

**T-Game
Tonight**

Rheba Clayton, DramaTech's first leading lady, will appear opposite Dan Santacroce, in the forthcoming production, "The Road To Rome."

'Road To Rome' May 12-13, 18-19 Coming DramaTech Production

By HAL REEVES

DramaTech is presenting "The Road To Rome", a comedy in three acts starring Dan Santacroce and Rheba Clayton. The play will be presented in Crenshaw Fieldhouse May 11-12, 18-19.

Roman History

"The Road to Rome", written by Robert E. Sherwood, is a fast moving, cleverly written play which includes in its cast 25 members. The background of the play is taken from Roman history. Just at the time when Hannibal was at the gates of Rome about to demolish the Roman nation, he unexpectedly ordered his army to retreat. Mr. Sherwood's answer to the question of why Hannibal's army was ordered to retreat at such a strategic moment, is the

main subject of the play. It has to do with a very attractive woman, who somehow makes him change his mind.

Presented In 1927

The play, probably one of the most successful plays of its type to be presented on the American stage, was first produced in Washington in 1927. It was presented in the Belasco Theatre there. Soon after it opened on Broadway. It has been presented over and over again in all summer stock theatres and many times on the road.

Although presented in the 20's, the play still applies, to modern problems. Sherwood's play retains the qualities necessary for modern theatrical productions. As a follow up for DramaTech's past production, "Home Of the Brave," this play is a perfect choice.

Elections

All students who are planning to run in either the class elections or the Student Council elections must turn in properly completed petition blanks by Monday, April 23. Blanks are available in the Administration Building.

World Student Fund Begins Spring Drive

Arnold Air Society To Present Dance On Friday, May 4

Arnold Air Society will hold an "Advanced Wing Dance" on Friday, May 4, 1956, at the Naval Officers' Club in Chamblee, Georgia. Music will be provided by the orchestra of Charlie Jay.

Unique Entertainment

A unique idea in entertainment will be introduced at this dance. Arrangements have been made with Fred Astaire Studios to demonstrate all of the latest dances which are currently popular on American college campuses. The studio will also present a series of dances tracing vogues of the twenties through those of today.

Not only will members of the advanced wing be invited to attend, but outstanding cadets in the basic program will also be asked, in order that they might meet the detachment personnel and gain an insight into the organization.

Dickie Mattison, vice-president of Arnold Air Society, said, "This is the first time that Arnold Air Society has sponsored a dance and I know that all those who attend will thoroughly enjoy the event."

Kampus Kapers

During one Air Force Drill several sergeants were seen enjoying a relaxing game of marbles.

At the end of one quarter a few ingenious students who wanted to express their appreciation for the wonderful welding course they had just finished, welded all their tools together and turned them in.

The Army has a new system for keeping its members GUNG HO!— It has placed several mirrors at the ends of the Army courtyard for self-inspection.

Goal Of \$1,800 To Provide Study For Foreign Students

By BAYLEY WALKER

Thursday night, the World Student Fund Committee began a school-wide campaign to raise \$1,800. The proceeds will be used to provide one year of study at Georgia Tech for six foreign students.

All students and faculty members are asked to contribute voluntarily to the fund. Receipts will be given to all contributors. The fraternity donating the largest amount of money per member will receive a trophy.

Doctor Postman, of the School of Textile Engineering, will head WSF's four man faculty committee, and Frank Hollberg will head the 14 man student committee. Numerous student volunteers will aid in the campaign.

\$4,000 Added

An additional \$4,000 which was collected at a fall football game will be added to the World Student Fund. As in previous years, tuition, fees, room, and a \$600 allowance will be given the students. Meals will be furnished by the fraternities.

Students to be sponsored will be selected by the WSF Committee on the basis of recommendations

and information from their colleges abroad. In the past, students from Stuttgart Technical Institute at Stuttgart, Germany, the Swiss Federal Institute of Technology at Zurich, Switzerland; and the University of Glasgow, Scotland, have been invited to study at Tech under the program.

Colleges Reciprocate

To reciprocate, the Swiss Federal Institute of Technology and The Stuttgart Technical Institute have been inviting two Tech students to be their guests for a year of study. Four graduate students and one undergraduate student are now attending Tech under WSF sponsorship.

