

Senior Class Leaders Picked For Who's Who

The superlatives for the class of 1956 on the Georgia Tech campus have been chosen. These men are to be listed in Who's Who in American Colleges and Universities. Who's Who is a national organization with headquarters in Tuscaloosa, Alabama. A quota and set of standards is given to the selection committees on the college campuses by the national organization.

This committee on the Tech campus is comprised of the senior class officers and the president of the junior class. This group nominates likely candidates after careful study of every senior's qualifications. The Student Council elects the most outstanding men among these nominees. This final group of students is then approved by national Who's Who headquarters.

The outstanding quality that these men possess is leadership. The following students are Georgia Tech's superlatives for this year. Included are some of their top activities.

Bill All, president of ANAK, Phi Delta Theta and YMCA Cabinet; Carter Barron, ANAK, vice president of Toastmasters Club; Harwood Bartlett, Blue Print Editor, ANAK, ODK president; Bob Beach, Engineer editor, ODK treasurer; Marcus Borom, ANAK secretary, president of Kappa Alpha; Charles Cobb, Senior Class president, ANAK, ODK member; Tom Davenport, Scabbard and Blade Captain, Student Council; Richard Devane, Beta Theta Pi president, Track Team captain, vice president of St. Patricks Council.

Bill Dunlap, Sigma Alpha Epsilon president, Trial Board, ANAK

member; Tom Gossage, Tau Beta Pi, "T" Club vice president, varsity football; Stan Gumble, president of IFC; Newt Hardie, Tau Beta Pi president, ANAK member, Phi Psi president; George Harris, president of Koseme and Student Council, ANAK, ODK member; Frank Holberg, Kappa Alpha vice president, WSF chairman, ANAK member; Claude Hollis, Student Council treasurer, Bulldog Club president; John Klinke, president of Triangle Club and Activities Council, vice president of YMCA Cabinet, ANAK member; Bob Little, Cadet Colonel Air Force ROTC, Alpha Tau Omega president.

Slater Marshall, Ramblin' Reck Club president, Senior Class vice president; Russ McDonough, Technique editor, Trial Board; Jimmy Morris, captain, varsity football; Gordon Oliver, Technique editor, Koseme vice president, president Pi Delta Epsilon; Gene Palmer, president of Phi Kappa Phi and AIE, Tau Beta Pi; Jack Pruitt, treasurer of ANAK, secretary of sophomore class, Sigma Phi Epsilon president; Richard Rosselot, Phi Eta Sigma president, vice president ODK, secretary Student Council.

Freshman Elections Begin With Primary On Tuesday

Yellow Jacket Tested For Part On Pending Walt Disney Program

The Georgia Tech Yellow Jackets may become as famous as Mickey Mouse if Walt Disney decides to use him as one of the characters in a proposed television program to be known as "Goofy Sports Story."

At the request of Walt Disney, the Public Relations Department at Georgia Tech supplied him with some pictures of the school's mascot. He advises that if the insect with a sting wins a place in the cast, suitable advance notice will be given to the students of Georgia Tech.

Ballots To Be Distributed In Administration Building

By J. B. MICHAEL

A list of 48 candidates for Freshman Class and Student Council offices was released today by Cody White, chairman of the Elections Committee. Of the 48, 19 are class officer candidates and 29 are candidates for the Student Council.

Aspiring to a class officer position are: John Howard, Jr., David O. Lawson, Gilbert N. Halpern, Paul T. Price, Paul J. Roberts, Randy Bowden, Bill Harris, Andy Clark, Jerry Neil Orr, Harris Baskin, Arthur W. Vogan, George E. Roy, Thomas M. Roberts, Albert McGregor, Fred F. Kauffman, T. A. Kaminsky, David Martin Harrell, R. W. Elrod, and M. A. Crabb.

Seeking Student Council positions are: David Wainer, Jr., Brad Bakes, W. B. Morton, Bill Vandlingham, Mike Pou, Peter Potter Pitman, Bill Miller, Chester Marks, Roy Latines, John Lanier, Stewart Kaiser, Bill Howie, Joel Esmond, Tully Dawson, Jim Davis, Jamie Cone, George Cates, Norman Cartledge, Victor Beadles, Russ Harris, Jack Worill, Temp Davis, Ronnie Bell, Sonny Watson, Tucker Grigg, Jim Tune, Bill Conely, and Sandy Simin.

Campaigning began last Wednesday, October 26, and will continue until the primary election November 8. The final election will be held November 15. The primary election will determine six candidates for council positions and six candidates for Freshman Class offices. The final election will determine the men who will hold the class positions for this year.

Primary Election

The primary election will be held in the Administration Building from 8:00 AM until 4:00 PM. Due to the large number of candidates, the ballot system will be employed with members of the Student Council and members of the Circle "K" Club conducting the election. Each freshman is entitled to vote for six of the men running for council positions and six men aiming for a class office. Specific class officers will not be voted on at this time. All freshmen are reminded to bring their student ID card which must be stamped before they vote. All candidates that are eliminated by the primary must remove all posters by Friday, November 4, or they will lose their privilege to run in future elections.

In the final election three council members and three class officers will be chosen. The class officer positions will be determined by the total number of votes with the man receiving the greatest number occupying the office of class president, the runner-up will assume the vice-presidency, and the third in the tally will be secretary-treasurer.

Rules Enforced

"The rules and regulations will be strictly enforced this year," said Cody White who is in charge of the proceedings. Any violation of any rule will mean immediate disqualification. Among the rules are the following:

1. Posters must not exceed the standard size and must be placed

Art Show Slated; Faculty And Staff Exhibit Best Work

An exhibition of talent in various artistic media featuring the work of faculty, wives and staff of the school will be sponsored by the School of Architecture. Beginning Sunday, October 30, from 3 to 6 PM. It will open daily Monday through Friday 8 AM to 5 PM and 7 to 9 PM and Saturday 8 to 12 AM through November 12.

Julian H. Harris, of the school staff and one of the South's outstanding sculptors, will exhibit several of his pieces

Displayed will be pencil drawings and photographs by Paul M. Hefferman, winner of the Paris Prize, a scholarship presented by the Beaux Arts Institute of Design. Hefferman is professor of design and senior design critic in the School of Architecture.

Wife of the Architecture School's director, Mrs. Harold Bush-Brown, who has exhibited in many of the countries leading exhibitions, will present several paintings.

