Declaration of Interdependence

by cultural memory organizations, for digital preservation

In the belief that it is our own responsibility to preserve digital files, the [member organizations](#) have agreed to band together for the common good of the institutions we serve and scholars around the world. 🐼 To that end, we have joined MetaArchive, a digital preservation network that empowers organizations to preserve content safely and cost-efficiently, while retaining complete ownership and control of all digital files. 🐼 May our cooperative approach become a powerful force for the free exchange of ideas and knowledge everywhere.