According to Charlie Commander, general secretary of Tech's YMCA, the purpose of the world famous WSF is "... to further

(Continued on Page 7)

Freshman Camp Date Set By YMCA, Alpha Phalanx

By BILL WHITE

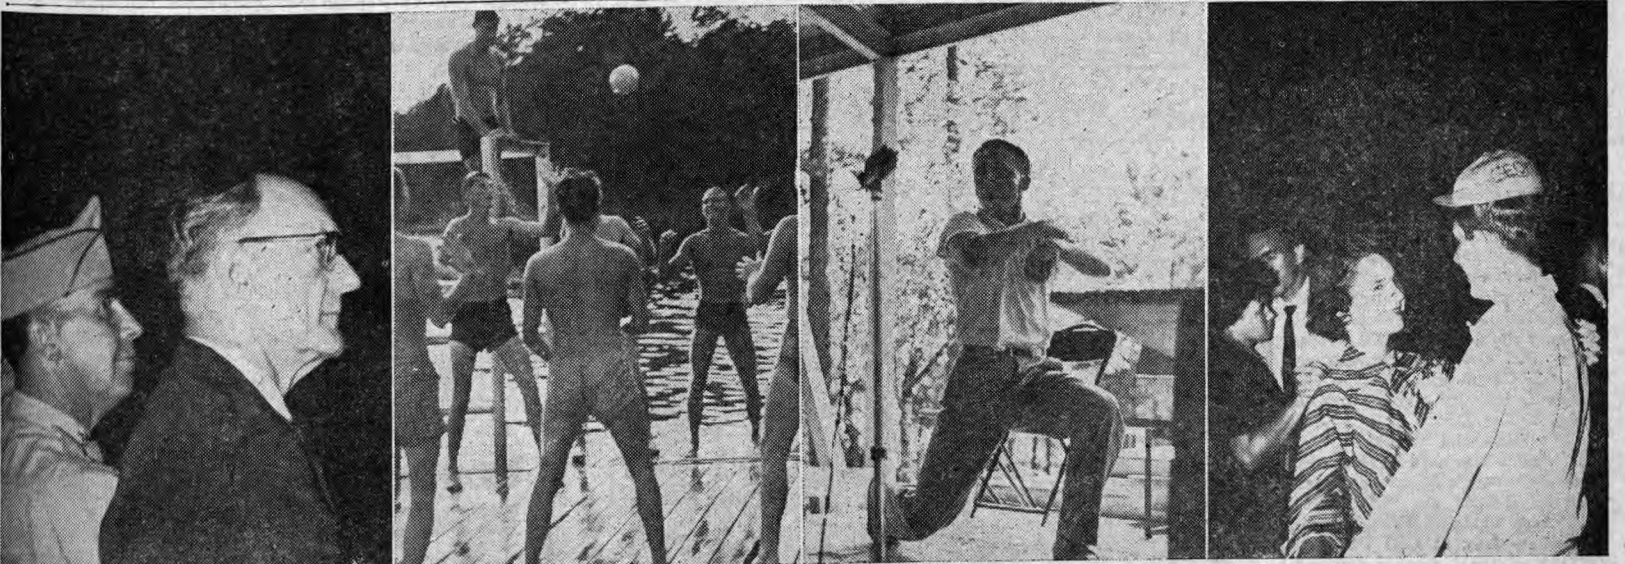

Freshman Camp 1956 will take place Thursday, September 13, to Saturday, September 15, at Lake Louise Conference Grounds, near Toccoa, in north Georgia.

Under the sponsorship of the Georgia Tech YMCA Alpha Phalanx Club, this camp is held annually to acquaint entering freshmen with the many facts of Tech life. Again this year campus leaders from the faculty and student body will be featured as speakers. Counselors will be chosen from the membership of Alpha Phalanx.

Recreation will include swimming, boating, volleyball, and other sports. Attendance will be limited to 370 freshmen, 23 counselors, and the speaking staff.

Camp Chairman
General chairman of camp is Ronnie Hanna, president of Alpha Phalanx. He has summarized the camp by saying, "The purpose is to give the freshmen an advance look at Tech, and to give them a better insight into the activities by having many Tech students as speakers."

Committees
Eight committees are working
(Continued on Page 8)

Leaders from both the student body and faculty attend the Alpha Phalanx Freshman Camp each year. At the right the late Colonel Blake Van Leer, Tech president, is shown prior to his address at last year's camp. Sitting next to him is Colonel William F. Curren, Jr., PMST, who explained the facets of Army ROTC.

In the second photo afternoon sports are being enjoyed at the shore of Lake Louise. Cheerleader Harry Stevens is demonstrating "Differential X" in the third photo. Freshman Camp 1955 was ended by a dance with Agnes Scott coeds; in the fourth photo a new "rat" is shown dancing wearing his official emblem, the "rat hat."

Tech Greek

By DAN LAIRD

SIGMA CHI plans for this weekend with an open house before and after the T-Day game on Friday. General Lee and his buddies are hosts to the TEKES for their wiener roast at Stone Mountain this Saturday night. The THETA CHIs plan a hayride to the farm of one of their alumni, Ross Howard Sr.

The DELTS have in store a big house party and other activities of the weekend will include swimming and water skiing at a get-together at Lake Allatoona.

The BETAS plan one of their famous record dances in their basement, while an open house Saturday night is on tap at the LAMBDA CHI house. The most tender of weekend events will be the AEPi's "Out-of-Doors Dance" in their Sweetheart's garden.

Last Saturday Night

Stan Lane won the treasure hunt last weekend at the "FIJI" island and was thereby better able to enjoy the dancing that followed. The ATOs, SAEs, and PHI DELTs are still talking about their Bermuda shorts frolic at Robinson's.