Work will be shown by George W. Ramey, assistant professor in the School of Architecture and recent winner of honorable mention in the Water Color Exhibition at the High Museum of Art.

Ceramics Society Initiates Five Men

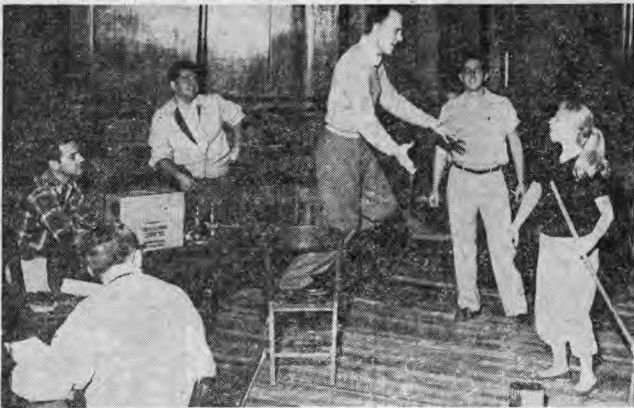

The Ceramics Department announced last week the initiation of five new members into the Ceramics Fraternity, a national ceramics society, and one of the oldest professional engineering groups. The members: Henry P. Still Jr., Edward L. Bradely, Stanley I. Warshaw, Leslie R. Hodges Jr., and Charles W. Biggerow, were selected on a basis of character, record, personality, and standing in class.

The initiates, welcomed to the organization by President Marcus Borom in a ceremony immediately after the Tech-FSU game, were later honored by a banquet, held at the Naval Air Station Saturday night.

Student Notices

All students interested in becoming members of Alpha Phi Omega are invited to attend a meeting to be held in the YMCA at 7:00 PM on Monday, November 7. The only requirements are that the students must have been affiliated with the Boy Scouts of America.

Dormitory applications are now being taken for the winter quarter. Those students interested should apply at the Housing Office.

Pictured above are the following participants in DramaTech's forthcoming production, "The Front Page." From left to right: Milton Peagler, Howard Harris, Dick Lawrence, Gordon Albury, Don Phillipelli, and Rosie Clark.

Albury And Santacroce Star In DramaTech's 'Front Page'

Gordon Albury and Dan Santacroce will star in the DramaTech production of "The Front Page" by Ben Hecht and Charles MacArthur. All rehearsals now point to opening night, Friday, November 11, at Crenshaw Field House. Other performances follow on Saturday, November 12, Friday, November 17, and Saturday, November 18.

Gordon Albury will portray reporter Hildy Johnson in Ben Hecht and Charles MacArthur's very famous play. Gordon, completing his fifth year in architecture, is from Miami, Florida, and is one of the outstanding students on the Tech campus. He is a member of both Omicron Delta Kappa and ANAK, among many other organizations. He has been with DramaTech since his sophomore year, having served as secretary of the group for three years, besides the many outstanding jobs done on the stage.

Dan Santacroce is a Tech graduate from New York City, and is in town serving with the Army at Fort MacPherson. He is also an architect, and is well known to Tech theater-going circles for many roles he played on the DramaTech stage. Four performances of this play

are scheduled on November 11 and 12, 17 and 18. It was presented by DramaTech seven years ago. Director Mary Nell Ivey has waited until now to again re-create this drama and she believes it will be just as popular this time as it was before.

Campus Capers

Large sign seen on the roof of the Robbery saying, "The Very Near Future Home of Alpha Epsilon Pi Fraternity."

Student, after trying for hours to get an unbusy line to Agnes Scott, finally calling his steady long distance.

Comment by professor in EE class, "Boys, we'll just skip lightly over this material now; it'll be covered more fully on the quiz."

WSF Committee Head Pleased By Outcome Of Homecoming Drive

Frank Holberg, chairman of the World Student Fund Committee, states, "I wish to express my appreciation to the spectators and students at the Homecoming game for their response to the collection of funds necessary for the continuance of the committee's work." He also expresses his thanks to the Georgia Tech Athletic Association, Thad Horton, the Ramblin' Reck Club, the alumni, upper-classmen, and freshmen who cooperated with the drive.

The purpose of the World Student Fund is to bring deserving foreign students to study here at Tech. It costs approximately \$1,500 a year to bring one of these students to Tech. Because of the reduced rates granted by the school the scholarships are worth about \$2,000 a year to each student. The funds taken up at the game Saturday will enable the committee to carry on this work.

Toastmasters Meet; New Officers Elected

The Georgia Tech student chapter of Toastmasters International recently elected officers for the next six months. The newly elected officers are Dan Shephard, president; Cracker Barron and Garnett Keith, vice-president; Jim Peacock, secretary; Hugh Roberts, treasurer, and Bob Wolff, sergeant-at-arms.

Toastmasters is a club which aims at educating the member so as to improve, through practical experience, his ability to speak in public. There is a limit to the number of members admitted, but this quota has not yet been filled. Toastmasters meet every Thursday evening at 6:30 in the YMCA, and all who are interested are invited to attend.

Inter-School Bus Service Suggested

The Atlanta Transit System is now making a study about the possibility of putting in bus service between the campuses of Emory University and Georgia Tech, according to a letter from Robert L.

Sommerville, president of the company, to President Blake R. Van Leer.

However, Mr. Sommerville states that previous studies had shown that such service would be used by very few people. But because of the critical parking situation at Georgia Tech, the Emory service might be justified now.

Election Tuesday

(Continued from Page 1)

only in places specified by the Election Committee.

2. Posters shall not be placed in public before Tuesday, two weeks before the elections.

3. No obscene or obnoxious means of publicity will be allowed.

4. No political blocs will be allowed.

5. The total amount, including gifts, spent in any form of campaign expenses shall not exceed \$25.00.

6. A candidate must be able to serve at least two quarters as a member of the class in whose election he runs.

Again, it is urged that all freshmen participate in their elections to insure proper class representation.

Who's Who Selections

(Continued from Page 1)

Engineer, Toastmaster Club treasurer, Koseme; Sam Van Leer, Sigma Chi vice president, co-captain Swimming, ANAK member; Wayne Wadde, sophomore and junior class vice president, president of Alpha Phi Omega, St. Patrick's Council, AHE; Joe Walker, Lt. Colonel Air Force ROTC, Drill Team head, swimming co-captain; Frank Williams, president of sophomore class and Chi Epsilon; Kell Williams, president of Debate Team, Lt. Colonel Air Force ROTC, Tau Beta Pi.

