steeplechase brings track talent from all over the South, and the cake race manifests much city-wide attention.

Capt. Dynamite Wilder shot the ball from the center of the court, just as the gun shot, and the sphere went through the hoop to register a win for the Jackets. This will be the only game for the Jacket this week, but the Bulldogs took on first North Carolina State Wolfpack at Raleigh Monday night. The close score of the first contest indicates that this will be the most important battle in Georgia basketball.

Soundings From The Flats

F. L. M.

One of the most hair-raising games seen on the Tech court this year, equal even to the Tech-Georgia game, was the contest between the Jackets and the Vols. The Jackets, who seem to be in the habit of improving with each passing game, loomed as potential champions in the opening half, presenting a defense that was so impenetrable that the Volunteers' attack was utterly hopeless. They secured only one field goal during the entire first half, which with four points accumulated from free throws made their total of six, but the Jackets, led by none other than Hank Heeke, had amassed a total of 19. The second half was an entirely different story. The visitors came back with renewed hopes in the second period and rang the bell with such consistency that before the Jackets really found themselves they were only one point in the lead, the score being 25 to 24. At this juncture Mr. Hank Heeke, the hero of the evening, rang up three field goals to give the Jackets a greater lead, and keep the students from suffering from heart failure and to bring his total to 16 points from the evening. The Jackets' defense began again to function and the Tennes-

seans were able to get only one more goal to bring their total to 26. Tech, 31; Tennessee, 26.

While our Jackets were winning from the Vols the Bulldogs from the University of Georgia lost to the Blue Devils of Duke University in an equally thrilling battle, requiring two extra sessions to untie the knotted score. The regular game ended with both teams totaling 36 points. Towards the close of the first extra session the Bulldogs were freezing the ball, hoping to hold their two point lead, but Councillor and Jankoskie were both fouled and both made their throws good to knot the score as the whistle blew. Duke stepped away from the Bulldogs in the second extra period to score seven points to Georgia's two and register a win by the count of 49-44.

The Jackets will take their second shot at the University of Georgia Bulldogs tomorrow night on their own court at Athens. This will be the second of a three-game series with the Bulldogs having taken the first by a scant margin of three points. Last year when Tech played Georgia in Athens the score was tied right up until the last minute, when

Freshmen Lose to Auburn But Win From Cummings

Hoffman Stars for Rats

The Tech freshmen did themselves proud last Friday by going up to Cummings, Ga., and beating the Cumming Athletic Club. It was a good game and was fought hard as the close score of 33-30 indicates.

Brooks of Cumming was high point man with 12 points. Hoffman of Tech was a close second, however, with 10 points, all being field goals.

Ten players were taken on the trip. They look like promising material for next year.

The line-up:

Tech (33)	Pos.	Cumming A. C.
Griffith	RF	Brooks
Hoffman	LF	Kirby
Jones	C	Bagley
Colvin	RG	Ingram
Maree	LG	Spence

Substitutions—Tech: Tippin for Hoffman, Lumpkin for Jones, Isaacs for Colvin, Brooks for Maree. Referee, Spence.

After playing the Cumming game on Friday, the young Jackets journeyed to Auburn for a tussel with the Tiger yearlings on Saturday night.

After getting away to a bad start the Tech Frosh came back strong and determined. However, they were unable to overcome the lead obtained in the first half by the Auburn Frosh. The score at the end of the half was 14 to 6 in favor of Auburn. The final gun found the Junior Plainsmen on top, the score being 32-28.

Lee, of Auburn, was high point man with 11 points, while Hoffman of Tech had eight.

The line-up follows:

Tech (32)	Pos.	Auburn (28)
Brooks (c)	RF	Lee
Tippin	LF	Warren
Lumpkin	C	Chappel
Isaacs	RG	Burden
Vestal	LG	Ticzer

Substitution—Tech: Hoffman for Brooks, Griffith for Tippin, Jones for Lumpkin, Colvin for Vestal, Maree for Colvin; Auburn: Mullis for Warren, Harmen for Chappel. Referee: Spinks.

If somebody would only invent self-starters for human beings!

Conserve your credit as carefully as you do your cash.

Remember the good old days when you thought you were having a good time if you went to the city on a dollar excursion and spent another dollar while in the metropolis?