The CHI PSI house took a step back into the "roaring twenties" for one last look at yesterday. The girls wore flapper dresses, the brothers showed in zuit suits and they all had a grand time doing the Charleston to the music of the Ramblers.

The DELTA SIGs were hosts to SIGMA CHI for a great party last weekend. The affair took on two levels; a dean's dream of a dance downstairs, and then upstairs (CENSORED).

Sports Parade

Nothing but victories in softball at LAMBDA CHI, KAPPA SIG, and AEPi houses this week. KAPPA SIGMA claims to be all ready to receive another intramural trophy and AEPi more modestly says that they are getting better each game; opponents beware.

Convention Counter

The LAMBDA CHI's Dixie Peninsula Conclave will be the order of the day for this weekend over in Athens. The Tech chapter will be well represented there. Bill Reed, Dan Laird, Ed Wilinski, and Pete Pitman along with several others will represent Tech's TEKE chapter at Auburn this weekend at the fraternities' Province Leadership School.

The DELTS will be represented by Jack Laverette and Pete Shadgett at a national meeting of their fraternity. The brothers and alumni of SIGMA CHI had a Mother's Club meeting last Thursday.

AEPi will be moving into their new house by fall quarter, and SAE is beginning an addition very soon.

SPE at Tech will be host to the annual District Six convention this weekend. Attending will be delegates from the University of Alabama, Auburn, Georgia State College and from the Valdosta State College Colony.

Dean Pershing will attend as a guest speaker, and the national traveling secretary of SPE will also be there.

The convention will be ended by a banquet at Camellia gardens.

New President Chosen

Bill Reed will hold the reins at TKE for the next year and Martin Farfel is the new sentinel at AEPi. Lawrence White leads the PHI KAPPA SIGMA fraternity, while the new LAMBDA CHI president is Steed Tyson.

The KAs claimed second place in skit night and winning first in scholarship last quarter has virtually uprooted the ATO house.

The PHI GAMs are giving an encyclopedia of philosophy to the library in memory of the late Col. Blake R. Van Leer.

Gasp and Giggle

It wasn't too hard to see why Gene Dunwoody's beard was voted best by KA at the "Old South Ball" last weekend. Casualties of a bedtime fray at CHI PSI last Sunday morning stand at one gas heater, six screens, and all brothers. Two men upon finding their bunks on the back roof, slept there, and were awakened only by the

Lloyd Chapin To Talk At YMCA Breakfast

Lloyd W. Chapin, Regents Professor of English, will be featured as devotional speaker at the YMCA Religious Programs Committee breakfast. The breakfast will be held at 7:00 AM, Wednesday, April 25, in the ODK Room of Brittain Dining Hall.

Professor Chapin is a native of Arkansas. He received a Bachelor of Arts Degree from Emory University and a Master of Arts Degree from Harvard University. He is a member of Omicron Delta Kappa and ANAK, and Phi Kappa Phi, and came to Tech in 1923.

Alpha Tau Omega social fraternity is sponsoring this week's program.

gentle rain of Sunday morning.

The DELTS are having "hell week" and wish to warn all to avoid anyone seen shooting down planes on campus. Bob Ogletree has been voted loudest mouth.

Obituary

All fraternities whose names do not appear in this column are lacking in action and are presumed dead.

Fellowships Available

Six fellowships for study or research in Spain are available to American graduate students for the 1956-57 academic year, it was announced today by Kenneth Holland, President of the Institute of International Education, 1 East 67th Street, New York City.

The awards, given by a private donor, are administered by the Institute. Closing date for application is May 1, 1956. The fellowships provide \$2,000 for the academic year, for travel, maintenance and tuition.

Candidates must be United States citizens under 30 years of age. Other eligibility requirements

are: A bachelor's degree by the time of departure; Demonstrated academic ability and capacity for independence study or research; A plan for advanced study at a Spanish university or for research; Good knowledge of Spanish; Good moral character, personality and adaptability; Good health; and Ability to provide for any dependents.

Applications may be obtained from the US Student Department of the Institute of International Education.

More than 78% of vehicles involved in fatal accidents in 1955 were traveling straight ahead.

Approximately 15,730 persons were killed in weekend traffic accidents last year.

Looking for daring engineering?

Here are a few of the many projects Westinghouse offers the young engineer or scientist interested in daring engineering and research:

- First homogeneous or liquid-fuel reactor for full-scale utility power plant (see sketch at left).
- Guided missiles—seeker head and ground control for "Bomarc," in new Electronics Laboratory.
- First steam turbine to operate at 5,000 lbs. pressure, being developed in new \$6 million laboratory of Steam Division.
- New uses for Magamps and transistors such as . . . controls for aircraft power . . . automation for industry.
- Research in nearly perfect vacuums, and near absolute zero temperatures, at new multimillion dollar Central Research Laboratories.
- Transistorized ultrasonic control systems for torpedoes.
- Pioneering in development of new metals and alloys, and metallurgical techniques, at new \$6 million Metals Development Plant.
- Development of world's first industry-owned testing reactor (cost, \$6½ million).