On The Drill Field

Staff Officers For Regiment Appointed By Army ROTC

By HERB SHERROW

The Army ROTC this week announced the appointment of five new cadet officers to the Regimental Staff. The selection was made by Cadet Regimental Commander Herbert and the senior officers. Basis for the selection was military bearing, academic standing, and extra-curricular activities.

The appointed cadets and their positions are: Cadet Lieutenant Colonel Armond J. Worrell, Executive Officer; Cadet Major Samuel W. Van Leer, Adjutant; Cadet Major Jack D. Lanier, S-2; Cadet Lieutenant Colonel Robert D. Adams, Jr., S-3; Cadet Major Emilio Zeller III, S-4.

The cadet non-commissioned officers will soon be wearing a new insignia. The new markings will be small metallic pins which are replicas of the present chevrons. They will be worn on the shoulders instead of the usual position on the sleeves. The reason for changing the identification is to preserve the appearance and condition of the blouses for future use.

Air Force

During the Thursday drill period this week the Air Force ROTC unit will make formal presentations to its distinguished AFROTC students. These awards are made to those senior AFROTC students who have met the qualifications during their previous three years in the program.

The honored cadets are: Harwood Bartlett, Homer J. Boatwright, Jr., Roger E. Collier, Ned W. Edge, Tommy L. Gossage, Walter B. Grant, James E. Haynes Jr., Robert M. Little, William W. Patton, Millard P. Stanley, Jr., Robert H. Stickley, Dewey W. Waddell, Joseph S. Walker, and James K. Williams.

Navy

The NROTC unit announced growing interest in a Navy

swimming team. Plans are underway and all interested NROTC students are urged to consider the possibilities of joining.

A formal presentation will be made this week during drill period to Lieutenant (JG) Emmet O. Floyd of Decatur, Georgia. He has received an award of a letter of commendation from Major General Twinning, Commandant of the Marine Corps. The award was earned while Floyd was a chaplain with a Marine division in Korea in 1953.

The presentation will be followed by a commanding officer's inspection.

Student Council Minutes

November 1, 1955

The meeting was called to order at 6:50 p.m. by Pres. Harris. Davenport, Fuentes, Harvard, Mattison, and McDonough were absent. The minutes of the last meeting were read and approved.

Committee Reports: Baker, Welfare Committee, discussed the bank situation and suggested the possibility of getting the branch of a local bank situated on the campus. The excess funds which the Bulldog Club receives from the Homecoming Dance were discussed.

Bolger, Athletic and School Spirit Committee, spoke on the conduct of the student body at the football games; particularly drinking, and dropping articles from the top of the stadium.

White, Elections Committee, announced that the freshmen primary would be held on Nov. 8. He moved that we pay A. P. Cantrell for servicing the voting machines. Motion tabled. Thornwell suggested that the election rules be revised and clarified.

Armstrong, Rules Committee, recom-

A Campus-to-Career Case History

"It sounded good to me"

Charles Poole, B.S. in Business Administration, Boston University, '52, is working for New Jersey Bell Telephone Company as a Traffic Superintendent. For a young man he has a lot of responsibility. And responsibility is what he likes. He has three New Jersey exchanges under his supervision—Dover, Madison and Washington—which total nearly 16,000 customers, and he manages a force of some 160 operators, including nine chief operators and fifteen service assistants.

"It's the type of job," says Charlie, happily, "where you can never say you're caught up. There's always some-

thing to do." Each day brings Charlie new problems, new experiences. And with every passing day his grasp of the telephone business is getting stronger, his value to the company is growing.

That spells the kind of future that Charlie wants: the opportunity to take an ever-increasing part in an ever-expanding business.

"It sounded good to me," Charlie says, remembering what he thought when the telephone interviewer had finished telling him about the company and its future. And, as you might expect, it still sounds good to him.

Charlie Poole is typical of the many young men who are building careers in telephone work. Similar opportunities exist today with other telephone companies, and also with Bell Telephone Laboratories, Western Electric and Sandia Corporation. Your placement officer has the details.

Faculty Facts

Profs Active Off Campus

By **BILL OAKES**

Professor Benjamin J. Dasher, Director of the School of Electrical Engineering, has been appointed general manager of the Institute of Radio Engineers Instrumentation Conference and Exhibit to be held in Atlanta on November 28, 29, 30 at the Biltmore Hotel. Other faculty members connected with the conference are: Professor D. L. Finn, of the E. E. Department, who is Program Manager and Chairman of the Atlanta Section; Dr. Walter S. Buckingham, Jr., of the Industrial Management Department; E. K. Ritter, chief of the Rich Electronic Computer Center; and W. B. Wrigley, of the Engineering Experiment Station.

Professor Alton A. Hobgood, of the English Department, was the guest speaker at the meeting of the Modern Language Club on November 3. The group met in the English Lounge Room in the Administration Building. Professor Hobgood's topic was "The Place of the Humanities in Engineering Education."

W. Cary Hansard, assistant professor of Ceramic Engineering, was invited to speak before the Northwestern Section of the American Ceramic Society at Seattle, Washington on October 28. He spoke on "A New Method of Body Prepara-

tion." This work was done at Georgia Tech in line with the potential of raw material blending in ceramics. Professor Hansard has published several previous papers on this subject.

Professor William N. Cox, of the Industrial Engineering Department was recently elected to the board of directors of the National Safety Council. Professor Cox, an active member of the American Society of Safety Engineering, set up the safety engineering department at Tech in 1944 and has remained as its director since then. The Professor is well known nationally for his talks on safety and during the last week has had several speaking engagements. Wednesday, in Jacksonville, Florida, he spoke at a luncheon of the Annual Safety Conference of Jacksonville, Duval County and today he is in South Carolina as guest speaker at the meeting of the 18th Annual Accident Prevention Conference held at Charleston.

Apple Jim And Mary, Local Entrepreneurs, Do Thriving Business

By **JIM PEACOCK**

For a quarter of a century, a man known as "Apple Jim" has been supplying Tech students with all varieties of fruit, candy, and peanuts from a push cart in front of the gymnasium. And his record of service during these 25 years is remarkable.

This summer Jim had an operation; but excluding the days he missed then, Jim remembers only one day when he hasn't been on hand for the convenience of Tech men. One day in the winter of 1936 a snow storm prevented Jim from setting up his stand. But the next day, he says, he shoveled away the snow and resumed business.