One advantage which the old fashioned cotton stockings had over the modern silk ones is that you could get more mileage out of 'em.

TECH BASEBALL TEAM LOSES ONLY FOUR MEN

Prospects Are Bright for Coming Season

McCash Heads Team

With football out of the limelight and with the basketball season well under way, it is only natural to start airing out baseball prospects.

Captained by McCash, premier right fielder of the Jackets, and with the loss of only four men of the last years squad, the Tech baseball team has a promising year to look forward to. The sophomore class will come forward with a bunch of fast stepping players from last year's freshman squad. Leading these will undoubtedly be Warner Mizell. Warner is a first baseman deluxe and, as well as being a good fielder, he is a potential power at

bat. Among the new men for the varsity will be Frink, 3b; Heeke, c; Spear, c; Hutchinson, 2b, and others.

Training will start on February 6, according to Coach Kid Clay. The Little Napoleon is looking for a Southern Conference title this year. This means trouble in enemy camps.

The season will open with the Atlanta Crackers on March 16 and 17. The Jackets then meet Ohio State and Mercer at Grant Field in the next battles. Auburn, Alabama, Tennessee, Vanderbilt, South Carolina and Georgia will also be met. The Georgia games will be the outstand-

ing lights of the season. Two games are set for Athens and two for the home folks. The games in Athens will be played on May 18 and 19 and those in Atlanta May 25 and 26.

The Jackets will play 28 diamond contests. Most of these games will be played on Grant Field. The Georgia games will be the only home games to be played at Spiller Field.

"A TECHNICAL SCHOOL WITH A NATIONAL REPUTATION"

THE GEORGIA SCHOOL OF TECHNOLOGY offers to young men of ability and ambition a training which will fit them for positions of responsibility and power.

The national reputation of this institution is based not on claims, but on results. Its greatest asset is the record which its alumni are making in the productive work of the world. Georgia Tech graduates succeed because they have been trained both to think scientifically and to work efficiently.

Courses in CIVIL, ELECTRICAL, MECHANICAL, TEXTILE, GENERAL, AND CERAMIC ENGINEERING, ENGINEERING CHEMISTRY, ARCHITECTURE, COMMERCE, AND GENERAL SCIENCE.

Coast Artillery, Signal Corps, Air Service, Infantry, and Ordnance Units of the R. O. T. C.

ALONG THE AVENUE

Friday night, the Piedmont Driving Club will again become the rendezvous of the popular "college contingent and younger (?) set." The Phi Psi will give their farewell struggle. And since all their friends just must be there, we will have a most tight time, like sardines and not as corn flakes. However, almost any forecast can be made; but we think, if you, kind and gentle (?) reader, will consent to accept our opinion or be bored by it, that it will be a "wonderful success and a brilliant ball" (in the jargon of the society writers) and "a da—a good hop" (in the lingo of some) and "just a plain dance" (in the thoughts of the majority). Rumors have been flying fast that the blackball has been used without regard for persons and that there will be a select few. Nevertheless be sure and wear the old headguard and shoulder pads for when the rush begins, the old rheumatics can't stand the gaff and many a good man will go down for the count.

If you fellows don't start patronizing these Pirate Script dances there won't be any pirate dance this year for you to show off your manly figures or carry swords and daggers that you would be afraid to use if you had to. We admit the charge that we have not been giving advance notice in this post of knowledge but it is only because we have not been sufficiently informed. Our ladies' man is off on a vacation and we are at a loss for that sort of thing. We are now conducting a contest for the position and would appreciate any nominations for the said honor and it is an honor to become a scandal monger and be the guiding light in this age of Iconoclasts.

It is indeed a shame to deprive all of our interested readers for the next two weeks but the Faculty just must have its little fun and games and we are going to be the big hearted souls and let them shoot us. The line of least resistance is to be exempt, but as yet, the exact methods of approach have not been made known to the average mind of the Tech Student and so every term they all stand up and get knocked down again. Some rise and others are not so fortunate. Studying is like golf. You have got to have the right outfit for your own personal make-up; your stance must be right; there must be a certain swing to your drive; the approach must be played carefully; and then the putt must be exact and accurate. For all the different sand traps and hazards there is some club in your bag that can help you overcome it. In every man there is something that can help him overcome his battles if he will just call on it at the right time. In this game

of study, there is a caddy and professional rolled into one. He is disguised as or known to the student as His Excellency, the Prof.