Today, more than ever before, *Big* things are happening at Westinghouse, and *Big* opportunities are wide open for you in the field of your choice. And, you can take graduate study, leading to Master's and Ph.D. degrees at 22 leading universities . . . at company expense. Location is no problem, for Westinghouse has 98 plants.

Before you make your decision, *phone collect* to C. H. Ebert at Westinghouse Educational Center, Pittsburgh . . . EXpress 1-2800, Extension 353 . . . he will answer any questions. Or write him at Westinghouse Electric Corporation, Educational Center, Ardmore Boulevard at Brinton Road, Pittsburgh 21, Pennsylvania.

CE STUDENTS OPERATE HYDRAULIC LAB CONTROLS
James L. Peed, John Leramo Work In Basement Research Center

INSTRUCTIONAL, TOO

Hydraulics Research Lab Best In South

By GEORGE DICK

Although it was on the campus before any of the present student generation, the laboratory in the basement of the Civil Engineering building is a relatively new facility. Space was included when the CE building was erected in 1938, but not until 1945, with the stimulus of financial aid from two private corporations was definite action taken to develop the facilities for their intended purpose.

Operations were begun in 1947 and in that same year the first hydraulics research project was initiated. The entire basement is now devoted to hydraulics and the lab is designed and operated both as an instructional aid and a research center. Undergraduate instruction, graduate thesis research, and sponsored research are all carried out.

Used By Industry

During its relatively short life the Tech hydraulic lab has become the most outstanding of its kind in the South. Significant uses of the lab include: hydraulic model studies for the Georgia, Alabama, and Florida Power Companies, a large turbine manufacturing concern, and state agencies.

Especially noteworthy occurred in 1950 when the US Geological Survey retained Professor C. E. Kindsvater as a consultant and at the same time inaugurated a program of open channel research which has been concentrated at Tech.

Professor Kindsvater came to

Tech in 1945 especially to develop the hydraulics laboratory. At the same time he was charged with the revision of the undergraduate courses in fluid mechanics and hydraulic engineering as well as initiation of graduate study leading to the Master's degree.

Other specialists are Dr. M. R. Carstens, Associate Professor, and Don B. Jones, Assistant Professor. Several other CE faculty members have aided in the supervision of undergraduate labs or have

taught fluid mechanics.

Today these hydraulic lab facilities have achieved full utilization, but projects must sometimes be discouraged in order to avoid congestion. Recent developments have included doubling the water supply, capacity, installing basic piping, instrument storage space, lockers, offices, computation spaces, and a large river model flume in the space formerly occupied by the highway materials lab.

New English Honor Section Established For Freshmen

By JIM PEACOCK

After much talk concerning the advantage of honor sections here at Georgia Tech, with mathematics listed as an example, the Freshman English Committee has proposed a one-quarter honor class in Freshman English. This plan will be the integration of an accelerated course and an honor class.

The proposal offered will allow about ten percent of the incoming Freshmen next fall to complete all Freshman English requirements in one quarter by taking a special course—to be called English 101-Honor.

Students who complete the course will also be given a satisfactory grade in English 102 and 103. The six extra hours gained in this way may or may not be taken in English; this is left to the discretion of the student.

Life Was Unbearable For J. Paul Sheedy* Till Wildroot Cream-Oil Gave Him Confidence

Sheedy's honey kept giving him the cold shoulder. "This is more than I can bear! Why not be n-ice?" he moaned. "What fur?" she demanded, "It'll be a frosty Friday before I date you again. And just in glacier wondering why, take a look at your shaggy hair." This made Sheedy paws and think. So he got Wildroot Cream-Oil and now he's the picture of confidence. His hair is handsome and healthy looking, neat but not greasy. Wildroot contains the heart of Lanolin, Nature's finest hair and scalp conditioner. Take Sheedy's advice. Whether your hair is straight or curly, blonde, red, black or bruin, keep it neat with Wildroot Cream-Oil. In bottles or handy tubes. It's the bearies!

Nation's Highways

Bloody Statistics Set In 1955

From the Public Information Department of the Travelers Insurance Companies
 1955 was one of the bloodiest years on our nation's highways, with a near record total of 37,800 deaths. As if this were not grim enough, our young drivers figured prominently in compiling these statistics. More than 27% of all drivers involved in fatal accidents last year were under twenty-five years of age, a greater number than ever before.

This figure, in the recently released safety booklet "Fatal Fallacies," an annual publication of the Safety Service of The Travelers Insurance Companies of Hartford, Connecticut, emphasizes the fact that the safety record of drivers under twenty-five deteriorated sharply in 1955.

The inescapable conclusion to this is that excessive speed and recklessness are the principal faults in these accidents.

In comparison, it can be pointed out that the group of drivers over twenty-five years of age made a significant improvement in their safety record for 1955. This improvement was evident particularly in the incidence of fatal accidents, once again pointing to the speed and recklessness of younger drivers.