As constant as Jim is his wife Mary, whom he married four years ago. She hasn't missed a day since that time.

When asked about his fruit, Jim said that he got it every morning at a farmer's market in Atlanta, and added: "I don't buy nothing cheap; I always get the best ones—only the best." And as an illustration of the quality of his merchandise Jim showed this reporter the biggest apple he has ever seen. It was almost six inches in diameter, and Jim guessed that it would weigh over a half-pound. Jim said that he was going to take it home and put it on his mantle-piece and "just look at it."

Each schoolday morning Jim and Mary push their apple cart from their house, about three blocks away, to their usual position in front of the gymnasium. Jim says he has worn out six carts in his years here at Tech. Jim has permission from Tech officials to operate the stand. He noted that Dr. M. L. Brittain originally gave him permission to set up business on

Week's Calendar

One function of the Georgia Tech Activities Council is the publicizing of the activities of its member organizations. It is to that end that this column is published. Beginning with this issue, a list of the activities for the coming week will appear in each Friday issue of the *Technique*. Forms for turning in this information were supplied to all members of the Activities Council; if any member club of the council failed to receive these, please notify Box 3011. Organizations interested in becoming members should contact Bill Moss, Box 3343, for further information.

- Monday, November 7**
 6:30 PM—Alpha Phalanx Club meeting.
 7:30 PM—Sigma Phalanx Club meeting.
 8:30 PM—Recreation Council meeting.
 7:00 PM—Newman Club; indoctrination of new members at Newman House.
 7:30 PM—Physics Club: Dr. B. M. Drucker, Math Department, speaks on electronic computers and the Rich Electronic Computer Center. Included will be a trip through the Center.
- Tuesday, November 8**
 7:00 PM—Newman Club: Weekly meeting at Newman House.

Letters to the Editor and signed articles represent the views of their writers and not necessarily those of the editor.

Windshield Broken

Council Asks For Contributions

Shortly after the Tech-Auburn game, a large group of Tech students were guilty of breaking the windshield of an automobile. The damage was done by a rock thrown from the crowd of students ringed around the car. No one individual or even a small group of individuals could be pointed out as being responsible for the damage.

The owner of the car sent a bill for his windshield to Georgia Tech and Dean George Griffin turned it over to the Student Council. Although the Council felt the car owner was completely justified in expecting the school to pay for his windshield, it was felt that the money should not come from the portion of the Student Activity fee allotted to the Council.

As a result a booth will be set up outside the post office next Wednesday and Thursday to collect the money for the windshield. Each student is being asked to contribute one dime and only one dime.

It will be awfully easy to pass the booth by despite the fact that the donation asked for is only ten cents. It will be completely voluntary, but every Tech student should feel it his duty to right the wrong done by the individual who threw the rock. Uncorrected incidences such as this would greatly degrade the name of Georgia Tech so dig into your pocket and give a dime.

Problem—Where To Park?

Can the parking situation on the campus be improved? Every person that tries to park his automobile on the Tech campus is certainly interested in getting an answer to this question. This includes students, faculty, visitors and members of the school administration. The way the situation now stands, the only people that are assured of a parking space are those who have a reserved space, such as Col. Blake R. Van Leer. But what are we peons supposed to do for parking space?

The answer is not as simple as it may appear. Each year there is a considerable increase in the number of cars on the campus and the small increase of expansion room is used to put up new buildings. These new buildings are certainly needed, but the fact remains that they are not leaving any room for the needed parking space. As a matter of fact, they attract additional cars. For example, where will people park when the Alexander Memorial Building is in use? Perhaps the architects should have included garage facilities in the plans.

The foremost question seems to center around the use of the big parking lot next to the Architecture Building. The Student Council and the *Technique* have been trying to get to the root of this and find nothing but a stone wall. There just isn't a clear cut solution.

It should be made clear that the Air Force does not own this lot and

they did not pay for the black-top surfacing. They were given this lot by the school. After securing its facilities, they allowed student cars to park around the perimeter. Another fact to keep in mind is that the Army and Navy also use this area—though not as extensively. On one day of the week the lot is in use seven hours. Of course, whether it is in use one hour or seven hours, the parking situation is still hindered. There is not one day in the week when this lot is completely free.

Several students have suggested using at least one row, which would allow an additional 27 parking spaces. However, in gaining these additional 27 spaces, the room between this additional row and the cars on the side would be wasted. This would also increase the possibility of cars driving across the drill field when it is occupied by students.

According to Col. Moore of the Air Force, the future expansion plans of Georgia Tech include armories and drill areas. Until these are completed, however, it appears that we will have to make the best of the present space allotments unless somebody invents some sky-hooks or donates enough money to build a multi-level garage.

In spite of the many obstacles, there is undoubtedly some solution to this problem and any student who thinks he has one which is feasible should present to the Student Council or the Faculty Parking Committee.

Use Discretion

Election Importance Stressed!

This year's freshman class will have its first opportunity to participate as a group in student activities Tuesday when it elects its class officers and student council officers. Every member should exercise his right to help select these officers and council members by voting.

It is of primary importance that the students pay close attention to the various candidates and their ideas when they are contacted. The boys elected this year will in many cases be the ones that hold offices for the four years to come. It is much easier to get re-elected as an upperclassman than it is to get elected for the first time. It will be up to the individual to judge the calibre of the men running and then to vote for the ones that they feel will do the best job.

Many times in the past large portions of the classes involved have failed to vote in the elections. Don't let your class be guilty of this. The men you elect can serve you and Georgia Tech in many ways. Make a choice and make sure that it is a wise one!

Letters

Homecoming Changes Needed

Dear Sir:

The weekend of October 28-30 is the biggest weekend of the entire year at Georgia Tech—at least it is according to local, city, and national press stories. Naturally all the publicity outlets played up Homecoming 1955 to the hilt. But to many, these tons of publicity were just so many empty phrases.

1) Why is it that organizations had only two or three days in which to make a choice for Homecoming Queen nomination?

2) Why is it that not all campus organizations were notified of the contest and that only a few of the 70 odd campus groups were even told about the competition?

3) Why is it that only organizations may nominate for this contest? What about the student, the typical Tech student who wants to make a nomination?

4) Why is it that there was such an inexcusable mixup in the Cake Race? Why weren't freshman team members notified that they weren't supposed to run?