Besides exams, the second game of the Tech-Georgia basketball series looms up and that is something else that we have got to get over and this time on the big end of a score. Birds flying this way from Athens bring all manner and forebodings of woe to the team and good times for the supporters—pardon us Mrs. Vanderbilt—it was our intention to say, those who go along as moral support and referee riding. Athens, or rather somebody over there, always has a big party and the Atlanta Chimes and Snub clubs have a big time. And these poor overworked Tech boys cross over there for a dry and "Deserted" time. Saturday afternoon, many a covered and uncovered wagon will leave the city for the village among the hills in eager anticipation and some will get there and then some won't. But it is a long dry road and then— (?) Can you guess?

Speaking, or rather writing of Athens, reminds us of a most unusual dance that was pulled over there on last Saturday night. For the details of this affair we are indebted to several Globe Trotters on the Campus who deem it unwise to spend a weekend in Atlanta and so every week go hither and yon in search of amusement. But nevertheless, the dance was called a Leap Year dance and it was enacted very appropriately. The female population consisting of Lucy Cobbers, Town girls, Co-eds, High schoolers, and what have you, called the male of their choice or sucked them in some way for a date on the aforesaid (note the legal term) evening. On the appointed hour, she drives up to his frat house in her own car and blows for him or goes in as the whim suits her. She had previously sent him a buttoniere. She ceremoniously buys the drinks and cigarettes at Costas and then pays the admission to the dance. Inside she asks for nobreaks and fills them; breaks; and carries out the spirit of the dance. That is a very good idea but still we can't get a Vitaphone reproduction of some sweet young thing of the Atlanta crowd dashing madly up to the Garbers with her date and puttin' out that old Iron Man and his little playmate for the evening's entertainment. And though it may get over big with our neighbors in the Classic City, it would be hard to imagine that our own little playmates would think so and attempt it. But it would be nice if they get the idea from their sisters in Athens and did pull something like it. Everything comes to him who waits.

Evening School Column

The evening school column did not die after its initial appearance but failed to function last week because the writer was sick.

Upon investigation we find the Evening School is represented in day school activities such as: Glee Club, Marionettes, and campus fraternities.

The following students have been pledged to Alpha Kappa Psi: Henry Garner, Richard Hills, Bob Looney and Vaughn Ozmer.

Evening School pledges to Delta Sigma Pi were: E. S. Clarke, Ralph Bell, Bill Vaughan, Glenn Chambers, G. H. Murdock, Morrell, Lawrence Cole, Geo. Giles and Joe Christopher.

Evening School is conducted on a quarterly basis. Final exams were held just before the Christmas holidays. The verdict has been rendered and we are about reconciled to the fact that we passed or flunked as the case may be.

At a recent meeting of the Senior Class a graduation committee was appointed with Sanders Rowland as chairman. It is to confer with the campus committee on matters concerning graduation.

It may be a little early to bring this up but I would like to see Sanders put to work. How about it Mr. Holman.

The freshman class have decided to

make an investigation to find the reason students quit school. Those who registered in January but failed to re-enter in January, will be included in the investigation. Results will be published in this column.

Our Latch Key is Out to University Folks

GOING to a dance—a party—a show? Make our station your meeting place. Leave here in a fine car that you rent at surprisingly small cost and drive yourself. Plan a party, four and divide the cost. In any way the expense to each is small you'll never miss it. The cordial spirit of service here will impress you. The cars will delight you. And you participate in adequate insurance protection. Our latch-key is out. Come in.

suits my taste like nobody's business

I KNOW what I like in a pipe, and what I like is good old Prince Albert. Fragrant as can be. Cool and mild and long-burning, right to the bottom of the bowl. Welcome as the week-end reprieve. Welcome... and satisfying!

No matter how often I load up and light up, I never tire of good old P.A. Always friendly. Always companionable. P.A. suits my taste. I'll say it does. Take my tip, Fellows, and load up from a tidy red tin.

PRINCE ALBERT

—no other tobacco is like it!

The tidy red tin that's packed with pipe-joy.