Young people react quickly and learn quickly. With these two factors in their favor, their driving record should theoretically be better than their elders'. Fast reflexes are not enough, however, to avert a serious accident involving a recklessly driven car traveling at an excessive rate of speed.

Speed and recklessness should be the primary targets of these programs.

More From Les

By LES HORN

I stepped out onto Peachtree Street one night last week, and stumbled into a boy of about ten years. He was alone. He had a bottle of cheap wine in a stained paper bag stuffed under his arm, and a cigarette butt dangled carelessly from his lips. He was dressed in rags and his shaded face was not like a boy's; it was contorted by experience beyond the understanding of his years. He stole a furtive "You a wise guy?" glance at me and then dissolved in the seedy mob that populates downtown Atlanta after midnight.

The incident lasted at most ten seconds, but it told of a trend that has been gaining momentum in Atlanta for the past ten years.

Many changes are being made in this thriving city of ours, and not all are as attractive as the "Come live here!" brochures would have it. Increased wealth has attracted a hoard of under-the-table hagglers to downtown Atlanta, who under the guise of legitimacy are steadily whittling down the business ethics which for so long have been the pride of this city.

But this is only one facet of the creeping perversion which is converting the city of Atlanta into the proverbial "Big City" with all the trimmings. The crime rate is disturbing and juvenile delinquen-

cy is becoming a threat to public safety. A little study will reveal that its increase corresponds directly to our new-found wealth and expanding dimensions.

Atlanta has grown and assumed an impersonal aspect for its natives. Civic pride for the individual has waned and interest in the preservation of economic and moral standards has become passive, permitting an influx of a displaced sense of ethical values. Its inevitable effect is most obvious in the warped products of our new progress, such as the example cited above.

The fact is that Atlanta could possibly become a morally unhealthy place. Thus far our boomtown progress has exceeded the foresight of the city administrators who are just realizing that they are responsible to the citizens of Atlanta for sanitation which goes beyond the litter in the streets.

Their recent installation of a curfew has had considerable initial success, but it probably will lose effectiveness with time. It is easier to attract youngsters from the streets rather than force them indoors at "zero" hour. Therefore, it would be far better to initiate a series of coordinated youth activities with the city's department of parks and the Police Department.

Will The Faculty Answer?

Student Body Denied Adequate Representation On Committees

Adequate student representation on the various committees which control student life at Tech is sadly lacking. In some cases there is none at all, thereby giving the faculty a completely unchallenged say as to what is done.

There is every reason why students should be adequately represented in every matter pertaining to their life. Members of the student body are the closest to problems that arise and would have solutions that often fail to occur to faculty members.

In the case of the Faculty Committee on Student Affairs there is one student and five faculty members. Even the name implies that it is faculty controlled. Why shouldn't it just be the Committee on Student Affairs rather than the Faculty Committee?

One student can do little with five men seeing strictly the other side of each issue. It is often difficult for him to express his views as he knows it will in all probability, do little good. He may receive no backing at all even though he is presenting a suggestion favored by the students, and in most cases a good one.

Another example is the parking committee. Here there is no student representation whatever. At various times students have been invited to the meetings but they are not given a vote.

There is little doubt that this editorial will have no effect as it is met by politely deaf ears. But it would at least be fitting for the faculty to explain why the students should be denied proper voting power in student matters.

Does the faculty feel that the student product it is turning out is not reasonable enough to effectively and intelligently represent the students? Until another answer is given we can do no more than wonder.

All College Students Urged To Exercise Voting Privilege

Register May 5; exercise your privilege to vote! We as college students should get in the habit of voting. As college students we are able to set an example for others to follow.

Paul M. Butler and Leonard W. Hall, chairmen respectively of the Democratic and Republican National Committees, have urged college students to assume the political responsibility for which their academic training equips them.

Such advice is significant in this presidential election year. It is especially significant for Georgians because of the forthcoming senatorial race.

Even though most of us as engineers will be in a specialized field, we should not isolate ourselves from important issues of the day. For we as prominent members-to-be of our communities should take our share of the leadership and responsibility and act as such.

-KILLIAN

English Honor Plan Proposed For Fall

(Continued from Page 3)
cretion of the student.

Placement Test Decide
The results of the English Placement Test, given to all incoming freshmen, will determine who may take the special course. Of course, students chosen will not be required to participate.

In this honor section, students will not be asked to perform more work than those in regular classes; however, the reading and writing assignments will be on a more complex level. The course will be a combination of the three normal quarters of English. Different tests will be used.

This honor section will be a definite advantage to incoming freshmen adept in English. The same instruction in rhetoric will be given them, and yet these talented students will not be retarded by slow students inadvertently found in normal classes.

Other Courses
If a professor feels that a member of his honor class needs more writing practice, or if a student wants more training in writing problems, English 103 can be scheduled the second quarter a freshman is in Tech.