5) Why is it that during the Reck Parade some of the fraternities were rushed by the judges stand, while others were permitted to tarry as long as they wished?

6) Why is it that there were four things going on at once during game halftime—the WSF announcement, the presentation of the queen, the parade of alumni, and the parade of "bullpups"?

7) Why is it that the supposedly "biggest dance of the year" was held in a building which was so small that it would have been absolutely impossible for all those present to dance at once?

8) Why is it that at this dance the only decorations were words (that were actually crooked) on a black backdrop?

9) Why is it that there was not a workable public address system at the dance,

even though one was needed for the ANAK tapping, UMOC announcement, display announcement, ad for the presentation of the Homecoming Queen?

10) Why is it that Georgia Tech couldn't even afford a big-name band for its Homecoming Dance? Even the University of Georgia has had in the past three years such notables as Sammy Kaye, Ralph Flanigan, and Ray Anthony?

What can be done? I surely don't have all the answers. But I strongly recommend that something should be done! Perhaps one major thing wrong with the entire weekend is that there are too many organizations sponsoring things. A few of the major events this past weekend included: Homecoming Queen contest, UMOC contest, ANAK tapping, display contest, Reck Parade, Cake Race, WSF Drive, and the Bulldog Club initiation.

I'm not saying that any of these should be discontinued, but it is obvious that if they are not better coordinated, and if the ones that are of major concern to the student body are not better planned and carried out, Homecoming will continue to be a farce. Work should begin THIS year for Homecoming 1956, and under the supervision and coordination of some central committee.

Since this weekend concerns the entire student body, it seems clear to me that the logical coordinating committee would be the Student Council. They could plan the entire weekend with the other organizations and individuals concerned, so as to prevent overlapping, empty spaces, and just plain ol' lack of organization. They could insure that publicity was concise, complete and coordinated. They could also insure that Homecoming at Georgia Tech would be something of which we would be proud.

Sincerely,
An Interested Student

Advice Given To Activities Council

Dear Sir,

We have written this letter to question the basis for choosing the "Best Organization on the Campus". We feel that the organizations on the Georgia Tech campus are so varied in their sizes and purposes that neither the Activities Council nor any other group could attempt to choose the "Best Organization on the Campus" without an extensive study of their structures. We do not feel that one organization can be chosen from 80 organizations with less than a week's preparation of the facts. The judges undoubtedly did an excellent job with the facts at hand, but more facts should be prepared.

The Activities Council would be of greater value to the students if it worked harder to accomplish its three-fold purpose as stated in its constitution: "(1) To introduce to new members of the student body the numerous organizations on the Georgia Tech campus; (2) To arouse interest in those organizations from all members of the student body; (3) To coordinate all cooperating organizations on the Georgia Tech campus in informing students of the presence and purpose of the organizations, in order that school spirit might be raised by a more active participation in the aforesaid organizations."

Without questioning the merit of the particular organization which won the trophy, we wish to question the right of the Activities Council to award a trophy for the "Best Organization on Campus". Only 35 out of 80 campus organizations are members of the Activities Council. Perhaps the Camera Club was most outstanding in the Activities Council out of this group of 35; however, an award made by the Activities Council and its 44% representation of student organizations should not be made in the name of the entire student body.

We hope that the Activities Council will regard this letter as constructive criticism, rather than degradation of their organization.

Sincerely,
Bill All and George Harris

A Need For Improvement

Lately I've heard quite a few disgruntled students complain about the inadequacy of various courses and this time it appears that a few of their peevish are well founded, particularly those directed toward Sophomore English.

The English Department offers in its "Survey of the Humanities" one of the most potentially valuable contributions to the intellectual development of the Georgia Tech student. With this promising license it is hard to understand why the course falls so far below par in student regard and academic importance. No doubt some of the blame can be attributed to the underemphasis of the arts at Tech (see Bernard Spano's "Student Opinion Urges More Liberal Training" in this issue), but it can be better explained by examining the method in which it is taught.

Nothing is lacking in the course as far as material content is concerned. If it were treated properly it could give the student an excellent opportunity to in-

crease his appreciation of the arts and improve his critical ability through the study of the history and intellectual activity of the regions which produced the literature; but strangely enough, these most important aspects of the course are not stressed. Instead, they are crowded into the back seat and replaced by a superficial survey of content which ultimately boils down into something like a query into Agammemnon's sex life or the nature of Scylla's appetite.

Students vary markedly in their powers of memorization and it is common knowledge that some members of the faculty take advantage of this "sure thing" to facilitate a "normal" dispersion of grades. Judging from student opinion it appears that some of our English Professors are guilty of making this sacrifice of content in order to insure a proper gradient among their students. This must be stopped if we expect to keep pace with the far-sighted arts programs of other engineering schools.

ODK Among Top Campus Honors Student Opinion Urges More Liberal Training

By FRED DOUGHERTY

One of the greatest honors a college man can receive is an invitation to membership in Omicron Delta Kappa, national leadership honor society for men. ODK was founded December 3, 1914, at Washington and Lee University, Lexington, Virginia, by 15 student and faculty leaders who felt that all-around leadership in college should be recognized and that such an honor society would more closely bind student and faculty leaders in co-operative effort to promote leadership and service in college life. In the 41 years since its inception, ODK has thrived and grown on the belief that participation in worthwhile extracurricular activities contributes to the development of personality and character, sense of responsibility, and fine qualities of leadership.

The threefold purpose of ODK is: (1) to recognize men who have attained a high standard of efficiency in collegiate activities and to inspire others to strive for conspicuous attainments along similar lines; (2) to bring together the most representative men in all

phases of collegiate life and thus to create an organization which will help to mould the sentiment of the institution on questions of local and intercollegiate interest; and (3) to bring together members of the faculty and student body of the institution on a basis of mutual interest and understanding.

An outstanding example of the way in which ODK fulfills its purpose occurred right here on our own campus back in 1938. The governor of Georgia at that time was attempting to make certain political moves regarding the University System which would have resulted in Tech losing its national accreditation. ODK launched a campaign aimed at organizing the students of the University System against the policies of the Govern-

nor. The student political "party" thus organized was a principal factor in the defeat of the Governor when he ran for re-election.