Therefore, these students are not being neglected in so far as writing practice. Yet, the advanced student in English will have six extra hours available if he participates in this English honors program. If he desires, then, he will have time to take some of the specialized English electives offered here, or he will be able to lighten his load in later years of study.

This new program will render outstanding young students a two-fold benefit—a more interesting, more advanced study of English and six extra allowable hours. In addition, by somewhat reducing student contact hours, it will also aid the Tech English Department.

Gridiron Review Tonight At Grant Field

'56 Preview Ends; Climaxes Tonight

Climaxing a month of intensive practice, the '56 spring training program comes to a close with this evening's annual T-night game. The intervening weeks between that fateful March day and tonight have been filled with the rumble and fury of the building of the Yellow Jacket juggernaut.

Taking a well earned rest from the spring activities were such standouts as Wade Mitchell, Dickie Mattison, Ken Owens, Paul Rotenberry, Don Ellis, Jimmie Thompson, and "Moose" Ecker. Their absence left a huge hole in the squad, but encouraged the younger set to work harder to fill shoes that will someday inevitably be left empty.

Broyles Sharpens Quarterbacks

Coach Frank Broyles has spent a great deal of time with frosh quarterbacks Doug Veazey and Floyd Faucette. Both boys are "arriving" under Broyle's all-seeing eye and should be a valuable addition to Mitchell, Vann, and company.

Newcomer to the Flats, Calvin James, has showed himself completely capable of carrying on the James family tradition of top-grade football. Stocky James can hit the line like a Marine division or lope away from would-be tacklers like a graceful antelope.

Not to be out-done by a frosh, Stan Flowers, Charlie Bryant, Joe Delaney, Dave Brooks, and Johnny Thomason have outdone themselves in turning out brilliant performances. Jimmy Noe has made it clear to all that watch that booting long kickoffs is not his only attribute, but that he can run like a man possessed, too.

Coaches Graves and Urban have had the work horses of the team stepping through their paces. O. G. Anderson, Ken Thrash, Urban Henry, and Frank Christy have been playing their usual efficient and aggressive style of ball. Big Carl Vereen, out while tossing the discus, has left a gap, but returnee Dan Theodocian has stepped in to help fill the hole.

Centers Don Stephenson, Rave Robinson, and freshmen Eddie Edward and Foster Watkins have progressed to fill in the vacancy left by Captain Jimmy Morris.

The ends have become practiced at knocking down safety men and snagging passes. Tommy Rose, Jerry Nabors, Paul Vickers, and Wesley Gibbs are the leading men at this position.

Coach Dodd has expressed his pleasure at the quality of the workouts several times. He feels that everything points to good T-Game tonight and a terrific season for the Yellow Jackets next year.

Softball Leagues Get Off To Rough Start

Softball competition in the intramural leagues has been in hot activities for ten days and only ten of the 33 teams remain undefeated, with seven teams yet to post any scores.

Pairings for tennis and golf play this quarter are posted in front of the gym, with the deadline for each flight shown.

(Continued on Page 8)

Ken Thrash (left) and Ormand Anderson, senior tackles for Georgia Tech, have been named by Coach Bobby Dodd to captain the rival squads in tonight's T-night game.

The T-night game is an annual affair which serves the double purpose of climaxing spring training with a scrimmage and previewing the coming fall's gridiron team.

Both Squads Pick Captains For Game

With the 1956 panoramic football preview coming up tonight Bobby Dodd has designated his two senior tackles Ken Thrash and Ormand Anderson as captain's of the White and Blue squads, respectively.

Leading the Blue squad in the gridiron battle will be shared between Floyd Faucette, Herb Schutte and Bobby Hardison. Quarterbacking for the White's will be done by Charlie Maynard and Doug Veazey.

Rounding out the Blue backfield will be Stan Flowers at lefthalf, Calvin James at righthalf, and Johnny Thomason in the fullback slot. Probable starters for the White team will be Lester Simerville at fullback, Joe Delany and Larry Fonts splitting the halfback positions.

Probable Starting Line-ups

WHITE		BLUE
Tommy Rose	E	Jerry Nabors
Gayle Manley	T	Urban Henry
Phil Baum	G	Jimmy Johnson
Don Stephenson	C	Dave Robison
W. A. Glazier	G	Frank Christy

By CAROL FREEDENTHAL

Few Experienced

Today's two-bits of information: For tonight's family affair, from the 90 boys taking part, only 12 have made the tried and proven circle of past varsity letter winners. As has already been, the Jacket mentor released his 12 senior players from spring drills and they will not take part in the head-knocking and bone-breaking game tonight.

Of the 90 men seeing action under the arc lights tonight, only nine of them are seniors. For the mathematical wizards in the audience, one can see that the Yellow Jackets will have a total of 21 four-year men on the squad come this fall. Of this number, almost all of them are members of the first two strings and when they leave the ranks of the White and Gold, the Engineers will be needing some experienced players.

-Big Billing

In tonight's contest, a number of the younger Jackets will be trying to fill the shoes of their more illustrious relatives. Calvin James, Johnny Thomason, Jack Rudolph and Sim Fulcher all have some close connection who rates among the Mr. Bigs in football circles.

James, who in size and ability bears a close resemblance to the Engineer's past All-American Leon Hardeman, is the little brother of Auburn's All-American, Fob James. While the little man is only a freshman, he has shown promise of being able to hold a reputation of his own.

Jack Rudolph is the cousin of Jackie Rudolph, the Engineer's fabulous safety man of the straight win stretch in 1950 through 1952 and Sim Fulcher is the brother of Bill Fulcher who graduates from the Flat-lands this year.

Thomason is the son of the famous Tech runner of the '20's era, "Stumpy" Thomason.

Even though the family tradition of father, son is going strong, one precedent that ends with this game is that for the first time in six years, a Morris won't be on the field for the Engineers. Starting with George and coming down through Larry and Jimmy, the Yellow Jackets have had a Morris in the front ranks until now.

Face Vols Tomorrow In Conference Match Netmen Trim Owls;

After losing an abbreviated match to Vanderbilt University last Saturday afternoon, the Tech tennis team came storming back to defeat the University of Cincinnati's Owls 7-2 last Wednesday.

The match at Vanderbilt was called because of darkness when the score was 4-3 in favor of Vandy. Tech lost the first singles matches, but Lee Jones, Mike Mehaffy, and Buddy Parker came back to even up the count going into the doubles. The only doubles match that could be completed was the number three match and Mehaffy and Parker lost this.

The match goes into the records as a loss for Tech but with the strong doubles duos of Lee Jones and Charley Cox at one, and Earle Bertell and Jack Heisel at two, the other matches could have gone either way.

The Vanderbilt match was forgotten last Wednesday as Tech won all the singles matches except number three and the two and three doubles matches to swamp the University of Cincinnati, 7-2. Jack Heisel, Charley Cox, Lee Jones, Mike Mehaffy, and Buddy Parker all dominated play as they won their matches handily from the Cincinnati boys. The number one doubles team of Heisel and Bertell lost a three set match with the score in the third set going to 7-5 before the match was finished.

Tech is host to the University of Tennessee tomorrow afternoon in a return match. The Jackets won the last encounter, 8-1, with Jack Heisel's loss at number one the only point Tech didn't pick up. This match starts at two and should show the Students just how good their tennis team is and what they can expect from them in the forth-coming SEC tournament.

world peace, international friendship, and professional competence by providing means whereby outstanding students from other nations can attend Georgia Tech as guests in order to study, to see America, and to represent their nation to us."

Jackets Face Tennessee Saturday; All Hopes Of Championship Lost

By JOEL ESMOND

With the Jacket baseball fortunes completely defeated via Georgia's two-game rout this past weekend, Coach Pittard's thoughts now turn only to a spot in the first division and a 1957 championship squad.

Pittard will be losing over half of his starting nine next year but hopes to have a solid team sparked by shortstop and leading batter, Lane Akers. Akers at the present moment is batting .353.

The Jackets still have several big conference games left on their schedule. This weekend Atlanta entertains the University of Tennessee in a single Friday and a doubleheader Saturday. Wednesday, the White and Gold traveled to North Carolina for an exhibition match with Clemson.

Jimmy Towery	1	2 1/2	1	1	0	0	0
Joe Taylor	1	1	0	0	0	0	0

A week from this past Wednesday, the Clemson Tigers pay back the Jackets with a second exhibition game, this one at Rose Bowl Field. Next weekend the team from the Flats takes off for Alabama for a three-game series with Auburn. The following Friday and Saturday, Georgia closes out the regular season schedule with a two game match in Atlanta. Tech at the end of ten games

has a .241 batting average. The opposition is smacking the Jacket pitchers around at a .291 clip. Pittard's boys have outscored their opponents 56-50 and have committed only 17 errors to the foes' 36.

More than 41% of the deaths and more than 35% of the injuries due to motor vehicle accidents last year occurred on Saturdays and Sundays.

MONEY ISN'T EVERYTHING

I have asked the makers of Philip Morris — an enterprising and aggressive group of men; yet at the same time warm and lovable; though not without acumen, perspicacity, and drive; which does not, however, mask their essential greatheartedness; a quality evident to all who have ever enjoyed the beneficence and gentleness of their wares; I refer, of course, to Philip Morris Cigarettes, a smoke fashioned with such loving care and tendered with such kind regard that these old eyes grow misty when I think upon it — I have asked, I say, the makers of Philip Morris — that aggregate of shrewd but kindly tobaccoists, that covey of enlightened Merry Andrews, that cluster of good souls bound together by the profit motive and an unflagging determination to provide all America with a cigarette forever gentle and eternally pleasing — I have asked, I say, the makers of Philip Morris whether I might use today's column to take up the controversial question: Should a coed share expenses on a date? "Yes," said the makers simply. We all embraced then and squeezed each other and exchanged brave smiles, and if our eyes were a trifle moist, who can blame us?