Alpha Eta circle of Omicron Delta Kappa was established at Georgia Tech on the 28th of May, 1930. Doctor F. B. Wenn, whose active and able guidance of the society earned him the affectionate title "Mr. ODK," was faculty Secretary-Treasurer until about four years ago when the post was taken over by professor W. A. Flinn. The interest and participation of these and other faculty members has been one of the principal contributing factors to the success of the Tech circle.

Among the many accomplishments of the circle here at Tech was the addition of the ODK banquet room to Brittain Dining hall. Solely through the efforts of ODK, the entire sum needed for this much-needed improvement was raised in the single school year 1937-'38. Immediately after the war ODK organized the President's Club for the purpose of promoting

(Continued on Page 8)

By BERNARD SPANO

Are Engineering students at Georgia Tech "deadheads"? Spurred by a paper written by Dr. Samuel J. Mantel, Jr. of the Georgia Tech Social Science Department, a typical cross section of the men on the campus was asked to comment on whether they

felt that the Tech student was well versed in the necessary knowledge to face the world upon graduation. All in all, comments of these men show that they tend to believe that the answer is, as engineers, yes; as cultured individuals, no.

In the paper Dr. Mantel compared the social science and humanity study required at Georgia Tech with the other eleven "best" Engineering schools in the country. Rated solely by the number of hours of liberal studies required, the list of schools showed that Georgia Tech was last with an average requirement of eight hours. This was some thirty hours less than California Institute of Technology which headed the list and four hours less than the immediately higher schools. The median

requirement of all schools was approximately 25 hours.

The students questioned about the subject readily agreed there was a need for more liberal courses at Georgia Tech, but all immediately pointed out that time was the limiting factor. Most did not feel that any presently required courses in their engineering curriculum could be deleted to favor the liberal art courses.

Some pointed out that the ideal situation would be a five year curriculum where the student attended a liberal arts school for two years and an engineering school like Tech for three years, thus leading to an A.B. degree as well as to one in Engineering.

Others commented that a few presently required courses might be condensed and integrated thus leaving room for social sciences and humanities to be extended as far as hours are concerned, that is, making five credit hour courses out of three hour courses. This would therefore be a means of obtaining a greater hour requirement for the liberal courses.

Of course a change-over from the present system would be a gradual process if attempted. Recommendations of the paper included a minimum program as follows:

| | |
|----------------------|---------|
| Basic Social Science | 10 hrs. |
| American Government | 3 hrs. |
| History | 3 hrs. |
| General Economics | 3 hrs. |
| Social Science | |
| Electives | 3 hrs. |

Total 22 hrs.

The paper closed with an excerpt from the "Report of Committee on Engineering Education After the War" in *The Journal of Engineering Education*, "... it is evident that adequate time must

Council Minutes

(Continued from Page 2)

mended that the By-Laws be studied by each member of the council for revision. Finance Committee: Hollis' motion to pay the Dining Hall \$5.97 for the Tech-Auburn Better Relations Committee Dinner was removed from the table and passed.

Hardie moved that the damages to a car by a Tech student after the Auburn game be paid by donations from the Student Body. Motion passed. Hardie announced that a booth would be set up on November 9 and 10 for the purpose of collecting this sum of \$75.49.

Van Leer, Trial Board, announced the results of the trials held during the past week. Old Business: Barron spoke to the council on the progress of the Student Activities Building Committee.

New Business: Baker was asked to look into the parking situation. Bolger was asked to check on the possibility of having concrete steps built on the bank in Peters Park.

Bolger urged that all organizations remove their wrecks as soon as possible. There being no further business the meeting was adjourned at 7:50.

Respectfully submitted,
Dick Rosselot, Sec.

On Campus with Max Shulman
(Author of "Barefoot Boy With Cheek," etc.)

ADVENTURES IN SOCIAL SCIENCE: NO. 1

"The proper study of mankind is man," said Geoffrey Chaucer in his immortal *Casey at the Bat*, and I couldn't agree more. In these tangled times it is particularly proper to study man—how he lives, how he functions, how he works. Accordingly, this column, normally devoted to slapdash waggery, will from time to time turn a serious eye on the social sciences.

In making these occasional departures, I have the hearty approval of the makers of Philip Morris Cigarettes, whose interest is not only in promoting the pleasure of young Americans by providing them with a gentle cigarette, matchlessly blended of vintage tobaccos, grown with loving care and harvested with tender mercy, then cured with compassionate patience and rolled into firm, tasty cylinders and brought to you in king size or regular, wrapped in fetching packages of lively crimson and pristine white, at prices that wreak no havoc on the most stringent of budgets; but who are equally concerned with broadening the minds and extending the intellectual vistas of every college man and every college woman.

I, for one, am not unmoved by this great-heartedness in the makers of Philip Morris, and though I know it is considered chic these days to disparage one's employer, I shall not. Indeed, I shall cry "Huzzah!" for the makers of Philip Morris. I shall cry "Huzzah!" and "Bon appetit!" and "Stout Fellows!"

But I digress. For our first lesson in social science, let us turn to the study of economics, often called the queen of the social sciences. (Sociology is the king of the social sciences. Advertising is the jack.) Economics breaks down into two broad general classifications: 1) coins; 2) folding money. But before taking up these technical aspects, let us survey briefly the history of economics.

Economics was discovered by the Englishman, Adam Smith. He published his theories in 1778, but everybody giggled so hard that Smith, blushing hotly, gave up the whole thing and went into the cough drop business with his brother.

For long years after that, economics lay neglected while the world busied itself with other things, like the birth of Victor Hugo, the last days of Pompeii, and the Bunny Hug.

Then one day while flying a kite during a thunderstorm, the American Henry George (also called Thorstein Veblen) discovered the law of diminishing returns, and then, boy, the fat was in the fire! Before you could say "knife," the Industrial Revolution was on! Mechanization and steam power resulted in prodigies of production. For example, a Welsh artisan named Dylan Sigafos before the Industrial Revolution used to make horseshoes by hand at the rate of four a day. After the Industrial Revolution, with the aid of a steam engine, Sigafos was able to make entire horses.