To the topic then: Should a coed share expenses on a date? I think I can best answer the question by citing the following typical case:

Poseidon Nebenzal, a student at Oklahoma A and M, majoring in hides and tallow, fell wildly in love with Mary Ellen Flange, a flax weevil major at the same school. His love, he had reason to believe from Mary Ellen's sidelong glances and maidenly blushes, was not entirely unrequited, and by and by he mustered

up enough courage to ask her the all-important question: "Will you wear my 4-H pin?"

"Yes," she said simply. They embraced then and squeezed each other and exchanged brave smiles, and if their eyes were a trifle moist, who can blame them?

For a time things went swimmingly. Then a cloud appeared. Mary Ellen, it seems, was a rich girl and accustomed to costly pleasures. Poseidon was bone-poor and he quickly ran out of money. Unable to take Mary Ellen to the posh places she fancied and too proud to tell her the reason, he turned surly and full of melancholy. Senseless, violent quarrels developed. Soon it appeared that the romance, so promising at the beginning, was headed for a breakup, but at the last moment, Poseidon managed to blurt out the truth.

"Oh, beloved agrarian!" cried Mary Ellen, grappling him close. "Oh, proud husbandman! Oh, foolish reaper! Why have you not told me before? I have plenty of money, and I will contribute according to my ability."

Poseidon, of course, protested, but she finally persuaded him of the wisdom of her course. From then on they split all expenses according to their incomes. Rather than embarrass Poseidon by handing him money in public, a joint bank account was set up to allow him to write checks. Into this account each week they faithfully deposited their respective allowances — 35 cents from Poseidon; \$2300 from Mary Ellen.

And it worked fine! Gone was all the arguing and bickering. They were happy — truly happy! And what's more, when they graduated they had a nice little nest egg — eight million dollars — with which to furnish a lovely apartment in Lubbock, Texas, where today they operate the local laundromat.

So you see? You too can salvage your failing romance if you will only adopt a healthy, sensible attitude toward money.

Lucre is no obstacle when it comes to Philip Morris. Popular prices still prevail for this, America's gentle cigarette, whose makers bring you this column every week.

Speeding on U. S. streets and highways last year killed 12,700 men, women and children.

American Youth Hostel Holds European Trip This Summer

The American Youth Hostel Association is organizing a trip to Europe this summer. It is to be a planned trip through England, Belgium, and Germany, and Switzerland for one month followed by independent travel for one month.

Schedule

Tentative plans are to fly "air charter" from New York June 22 and to return from Paris August 28. Travel in Europe will be made by bicycle and train. Some of the highspots of the trip will include Southampton, London, Canterbury, Burges, Ghent, The Black Forest, and many other points of interest throughout the before mentioned countries. This itinerary is followed by a month of travel "on your own," and the group meets back in Paris to fly back home. This trip is designed to pro-

vide one month of group hosteling, with a group of ten boys and girls, followed by one month of independent hosteling.

Trip Cost

The cost for round-trip transportation and all expenses while with the group is approximately \$595.00 plus the rental on a bike. After the first month, one can hostel individually for about two to three dollars a day.

Those interested in cycling in Europe, living under simple circumstances (hard beds, cold water, and vigorous exercise), meeting the young people of Europe through Hostel life, and those willing to cycle thirty miles a day on a lunch of bread, cheese, and milk, contact Bill Cooper, 1192 Barnes Street, N. W., Atlanta, Georgia.

Bill plans to lead the trip and will be glad to furnish to students or anyone else who might be interested in this type of trip, information. Bill has had one year of hosteling experience in Europe and claims that it is the chance of a lifetime.

The Physics Club will have as its main speaker Professor L. Davis Wylly of the Georgia Tech Physics Department. The subject he will discuss will be Atomic Energy. The meeting will take place Monday, April 23, at 7:30 PM in the Wilby Room of the Price Gilbert Library.

In 1955, 37,800 Americans were killed in traffic accidents.

In 1955, 2,158,000 persons were injured in motor vehicle accidents.

Freshman Camp Set

(Continued from Page 1)

with the Alpha Phalanx president. The program committee is under the direction of Dan Laird, chairman. This committee takes care of all camp activities and arranging of speakers.

Blair Boggs is chairman of the financial committee.

The athletic and sports program at camp will be under the general direction of Sonny Watson.

Leigh Davis and Bill Van Landingham are chairmen of the Saturday committee which plans the dance after camp, and all other Saturday afternoon and evening events.

Richard Johannes is in charge of the schedule committee, which takes care of all pre-camp details.

The transportation committee arranges for the use of the busses and is under the chairmanship of Alison Smythe.

Joe Pinnell heads the staff committee, which selects the counselors.

The publicity committee is headed by Bill White.

Tentative Schedule

According to the tentative schedule the group will leave Atlanta by bus for Lake Louise Thursday morning, September 3. They will return to Atlanta Saturday and then participate in recreation with girls from Agnes Scott.