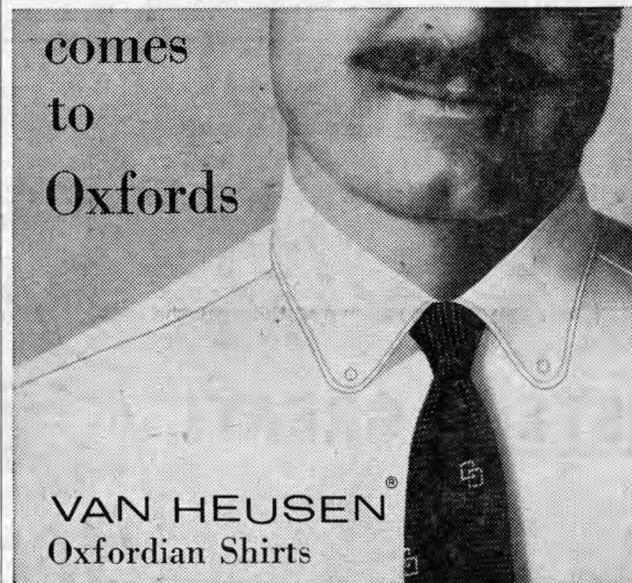

And so it went—factories rising from the plains, cities burgeoning around the factories, transport and commerce keeping pace—until today, thanks to economics, we have smog, depressions, and economics textbooks at \$5.50.

©Max Shulman, 1955

The makers of Philip Morris, who bring you this column, are no economists, but they do understand supply and demand. You demand gentle smoking pleasure; we supply the cigarette that has it—Philip Morris, of course!

FASHION

comes to Oxfords

VAN HEUSEN
Oxfordian Shirts

get a lift from new colors, new collar styles

Gone are the days when young Joseph College settled for a batch of white button-downs and called it quits. Today he spikes his shirt collection with oxfords in many soft charcoal-suitmate colors and a variety of neat new collar styles. Like the Van Garde, above. And for every sidelong glance he gets, he thanks Van Heusen for making the softest, silkiest oxford shirts with an eye for correct but lively 1955 style! Only \$4.50 each.

Favored Yellow Jacket Squad Entertains at Vol Homecoming

Georgia Tech's Yellow Jackets still feel joyous will be Tech coaches Bobby Dodd and Ray Graves. Dodd and Graves were All-Americans in 1928-'30 and '40-'41, respectively at Tennessee. The Jackets go into Saturday's game, 27th in the rivalry, with a

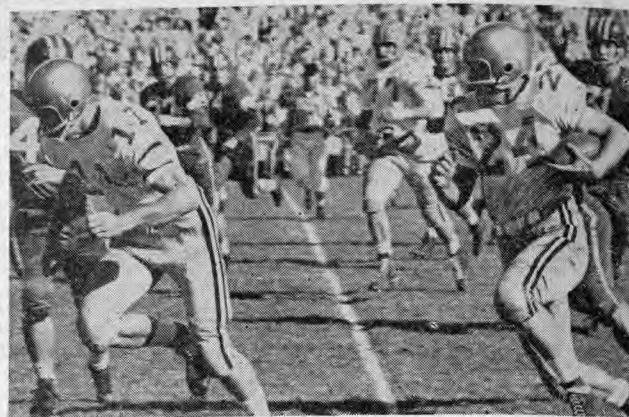

13-8 edge in the series. The Volunteer's went down to defeat last season in Grant Field by a 28-7 score.

Best Shape

The team from the Flats will be in its best shape this season since the Florida game. Star halfback Paul Rotenberry will return to the lineup after being out most of the season with a knee injury. Jimmy Johnson is due for action this week in the fullback slot. Johnson was moved from center to his present position when Ken Owen was injured in the game against FSU. Owen is not yet fully recovered and will be the only regular missing from the lineup when the whistle blows.

Arkansas Game

The Vols, continually improving with each weeks play, last Saturday tore North Carolina to shreds by a 48-7 score. Leading their attack will be quarterback Johnny Majors, who according to Tennessee Coach Bowden Wyatt is one of the few "triple-threat" athletes (Continued on Page 8)

Tech's biggest ground-eater, halfback George Volkert (24), picks up yardage on his first quarter touchdown romp that put the Engineers ahead 14-0. Clearing his path is quarterback Wade Mitchell, (11), who made the key block for Volkert's run.

'Mural Playoff Dates Decided; Swimming Scheduled Next Week

By MIKE HUTTON

Coach Tommy Plaxico, intramural sports director, has announced the playoffs in volleyball and football will be held the week of November 14. Winners of the five leagues in both sports will play each other with the champion receiving a trophy and 15 points towards the IFC contest.

Details for the intramural cross-country race, which is usually held about Thanksgiving time, have not yet been decided upon by the sponsoring Bulldog Club. The swimming meet is scheduled for the evening of November 18, with trials being held on the preceding Friday.

The standings in all volleyball and football leagues, which are correct through Wednesday, November 2, follow:

| Football | | | | |
|---------------------|----|----|----|-------|
| Gold League | W. | L. | T. | Pct. |
| Phi Delta Theta | 1 | 0 | 0 | 1.000 |
| Sigma Chi | 1 | 0 | 0 | 1.000 |
| Sigma Alpha Epsilon | 1 | 0 | 1 | .750 |
| Alpha Tau Omega | 1 | 1 | 0 | .500 |
| Beta Theta Pi | 0 | 1 | 1 | .250 |
| Kappa Alpha | 0 | 2 | 0 | .000 |

Reck Rumbly's

By
CAROL FREEDENTHAL

After surmounting the depths of Hades, and romping over the Devils from Durham, the Engineer's national ranking took a step upward. In the Associated Press's top ten of the nation, chosen by a group of sports writers, the Jackets moved into eighth place, while in the United Press elite, picked by a board of coaches, the White and Gold placed seventh.

In the conference race, after the lowly Green Wave of Tulane grew into tidal proportions and drowned the title hopes of the highly rated Auburn Tigers by a 27-13 deluge, the Engineer's chances of sharing in the victor's spoils took a boost. Presently, the Mississippi State Maroons and Ole Miss share the spotlight, but after this week, the leader's margin should be cut in size. Mississippi State plays the Tigers, and even though the Plainsmen were upset last week, they should be fully recovered for this encounter. Mississippi has a vacation this week and the next few until it meets the Maroons from State.

While a week ago we put Auburn as the choice for the conference cup, after Saturday's miscalculation, we have to reverse our field and pick the Jackets and Mississippi to come in neck and neck for the first place position. With the exception of State, the Ole Miss team has no more conference games, while the present league co-leader, Mississippi State has to navigate past Auburn, LSU and the Mississippi Rebels. The Rambunctious Recks have three more obstacles in their path, but after last week's showing, they should be little trouble.

-Tennessee Game

In the first of these contests, the Engineers meet the Tennessee Volunteers in Knoxville. For this battle of the gladiators, the Jackets will be guests for the Vol's Homecoming weekend. While the Homecoming fever has spelled doom for the visitors this season—Tech beating Duke, Tulane dropping Auburn, and Georgia running over Alabama—this is not likely to be so as the Jackets will be at full strength for this encounter with the exception of their first string fullback, Ken Owen.

Tennessee started the year off losing its first few games, but in its last tests, while against weaker teams, it has run up large scores. The Volunteer's coach, Bowden Wyatt, like Tech's head man, is a General Bob Neyland protege. The last time Bobby Dodd's forces met Wyatt was last year in the Cotton bowl against the Arkansas Razorbacks.

Going into this weeks contest, the Jackets are just a point behind the UCLA Trojans in allowing opponents to cross their goal-line. The West Coast boys have allowed 33 points and the Engineers have only given up 34. Since last year's game with the Vols, only one team has been able to score more than one touchdown in a game. With Paul Rotenberry, Tech's ablest defensive backfield man, back, the stinginess of the Jackets should not lessen.

-Other Games

In our last week's prognostications we had the racking average of .875. While this week some of the closest matched teams in the conference will tangle horns, we'll take our chances with the following choices:

Tulane over Alabama—The Greenies are looking for teams to beat after last week, and Alabama will fit the bill.

Auburn over Miss. State—The Tigers should have recuperated enough to edge by the Maroons, but, the State team still likes that lead spot and should make the Plainsmen work.

Florida over Georgia—The hot and cold boys from Athens do not have the heat to beat the Gators.

Kentucky over Vanderbilt.

Maryland over LSU.

Mississippi over Memphis State.

Georgia Tech's pre-season All-American pick, guard Franklin Brooks.

Runners Win Meet; Ellis Takes First

Georgia Tech's fast improving cross-country team made its best showing of the season Monday afternoon in defeating Mercer College, 16-39, at the local Water Works course.

Tech's Jerry Ellis finished first for the Engineers, followed by Jim Goode and John Fortune, who ran second and third, respectively. Coleman Bryan and Ted Cooke also ran well in the one-sided victory.

Player Of The Week

Dodd Rates Brooks Best Guard In Jacket History

By JOEL ESMOND

Franklin Delano Brooks, star left-guard of the Yellow Jackets has played such consistently fine ball this season that he is well on his way to the All American recognition that pre-season experts accorded him. Coach Dodd says of Brooks, "Franklin is certainly one of the finest all-around linemen in Tech history. I would rate Brooks as one of the hardest men I have ever seen to fool or block out of a play."

Time and again this season Brooks has shown the talent that gave this publicity to him. In two games especially, against Miami and Duke, Brooks repeatedly smashed through the opposing line to break up plays and pave the way for the victories in these games.

A home town boy, Brooks attended O'Keefe high school and was named All-State there. Since entering Tech Brooks has played regularly on the varsity. If Tech gains a bid to a post-season bowl game, Franklin is one of the few athletes in history to start in four bowl games in a row.

In the years when the two-platoon system was in existence, Brooks was used extensively on both offense and defense proving

his mettle in every department. In 1954 Brooks was nominated five times by the Associated Press for the title of "Lineman of the Week." He also led the team in tackles that year with 110. Franklin was named on the All-Southeastern Conference team by the Associated and United Press and the All-Southern team by Colliers magazine. Brooks made at least honorable mention on every all-star team in the country.

Ticket Notice

Tickets for the November 12th game with the University of Alabama in Birmingham are still on sale in the Athletic Association office. Any student who has not bought a ticket and plans to go to the game is urged to buy it immediately as there are only a small number of tickets left.

Other Colleges Say

A yelling mob of almost five hundred Duke students besieged a nurses' dorm recently in Durham. The turmoil began as freshmen joined the ranks of fraternity men in the breaking of window panes and other disturbances. The frenzy reached campus-wide proportions when freshmen threw hot water on dazed upperclassmen and fireworks broke loose.

Calls and invectives for more and more men swelled the mass gathered in the main quadrangle to a body estimated to be about 800 strong. The cry went up for Hanes House and panties, and the trek across campus to the nurses' dorms began. Most of the crowd gathered at one side of the dormitory near a wooded area. They shouted, "We want some panties! We want some panties!"

When police appeared at the rear of the building along with the dean of undergraduate men, pandemonium broke loose. Panic-stricken, the large body of men fled wildly into the surrounding woods and made their way in haste toward their own West Campus.

The spoils of the invaders, many of them dressed only in pajamas, was estimated at ten pairs of panties, including one bright red pair, and at least one slip.

the campus. For a while after their marriage, Jim and Mary operated two separate stands on opposite sides of the campus, but when Jim's health "started failing him," they consolidated the two stands into the one at their present location.

Jim is back on the job now, after his operation this summer, and is fine. Mary and Jim are both interested in Tech and its students, and will very likely be with the school for quite a time longer.

ODK Honors Top Men

(Continued From Page 5)

harmony and a spirit of co-operation among the campus activities. Since 1938 ODK has been solidly behind the proposed student union building, and largely through its efforts enough money has now been raised to employ architects who have already begun drawing the plans.

Members of ODK are selected on the basis of proven leadership in at least three of five major phases of college life: scholarship, athletics, social and religious affairs, publications, and speech, music, and the dramatic arts. The circle here at Tech has established a point system designed to place emphasis on those activities which require the greater leadership. The compilation of a certain number of

points is a minimum requirement for membership. Membership is considered as much an obligation and responsibility as it is a mark of high achievement and honor.

The Fuzzy Wuzzies of the Sudan settle minor disputes by having the contestants stand some yards apart in small circles marked in the sand and throw rocks at each other.

Yellow Jacket Squad

(Continued from Page 6)

around these days. The last time Coach Wyatt met Tech was on January 1, 1955, when he took a highly touted Arkansas team to the Cotton Bowl only to return home vanquished.

The Yellow Jackets have faced Tennessee five times since Dodd

was named coach and at this point hold a slim 3-2 lead in the series.

The Engineers will field an opening whistle lineup of Wade Mitchell, Stan Flowers, George Volkert and Dickie Mattison in the backfield with Tommy Rose, Don Ellis, Frank Brooks, Allan Ecker, Carl Vereen, Ormand Anderson and Captain Jimmy Morris on the line.
